FARMERS ATTENTION!

When in town come in and see our new Owens grain cleaner and grader. This mill is on the same principal as the larger cleaners used in the elevators; will clean from 65 to 100 bushels per hour. Any farmer or bunch of farmers need a mill of this calibre and now is a good chance to get one at a reasonable price.

I am holding an Auction Sale of Household Goods on Saturday, January 14th. Watch for bills.

LOCAL and PERSONAL

Mrs. E. Moore and family of Jarrow is visiting her sister, Mrs. Lovell.

Mr. and Mrs. McLaughlin and family spent New Year's in the city.

Miss Mary Easton left for Camrose on Monday morning.

Mrs. Tebo left for a visit among friends at Victoria this week.

Mrs. F. M. Webb, is ill with nervous trouble. Her many friends will wish her a speedy recovery.

Miss Eva Clutterham returned from the city on Monday morning after spendings a few days holiday visiting friends.

A very severe cold and the shutting off of the gas supply on two occasions this week seriously hampered us in getting out the Mercury this week. Consequently its appearance is a little late.

Chas Kallal, purchased the farm occupied by Mr. Nichols recently. We understand one of Mr. Kallal's friends from the States will occupy the farm in the spring. The deal was put through by F. O. Ball.

Mr. and Mrs. Clare and family who were visiting at the Worton home over Christmas, left for their farm home at Radway Centre on Tuesday. Mr. Clare was at one time a member of the Mercury staff.

Born.—To Mr. and Mrs. C. W. Piper, on Wednesday, JJanuary 4th, a son.

School re-opened on Tuesday morning with a full complement of teachers.

Emil Bachlund, at one time cream tester at the Tofield Creamery was a visitor at Tofield on Monday. He accompanied the boys hockey team from the city here.

After the game on Monday a social time was spent by the two teams and a number of the high school girls at the Curling Rink Club Room, kindly loaned them by the club for that purpose. Supper was served after which music and games occupied the time.

Mrs. F. M. Webb wishes to announce that owing to illness she will be unable to give music lessons until about February 1st.

The Royal Alexandra Hotel now boasts of a full set of storm windows. They look both classy and cosy.

Word has been received that Mr. Allen, accountant at the local branch of the Bank of Montreal, has been transfered to Leduc. Mr. Allen has been accountant at the local branch for quite a time and during that time both he and Mrs. Allen have acquired a large circle of friends who will be sorry to hear of their departure. Mrs. Allen was an active member of the Women's Institute.

Don't forget the 15c. Tea and Sale of Home Cooking at the Institute Rooms on Saturday held under the auspices of the U.F.W.A. The lightest bread, the most wholesome cakes, the most wonderful culinary achievments of history have been accomplished by farm women. Why, man, that's the place to go on Saturday. LET'S GO!

Mr. and Mrs. K. W. McIntosh left for Biggar at the end of the year, prior to going to another point in Saskatchewan where Keith will operate a creamery owned by McIntosh and Sons. Keith has been a resident of Tofield for a period of about seven or eight years, and during that time has become very widely and favorably known. During the days of station buying, he bought cream in the Mercury building, and when the branches went out of use, he went down to the creamery and continued the same work there. Later, he became manager of the creamery under the new proprietors, which position he resigned from to take up a similar position in Saskatchewan. Their many friends will be sorry to hear of Mr. and Mrs. McIntosh's leaving, but nevertheless will wish them the very best of good fortune in their new home.

Mr. Alec Ross, who has been buttermaker at the Tofield Creamery for some time has now taken over the managership of this concern. Mr. Ross came to Tofield from Innisfail last year and has had many years experience in the creamery business. The Mercury takes this opportunity of wishing Mr. Ross every success.

HOLIDAY HOCKEY

Not since the days when Bert McIntosh, Archie Pruden and Laurie Scott besported themselves on the forward line of a Tofield team has there been as much enthusiasm shown at a hockey game as there was displayed on Monday.

Then the rafters rang, and the fans would give their eye teeth for a goal.

On Monday, while it was junior hockey, it was well worth watching, fast and exciting. Twice the Tofield team went to the dressing room a goal behind, but in the last period, accompanied by frantic yelling, cheers and board banging, let loose an attack that was irresistable scored 3 goals, which in the final tally gave them a one goal lead. And they were up against stiff opposition. The boys from Edmonton can skate, stick handle and shoot, and their subs were as good as their regulars; and they never gave up until the whistle was blown.

The game opened with both teams playing fast hockey, chiefly using end to end rushes. After about five minutes of play, Bill Worton, scored after a face off. The goalie never saw it. After a few minutes of further play, Edmonton equalized and to make it doubly secure scored again. The period ended with the score 2—1 in favor of Edmonton.

The second period was a neck and neck affair. Fast skating, snappy passing and hard shooting kept the fans in an uproar. Tofield made a tally in this period, equalizing the score, but Edmonton came right back to give them the one goal lead. The period ended with the score 3—2 in favor of Edmonton.

The third period opened up with a rush. Tofield pressed hard and were successful in putting in two scores, one by Ray Martin and the other by Sid Worton. Following this, Bob Whyte put one past the Edmonton goalie and things looked rosy for Tofield, until—away went a man down the ice and Edmonton scores. They tried frantically for the next seven minutes to even up the score, but at time the Tofield boys were one goal up, the score being 4—5 in their favor.

Line-up—Tofield, goal, Bowick; defence, Whyte, H. Martin; forwards, S. Worton, W. Worton, R. Martin. Subs., A. Beirnes, K. Ball.

Bud Hannan refereed to the satisfaction of all.

On Thursday night last the Tofield Juniors entertained the Holden hockeyists to a little party. The night was cold and the train late and it was only a handful of fans that saw the game. As Holden telephoned to say they could not put on a team of suitable age and weight, it was found necessary to bolster up the Tofield team. Bud Hannan played goal, and Yakabuski and Glover were on the forward line. The game was a close one, but was marred by persistent long shooting.

The score was 4—3 for Tofield, of which Les Glover got one, Sid Worton two and W. Worton one (on a pass from Yakabuski).

The Holden players to break into the scoring column were, D. Allan, M. McPherson and A. Black with one each.

The feature of the game was the goal tending of Bud Hannan. The Holden team, which on the whole was a little older and heavier than the Tofield bunch, had the locals in the third period, backed up against the wall and were peppering Bud to beat the band.

A. B. Clutterham efficiently refereed.

HOLY TRINITY CHURCH

Sunday, January 8th, 1928

11:00 a.m. Confirmation class.

7:30 Evensong and address.

REV. A. A. ADAMS,

Priest-in-Charge.

CALENDARS

The 1929 calendar samples have arrived and we can truthfully say that they are the best set of samples sent us so far. Last year we supplied fully 50 per cent of the calendar requirements of Tofield and this year expect to exceed this. The house we represent furnishes you with better calendar values that you ever received before and we approach you for your calendar orders on a strictly price and quality basis. A Mercury representative will be calling on you in a few days.

THE TOFIELD MERCURY

BAKESHOP BURNS

Between eleven and twelve on Sunday night W. Craig and W. Lewis discovered smoke coming from the building occupied by Stone Bros. and used as a bakeshop.

The alarm was given and in a few moments many willing hands were carrying out flour and other things from the interior of the shop.

Upon the arrival of the chemicals they were found to be of little use due to the outlets being frozen.

In the meanwhile the fire had gained much headway and it was quickly realized that the building was doomed. Consequently attention was directed towards saving the adjoining buildings of John Lee's. These consisted of his store in which was a valuable stock of harness, etc., and at the rear, a granary containing a large quantity of grain. The volunteer helpers were able to prevent the fire from spreading but it completely dmolishd the bakeshop and the premises for many years occupied by the Edmonton City Dairy, as a cream buying station.

The building was owned by Mrs. Seale and was covered by some insurance.

Mr. Stone lost considerable stock and a quantity of valuable personal effects, also a quantity of currency. He carried no insurance. At the time of the fire, Mr. Stone was visiting with Mr. and Mrs. Wallace Herndon and did not know of it until it was well under way.

The cause of the fire is unknown.

GAS SHUT OFF

After four years of uninterrupted service Tofield experienced two gas shortages within a week.

The more serious of the two occurred on Monday when the gas was off from about 11:30 to 5:30. The cause was a break in the mains near Bruce. Coming as it did on January 2nd, many a New Year dinner was interrupted. Fortunately, as far as Tofield was concerned, it was not necessary to undergo any great hardship. The day was, compared to those which had immediately preceded it, fairly warm, and the houses did not cool off as rapidly as they would have done a few days previous.

The local representatives of the gas company warned all users regarding closing their valves, and as far as we know, no untoward happening occured.

In Edmonton the gas was off for a longer period of time and there was a rush on buildings that were coal heated. The company there enlisted the services of the newspaper services, radio, stations, picture theatre screens, and other means of publicity to warn gas patrons agains leaving their valves open. Only one or two incidents occurred where people suffered from gas fumes.

At Tofield on Thursday afternoon, the gas was again turned off for a period of about two hours. This was probably to enable repairs to be made on the mains which had become damaged due to the bakeshop fire of Sunday night.

CURLING NOTES

"Behind the Tee"

Tom Shultz and Chris Hammond giving ice one the once over looking for the "odd" brave.

F. O. Ball explaining how one can come back after being down seven come back after being down seven points in the third end.

No. four, the ladies' sheet is very popular, and they draw some real crowds.

Come to the rink any night, whether you curl or not. Some of the best games this year have been won and lost in the waiting room.

Bill Chapman on the still hunt for the odd dors.

The president looking for more space to put up rules and regulations.

This will be a busy month for the curlers with the ladies' spiel, also the men's and curlers attending out of town spiels.

Get the broom and weight and you'll make a curler.

Howard Lee returned to Vegreville Tuesday evening after spending Christmas at home. Howard is playing with the Vegreville hockey team this winter.

MASQUERADE DANCE

Tofield and district lovers of the light fantastic were given a real treat on Monday, when manager Ball of the Variety, staged a masquerade dance that pleased mightily.

The music which was furnished by the Byley orchestra was voted first class. The costumes were varied and beautiful many original and novel designs being seen.

The prize winners were as follows: 1st (couple) Mr. and Mrs. Carver, Mr. Carver being dressed as a Hindoo Prince and Mrs. Carver as a Spanish dancer. 1st comic (couple) Miss Anne Hobson and Miss Kathleen Hobson, dressed as coons.

GOING CROOKED

On Saturday night at the Variety, patrons will be given a glimpse into the underworld of one of America's greatest cities. The picture "Going Crooked" is one of the most realistic films depicting the gangster and his nefarious work ever yet produced.

It is packed with tense moments and breath-taking scenes and above all carries the moral home to the audience that a fight against the law is always a losing one. The story centres around a collection of wonderful jewels which for ages past, men and women have striven to obtain, honestly and otherwise.

There is humor too, in this picture, and patrons may be assured of receiving real entertainment at the Variety on Saturday, January 7th.

U.F.W.A. NOTES

Don't forget that the first meeting in the new year will be held on Saturday, Jan. 14, at 2.30 p.m. at the home of Mrs. Johnston Ferguson. The roll call will be answered with "How I Spent the Holidays." Mrs. Ferguson will give a demonstration of making tailored pockets and buttonholes. Let us be on deck and start the new year right. All women desirous of joining also visitors cordially invited.

LINDBROOK

Happy New Year to all from Lindbrook, may it be the best yet.

The pupils and teacher of Lindbrook School put on a dandy Xmas Concert on Dec. 22. The program [illegible], in fact too long [illegible], but the "actors" were better and action perfect and in no way abashed by stage fright. The costumes were works of art and must have required a lot of work and thought to produce. Everyone thought the concert was fine. The school was nicely decorated and boasted a lovely Christmas tree. At the close of the program, Santa Claus arrived in traditional garb and distributed bags of candies, etc. to all the children and also gave them their presents from the Christmas tree, no child was forgotten. After that, supper was served and then the crowd of happy juveniles and adults departed home to dream of Christmas and its glories, etc.

Mr. J. Wenscroft wishes to thank the people of Lindbrook and district for the radio installed for Mrs. Wenscroft's benefit, for their kind thought, and generosity, and help by the means of the Basket Social. Both he and Mrs. Wenscroft very much appreciate the kindness and we only hope that Mrs. Wenscroft will enjoy the radio as much as we enjoyed the social.

Mr. Leahy left this week for a trip to the coast.

Mr. August Lundgren of Edam, Sask. spent the Christmas holidays with his brother, Mr. Otto Lundgren and family of Lindbrook.

Mr. and Mrs. Hobbs left on Saturday for Heinsburg, 6 miles east of St. Paul de Metis, where Mr. Hobbs has been appointed section foreman.

Mr. and Mrs. Gillies of Ardrossan visited Mr. and Mrs. Andrew Scott and family for the New Year. "Oot wi the haggis the noo, laddie, dinna let it coo unco lang."

Westlake school pupils and teacher gave a Christmas concert on Dec. 23, which went very well and was much enjoyed by all. After the supper dancing was enjoyed until the wee small hours when everyone went home to rest up for the attack on the goodies of Christmas.

After spending a few days at the Ovanie home, Ed. Ingram of Woodlawn left for Wainwright.

The Best Laxative He Ever Tried

Mr. Wm. Towner, New York, writes: "Never have I felt better in my life. Your purely vegetable Laxative Pills keep my bowels active; headaches and indigestion never bother me now. I enjoy my sleep and get up refreshed, with a clear head ready for a day's work."
CARTER'S LITTLE LIVER PILLS
Sold all druggists 25c and 75c red pkgs.

WORLD HAPPENINGS BRIEFLY TOLD

Production of automobiles in Canada during November numbered 6,617 cars. This output was the lowest for any month this year.

The Canadian Government will seek authority at the coming session of parliament for the purchase of two new modern destroyers to be delivered within three years.

The red flag of Soviet Russia was lowered on the former Soviet consulate at Shanghai, Dec. 24, and Soviet activities in Nationalist China ended officially.

Direct all-Canada telephone communication will be established between Vancouver and Calgary next spring by the British Columbia Telephone Company and the Alberta Government system.

At least 4,000,000 in the province of Shantung and part of Chihli are facing extreme famine, which must be expected to become more severe as winter progresses, a committee of observers report.

A statement has been received from Washington, D.C., that the United States patent office has issued a patent to James Fleming, of Mountainside, Man., for a new type of road machine.

The export of Canadian grown tobacco in the fiscal year 1927, was thirty times greater than in 1921, according to a return issued by the Department of Trade and Commerce, Ottawa.

North Dakota is drawing on Canada for pure Marquis seed wheat, the purpose of the importations from this country being to rehabilitate the strain becoming impure in some sections of that state.

Italy's old soldiers received unexpected Christmas presents when Premier Mussolini introduced a measure raising the extra pension of survivors of Garibaldi's famous "Thousand." The increase is from 3,000 lire to 4,000 lire (about $200).

Sizing up the growth of 255 United States cities with populations of 30,000 or more, census bureau experts have figured among other things that by the middle of next year New York will have more than six million inhabitants.

For Rheumatic Pains. The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Eclectric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Took No Chances

When King Fuad, of Egypt, visited Europe recently, he brought a large retinue of household officials. Among them were a chamberlain, a food taster, a chemist for analyzing the food, a barber, a valet, and three butlers.

The King of Pain—Minard's Liniment

The Jordan has been accounted the most crooked stream in the world. But it cannot compare with White River, Arkansas, which travels 1,200 miles in traversing a distance of 50 miles.

Woman's Wisdom

Kingston, Ont.—"Dr. Pierce's Favorite Prescription is such a great help to nature in motherhood, I marvel that every prospective mother does not take it. I had two children before I knew that there was such a tonic. My former experiences caused me dread. By chance I read that Dr. Pierce's Favorite Prescription quieted the nerves and strengthened the body of the expectant mother and I proved that statement to be true, also I had comparatively no suffering and did not lose any of my strength or vitality. My baby is now 2 years old and weighs 30 lbs., is the picture of health."—Mrs. Olive Brown, 12 Markland St.

Stuart Brown

Liquid or tablets at the drug store. Write Dr. Pierce, Buffalo, N. Y., for free medical advice.

Some Tips For Inventors

Few Of Things Needed Are Included In List

New challenges to inventive genius are the latest entries in the "What's Wanted" book maintained by the Institute of Patentees in London, in which suggestions for needed inventions submitted by the public are filed.

An unbreakable shoe lace, a mechanical bricklayer, a folding umbrella that can be carried in the pocket—these are some of the devices laymen want. Particularly in demand are inventions that will make a dwelling more comfortable to live in, and ease the housewife's tasks. These are some of them:

Vacuum cleaners for the chimneys.

A way to prevent water in house pipes from freezing.

Apparatus to remove deadly carbon monoxide and unwanted carbon dioxide gas from living room air.

Another machine to fill the air with health-giving oxygen at low cost.

Windows of unbreakable, clear flexible glass.

A means of cleaning windows by machinery.

A better way of fastening carpets than by the use of tacks.

Non-slippery floor polish.

Permanent paint for gas stoves.

A way to uncork bottles without destroying the corks by a cork-screw.

Made Good Selling Agent

Texas Woman Marketed Millions Of Bushels Of Grain

Many a man has appointed his wife as his purchasing agent, but it remained for the wheat growers of Texas to choose a woman to sell their grain.

Miss Grace Webster, secretary and treasurer of the Texas Wheat Growers' Association handled millions of bushels of wheat—which meant millions of dollars—following the harvest of this crop.

Her direction of the co-operative marketing enterprise was so successful that the farmers belonging to the association placed in her hands this winter an additional responsibility. They decided to let her market their coarse grains as well as wheat.

Miss Webster's age is in the early 30s.

Winnipeg Newspaper Union Fashion

1669

A Daytime Frock Of Smart Distinction

The discriminating miss or small woman will find this an unusually smart and becoming frock. Of special interest is the rever, which may be of matching or contrasting material, and the set-in pocket placed at the upper left and lower right side. The skirt has two box-pleats in front, and is joined to the bodice, while the back is in one piece, and the long sleeves have shaped cuffs trimmed with buttons. No. 1669 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3¼ yards 39-inch or 2½ yards 54-inch material. If the rever is made of contrasting material, ¼ yard additional 39-inch (cut crosswise) is required. Price 20 cents the pattern.

Many styles of smart appeal may be found in our new Fashion Book. Our designers originate their patterns in the heart of the style centres and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

LESSON No. 16

Question: Why do growing children, particularly girls, need emulsified cod-liver oil?

Answer: Growing children, and particularly girls, need vitamin-rich nourishment to help them through critical stages of extreme tax on their strength.

Pleasantly flavored, easy to take, children like

SCOTT'S EMULSION

Another Blank Spot Filled

Over Two Thousand Square Miles In Alaska Has Been Mapped

The United States Geological Survey has filled in another blank spot on the map of the world. In doing so it discovered a new river, a large lake and an active volcano.

The Survey's Alaska Expedition of last summer has returned, after mapping a territory more than 2,000 square miles in the Alaska range and adjacent country. This area heretofore has been shown as a blank and unknown space on the map of the world.

The party, headed by S. R. Capps, a geologist, discovered the river Chakachatna, the drainage basin of which covers an area of more than 1,100 square miles. Its current has an average speed of 15 miles an hour. The river rises in what Mr. Capps described as a "superb lake," named Chakachamna, 23 miles long, hemmed in behind lofty mountains, and impounded between a great glacier.

The mountain peaks in the section are ragged pinnacles, which could be climbed, if at all, with great difficulty. The highest peak is mount Spurr. Its flanks are covered with perpetual snow but from its top a plume of steam, rising a thousand feet into the cold air, could be seen, the party reported.

Commander Byrd Tells Exploration Plans

Flier Comrades and Experts Will Accompany Him To South Pole

Commander Richard E. Byrd has confided how he plans to tackle the job of exploring a South Polar territory one and a half times as large as the United States.

He told members of the National Society, at Washington, that he will take other flier comrades and at least 12 Arctic experts on a reinforced ship to the ice of the great Ross barrier.

There the party will make its main base, setting out with six Eskimos, special motor toboggans and dog teams to lay further bases 100 miles apart toward the Pole and the very edge of the unexplored Antarctic continent.

Then will begin flights in three planes, with mapping cameras recording the hitherto unexplored continent at the rate of 100 miles an hour.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Wooden Railway Cars

It has been shown that all the deaths in the railway collision at Dockrill occurred in a wooden coach which was crushed between two others made of steel and there is a general opinion that the practice is bad. Either wooden coaches should not be used or they should not be combined with those made of heavier material. Recent accidents have shown that wooden coaches stand little chance in accidents.

Tailor For Indians

When Lo, the poor Indian, wants a stylish war bonnet or a fancy beaded vest, the chances are that he'll buy them from a white man. Robert F. Backus, of Florence, Cal., who makes a hobby of fashioning Indian garments, has filled hundreds of orders from various western tribes. Last summer he supplied the materials for the headdress which was presented to President Coolidge in the Black Hills. It was valued at $2,500.

Wife (at the radio): What is it that whistles when I turn the dials?"

Husband: That means that you're coming to the next station.

A cargo of 3,000,000 feet of spruce lumber was recently sent from Russia to Buenos Aires, Argentina.

France Is Building Largest Submarine

Undersea Craft Will Be Able To Challenge Cruisers

France has laid the keel of the greatest of submarines, a monster under-water cruiser.

The new French submarine will be 3,000 tons, a submersible fortress, a warship which can stay on the surface and match strength with any cruiser or slip under the water and lay mines or sow destruction among capital ships.

Thus, France becomes queen of the sub-sea although her submarine tonnage will be inferior to that of the United States and Great Britain, even after the 12 other submarines now in process of construction are completed. The submarine-cruiser with a crew of 100, has many novel features in her construction including fuel tanks to enable her to cruise half way across the ocean without rising to the surface.

To attain ratio, France needs 2,000 tons more of submarines but when she attains that limit, none of her undersea fleet will be more than five years old. She then will have the most formidable array of submarine craft of any navy except Great Britain.

At present, the French fleet is slightly inferior to the Italian, naval experts agree, but when the present building program is completed they will be on equal terms, although Italy holds the advantage in that she concentrates her whole fleet in the Mediterranean while France must divide her craft between the North Sea, the Channel, the Atlantic, Mediterranean and along her commercial lanes to Africa and the South Seas.

Britain and Italy Withdraw From Contest

Agree Not To Join Schneider Seaplane Races This Year

Italy and Great Britain have agreed not to participate in the 1928 Schneider cup seaplane races if other competitors consented, the Air Ministry announced.

Italy and Great Britain agreed also, it was said, to support a project to hold the races every two years instead of every year hereafter.

The Air Ministry announced that the United States, French and German authorities had been consulted informally and were understood by the Ministry to concur in both proposals.

The Italian-British agreement not to participate in 1928, the Air Ministry said, was necessary because there was not time to make the necessary formal revision of rules.

Leather Prices Higher

Canadians Will Have To Pay More For Shoes

Prices of all cattle hides are today 60 to 100 per cent. more than a year ago, so that for their approximately 16,000,000 pairs of boots and shoes, or about two pairs per head of the population, Canadian will, according to S. P. Beal, chairman of the Tanners' Section of the Toronto Board of Trade, have to pay much higher prices. The consumption of leather and sheepskin, he said, has declined, while the number of cattle in Canada has decreased about 12,000,000 head, while sheep and lambs are much fewer in number. These two tendencies must, he thinks, send the price of leather up, to say nothing of the demands for export.

When the Worm Turned

Judge—"Why do you want a divorce?"

Fair Plaintiff—"My husband is a fiend in human form. He thinks nothing of knocking me down or pushing me down stairs. He often throws boiling water on me, threw me out of the window twice, and once—Judge, I can stand other things, but not this—once he wiped his hands on one of my guest towels."

Tunnels Under Paris

Under the heart of Paris are mysterious caverns and tunnels, long forgotten even by historians, until the other day when workmen were excavating for a new hotel. The caverns once were stone quarries and the openings long since have been filled up. The new hotel will use one of them for its wine cellar.

Hoarse?

Rub throat and chest thoroughly with Minard's Liniment. Quick relief assured.

MINARD'S KING OF PAIN LINIMENT

SUNDAY SCHOOL LESSON

JANUARY 8

JESUS AND THE SICK

Golden Text: "He hath done all things well; He maketh even the deaf to hear, and the dumb to speak."—Mark 7.37.

Lesson: Mark 1.21-45.

Devotional Reading: Psalm 103.1-6.

Explanations and Comments

I. The Authority Of Jesus As a Teacher, verses 21, 22.—In New Testament times sacrifices were offered only in the temple at Jerusalem, but every town and village had its synagogue for worship, an institution which evidently had its origin during the Babylonian captivity. On a certain Sabbath day Jesus taught in the synagogue at Capernaum (built by the centurion whose faith Jesus commended, Luke 7). In the synagogue worship, after the recitation of the "Schema" (Deut. 6.4-9; 11.13-21), and the offering of prayer, a lesson was read from the Law (Pentateuch), and another one from the Prophets. It was customary for the chief ruler of the synagogue, who had charge of the services, to ask a distinguished visitor to read and explain the lessons. Upon this occasion he called upon Jesus for this service.

As the congregation listened to Jesus they were amazed at his teaching, for he taught them as one having authority, and not as the scribes. The scribes constantly cited some well-known rabbi as authority for their teaching; Jesus said, "Verily verily, I say unto thee, We speak that which we know, and bear witness of that which we have seen," John 3.11. As has been well said, there was no "perhaps" in the teaching of Jesus. Recall the phrase often repeated in the Sermon on the Mount, "I say unto you." The highest praise for a scribe was that he resembled a cemented cistern which lost no drop of water put into it. He was bound never to teach otherwise than as he had been taught. Christ as a teacher was not a cistern, but a spring, clear, abundant and perennial."

"Men crave to know; they want certitude; they long to be sure. And to them Christ presents Himself as the Truth, God's Everlasting Yea, the answer to all their questioning." — J. D. Jones.

Merits Of New Wheat

Reward Wheat Is Arousing a Great Deal Of Interest

One of the newest varieties of wheat evolved at the Canadian Government Experimental Farm at Ottawa, bearing the name Reward, is arousing a great deal of interest among Canadian farmers. This new wheat, which won the championship in the grain exhibits at the Royal Winter Fair recently held at Toronto, is an early maturing wheat, even more so than the famous Marquis, but not quite as early as Garnet. Both Marquis and Garnet are discoveries of the Ottawa Experimental Farm. The flour derived from Reward wheat is said to be without spot or blemish. It has the strongest straw of possibly any wheat to withstand wind and storm. One of the most important merits of all, this year's experiments have shown Reward wheat has thus far shown more immunity from rust than any other of its competitors.

Longevity Of Germs

Found Alive and Deadly After Being In Sealed Tube 26 years

Experiments carried out by Sir William Simpson, the expert on tropical diseases, to test the longevity of germs, have had remarkable results. Twenty-six years ago Sir William placed in a test tube some germs taken from a South African patient who was suffering from one of the most deadly of tropical diseases. The tube was sealed.

Recently, Sir William opened the test tube. He was astonished to find that the germs were still alive and as deadly as ever.

A guinea pig which was inoculated with them died soon afterwards.

The only food the germs had during their long imprisonment was a kind of jelly called "Agar," which was put in the test tube with the germs 26 years ago.

Credit Goes To Egyptians

Solved Problem Of Measuring Earth's Surface In 1800 B.C.

Russian scientists have just completed the study of what is said to be one of the most remarkable Egyptian parchments in history.

The parchment has been decided after years of painstaking labor by Professors B. B. Turaieff and Struve, noted orientalists. The document is said to shed new light on the mathematical studies of the ancient Egyptians, establishing the earth's surface as well as the globe was solved by the Egyptians in 1800 B.C., whereas the solution of this problem heretofore has been attributed to Archimedes, who lived in the third century, B.C.

It doesn't take much of a genius to discover a scheme that won't work.

The greater the difficulty the more glory there is in surmounting it.

VERY HARD LARGE PIMPLES

Spread Over Face and Hands. Cuticura Heals.

"My trouble began with a few pimples on my face and hands and soon spread all over them. The pimples were very hard, large and red, and festered and scaled over. They itched and burned so that I scratched them, which caused eruptions. My face was disfigured, and I could not put my hands in water and could hardly do my work.

"A friend advised me to try Cuticura Soap and Ointment so I purchased some, and in about two months I was completely healed." (Signed) Miss Jennie Ducharme, 441 Giroux St., Norwood, Man.

Cuticura Soap, Ointment and Talcum are all you need for every-day toilet and nursery purposes.

Justice Plays No Favorites

But Criminals Seldom Realize They Will Be Caught

That is what the criminal always says. He knows that he has no business stealing or boot-legging or forging, or otherwise defying the laws of organized society. There never was a criminal who did not enter upon his career with his eyes open. He had noted scores who acted precisely as he was acting. He had seen such men dragged to court and sent to prison. He well knew that each offender was fairly dealt with. In the face of this knowledge, he was stupid enough to believe that his predecessors had been dull and witless and incautious. Otherwise, he reasoned, they never would have been caught. "It is all very well for So-and-so to get what was coming to him, but it doesn't mean me." Stupidity and crime always go together. Justice may be slow of foot, but she is sure to overtake the guilty.

What the criminal does not realize is that criminal in the seats of the mighty or one of the crowd—is that he is suspected and watched from the hour of his first transgression. Crime is self-revealing. As sure as grass grows and rain falls, wrong-doing will out, whether it be petty larceny or murder or treason. The very stones cry out against crime. This is as inevitable as gravity, as sure as death. There is restoration for the man who is genuinely sorry for his crime and who turns to law and order with all his heart. But for the obdurate offender there is nothing but penalty and punishment. In the end, justice plays no favorites, as petty thieves and bootleg kings and poltroon officials, as well as Napoleons and Kaisers, have been compelled to understand.

When building a grandstand engineers must make allowance for "the weight of excitement" or the additional strain given when excited spectators jump up and down.

For frostbite use Minard's Liniment.

The Caterpillar Club, composed of aviators who have made parachute jumps to save their lives, had forty-nine living members.

Some people make a specialty of exchanging their brass for other people's gold.

CHAPTER XV.—Continued

The men gasped. Wasn't Jack Doran "the queer divil to ask a girl right out before every one."

"Will you marry me, Helmi, today?" he repeated.

Helmi simply nodded.

A shout of applause broke from the men, in which Bill Larsen did not join. He suddenly hated Mrs. McMann for her interfering ways; she'd made nice hash of things.

Mrs. McMann's face grew dark; she had been beaten, right here in her own house. Worse still, she stood to lose the best girl she had ever had. Jack Doran, with his big feelin' ways, would never let his wife sling hash to miners. Mrs. McMann caught her breath on the intake.

"Well, at least you might have given us a little warning. What's all the rush about, I'd like to know. It don't look well—that's all I have to say."

Mrs. McMann resented youth more and more as she grew older. The slimness and agility of Helmi reproached her ponderous bulk, and now, looking at the boy and girl, so clean, lithe and wholesome, who stood before her, she felt she hated both of them. They seemed to defy her; "crazy young fools—what did they know about life? She hoped. . . ."

She blew her breath on her lips as if they needed to be cooled.

CHAPTER XVI.

That afternoon Helmi and Jack drove to Bannerman, eight miles away, to find someone to marry them. Helmi wore the black silk dress which she had worn on the train with the lace collar, fastening the latter with the sun-burst which Jack had given her at Christmas.

Mrs. McMann was horrified at the thought of Helmi being married in black. "I ain't superstitious, Helmy," she said, "but you know the sayin' 'Married in black, wish yourself back.'"

Helmi laughed—her little world was pulsing with joy; she hardly heard Mrs. McMann's doleful predictions. The mountains were bright with sunshine, the ice had gone out of the river, the world was very fair.

"Jack Doran is only a boy," said Mrs. McMann, "and I believe he asked you right out like that hopin' you'd refuse him, Helmy."

Helmi's eyes were pools of rapture. "I fooled him—didn't I? that Jack Doran? He'll know better next time than ask a Finn girl!"

Mrs. McMann looked at her and sighed. Helmi was too happy to yield to any discouraging suggestions.

Nothing dimmed the glory of the day for Helmi until they reached the top of the hill looking down at the little town of Bannerman, where a huddle of houses were grouped around the station. Then Helmi suddenly caught Jack's arm.

"Oh, Jack, I no like!" she said, "look at the little houses—they are like cats going to spring! It is not friendly."

Jack put his arm around her. "Don't be frightened, Helmi, nothing can hurt my Finn girl."

His eyes were tender when he looked at her, but Helmi's were full of tears. "It is a bad place, this," she said shivering, as she pointed down into the valley; "it is full of bad words and bad thoughts for us."

The river wound its wide blue ribbon below them, satiny and smooth, with no trace of haste or unrest. From where they stood they could see a smaller stream, which, coming down a wooded ravine, poured its waters into the larger stream with a musical murmur which came softly to their ears. They had stopped their horses at the top of the hill.

The arrival at the fateful spot and the solemnity of their mission gave eloquence to Jack's tongue: "We do not know each other very well, Finn-girl," he said, "but we love each other, and that's all that matters. Now, let us get one thing straight. We have to trust each other—that's all there is in getting married and making it go. I liked you, Helmi from the time I saw you first, because you have such a straight eye. I believe you are square, and I am too. I've never had a girl but you. You are not afraid now, are you Helmi?"

Helmi wished she could tell him everything in her past life—Jack would understand—but it was so hard to get always the right words in English.

Jack continued: "We are like two streams, Helmi dear, that join there and run together to the sea. We are going to join, just like that, and run together all the way. Once we join we cannot separate. It is a long way to the sea, too, for us, and there may be rocks and rapids and rough water; but we'll always be square, Helmi. You are not afraid now, are you dear?"

Helmi's eyes were misty with tears, as she turned and looked into his. "I am not afraid," she said.

They went first to the postoffice to get the license. An elderly man, with a long beard, filled in the form which gave John Ward Doran, and Helmi Milander the right to be joined in the bonds of wedlock. For this the sum of five dollars had to be paid.

They asked for the Methodist minister, but found there was none. The Anglican minister was away, but the postmaster said the magistrate would be sure to be at home and he gave them directions to find his house.

It stood by itself, inside a broken picket-fence, a dishevelled, untidy little house, plainly occupied by a man alone. There were no curtains, and the blinds hung crooked, with torn edges; the steps leading to the screened-in-verandah were broken, and the wire screening was bulged as if football games were often played inside.

"This looks like a rough house," said Jack, as they approached; "but never mind, Helmi, we'll get married all over again when we go to Edmonton, and in the biggest church there, with stained glass windows; and we'll have a car full of flowers, and bridesmaids and wedding-cake, and 'here comes the bride,' and everything. But in the meantime, if this old boy is sober, we will get enough of the law on our side to go on with."

The magistrate, J. Edgerton Blackwood, late of Stoke-Pages, opened the door. His manner registered deep annoyance, his appearance suggested fatigue. A soiled collar, held only by the back stud, flared jauntily from his neck, and the condition of his shirt gave evidence that there had been some disappointment over his last week's laundry. Tufts of hair, like small brushes, grew out of his ears; his eyes were bloodshot, his voice hoarse. Indeed, Mr. Blackwood looked and felt much like a dog that has barked all night.

"What the h— do you want?" he asked, when he opened the door. The words, though ungracious, were spoken in the well modulated tone of the cultured Englishman—the voice that one hears in the most remote and most unexpected corners of the earth.

Jack paused a moment before replying. "Are you a Justice of the Peace," he asked in surprise.

"I'm everything, damn it! I keep the pound, am clerk of the township, do book-keeping for the storekeepers here, and play poker. What can I do for you?"

"We want to get married," said Jack, smiling. No one could quarrel with Jack Doran on this day of days. He felt Helmi's hand tighten on his arm, and noticed she was pale and frightened, but Jack had no feeling save pity for this dirty and dagrun-tled old man.

"Come in," said His Worship, at length, "come in and sit down." He left them to solve the problem of sitting down as best they might. Every chair carried its own burden of clothing, papers, cooking utensils, and other bric-a-brac. A horse-collar occupied one; a pair of rubber boots another. A square red stove stood in the middle of the floor, its damper hanging drunkenly from one corner; ashes from its end door had dropped down and were tracked over the floor. A tumbled bed, visible through the open door of the room adjoining, gave the impression that Mr. Blackwood had but recently left it. The table in the room was full of dirty dishes and empty bottles.

Something prompted the Magistrate to apologize.

"There's a flock of women here, but they're too damned independent to do a day's work since the miners opened. I would like to see them slowly starving and freezing to death. Damned foreigners that they are, who never should have been let come into a white man's country, anyway. Doukhobors and Finns."

(To Be Continued.)

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was awful sick each month, too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others."—Donalda Fanteux, Ayer's Cliff, Quebec.

"Unable to Work"

Canning, Nova Scotia.—"I had irregular periods and great suffering at these times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved."—Laura J. Eaton, Canning, King's County, Nova Scotia.

Complex Is the Same

Chicago Mayor Not Any Saner Than Tonopah Man

Down at Tonopah a few days ago a desert character, one "Two Gun" Smith, paraded the camp with the announcement he had $100,000 in money and that he meant to give half of it to King George so he could come to this country and live. He was committed to the insane asylum by his fellow citizens. Over in Chicago William Hale Thompson paraded the city with banners declaring that he was going to drive King George out of the school books and public libraries, and they elected him mayor. The complex is the same. The difference between the two cities is that Tonopah knows a lunatic when she sees one.—Reno Gazette.

Purpose Of National Parks

Canada's national parks exist to render the best possible service to Canada and Canadians. Their establishment and development are based upon the idea that the Dominion's greatness as a nation depends not so much upon her natural resources as upon the quality of her men and women.

A French scientist claims that bees are guided solely by odor, and will often pass a scentless flower stored with honey for one having sweet perfume and little sugar.

A man is in luck if he lends a friend an umbrella and lives long enough to get it back.

WAS SO NERVOUS and SHORT OF BREATH COULD HARDLY SLEEP

Mrs. Louise Baglia, Golden Lake, Ont., writes:—"For several years I was greatly troubled with my heart. I was so nervous and short of breath I could hardly sleep at night, and if I did sleep for a while I had bad dreams.

"I managed to keep at my work, somehow, until I began to have dizzy spells which got so bad I had to give up. I used many kinds of medicine, but found no help until I got a box of [Milburn's Heart and Nerve Pills]. After the first box I found a great change, and after two boxes I was as well as I could be.

"I told my mother, who had choking sensations, about them and they helped her greatly."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Mathematics Of Relativity

Queer Tricks Played By Rotating Earth Are Explained

The News says: A freight train going from Detroit toward New York weighs less and travels faster than when it is going back to Detroit. The answer is neither "Now I'll tell one" nor "So's your old man." It is the mathematics of relativity, farthest reach of the human mind into the unknown—or, possibly, a mistake.

That mass loses weight when moving east and travels faster than it appears to do, is the belief considered undeniably true by many relativist philosophers who are eminent in the mathematical field.

A piece of lead travelling on a train from Detroit to New York which moves at a speed of 25 miles an hour would actually be going 25 plus 1,000 or 1,025 miles an hour, writes Thomas M. Johnson in Popular Science Monthly. This is because the earth rotates eastward 1,000 miles an hour. When the train goes westward, however, the lead only travels 975 miles an hour.

The lead would lose weight in easterly motion, for in that direction the metal has a greater tendency to fly off the earth's surface because of the increased speed developed.

Relativity also claims that a perfectly accurate clock hurtling through space at a speed of light would not show that any time had elapsed, that time is slower in Ecuador than in Iceland, and that the shortest distance between two points is not always nor necessarily a straight line. You have to do whirligigs of reason to understand relativity.

Prairies Are Optimistic

Destined To Play Important Role In Economic Life Of Canada

"There is a very marked optimism pervading the western provinces about the economic situation," stated W. McL. Clarke, secretary of the Canadian Chamber of Commerce, who has returned from a five weeks' visit to the western provinces. The president of the Canadian Chamber of Commerce, A. M. Dollar, of Vancouver, and the chairman of the executive, W. M. Birks, accompanied by Mr. Clarke, left Montreal toward the middle of November with the object in view of visiting the Boards of Trade in the prairie provinces. "Altogether points of practical contact were established with 50 local organizations, and the reception given to the Canadian Chamber of Commerce idea was on every hand most encouraging," stated the secretary.

"Altogether there is a pronounced feeling throughout the prairie that the West is destined to play an increasingly important role in the economic life of Canada. There is also an evident desire," stated Mr. Clarke, "on the part of the urban Board of Trade to work with the agriculturists for their common welfare, and it was luminously clear that class consciousness is receding before the greater force of economic co-operation in Western Canada."

To Assist Aviation

Civil government air-harbors will be open to the use of aircraft operators to the extent that their size and facilities allow on payment of moderate fees. This was announced by the Minister of National Defence. This step is taken to assist in the development of flying and the provision of flying facilities throughout Canada.

A Scotch countryman entered a store with the view of purchasing something for his sweetheart. The salesman suggested an umbrella, a pair of stockings or possibly "something for her neck."

"The very thing," responded the countryman. "A cake of soap."

Minard's Liniment for Rheumatism.

Wireless Beacons For Planes

Machine Will Indicate Course By Strength Of Signals

Wireless lighthouses, or beacons, have been erected by Trinity House round the British coast to assist vessels in taking bearings in foggy weather, but the United States is showing the way with an ambitious system of wireless beacons to assist aircraft.

There are in the United States twelve private aviation companies who have flown 768,251 miles in the last three months, regularly transporting mails and passengers over 8,000 miles of air routes. It is planned to establish a network of wireless beacons at intervals of 200 miles along these airways.

The directive properties of the frame aerial will be employed and the transmitter will have two aerials erected at right-angles to each other, each radiating signals in the direction in which it points.

An aeroplane flying along a line of equal distance between two transmitters will receive audible signals of equal strength from each transmitter, but when turning in its course to left or right it receives one signal of greater intensity than the other.

These signals can be received on an ordinary receiving set, no special direction-finding apparatus being necessary. The aeroplane will therefore "ride on a slender ray of directed wireless."

A World Famous Figure

Captain Gordon Campbell, V.C. Commanded "Mystery Ship" During War

It is understood that the regulations now governing retirement will shortly lop off from active list of the Royal Navy several well-known captains who did distinguished service in the Great War. Among these, it is reported, will be Captain Gordon Campbell, the famous Mystery Ship, V.C. Captain Campbell was a Lieutenant-commander in 1914. Before the war ended he had become a captain, V.C., and a world-famous figure. The Mystery Ship or "Q" ship as it was officially called, practically originated with him, and his fights and narrow escapes with submarines were frequent and most thrilling.

The "Q" ship was a fighting vessel disguised to look like a tramp, and carried a naval crew dressed in keeping with the supposed character of their ship. Captain Campbell is credited with having lost one ship in a scrap with a submarine and having been back at sea in another ship hunting U-boats before nightfall.

Fruits On the Prairies

Great Variety Of Home Grown Fruits Found On Prairie Farms

An inspection of 2,812 farms in the provinces of Manitoba, Saskatchewan and Alberta made in 1927, showed that 2,411 had good vegetable gardens; 1,236 were growing small fruits; 379 had ornamental shrubs; 265 were testing standard apple trees and 213 were growing plums. Twenty years ago the number of prairie farms with pretentious flower and vegetable gardens was small and little attempt was made to grow fruits. Now a great variety of home-grown fruits is common to the prairie farm home menu, while vegetables of a wide variety grow to perfection. For two years in succession a Manitoba farmer has won the cauliflower championship at the American Vegetable Growers Association annual show.

Queen Elizabeth of England was the first woman to wear a pair of machine-made silk stockings, the gift of the Rev. William Lee, of Nottingham, inventor of the first knitting machine.

In excavating the third wall of the city of Jerusalem a stone ball shot from a catapult during the Roman seige was found.

Peps Quickly Banish the WORST COUGH

Little Helps For This Week

Even so, Father; for so it seemed good in Thy sight."—Matthew xi. 26.

For naught can come as naught hath been,
But what my Father hath foreseen.
And what shall work my good;
Whate'er He gives me I will take,
Whate'er He chooses I will make
My choice with thankful mood.
—Paul Flemming.

If God gives us much, we are bound to be thankful and use it for Him. If He gives us but little, we are bound to be content and cheerfully to enjoy Him in it.—Matthew Henry.

THIN, WATERY BLOOD ALWAYS DANGEROUS

If Not Corrected Serious Results Sure To Follow

In no trouble is delay neglected more dangerous than in anaemia—thin, watery blood. It is very common in young girls and in persons who are overworked or confined within doors. It makes its approach in so stealthy a manner that it is often well developed before the trouble is recognized.

But taken in time the tonic treatment through the use of Dr. Williams' Pink Pills, so enriches the blood that good health and strength is speedily regained. The correction of anaemic conditions by Dr. Williams' Pink Pills is as certain as anything can be. Miss Teresa Heafey, Dunraven, Que., is one of the many anaemic sufferers who has found new health through the use of this medicine. She says:—"I cannot express too warmly my thanks for what Dr. Williams' Pink Pills have done for me. I was suffering from a badly run-down condition. I was very nervous, had little desire for food, and would feel tired out at the least exertion. In this condition I began taking Dr. Williams' Pink Pills, and before using them very long found my health gradually improving, and under their continued use was completely restored. For this reason I earnestly advise all weak girls to take these pills, feeling sure that they will do for others what they did for me."

Send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., and they will mail you free a useful little book on "Building Up the Blood." The pills can be obtained through any druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Ship Canadian Clays To U.S.

White burning clays from Southern Saskatchewan are being shipped in quantities to the United States, where they are manufactured into white-ware such as dishes, electrical porcelains and floor and wall tile. These deposits are situated to the south of Moose Jaw in a rich grain growing and mixed farming country. These beds of refractory clays are very extensive and are used in the manufacture of fire brick, stoneware, pottery, glazed drainage pipes and porcelain ware.

Sailors Preferred Jail

Sixteen sailors from India rebelled against further service on their ship when they learned that it was going to America. Arrested, they explained that they feared they would die from the cold in America. So their ship left for Norfolk, Va., and they went to jail for a month.

Minard's Liniment for sore throat.

When a henpecked man sees his wife terrified by a garden worm, he gets some idea of where he stands in the scale of creation.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE VIRGIN BIRTH OF CHRIST

(By J. H. Woodward)

"The Barrhead News"

Isaiah 7:14. "Behold, a virgin shall conceive, and bear a son, and shall call his name Emmanuel."

Luke 1:30-33. "The angel said . . . behold, thou shalt conceive in thy womb and bring forth a son, and shall call his name Jesus. He shall be great and shall be called the Son of the Highest and the Lord God shall give unto him the throne of his father David; and he shall reign over the house of Jacob for ever and of his Kingdom there shall be no end."

The structure of Christian faith rests upon two great pillars both of which vitally affect every Christian man and woman.

These two pillars are an integral part of the eternal ministry of Christ Jesus our Lord, without which he would be levelled to the plane of ordinary sinning humanity, having no more power to provide redemption for a fallen race than any member of that race.

I refer to the miraculous birth of our Lord as one pillar and His supernatural resurrection as the other. The keystone is the shedding of His blood on Calvary by which he made an atonement for our sins.

The Virgin Birth of our Lord is my special theme tonight.

This subject is often left for Christmastide, but in view of its importance and the fact, that the past thirty-five years have been marked by a determined assault upon it, it behoves us to draw attention to it at this time.

In the year 1892 a great controversy broke out in Germany owing to the refusal of a pastor named Schrempf, to use the Apostles' Creed in Baptism because of disbelief in this and other articles.

Schrempf was deposed and an agitation commenced against the Virgin birth which has grown ever since. The result today is, that in many quarters the Virgin birth of Christ is openly treated as a fable and belief in it is considered unworthy of twentieth century intelligence.

In spite of this however the record of God's Word declares the birth of Christ to be supernatural.

What is meant by the Virgin birth? How did it happen?

Let the Scriptures give the answer. Will you please turn to Matthew 1:18-21 and read carefully "Now the birth of Jesus Christ was on this wise (a very positive statement is it not) when as his mother Mary was espoused to Joseph, before they came together, she was found with child of the Holy Ghost. Then Joseph her husband, being a just man and not willing to make her a public example, was minded to put her away privily. But while he thought on these things, behold, the angel of the Lord appeared unto him in a dream, saying, Joseph, thou son of David, fear not to take unto thee Mary thy wife: for that which is conceived in her is of the Holy Ghost. And she shall bring forth a son and thou shalt call his name Jesus; for he shall save his people from their sins."

Now please turn to Luke 1:26-38 and read " And in the sixth month the angel Gabriel was sent from God unto a city of Galilee, named Nazareth, to a virgin espoused to a man whose name was Joseph, of the house of David; and this virgin's name was Mary. And the angel came in unto her, and said, Hail, thou that art highly favored, the Lord is with thee: blessed art thou among women . . . . behold thou shalt conceive in thy womb, and bring forth a son and shalt call his name Jesus. He shall be great and shall be called the Son of the Highest: and the Lord God shall give unto him the throne of his father David: and he shall reign over the house of Jacob for ever, and of his kingdom there shall be no end." (Now please pay particular attention to the next two verses. They are very important) Then said Mary unto the angel, How shall this be, seeing I know not a man? And the angel answered and said unto her, The Holy Ghost shall come upon thee and the power of the Highest shall overshadow thee: therefore that holy thing that shall be born of thee shall be called the Son of God . . . . And Mary said, Behold, the handmaid of the Lord; be it unto me according to thy word. And the angel departed from her."

Thus was our Lord Jesus Christ brought into human flesh.

He, who shaped the worlds and without whom was not anything made that was made, who was equal with God for He was God, humbled himself and took upon himself the form of a man; and it happened just as we have read.

Mary. The Divine element was the Holy Spirit. There was no human father.

The Scriptures offer much other evidence supporting this wonderful fact of which we have only time to look at a little.

You are all familiar with the scriptural manner of recording pedigree, I am sure. See for example I Chron. 9:35-44 and Matthew 1:1-16. "Abraham begat Isaac. Isaac begat Jacob, Jacob begat Judas and his brethren etc. You will note the father's name is mentioned but no mention is made of the mother. BUT LOOK at Matthew 1:16 and note the unusual departure. "And Jacob begat Joseph the husband of Mary, of whom was born Jesus, who is called Christ." It was of Mary alone and not Mary and Joseph that Christ was born.

In Genesis 3:15 God pronounces judgement on Satan and states that "the seed of the woman would bruise his (Satan's) head. Satan's Conqueror would be the seed of the woman.

When Christ came into human existance there was not the creation of a new personality as in a natural birth but it was a personality already in existance coming into new form hence we note the prophecy in Isaiah 9:6 "For unto us a child is born, unto us a son is given."

The child Jesus was born—The Son was given of God.

Isaiah 7:14 "Therefore the Lord himself shall give you a sign: Behold a virgin shall conceive, and bear a son and shall call his name Immanuel (God with us.)

This morning I read twenty-two distinct prophecies in the Old Testament concerning the time, manner and place of the coming of God's Holy One. These prophecies were made in most cases hundreds of years before He came. In the fulness of time God sent forth His Son in the likeness of sinful flesh and this coming was exactly as predicted even to the minutest detail.

When Jesus chided the Emmaus disciples he used these words. Luke 24:25-27 "O fools, and slow of heart to believe all that the prophets have spoken; ought not Christ to have suffered these things, and to enter into His glory? And beginning at Moses and ALL the prophets he expounded unto them in ALL the scriptures the things concerning himself."

By so doing He gave added authority to the Old Testament Scriptures which men today are twisting and distorting and calling myths.

I am satisfied to believe the Word of God.

In drawing this message to a close I want to draw your attention to part of the practical value of this wonderful birth of Christ.

First. His Virgin Birth makes Him superior to all other men.

As mere man he would be entitled to our respect and admiration but, as the Son of God who became man, He retains His Diety and is entitled to our worship and adoration. Are you giving it to Him?

Second. His Virgin Birth reveals to me the matchless love of God for sinners.

"O what love, what wondrous love,
The love of God to me;
It brought my Saviour from above
To die on Calvary."

God did not choose some secondary means of providing for our redemption.

He broke His own heart to save us.

Sinful man could not be man's Saviour.

Angels were not equal to it.

"There was no other good enough
To pay the price of Sin,
He only, could unlock the gate
Of Heaven, and let us in."

Transcending all human affection God's love planned salvation for all men even the very worst. No price was too great to pay hence He gave His only begotten Son that whosoever believeth in Him should not perish but have everlasting life."

My friends, what are you doing with this wonderful love?

Third. His Supernatural Birth makes Him a distinct gift from God.

He is God's answer to the heart cry of sinful men and women.

He comes with the power of heaven to touch broken lives. His touch is the touch of God and never spoils that which is touched.

He is God's gift to the individual and when received He brings heaven into the life, light into darkness, the oil of joy for mourning, salvation instead of sin.

In conclusion let me say Jesus is sufficient for every need you have. He cares for you and offers Himself to you tonight. Will you take Him?

CANADIAN HOMES AND GARDENS

Monthly

$2.00 one year
$5.00 two years

Canadian Homes and Gardens inspires one with a renewing love for beautiful homes and gardens and as it grows older, its field seems to become even richer. Here you find departments on home decoration, collecting, entertaining, handicraft, as well as important articles about the outdoor and indoor gardens which means ever splendid success. These explain some of the popularity of this beautiful publication.

NEW OPPORTUNITY TO ENTER THE AUTOMOBILE BUSINESS

One of the world's largest and oldest automobile manufacturers is establishing dealers to sell a new six-cylinder closed car which will list at

$995 f.o.b. Canadian factory

Other models of this same manufacturer range in price up to $3235. They will all be available to the dealers who handle this new popular priced car. There is in addition a complete line of commercial cars.

In communities of small size, however, you need contract only for the fast selling low-priced model.

Only moderate capital needed to Start Business

A contract has been worked out to enable dealers to get started representing this new car with only a small investment.

No such favorable franchise has ever before been offered by any manufacturer

If you believe that you have the ability to sell in your community an automobile that is destined to be the sensation of 1928—a closed car that will offer for $995 a beautiful exterior, lacquered in the latest fashionable shades, an interior luxuriously upholstered, arm rests, ash receiver, gasoline gauge on the dash, coincidental lock to steering and ignition, steering wheel control of twin-beam headlights, rear vision mirror, automatic windshield cleaner, and similar refinements—proved power to maintain high speed indefinitely—quality construction throughout—if you are able to sell such a car in your community, send in the attached coupon at once.

Room 33, 17 Main Street, East Hamilton, Ont.
Send further particulars on the franchise for the new $995 six-cylinder car you are advertising.

POT-POURRI

Henry: "Can you let me have the afternoon off boss? My wife wants me to go shopping with her."

Boss: "Can't do it."

Henry: "Thank you! Thank you a million times."

—:o:—

A protest has been lodged with the Edmonton City Commissioners against the employment of married women; evidently on behalf of unemployed single women. No doubt there are any number of jobs seeking female employees but these unfortunately are like the men. They all want white collared jobs. If unemployed young women would be willing to seek employment as domestics, where there is a good demand and more money to be saved than working in offices and paying board, there would not be any need for such protests.

—:o:—

Whatever men's thoughts may be to-day regarding the outcome of the World War, history can have but one final word; its supreme result was the opening of the way for the return of the Jews to Palestine—The New Palestine.

Dr. Judah L. Magnes, Dean of the Hebrew University in Jerusalem, is now in the United States to raise an endowment fund of $10,000,000.00 for the University.

—:o:—

An old lady living in Aberdeen was troubled with a malady affecting her back. After trying innumerable home treatments she eventually called in the doctor, who said she would require to have her back painted.

After the doctor had performed the operation the lady asked what the charge would be.

"Three-and-six," replied the doctor.

"Three-and-six for painting my back, "exclaimed the old lady, "man, I've just had my hale kitchen painted for half-a-croon."

MISSIONARIES ARE RESCUED BY BRITISH MARINES

Hong Kong.—Arrested December 22 for preaching and practising Christianity, and held captive for nearly a week near Swabue, 60 miles from Hong Kong, a party of 10 Italian and Chinese priests and nuns has been rescued from Communists by the British destroyer Seraph.

A Chinese convert, who came here from Swabue reported to the Catholic Bishop that one Chinese and two Italian priests and seven nuns were held prisoners and that the Chinese priest had been sentenced to death, that the mission building, convent and orphanage had been sacked and closed down.

The Bishop communicated with Admiral Sir Reginald Tyrwhitt, commander in chief of the British naval forces, who immediately ordered the Seraph to proceed to Swabue where the prisoners were rescued.

The Communists were at first reluctant to give up a Chinese priest and only consented when informed that he was a British subject.

The commander of the destroyer set a time limit for his delivery. The destroyer cleared for action and landing parties were made ready.

The missionaries had given up all hope when the destroyer appeared. At this show of force, however, they were handed over to the British officers.

European priests give terrible accounts of cruelties and executions witnessed only from the prison windows.

Severe Weather In Europe

Seven People Perish From Cold In France

Paris.—Northeasterly gales with snow, which have been raging along the entire Atlantic seaboard, from Dakar to Dunkirk, have brought Europe and Africa to a realization that winter has come.

Cherbourg reported an 80-mile gale, Calais and Boulogne channel services have been interrupted and the air service between Paris and London has been entirely cancelled. Veritable mountains of mail are awaiting shipment from all French ports.

Seven lives are reported lost in France alone, mostly in the northern sections, which are buried under 15 inches of snow. Floods are threatening Rabat, Casablanca, and the Morocco rivers are overflowing in torrents, especially the Ouergha, where Abd-el-Krim's forces fought the French in 1925, which is out of bounds, making a lake from Meknes to the sea.

In France the Seine and Marne are rising and a recurrence of the great floods of 1910 and 1921 is feared.

Soviets Are Blamed For Chinese Trouble

Canton Leaders Accuse Russians In Note Handed To Foreign Consulates

Canton.—A note stating that the Russians were responsible for the recent Communist outbreak here and the burning of the city was handed by the Chinese authorities now in control to foreign consulates.

Arms, flags, and marked military maps proved beyond a doubt that the Soviet Consulate was headquarters of the Communists, the note said. It was stated that Russian consul-general, instead of being released as planned, would be held until the incriminating documents were translated.

The note served as a reply to the statement of M. Tchitcherin, Soviet commissar for foreign affairs, that the Soviet was not engaged in any plot to overthrow the Canton Government. It was stated that the Russians had extensive plans for bringing in a peasant army from the surrounding districts.

Plans Flight Over North Pole

Ottawa.—An Italian explorer, General Nobile, wants to fly over the North Pole next summer and Dr. Donardelli, Italian consul here has been asked to secure from the Canadian Government maps and other data. Not much has been learned of the project apart from the fact that it is for scientific purposes. The flight would be in a dirigible.

Experiments show that it requires 300 pounds of grain and 900 pounds of hay to put 100 pounds of gain on fattening lambs.

To Fly Over London

Canadian Farmers To See World's Metropolis From the Air

London.—A unique sight-seeing tour has been arranged for the 125 Canadian farmers who are coming to England in January with the Canadian National Railways' Farmers Marketing Party. In addition to seeing London as the average man sees it—obtaining a worm's eye view from underground and a normal view from the top of a 'bus—the visitors will see London as the birds see it, from the cabin of one of the most up-to-date air liners of the Imperial Airways, Limited.

As many of the Canadian farmers as desire to do so will be taken for a 20-minute "joy-ride" over London and down the Thames. Should a sufficient number signify their intention of taking to the air, two or even three of the latest "Silver Wing" passenger 'planes "de luxe" will be brought into service to cruise over London together. These air liners are the last word in aeroplane construction, carry 18 passengers, and are equipped with buffet and easy chairs with a steward in attendance.

The flight will be made from Croydon Aerodrome, today known as Britain's premier air-port, where passenger aeroplanes take off daily for Paris, Amsterdam and other points on the Continent. Here the visitors will be conducted through the hangars by competent guides who will explain to them the various types of machines used in modern air travel.

Famine In China

Four Million In Shantung Facing Direst Extremity

Pekin.—At least 4,000,000 in the province of Shantung and part of Chihli are facing extreme famine, which must be expected to become more severe as winter progresses, a committee of observers has reported.

The report grew out of the Chinese international famine relief commission's appeal to the Red Cross for aid and the request of the Red Cross for more exact information.

A survey was then compiled by competent foreign authorities and observers.

Thousands in Shantung were found already subsisting on bark of trees, chaff and grass.

While the Chinese famine relief blamed the drought and locusts, the committee thought that "civil war, banditry and exorbitant taxation" were also equally to blame for Shantung's plight.

The peak of suffering was said not to have been reached yet. It will grow more intense from the Chinese New Year, January 23, until spring.

Gives Brain To Science

Noted Russian Scientist Bequeathes Brain To Noted Collection

Moscow.—"The brain pantheon," founded by Prof. Vladimir Bechtereff, noted Russian psychiatrist, to study the source of talent and genius, will shortly have a fourth brain added to the three already preserved — that of Prof. Bechtereff himself.

The noted scientist, who has been devoting much time in recent months to organizing the brain pantheon which had been approved by the Soviet Government, died recently from paralysis of the heart after an extremely short illness. News of his death shocked the Russian scientific world deeply. Prof. Bechtereff willed his brain for scientific study.

The brains already in the collection are those of Anton Rubinstein, the famous pianist and composer, Demitri Mendeleff, naturalist and chemist, and Alexander Kohni, writer.

Will Attempt To Break Speed Record

Automobile Race Driver Aims To Better Englishman's Mark

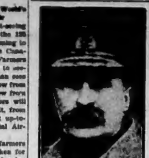
Indianapolis.—Frank Lockhart, automobile race driver, will attempt to shatter the world's record of 203.79 miles an hour for a straight-away drive of a mile at Daytona Beach, Fla., some time between February 15 and 23. The record was established last year by Major H. D. Seagrave, of London, England.

Malcolm Campbell, of London, Eng., and an automobile builder named White, of Philadelphia, also are said to be planning to try for the mark at Daytona Beach in February.

Soldiers Frozen To Death

Belgrade, Jugo-Slavia.—Clutching their rifles and in perfect marching order, the dead bodies of 17 soldiers, frozen in the cold wave a week ago, were discovered when the snow melted along the railway to Nish. Huge snowdrifts had prevented a search for them before.

Had Long Military Career



Lieutenant-General Sir Edwin Alderson, commander of the Canadian troops in the great war, who died in London recently. He won many decorations during a long military career. Sir Edwin was the author of several volumes.

Instruct Future Citizens

Arrangements Being Made For Study Of League Aims In Canadian Schools

Geneva.—Canada is instructing her future citizens in the aims of the League of Nations.

Ottawa informed the League that Manitoba had prepared a special chapter on the League which will be included in school readers and has adopted regulations requiring all students of the tenth grade in secondary schools to study a special pamphlet drawn up by the Canadian League of Nations Society.

The Lieutenant-Governor of the Province of Saskatchewan has made arrangements for study of the League in schools in that province, and Ottawa has called the attention of all provincial governments to the importance of teaching the doctrines of the League.

Honoring Mrs. Lindbergh

Will Receive Gold Medal From Detroit Board Of Education

Detroit, Mich.—The Detroit Board of Education has voted to confer a gold medal of honor upon Mrs. Evangeline Lindbergh "in recognition of the great value to this nation and the public school system of the qualities of motherhood she has exhibited."

This and her qualities of "patriotism, loyalty, valor, heroism, courage, efficiency and the pursuit of the better and higher things in life" were cited by the board in adopting a resolution to confer the medal.

Mexico May Buy Airplane

Washington.—Deciding upon a "distinct relaxation of the air craft or war munitions embargo against Mexico, the state department granted a license to the Mexican Government to purchase the tri-motored plane in which Mrs. Evangeline Lindbergh flew from Detroit to Mexico City. The permission given to Mexico to buy the plane was the first step taken under the new policy.

Barred From U.S. Hockey

St. Paul.—"Spunk" Sparrow, forward on the Minneapolis hockey team, has been permanently barred from play in the American Hockey Association for his part in the free-for-all fight in the game between St. Paul and Minneapolis.

MANY BRITISH SETTLERS COMING TO CANADA SOON

Ottawa.—The coming to Ottawa next month of Hon. L. C. Amery, Dominion Secretary of the British Government, probably will lead to a final determination of a large program of British migration to Canada. It was privately submitted to the British authorities some months ago but the decision was deferred until Mr. Amery had an opportunity of looking personally into the matter and securing first-hand information.

Considerable reticence is maintained here as to details pending a formal discussion of the question, but the plan is known to contemplate an elaboration of the family settlement scheme by which, at the end of this year 3,000 families will have migrated. In the original period set, only 2,300 families came and hence the agreement was extended to cover the balance.

The new plan, however, will be different and generally speaking, if approved, will look to the establishment of groups or colonies of British settlers in parts of the country where the opportunities are considered most promising. While the movement would not be directed to unsettled localities, it would be designed to involve considerable pioneering, similar to that accomplished by British colonies in the early stages of Western development in the nineties. A feature of the plan would be that which would provide for expert supervision by experienced people of the location of the groups and for assistance to them in the problems connected with absorption into Canadian life. The plan would be worked out on a basis of co-operative contribution by the British and Canadian Governments.

It is stated that the success of the Empire settlement plan, confined largely to soldier lands, having been demonstrated the new scheme, if given effect will eventually lead to the migration of as many as 20,000 families.

Extols Work Of League

No Other Power Could Settle Polish-Lithuania Dispute Says Senator Dandurand

New York.—No power on earth except the League of Nations could have effected a settlement of the differences between Poland and Lithuania this year, in the opinion of Senator Raoul Dandurand, Canada's representative on the council.

The leader of the Canadian Senate returned from Geneva on the Mauretania. Acceptance by the two countries of the supervision over distribution of troops along the border by military attaches of Great Britain, France and Italy implied a superior authority, said Senator Dandurand.

"I am strong in the conviction that outside of the League of Nations there is no power on earth which would have had the influence to impose its views and its will upon two independent nations," he added.

Is Victim Of Pneumonia

Calgary, Alta.—Garfield "Garry" Graham, manager of the Calgary branch of the Barber-Ellis, Limited member of the Calgary Rotary Club and prominent mason, died in the Holy Cross Hospital here, after an illness which began nearly five weeks ago with an attack of pneumonia.

Relic of Pioneer Ship Mounted

The glittering figurehead of the Canadian Pacific Empress of Japan, pioneer trans-Pacific liner of the company, has been erected in Stanley Park, Vancouver, as an historic relic of the port. The Empress of Japan was put in the discard a few years ago, her place in the service being taken by the greater Empress. The Empress of Japan held, as does her successor, the trans-Pacific speed and comfort honors. This old vessel, built at Barrow-in-Furness, England in 1890-91, was the first Canadian owned ship to ply regularly out of Vancouver across the Pacific. She was of the old clipper type vessel.

The elaborate figurehead is perfectly preserved and stands on a concrete block. With its glowing eyes, glittering teeth and gold, green and white paint, it is all that remains of the famous vessel. It was presented to the Vancouver Parks Board and erected by that organization.

Strengthen Canadian Navy

Government To Seek Authority For Purchase Of Two Modern Destroyers

Ottawa.—The Government will seek authority at the coming session of parliament for the purchase of two new modern destroyers to be delivered within three years. The new destroyers will replace the Patrician and Patriot. The Patriot and Patrician will be sold out of the Canadian navy.

Construction of the first of the new destroyers is to be commenced at once. In the meantime, arrangements have been made with the admiralty to obtain two destroyers to carry on with until the new craft are ready. They are H.M.S. Torbay and Toreador, and the Canadian Government has authorized the commencing of work forthwith at Portsmouth to recondition the vessels and bring them forward for Canadian service.

It is expected they will arrive in Canada toward the end of March.

The Torbay and Toreador were built by Thornycrofts and belong to the same group as the S class admiralty destroyers. Eight of these compose the eighth destroyer flotilla in commission on the China station. Three are in commission and two are in reserve in the Australian naval service. One is in reserve commission on the Mediterranean station.

Compensation For Lindbergh

Estimated That He Has Earned Quarter Of a Million

New York.—The New York Sun says: "Since his Paris flight it is estimated that Col. Lindbergh has earned about $250,000. The Orteig prize was $25,000; the profit from his book "We," and his newspaper articles was estimated at approximately $100,000, and it was said that he received $25,000 from the Guggenheim fund to finance his tour of the United States.

The Sun also says a director of one of the largest craft companies in the United States told of offering Lindbergh a job at anything he wished at any salary, and receiving this reply:

"I don't want any more money than I am worth. I won't take any job just to capitalize my name. If I should decide to work for you I want to be paid what I can actually earn. I'm not worth much, except my name, and I won't sell that."

British Cattle Infected

Foot and Mouth Disease Breaks Out In Several Centres

London.—Twenty-six outbreaks of foot and mouth disease in six widely distributed centres of infection has necessitated declaration of a "stand still" area by the ministry of agriculture. The effect of the declaration is to prohibit movement of cattle, sheep, pigs and goats in the area without a license. The movement of them from the "stand still" area to a free area is forbidden and markets will be strictly regulated.

The "stand still" area covers practically the whole of the Midlands and part of Yorkshire and Lancashire.

Employment Situation Improves

Ottawa.—The seasonal losses in employment recorded at the beginning of December were on a smaller scale than on the same date in any other of the last eight years except 1925, and the situation continued better than on December 1 in any previous year of the record. Statements were tabulated by the Dominion bureau of statistics from 6,276 firms employing 846,420 persons compared with 862,113 in the preceding month.

APPROPRIATION OF LARGE SUM FOR H. B. ROAD

Ottawa.—A further appropriation of several million dollars for the Hudson's Bay Railway will be included in the railway estimates at the coming session of Parliament.

The amount will not be decided until the engineers report as to the extent of the work which can be accomplished during the year, the contract for the last section of the road having been awarded.

The appropriation for the current year was $5,100,000 and good progress has been made.

As the Canadian National Railways last session got approval of a three-year branch line program, it is not expected that much legislation will emanate from that quarter this year.

The Minister of Finance will present a bill to ratify the agreement concluded some time ago with the Canadian Northern income bond holders.

NINE VICTIMS OF POISON ALCOHOL IN WINNIPEG

Winnipeg.—Wood alcohol and "canned heat," consumers of which are stricken blind and die in frightful agony, have claimed nine lives in Winnipeg, and another man is suffering terribly and may succumb.

The deaths followed a "death party" in the Coronation Block, 228½ King street, in the heart of the Chinese district, where a fatal drinking bout was staged by about a dozen addicts of "canned heat," and those who have not succumbed, are terribly ill.

Most of the poison liquor addicts groaned and writhed in frightful agony as they slowly succumbed to the terrible ravages of the "canned heat" or wood alcohol.

Police investigations have led them to believe that the alcohol was bought from a Main street drug store. This morning they found three bottles of methyl-hydrate, labelled "poison" in red lettering, in one of the rooms. There was no one in the room at the time.

According to police, more than 25 deaths from alcoholic poisoning have occurred in Winnipeg during the past two years.

Reduced Express Rates

New Schedule Of Rates On Small Parcels Goes Into Effect

Ottawa.—Canadian Express companies announce reduced rates for the shipment of packages up to fifteen pounds in weight and not over three and a half feet in length, width or depth. The new schedule has been filed with the board of railway commissioners for Canada by the Express Traffic Association. The change takes effect January 1 and continues the former arrangements of protection against loss or damage up to fifty dollars without extra cost.

The reduced rates are calculated on packages ranging from 5 pounds or less, 6, 7, 8, 9, 10, and 11 to 15 pounds inclusive. The Maritime provinces are grouped as one. Between the same points in any province the rates are from 30 cents to a maximum of 60 cents according to weight. Between points in adjoining provinces the rates are from 40 cents to a maximum of 80 cents. Between points in separated provinces the rates are from 50 cents to a maximum of $1.55 for the longest haul for the maximum weight of 15 pounds.

In no case can the length and girth of a package combined exceed six feet. The reduced charges will not apply to money, bonds, bullion, securities, live animals, birds, iced goods, liquid oils or grease unless packed in sufficient absorbent.

Working On Mine Railway

Supplies Are Being Rushed Into The Pas District

The Pas, Man.—Engineers of the Canadian National Railways are hurrying supplies into The Pas district for an early start on the construction of its 63-mile mine track. Two of the system's locating parties, numbering 50 men, are already at work under the direction of Frank Haven, reconnaissance engineer.

At present there are between 250 and 275 men employed on the construction of the work under the direction of K. A. Ramsay, superintendent. These men are preparing right of way through muskeg country overlaying limestone rock and boulders and thickly timbered with trees of medium growth.

Cutting of the right of way starts at the ballast pit four miles from the spur and the objective for this winter is Cranberry Portage, 50 miles further on, according to H. A. Dixon, chief engineer of the western division of the Canadian National Railways.

The Death Toll

Final Figures Show That 32 Children Lost In Quebec Fire

Quebec.—According to Rev. Mother St. Romuald, superior of the Hospice St. Charles, the death toll in the conflagration which destroyed part of the institution on December 14 cannot be greater than 32.

She added that 28 children remained to be brought back to the hospice but that definite trace of all of them had been secured. So far 30 bodies have been discovered. Reports to the effect that parts of other bodies had been found were discounted by the coroner.

At the Morgan morgue it was stated that no such discovery had been made, while the mother superior said that as far as she knew the reports were false.

LAKE SHORE

A very enjoyable party was held at the home of Mr. and Mrs. A. N. Booth on Wednesday evening of last week. The time passed pleasantly with cards and games after which a dainty lunch was served. William Tiedemann was the lucky gentleman winning first prize at cards while his sister Alma won ladies' first.

Mr. [illegible] spent Saturday and Sunday at the [illegible] home. [illegible] was also a [illegible] at the same time.

[illegible] and Mr. and Mrs. Hans Jacobsen left on Monday for a trip to Europe. They expect to be gone about three months.

Mr. and Mrs. [illegible] entertained at [illegible] Miss Nettie [illegible] and Wm. [illegible] on New Year's day.

Mr. A. [illegible] left on Monday morning for [illegible] for a visit with friends and relatives.

Mr. and Mrs. [illegible] and sons spent New Year's day at the A. C. Dodd's home.

Mrs. [illegible] and children of [illegible] spent several days last week visiting Mr. and Mrs. [illegible] Noland. Mrs. Carney is Mrs. Noland's mother.

A very pleasant evening was spent at the T. W. [illegible] home on Monday when a number of young people were invited in to play cards. Six tables played, and gentleman's first prize was won by [illegible] while [illegible] captured ladies' first. [illegible] won the consolation and [illegible] won the other.

Miss Myrtle [illegible] and brother Melvin [illegible] and Todd Gray were callers at the A. T. Anderson home on Sunday evening.

School reopened on Tuesday after the holidays.

BARDO

In spite of the cold weather the holiday time has been observed by the usual feasting and good times.

Mr. and Mrs. Pete Eggen are "At Home" at the Eggen homestead. The young people treated them to a "Serenade" the evening of their return from Edmonton.

The Mosvold [illegible] family spent a part of last week with relatives in Ryley.

The Joe Stauffer and A. Haakedal families and Miss Hannah Jenson were guests at the P. O. Lerbekmo home in Tofield on Sunday.

Miss Irene Rude was home for the holidays.

The young people of the Lutheran church had their New Year's meeting Sunday evening at the Joe Stauffer home.

The J. L. Stauffer, A. A. King and J. King families were New Year's guests in the Makkey Bauer home.

Word has been received that the W. E. Parker and Geo. Moen families are living in Gresham, Ore.

W. I. NOTES

It has been decided to postpone the Banquet until Friday, the 27th. Full arrangements for which will be made at the regular monthly meeting on Tuesday, 10, at 2 p.m.

We want all old members to rejoin this year, and as many new ones as possible. Fee this year is 50 cents.

Be on time. Tuesday at 2 o'clock.

NOTICE

On and after this date all the roads and trails leading through the N. W. 5-16-50-19 will be closed.

J. APPLERY.

KETCHAMOOT

December 27

Christmas holidays passed very quietly in our community with the exception of family dinners for Christmas day and Christmas concert, everybody kept pretty close to their own firesides, which was a very good place to be when the thermometer kept around 40 below.

UNITED CHURCH OF CANADA

January 8th, 1928

WE ARE CALLED—

By an increased consciousness of human brotherhood,

By all nobler ideals of sacramental service,

By the memory of those, who following Christ have advanced life,

By the general recognition of the solidarity of the whole world,

By the charm and power of Christ's own life and the compulsion of His Spirit

To faith and loyalty to our Master Himself.

Not to respond is to miss the [illegible] of our visitation.

The Church has a message.
The World needs the Church.
The Church needs you.
Will you respond?
Sermon: World Peace.

J. THOM GORDON

Tofield Farmers Supply Co., Tofield

LADIES' BONSPIEL JANUARY 17-18

The Tofield Ladies' Curling Club will hold their first annual bonspiel on Tuesday and Wednesday, Jan. 17-18. The ladies are making every preparation to make this a huge success.

There are three separate competitions each with a handsome trophy, viz: The Ash trophy, the Young trophy and the Kline trophy. These all were donated by Edmonton jewelry firms. To accompany the trophy there is a good selection of handsome presents.

DANCE ON WEDNESDAY JANUARY 11th

Holroyd's Harmonizers Orchestra are holding a dance in Tofield on Wednesday, Jan. 11th. This orchestra which is composed of clever orchestra have many years experience where they played last. Holroyd's orchestra made a great hit in Camrose were playing dance music. They play all the latest hits with novel effect and get the most out of their instruments. R. Holroyd, the pianist and leader was formerly a radio entertainer of note, and the other members are well known provincial musicians.

The M. A. S. will hold their annual meeting next Wednesday, Jan. 11, at the home of Mrs. G. W. Sears. Everybody welcome.

CARD OF THANKS

I desire to express my appreciation and extend sincere thanks to the workers who helped save my buildings from burning on Sunday night.

JOHN LEE

FARMERS ATTENTION!

If you are in the market for a TRACTOR why not investigate the merits of one of the best tractors on the American continent. Do you realize the Minneapolis Steel and Machinery Co., are one of the largest manufacturers of farm tractors in the world; besides making the TWIN CITY TRACTOR for their own sales, they make numerous other tractors for other companies. At one time they were making over twenty different tractors for other machine companies. We carry a full line of repairs in Edmonton, at all times.

LOCAL and PERSONAL

Cards are out announcing the birth of a son, James Andrew, to Dr. and Mrs. Law, on Wednesday, December 28th, 1927.

Friends of Miss Jean Kellner will be glad to know that she returned from Edmonton, last week, after spending some time in the hospital there.

Mrs. R. C. Longson and little daughter of Halcourt, Alberta, are visitors at the Kellner home. Mrs. Longson will be better remembered as Miss Anna Belle Kellner.

Mr. and Mrs. Allan and Durine, left on Wednesday for Leduc. Mr. Allan will continue to serve the Bank of Montreal at that point.

Miss S. Wahlstrom of Wetaskiwin is relieving Miss Lorett Ross this week.

Miss Thelma Noland returned from the city on Monday after spending a few days there.

Mrs. Hills, and Luella left for the city last week. Mrs. Noland is spending a few days with them there.

Mrs. Roberts, of Blackie, Alta., is visiting her sister, Mrs. W. Herndon, for a few days.

Mrs. (Dr.) Carmichael and Mrs. Bremner are visiting at the Law home.

Mrs. Tobo is visiting her sister in Wetaskiwin.

Mrs. Church and family of Wainwright is visiting at the Mrs. Herndon sr., home.

A very enjoyable whist party was held at the home of Mr. and Mrs. W. C. Swift last week, when a number of young people were invited to the house for an evening's entertainment. A delicious lunch was served by the hostess and all voted it a most enjoyable evening.

Some early spring auction sales are already announced. A furniture and community sale will be held in town on Saturday, cried by F. O. Ball. J. D. Hannan will cry a sale in the Ryley district on Thursday of this week and F. O. Ball will cry a sale at Chipman on February 17th.

If present arrangements hold, the Tofield hockey team will go to Holden on Saturday and try to lift the Dawson cup and bring it to Tofield. Well, we'll see. We remember the time a Tofield team went to Wainwright to fetch home this piece of silverware, but fate and the Wainwright hockey team were against them. Who knows, the boys may turn the trick this time.

A very enjoyable party was held this week at the club rooms. The party was arranged by the leaders of the Trail Rangers and the C.G.I.T. girls, Miss Clement and Reg. Bearisto. Games were played during the evening and everyone present had a splendid time. The usual good "eats" were there in abundance and young healthy appetites did full justice to them.

A very enjoyable party was held at the home of Mr. and Mrs. J. Francis on Monday evening, December 2, when a number of young folk were invited to spend the evening. Active games and cards took up the first part of the evening. A delicious lunch was served after which games were again played until early morning when the guests departed all voting it a splendid evening.

Mr. W. J. Thomson has recently installed a five tube radio in the Thomson home.

The Cornhill Municipal District Council held the last meeting of the municipal year on Wednesday. Their next meeting will be after the election.

CALENDARS

The 1929 calendar samples have arrived and we can truthfully say that they are the best set of samples sent us so far. Last year we supplied fully 50 per cent of the calendar requirements of Tofield and this year expect to exceed this. The house we represent furnishes you with better calendar values that you ever received before and we approach you for your calendar orders on a strictly price and quality basis. A Mercury representative will be calling on you in a few days.

THE TOFIELD MERCURY

W.I. NOTES

The Women's Institute had a very enjoyable meeting on Tuesday afternoon in their rooms. A very interesting talk on home nursing was given by Mrs. Davidson, Provincial organizer of the Home Nursing. It was decided by the Institute to have a series of lessons in the near future given by Mrs. Davidson.

Don't forget our banquet on January 27th. Everybody come and sign up with the Institute for 1928. We always have a grand time at our banquet and we extend an invitation to all the women.

The editor has promised to outline a home nursing course letter which we received, in the next issue of the Mercury.

OVERCOME BY FLAMES WHILE PLAYING FOR "PUPPETS"

Courage is a common virtue in films, but the greatest courage is often shown behind the scenes and never gets to the motion picture audiences.

In First National's photoplay, showing this week at the Variety Theatre, starring Milton Sills, there is a scene in a puppet theatre in which Milton Sills and Francis McDonald draw lots to see which shall kill the other. As they start to draw Gertrude Olmsted sets fire to the surrounding scenery.

Sills and McDonald are lost in the smoke. Sills emerges, grasps Miss Olmsted by the arms and tells her what he thinks of McDonald, whose vilainy has been exposed.

When the last shot had been taken Miss Olmsted fainted, overcome by the strain and the intensity of the heat from the flames. It took real courage for this girl to stay there and act when at any moment the flames might jump to her clothes, but she did not complain.

It was all in the day's work.

COMPLAINTS RE BRIDGE

The Mercury office was visited by a delegation of farmers using the south road, last week. They desired that something should be said relative to the condition of a bridge near Mr. Piper's place. The bridge in question, so it was stated is in very poor shape. It apears that some repairs were made on the bridge last summer, some new planks being put in. These do not by any means line up with the old ones and it is a series of bumps for the car or truck driver when passing over it. A real axle breaker was one way one of the men described it. The bridge is maintained by municipal and government authorities and it would appear, such being the case, that suitable repair work should not be hard of accomplishment. We have no first hand knowledge of the condition of the bridge, but we thoroughly sympathize with a farmer, who having harvested his crop, meets with difficulty in bringing it to town through faulty repair work of a bridge over which he must pass. Perhaps those in authority and responsible for the condition of the bridge will give it a little of their attention and if possible improve it.

WEATHER NOTES

(Courtesy Editor of the Hay Lakes Times)

We are decidedly of the opinion that someone made a miscue in the weather factory this week. When we left off in our report last week, it was raining, and the thermometer was hovering just at the freezing point. The rain was of very short duration, but the mildness of the temperature held.

Seldom indeed is it that we are treated here to what we can call a Chinook, but this week one passed our way. While the mercury dropped a little on Friday and again on Saturday, it rose with a rush on Sunday morning, and in a few hours the water was dripping from the houses. This continued until Monday evening when the temperature again reached the freezing point. Tuesday was slightly colder, but very fine weather for January.

The following are the temperatures for the week:

January 5th, 31 above.
January 6th, 22 above.
January 7th, 15 above.
January 8th, 22 above.
January 9th, 30 above
January 10th, 31 above.
January 11th, 28 above.

We frankly admit we like this weather, and the more we receive of it in the next six weeks, the better we shall be pleased.

—J.W.M.

BARDO

Several from Bardo and vicinity are spending the winter at the coast. Mr. and Mrs. Bertness are at Poulsbo, Wash., Mr. and Mrs. Jensen and Miss Hannah Jensen at Vancouver, B.C. Milo Stutsman is attending Bible school at Hubbard, Ore.

Announcements have been received of the marriage of Malvei, eldest son of Mr. and Mrs. V. L. Roth, to Miss Hershberger of Millford, Nebraska, at the latter place on January 12th.

Mr. Tom Borem is visiting in Minnesota and Northern Iowa.

Mrs. Chas. Whillans spent Monday with Mrs. Hills.

The Ladies Aid met with Mrs. Hagen on Tuesday for their yearly meeting. A large number were in attendance. Mrs. John Jevning was re-elected president, Mrs. Haakedal, Vice-Pres., Mrs. Steen, secretary; Mrs. Brechan, treasurer. Work committee, Mrs. Ness, Mrs. B. Anderson, Mrs. Hills.

Mr. Jacobson sawed wood for B. Anderson on Tuesday.

U.F.A. and U.F.W.A. met at the John Andersen homestead for a joint meeting on Wednesday afternoon.

Mr. Rude and little Mavis Jacobson are on the sick list this week.

The Thimble Club officers are: president, Sigrid Eggan; vice-pres., Borghild Fosbaug; secretary-treasurer, Anna Jevning. Work committee, Nora Rude, Mrs. Haakedal and Mable Jevning.

KETCHAMOOT

The mild spell has been a pleasant break in the winter, especially for the stock as the extreme cold was very hard both for man and beast.

The McGinitie families held their New Year's dinner at the Henry McGinitie home.

On account of the low temperature no preaching service was held on New Year's day.

Mr. and Mrs. J. B. Ingram were passengers to Edmonton on Wednesday returning home on Saturday.

Little Miss Eileen Stirrett has been detained home from schol on account of illness.

Miss F. Fawcett is visiting friends at Strome, Alta.

Mr. and Mrs. D. H. Mitchell are still residing on the old home place until about the first of February. We understand they have bought a fine modern house in Edmonton, where they will make their future home.

Mr. and Mrs. G. W. Sears and family were guests of Mr. and Mrs. C. A. Ingram New Year's evening.

Mrs Wesley Ingram and Miss Pearl Welch are visiting friends and relatives in Edmonton.

Mrs. A. McMullen is caring for three of Paul McMullen's children. We are glad to hear, Mrs. Paul McMullen's health is more encouraging.

Mr. Martin Lawson who has been working in a grain elevator at Fedel, Alta., for several months returned home New Year's day, where he will form the home place for this year.

Mr. and Mrs. Herman Lawson entertained a crowd of young people at their home on Friday night. Those present were Mr. and Mrs. A. Haukedal, Mr. and Mrs. John Brown, Mr. and Mrs. Leslie McGinitie, Messrs. Agnes Jensen, Mabel, Mildred and Edna Lawson, Martin Lawson and Ray Lee.

Mr. and Mrs. W. A. Mitchell entertained Mr. and Mrs. Carlisle, Mr. and Mrs. Whillans, Mr. and Mrs. Chas Ingram and D. H. Mitchell to supper on Tuesday evening, after which a committee meeting was held.

Mr. and Mrs. A. McMullen entertained relatives to New Year's dinner on Sunday. Those present were: Mr. and Mrs. Sherwin Gladewin and family, Paul McMullen and family, Mr. and Mrs. Chester Coombes and family and Mr. and Mrs. Harold McMullen.

Mr. and Mrs. Herman Lawson entertained friends and relatives to New Year's dinner on Sunday.

Mr. and Mrs. Wesley Ingram, Misses Pearl Welch, Mildred and Gertrude Ingram and Willie Ingram were guests of Mr. and Mrs. Barnes New Year's day.

Mrs. W. A. Mitchell and daughter, Margaret spent several days in Edmonton last week, Margaret being fitted for glasses.

KINGMAN

Mr. and Mrs. C. R. Blychert and Mr. and Mrs. T. Horte and family and H. T. Sparby were the guests of Mr. and Mrs. J. Bones on Thursday evening.

Mr. and Mrs. C Adamson and family and Mr. and Mrs. C. Johnson and family were the guests of Mr. and Mrs. C. R. Blychert on Sunday.

Mr. and Mrs. Roy Mulvik and family and Mr. and Mrs. C. R. Blychert were the guests of Mrs. P. Simonson on Friday evening.

Mrs. P. Simonson and family were the guests of Mr. and Mrs. Andrew Johnson on Thursday evening.

Mrs. T. Horte and family visited in Camrose over the week end.

Mr. and Mrs. J. Bones and family Mr. and Mrs. R. D. Bruce and family, Mr. and Mrs. Jack Erickson and daughter, Mr. and Mrs. John Anderson and T. Horte were the guests of Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. Andrew Johnson, Mrs. P. Simonson and family were the guests of Mr. and Mrs. Roy Mulvik on Saturday evening.

Quite a number of men are engaged in working on the new hall, which, if nice weather continues will be completed in about two weeks.

Mr. and Mrs. R. D. Bruce and family left on Monday for Minburn where they will make their home.

AMISK CREEK

The Ladies' Aid held their annual meeting at Mrs. P. O. Flaaten's home on January 4th. The meeting was very well attended, nearly all the members being present. The officers re-elected were as follows: Mrs. E. A. Moen, president; Mrs. R. O. Berg, vice-president; Mrs. I. C. Olsen succeeded Miss Lena Anderson as secretary-treasurer, as Miss Anderson will be moving to Ryley in the near future. The men of the district also met at the the same time and held their annual congregational meeting. It was decided to make some repairs to the church in the spring. Mrs. I. C. Olson, Mrs. R. O. Berg and Einar A. Moen were elected a committee to look after the affairs.

Mr. and Mrs. E. A. Moen and family were visitors with the Steen family in Bardo last Sunday evening.

The Annebo family, Mr. and Mrs. Bakkehouse and baby and Mrs. P. O. Flaaten were guests at the reception held at the Eggan home last Saturday in honor of the new married couple, Mr. and Mrs. Pete Eggen.

The R. O. Berg family and Mr. and Mrs. Bakkehouse and baby, Mr. and Mrs. P O Flaaten were guests at the P. Aasmos home last Sunday evening.

Ruby Berg and Henry Annebo have again taken up their studies at school in Ryley, following the Christmas holidays.

E. A. Moen shipped a carload of cattle and hogs from Ryley to the Pool on Tuesday.

The R. O. Berg family and Mr. and Mrs. E. A. Moen visited at the P. O. Flaaten home on Friday evening of last week.

Nels Sand is busy at the Hillerud's new house while the nice weather is lasting. Mr. Earl from Ryley is doing the plastering.

GOOD CROWD AT DANCE

Holroyd's orchestra played dance music to a good number at the Variety Theatre on Wednesday night of this week. The orchestra proved itself very popular to the lovers of the light fantastic and many are looking forward to a return engagement.

NO. 1 WHEAT IN 1926 GRADES NO. 3 TO-DAY

"From his crop of No. 1 Northern wheat threshed in 1923, George Bone, retained a bin full for seed and some to be sold and exchanged for flour.

"During each of the years, 1924, 1925, 1926, a load was sold and exchanged for flour. Each year the wheat graded No. 1 when sold. This year a grist from the same bin of the same wheat graded No. 3. Mr. Bone still has one more load in the granary. He has been advised by his neighbors to sell as next year, the way wheat is being graded it will be a six."

LESSON No. 17

Question: Why is *emulsified cod-liver oil so efficient a food for young children?*

Answer: Rickets or weak bones are evidences of lime-deficiency. Emulsified vitamin-rich cod-liver oil *helps Nature* supply this deficiency.

Pure, pleasantly flavored, nothing quite surpasses

SCOTT'S EMULSION

WORLD HAPPENINGS BRIEFLY TOLD

President Paul von Hindenburg has accepted the post as patron to the International Aeronautic Exposition to be held at Berlin in 1928.

Five occupants of a hydro-aero plane which was undergoing a test flight, were killed when the machine crashed from a height of 1,200 feet near Hong Di Sarno.

Blair Kent, a native of Ottawa, Ont., and for many years an official of the Canadian civil service, died suddenly in Los Angeles, following a heart attack. He was 72 years of age.

With a weight-lifting capacity of thirty passengers, probably the most powerful air liner in the world is being built in Scotland. It is an all-metal monoplane with a wing span of 140 feet.

The Strait of Gibraltar, which by man has ever been bridged or having swum, stands victor over two women tempts from London took of them same within a few miles of the Spanish shore.

An order for four locomotives for the Edmonton, Dunvegan and B.C. Railway has been placed with the Canadian Locomotive company. Work on the order has been commenced and will give employment to 300 men.

The Edith Cavell Post of the British and Canadian War Veterans in Pittsburgh, was presented with a Union Jack at a joint ceremony by the veterans, the Ladies' Auxiliary and the Lord Kitchener Post, of Homestead, Pa.

An Exchange Telegraph dispatch from Athens says the Greek Government has recalled its minister from Turkey because of dissatisfaction with the manner in which Angora has carried out various agreements entered to the Treaty of Lausanne.

The number of farms devoted to raising fur-bearing animals in Canada is increasing and figures issued by the Dominion Bureau of Statistics shows that for the year 1926 there were over four hundred more such establishments than in 1925.

Experts at the French Foreign Office began a study of a Pigeon Americain peace pact which has been suggested by Secretary of State Kellogg. The experts were given special instructions by Foreign Minister Briand to report on the reservations in the Washington text.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It drives it before it comes. Our experience with this relief-giving remedy shows how it proves positive in the manner it advertises. For the result of Hay study and experiment and was not submitted to the public until its makers knew it could do for users well.

Motorist—"It's not my fault! He is not dead, only in the middle of the street.

Policeman—"Don't tell me that. He's lying right here at the street intersection."

Motorist—"Well, he was in the middle of the block when I hit him!"

One great drawback in the popularity of the theatre is its refusal to make concessions.

Sorena Remedies Get Results

Sorena is Nature's remedy for most minor ailments of the skin, resulting eczema of all kinds, Blotches, Blisters, Scaly patches in Eczema, Rough, Red, Pimply Skin, Chapped Hands, Itching Scalp, Dandruff, Chafing, Sore Feet, Sunburn, Prickly Heat, Insect Bites, Baby Rashes

KETCHAMOOT

(Unavoidably held over from last week.)

On Monday, Dec. 16, six horses were reported killed on the railroad track between Kingman and Bardo. It seems the passenger train was five hours late, and was traveling fast to make up lost time.

Russel Schultz who is working at Bruce spent Christmas at home.

William Ingram and Ralph Barnes spent several days in Edmonton last week.

Mr. and Mrs. Herman Lawson and family and Mrs. Geo. Lawson motored to Edmonton on Wednesday.

The Peter Lee and Henry McGinitie families had radios installed last week.

Mr. and Mrs. Carlisle and Mr. Hull motored to Camrose Christmas Sunday, and spent the day with Mrs. Hull.

Miss Hilda Nomoland spent Christmas holidays at the parental home.

Miss Viola Lee came down from Edmonton for the Christmas holidays with her parents.

Mr. and Mrs. Henry Sutton entertained Mr. and Mrs. Joe Sutton and family, Mr. and Mrs. Fred Sutton, Mr. and Mrs. Simpson and their families on Christmas day.

Mr. and Mrs. P. O. Moline and family were guests of Mr. and Mrs. C. A. Ingram Christmas Monday.

Miss Marjorie Lee who has been teaching school near Wainwright is home for the Christmas holidays.

Mrs. O. Barnes was a passenger to Camrose last Friday to visit her mother, Mrs. Hull, whose health is gradually improving.

Misses Mildred and Gertrude Ingram returned home with their sister, Mrs. F. D. Ferguson for a short visit.

Miss Mabel Lawson and pupils are to be congratulated on the splendid program put on at the school house last Friday, Dec. 23, also Miss Mildred Lawson who assisted her sister as organist and with the singing. The concert was the best ever put on and the school house was beautifully trimmed, and packed to the doors. Mr. Schultz as Santa Claus, very ably filled the bill and distributed presents and treats to all the children both big and little. We fear the program was too lengthy for publication.

Albert Sears left Tuesday evening for a trip to Victoria, B. C.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Government of Alberta, Edmonton, January 7th, 1928

Premier Goes East on Railway Business

Premier Brownlee and Hon. V. W. Smith, Minister of Railways, left on Friday for Montreal where they will confer with Sir Henry Thornton and E. W. Beatty, Presidents respectively of the Canadian National and Canadian Pacific Railways, in connection with the possible sale of the railways owned by the Alberta Government. Following a discussion of the Alberta railway situation with the heads of the two transcontinental lines, the Premier has arranged a conference at Ottawa where the natural resources and other problems affecting this province will be discussed. In the meantime, preparations are going ahead for the opening of the legislature at Edmonton on February 2nd.

Heavy Exports of Alberta Cattle

More than $[illegible] worth of Alberta cattle were exported to the United States between July 1st and November 30th, 1927, according to the report of S. C. Reat, American Consul at Calgary. The shipments include some 12,000 head comprising stockers feeders and butcher cattle. According to Mr. Reat, the American markets at the present time are very inviting to stockmen in Western Canada and shipments have shown greater activity during the past six months than in any similar period since the imposition of the Fordney-McCumber tariff in 1922.

New O.S.A. Dormitory Officially Opened

Some 500 people including students and ex-students of the Olds School of Agriculture and their friends and citizens of Olds attended the official opening of the recently completed dormitory building at that institution on Tuesday last. This event was combined with the annual reunion of students of the school which was attended by graduates from many parts of the province.

Inspiring and optimistic addresses were delivered by Premier Brownlee and Hon. George Hoadley, Minister of Agriculture.

With 265 students enrolled in the first and second years of the courses in agriculture and home economics, the present term is proving a busy one for Principal F. S. Grisdale and his staff.

Provincial Exhibit at Seed Fair

An interesting feature in connection with the Provincial Seed Fair which is to be held in Calgary from January 16 to 20th will be an exhibit of the agricultural products and other resources of the province display by the Publicity Branch of the Department of Agriculture. This includes grains, grasses, gums, coal, oil, tar sands and other products and pictures illustrating many branches of agricultural life in Alberta. This exhibit, as well as the many choice samples of grain to be shown at the fair is expected to attract a large number of those who will be in attendance at the U.F.A. convention to be held during the same week.

COMMUNICATION

On his departure from Tofield, the Rev. Fr. Quirk wishes to thank his local friends for their many acts of kindness during the past year.

He trusts that the same friendly relations will continue throughout the stay of his successor.

Until his arrival there will be no services or other church activities, as the C.W.L. will not organise any events.

Mrs. W. L. Forman, formerly 1st vice-president of the C.W.L., has no longer any connection with the C.W.L. in accordance with section three of the constitution.

E. QUIRK

THE WISE FRIEND

Once upon a time—and not very long ago—there was a brother and sister who had a friend. A very special friend he was, who told them stories about men who flew through the skies over far-flung spaces of the earth; of boys and girls who had thrilling and mysterious adventures; of others who had most unusual situations confront them, yet managed to come through their tests with steadfast and courageous hearts; of wild animals in deep jungles—how they lived, hunted, and died. Such a host of things did their good friend tell them of, and how interestingly he told them!

Came the time when their friend moved away to another town. Brother and sister were saddened by his going, for they knew they would miss his cheery smile and the wonderful stories and amusing anecdotes he was so fond of telling them. Then one day the postman brought them a letter from their friend, in which he told them he was sending them The Youth's Companion so that they would not forget him, and that in it they would find just the sort of stories they had so much enjoyed hearing him tell.

And sure enough, a day or two later the magazine arrived, and brother and sister found that it truly did have just such wonderful stories of adventure and sport and mystery, and just such jokes as they loved so well. And every time that a new number of The Youth's Companion arrived, they wrote a note to their friend and told him how much pleasure the magazine gave them.

You, too, may have just that same pleasure, or give that pleasure, by means of a subscription to The Youth's Companion. Subscribers will received:

1. The Youth's Companion—12 big monthly issues in 1928, and
2. Two extra numbers to new subscribers ordering within 30 days.

All for only $2.

3. The Companion's new book of humor "1001 One Minute Stories" also included FREE (send 10 cents to cover postage and handling).

DOMINION HAS ADVANTAGE ON FREIGHT RATES

Washington.—Farm relief came up for its first round of consideration this session in the Senate amid an atmosphere apparently as bitter as of old.

While Senators Bruce, Democrat, Maryland, and McKellar became entangled in a spirited row over farm relief, Senator Arthur Capper, Republican, Kansas, leader of the erstwhile Senate farm bloc, put forward a resolution proposing a reduction of freight rates on grain and grain products exported from this country in an effort to equalize the position of United States grain growers with Canadian competition.

Declaring Canadian wheat enjoys an advantage of eight to ten cents a bushel in lower transportation charges, Senator Capper held this was a serious menace to American farmers and he called for an immediate investigation by the interstate commerce commission of export grain rates. The commission would be directed to adjust rates to a basis that will permit grain and grain products produced in the United States to move as freely as grain produced in the Dominion of Canada to points of export.

According to Senator Capper, the resolution has the approval of various farm organizations of the United States.

"Unless wheat and wheat products of the United States can compete on fairly equal terms in world markets with wheat from Canada, we shall have on our hands a surplus of grain that eventually will disastrously depress the domestic price of wheat and again bring ruin to the grain growers of the middle west," Senator Capper said.

Air Pilot Killed At The Pas

Capt. Stevenson Meets Death When Engine Stalls

The Pas, Man.—A few minutes after he commenced a trial test flight of his aeroplane over The Pas, the engine stalled and the 'plane nose-dived to earth, bringing instant death to Captain F. J. Stevenson, pilot, formerly of Winnipeg and Toronto.

The 'plane crashed in the centre of a street, a twisted mass of wood and metal wreckage. While 300 feet in the air, the engine stopped dead. According to several observers, the 'plane immediately turned nose down and crashed to the earth with terrific force. Captain Stevenson was dead when extricated from the wreckage.

Captain Stevenson, who was a pilot for the Western Canada Airways Limited, a company which maintains aeroplane service between Winnipeg and the northern mineral districts of Manitoba, was alone and testing the 'plane following the installation of new motor parts.

Another Gold Shipment

Canada Has Sent a Further $3,000,000 To United States

New York.—The gold movement from Canada back to New York, which amounted to $5,500,000 in December owing to the discount on the Canadian dollar in the New York foreign exchange market, has been increased to $10,500,000 with another shipment of $5,000,000, consigned to the Canadian Bank of Commerce in New York.

The net loss of gold to the United States during 1927 is placed at $151,-600,000 by the Federal Reserve Bank of New York in its monthly review of credit and business conditions.

Find 'Plane Wing In Sea

Charlottetown, P.E.I.—A piece of wreckage, said to be part of an aeroplane wing, has been found at Miminegash Harbor, about seven miles from Tignish, on the Northeast coast of the island. The piece found was seven feet long, in five sections, fastened by copper screws. There were over a dozen numbers on the wreckage.

Sight Icebergs Below Equator

Montevideo, Uruguay.—Although it is summer below the equator, the German steamship, Atto, sighted three icebergs near the mouth of the Rio De La Plata, the ship reported by radio. Experts attribute the unseasonable cold weather in that region to the presence of these and other ice formations which have been sighted.

Children Rescued

Wilhelmshaven, Germany.—Seven children adrift on an ice floe, were rescued by a naval vessel after being lost four hours.

Curb Money Lenders

Cannot Solicit Customers In Britain Through the Mail

London.—The Money Lenders' Act, which became effective January 1, forbids money lenders from soliciting customers through the mail, but they are still permitted to advertise in newspapers. The end of 1927 witnessed a grand effort by the money lending fraternity to get circulars out through the mail before the new law came into force, and they were plaintive in their appeals to the recipients of the circulars to "keep for reference," with the suggestion to do so in view of "eventualities which may arise in your personal financial commitments."

Deprived of the use of the mail, many money lenders are now attempting to widen their publicity in the newspaper field. With a few striking exceptions, however, prominent newspapers all along have refused to insert such advertisements and they declare they will rigidly maintain this attitude.

Flin Flon Development

Hudson Bay Mining and Smelting Company To Commence Operations

Winnipeg.—Preparations are actively under way for the commencement of real work on the projected development of the Flin Flon mine. Plans for the mill and smelter are being prepared and also for the townsite which will be situated on Ross Lake, about two miles away from the plant.

The Hudson Bay Mining and Smelting Company is the name chosen for the company which will operate the mine.

The company will, it is learned, in all probability operate under a Dominion charter, but there are several details yet to be settled. R. E. Phelan, general manager of the company, who has been in San [illegible] for some time past, is expected to arrive in Winnipeg this month and will establish his headquarters here.

Propose "No War" Treaty

Negotiations Between France and U.S. In First Step

Washington.—France has been asked by the State Department to share with the United States a mission to unite all principal nations in "renouncing war as an instrument of national policy."

The proposals for joint leadership, springing from the suggestion of Foreign Minister Briand for a Franco-American treaty outlawing war, is put forward by Secretary Kellogg as offering opportunity for a "more signal contribution to world peace by joining in an effort to obtain the adherence of all the principal powers of the world" in a renunciation of war.

Reimbursed His Clients

Ones Who Lost By His Advice Remembered In Lawyer's Will

San Francisco, Calif.—The legal profession found in the will of the late Gavin McNab, noted California lawyer, a precedent and a heritage. He left money to reimburse clients who lost by his advice.

The will, filed in the probate court here, disposes of an estate valued at between $600,000 and $800,000 earned in fees since McNab left his place as a hotel clerk and decided to study law.

Of this amount $40,000 was returned to two clients who paid McNab for advice as to investments upon which they lost.

Would Stage Bull Fight

Spanish Matador Anxious To Show Britain What Sport Is Like

London.—Antonio Marquez, famous Spanish matador who is spending his honeymoon in London, wants to stage a "painless bull fight" here.

The Spanish matador, who hopes to demonstrate to the English public that bull fighting is not cruel, is negotiating with a famous amusement promoter to stage the fight in London in order to exhibit the matador's supreme speed, agility and daring to the sport-loving British.

Rich Platinum Area Found

London.—The Colonial Office announces the discovery of a platinum-bearing area of about 40 square miles in Sierra Leone, British West Africa. The deposits are alluvial and are considered important.

A Family Affair

Alliance, Neb.—After his four daughters had married four brothers, Charles W. Sisley, 70, was married here to Mrs. Sarah E. Colerick, 59, mother of the quartet of brothers.

Bandits Make Haul

Armed Robbers Secure $3,500 From Storekeeper At Beaubier

Weyburn.—Armed American bandits, at the point of a gun made a sortie on the hamlet of Beaubier, and, secured some $3,500 from John Kenna, storekeeper. Kenna was called from his bed by two men who declared that they were in urgent need of medicine and he accompanied them to his store, where they produced revolvers, and compelled the man to open the safe which contained money belonging to the Saskatchewan Pool Elevator Company, the International Elevator Company, the Post Office department and Kenna himself. After raking every nickle out of the strong box, the bandits bound Kenna hand and foot and gagged him before they made their getaway.

Beaubier is a new town on the Lake Alma branch of the C.P.R. and remote from communication with police and other centres. The town is located between Lake Alma and Ratcliffe, fifty-five miles south of Weyburn, 30 miles southeast of Radville, fifty miles due west of Estevan, all distances as the crow flies. It is ten miles north of the international boundary and twenty-two miles north of Westby, Mont., a notorious hangout for yeggs and gunmen.

Beaubier is also 20 miles from Bromhead, Sask., a former detachment of the Saskatchewan Provincial Police that was ordered closed last spring, when the force was reduced.

BRITAIN WOULD FURTHER PLAN TO OUTLAW WAR

London.—The British Foreign Office has intimated that it would give most favorable attention to any proposals for outlawing war. At the same time reports appearing in the London papers that the United States' proposed treaty to that end has been forwarded to the British Government are without confirmation. Officials remarked that it would be difficult to comment on a treaty which has been so variously reported in the press.

The Nicaraguan situation receives much more space in the London evening papers than the proposed treaty.

"While the United States is inviting France to join in proposing to the world a treaty renouncing war as a national policy," says The Evening Standard, "she is involved in a campaign in Nicaragua."

The Standard explains this contrast between precept and practice has been brought about by General Sandino, the rebel leader.

The Star heads the Nicaraguan situation: "An Unpopular War."

The Evening News devotes nearly a column to the Nicaraguan situation as against an inch paragraph to the proposed treaty.

Commenting editorially, The Westminster Gazette calls Secretary Kellogg's proposal to France for a multilateral treaty "a shrewd stroke." It is unable to see, however, how this would advance the cause of pacific settlement of international disputes.

CONSERVATIVE LEADER

Col. R. B. Bennett, Conservative Leader, photographed on his return to Canada from his recent visit to England.

Canada Makes Own Program

Will Not Hurry Construction Of Two New Destroyers

Ottawa.—It was stated at the Department of National Defence that it is the intention to have the two new destroyers for Canada built successively and not both at the same time, allowing a certain period for receiving tenders.

The construction of the two boats will take about three years.

This statement was made in answer to some comments by the London paper, Truth, which, among other things, applied to the length of time to which construction of the vessels will take. By constructing the vessels one after the other the financial obligation will be spread over a period of three years.

"We make our own programme," was the comment at the department on the criticisms of the London paper, when read to one of the officials. It was pointed out that the London paper is in error in saying that the Patriot and Patrician are cruisers. They are destroyers and will be simply replaced by other destroyers of a more modern type.

Miner Killed In Snowslide

Body Of Kootenay Man Covered By Tons Of Snow

Nelson.—Semon Wetterhaus, 45, pioneer mining man of the Kootenay district, was killed in a snowslide at the Mammoth mine, near Silverton.

The body probably will not be recovered before spring as tons of snow covers it.

Wetterhaus, who was foreman and part owner of the Mammoth mine, served in the World War with the 225th Kootenay Battalion.

Premier Must Take Rest

Winnipeg.—Premier Bracken, of Manitoba, who suffered a slight attack of appendicitis a few days ago, has been ordered by his physicians to take a complete rest from his official duties. The premier's condition, the doctors state, had not shown the improvement they had expected.

Governor General Inspects Namesake

His Excellency Lord Willingdon, hearing that an internationally-famous Clydesdale stallion "Lord Willingdon" was a feature of the stallions being shown recently at the Ottawa Winter Fair, took the opportunity of inspecting his namesake. His Excellency is shown in the above photograph standing at the left beside the champion. At the right is W. J. McCallum, of Brampton, Ontario, and Regina, Sask., who purchased the stallion in Scotland last year at a price exceeding $10,000, and brought him to Canada in October.

This two-year-old stallion has made a clean sweep of grand championships at Canadian fairs this fall, being grand champion at Toronto, Ottawa and Guelph. The horse has secured the enviable record of being the champion of Scotland, England and Canada. He was brought to Canada by Mr. McCallum, on the Bolingbroke, along with over 100 other pure-bred animals which, with the exception of this stallion, will be disposed of throughout the West. "Lord Willingdon," however, will be shipped back to Scotland shortly on the Canadian Pacific freighter "Berwyn," to be used for breeding purposes until 1930.

Women and the Senate

Stated That Matter Will Come Before Supreme Court Of Canada

Toronto.—According to word received here, Hon. N. W. Rowell, K.C., Toronto, at the request of the petitioners, had been appointed by the Department of Justice, at Ottawa, to argue before the Supreme Court of Canada the eligibility of women for appointment to the senate of the Dominion. The question hinges on whether a woman is a "person" within the meaning of the British North America Act.

Judge Emily Murphy, one of the petitioners, has left Toronto for her home at Edmonton. Her co-petitioners are Hon. Irene Parlby, member of the Alberta cabinet, and Miss Henrietta Edwards, of McLeod, Alta., Mrs. Nellie L. McClung, and Mrs. Louise McKinney, former members of the Alberta legislature.

Mountain Climber Lost

Los Angeles Man Was Attempting To Scale Mount Whitney

Lone Pine, Calif.—The wind swirled snows from the peak of Mount Whitney, highest in the country, smothered out the tracks of Robert A. Evans, of Los Angeles, mountain climber missing since he set out to scale the highest of the Sierras.

A pre-arranged plan of reporting his progress by means of signal flares failed.

Signals flashed from the warm slopes here at the Eastern foot of the mountain brought no reply.

He had planned to be on the summit to hail the New Year. He had four days' food supply.

Pardon Was Impossible

Former Cossack Officer Must Suffer For His Crimes

Krasnoyarsk, Siberia.—Vassili Abalakoff, a former Cossack officer, was condemned to death after a trial in which many witnesses told of the defendant's terrible cruelties to which more than 400 deaths during the civil war of 1919 were attributed.

Eye witnesses described the burial alive of some persons and the hacking to pieces of others. They recounted how his victims were thrown under the ice and numerous deaths from whippings.

In pronouncing sentence, the court held that amnesty for the former officer was impossible.

No Announcement Made

Ottawa.—No announcement was forthcoming from the prime minister following the cabinet council here. Asked if the cabinet had been considering appointments to fill the four senatorial vacancies, Mr. Mackenzie King replied in the negative.

MODIFICATIONS IN NEW LIQUOR BILL FOR MANITOBA

Winnipeg.—A number of modifications in the Manitoba Government's draft bill on liquor legislation were announced by Hon. W. J. Major, attorney-general. The proposed changes will eliminate certain objectionable clauses which raised a storm of criticism when the draft bill was announced.

Permission is to be given brewers to deliver beer direct to permit holders, but to ensure full compliance with the existing laws, authorized inspectors will be assigned to every brewery operating in the province who will supervise all orders received.

The government also has decided to waive the regulation which provides for the production of permits at the time an order is placed.

The bar against brewery encumbered hotels is also to be removed. Modification of this clause of the bill will enable hotels in which brewers are financially interested to operate beer parlors.

The original draft of the bill prohibits establishment of beer parlors in such hotels. A proviso, however, is contained in the amendment clause which stipulates that brewers who have an interest in an hotel cannot dictate as to the firm from which the supply of beer or liquor is to be purchased.

Other modifications provide for reduction in the number of rooms in an hotel operated as a beer parlor. The number is reduced from 40 to 24. The gallonage tax on beer is to be fixed at 12½ cents a gallon. Licenses to veterans clubs also are to be increased and minor changes proposed in the law enforcement clauses.

The modified bill will be presented to the law amendments committee of the legislature at the next meeting.

CANADA MUST LOOK ALIVE TO HOLD ITS TRADE

Vancouver.—"The greatest danger to Canada is an uninformed and uneducated public, an uninformed democracy. I urge you young men to equip yourselves to decide upon the great economic problem before us," declared Hon. R. B. Bennett, addressing the Canadian Club here.

Choosing as his subject "Business," Mr. Bennett emphasized the necessity of Canada making a decision as to whether her strength, economically, was cast within or without the British Empire.

Mr. Bennett, in opening his remarks, said that he might have met with some success materially, but what mattered most was how one could best serve his country.

Turning at once to his subject, the speaker said all must have observed the peaceful but highly competitive war now on throughout the world on the part of all nations to extend their trade. The United States had its emissaries everywhere. The European countries were confronted by the fact that they were losing trade and are making up their minds that they must combine in some form of European union if they were to hold their own in commerce.

Therefore, there was a European United States if they would, and a United States of America. What would be the course of Canada in this economic struggle?

"Canada has the greatest trade per capita of any country in the world," said Mr. Bennett. "But what shall the future be? We cannot stand still. Within we are a part of the British Empire. With respect to the constitutional aspect, I shall not speak before this tribunal. There is another place for that. The British Empire is producing everything necessary for its own consumption. It is a self-contained empire.

"Yet, with all these vast resources, the Empire is without economic organization of any kind. No effort is being made to develop the raw products of which Canada is the greatest depository. As a business proposition we must decide whether our strength, economically, is cast within or without the British Empire. We have great competition but not the slightest organization for economic strength within the Empire."

How this economic organization was to be effected, Mr. Bennett did not say. At the outset of his address he suggested that it would be through provocating rather than political or in the nature of propaganda. He left it to the individual in the audience to give thought to the subject.

"We must decide within the next few years if we are to combine with other parts of the Empire or combine with economic interests elsewhere," he said. "It is economic union with the British Empire or with our cousins to the South," he said.

Exchange Political Prisoners

Ten Released To Poland Condemned To Death By Soviets

Warsaw.—Soviet Russia and Poland exchanged 28 political prisoners held under various charges. Among those released by the Soviets were ten who had been sentenced to death.

Poland delivered nine persons, among them a noted spy named Illnica. Soviets returned 29 prisoners, among them two priests and six women.

At the same time the two countries exchanged a protocol which guaranteed the return to Poland of two more priests held prisoners.

Rescues Crew Of Air Mail Plane

London.—The captain of the British steamer, British Knight, has notified his London owners that he picked up the French mail airplane, N-R-54, of the Latecoere line, and rescued the crew, 56 miles east of Cape Decata. The plane and crew will be landed at Gibraltar.

Recover Bodies From Submarine

Provincetown, Mass.—The bodies of three members of the crew of the S-4 was recovered by divers who entered the sunken submarine. All of the bodies were found in the engine room of the submarine. They were fully clothed and appeared to have met death by drowning.

Would Honor Late Premier Oliver

Victoria.—Hon. Charles Stewart, minister of the interior, is favorable to the naming of a mountain peak after the late Premier, John Oliver, according to advices received here. He will recommend the proposal to the Geographic Board of Canada.

THE WEATHER 1917 to 1927

Mr. Editor:

The weather is always an interesting subject, especially in the winter. I have kept a daily diary for the past thirty years and at the end of each day have set down the weather condition. Many of my friends of- [illegible] about the weather because they know that I have certain set ideas regarding it, and among them I always predict a long warm spell and thaw in January. The following is an extract from my diaries for approximately ten years, omitting 1919 and 1922 when it was not properly kept. I have covered the weather of each year as between the 10th of December and 15th January consecutively. It will be noted that in not one year did the thaw fail to show up in a greater or lesser degree. It is also interesting to note that the break often comes with a blizzard. The extract now follows:

1917—

Jan. 6th, fine and warm. 7th, rained heavily. 8th and 9th, thawing very fast.

Dec. 10th to 20th, very warm, broke on 22nd with blizzard.

Dec. 30th, 6 a.m. Zero, 31st noon, 4 degrees, 3 p.m. 30 above—evening drizzle.

1918—

Jan. 1, 2, and 3, very warm and thawing; 4 p.m. rained heavily.

Jan. 4, 5, 6 and 7, continued very warm and thawing. Midnight 7th broke with blizzard.

Dec. 15 to 20 exceptionally warm and thawing. On 20th broke with blizzard. 21st blizzard.

1919—

Jan. 2nd, chinook and heavy thaw, chinook continuing till 5th.

6th to 15th. Heavy thaw still continuing. Warm evening at nights. 15th broke with light snow.

Dec. 17 and 18, thawing; 19th thawing all night. 22nd, colder. 24th to 29th, very warm and thawing till midnight, zero in morning of 30th. 30th and 31st cold during day, warm at night.

1920

Jan. 1st to 10th, fine and warm, thawing daytime except 5th.

Dec. Latter half generally very cold and below zero.

1923—

Jan. 12th to 15th very mild and thawing.

Dec. Average changeable weather, nothing noteworthy.

1924—

Jan. 3rd, 6 p.m. 14 below; 4th, 6 p.m. 20 above; 5th, 6 p.m. 45 above. Stayed mostly above freezing until 14th.

Jan 13th, 6 p.m., 26 below; 14th, 40 below; 15th to 18th, 40 to 45 below.

1925—

Jan. 1st. Went up to 30 above thru night. 2nd very warm night. 16th, two separate blizzards in afternoon but mild to 21st.

Dec. 29th Chinook wind warm till 31st.

1926 —

Jan. 1st to 17th, very warm and thawing, hardly freezing nights except 14th about 7 degrees through night. On 17th broke at night and then went 20 below.

December 6th to 10th, thawing fast not freezing at nights. 10th very heavy rain afternoon two hours, thawing very rapidly.

11th, worst blizzard ever witnessed by oldest timers, 8 am. to 9 p.m. 14th over 40 below; 29th, thawed all through night.

1927—

Jan. 1 to 5th, fine warm and settled. On the 10th I have this notation in diary "temperature for past three weeks not going below zero at night and from 10 to 35 above thru day.

RAYMOND W. PINCOTT.

Tofield Farmers Supply Co., Tofield

Here and There

Northern Alberta's biggest farm land deal this year was completed the other day when the well-known Trent Farm was sold to a colony of Mennonites for more than $120,000. The new owners, eight families, will take possession on New Year's Day. The farm, which is in the Tofield district, has 5,641 acres.

Passengers on the "Empress of Australia" now touring the world had a memorable experience when they witnessed brilliant military manoeuvres near the Grand Pyramid initiated by King Fuad of Egypt in honor of the visit of King Amanullah of Afghanistan. Some of the passengers were subsequently received at King Fuad's court.

Toronto.—An optimistic note with regard to the market for Canadian bacon was struck by A. J. Mills, representative of the British Ministry of Food in conference with packers here. He expressed the conviction that Canadian farmers would be very poorly advised to slacken in hog production at the present time, stating that an improvement in the British market was in sight with many of the countries which had been flooding Britain with bacon during the past year being practically out of the business.

A handsome New Year's gift to the people of Canada is indicated in the announcement of reduction of rates charged by Express Companies of the Dominion for shipment of packages up to 15 lbs. in weight and not over 3½ feet in length, width or depth, which has been issued and filed with the Board of Railway Commissioners for Canada by C. N. Ham, Chairman, Express Traffic Association. The reduction went into effect January 1 and it includes a continuation of the arrangement under which the Express Companies give protection against loss and damage up to $50 without extra charge on packages carried.

Toronto.—The Exhibition at Toronto led all the fairs on the continent last summer with an attendance of 1,780,000, according to a report by E. L. Richardson, of Calgary, President of the International Association of Fairs and Expositions. He states that fairs each year are becoming more popular and more successful, educationally and financially. More than 20,000,000 persons attended the 2,200 fairs in the United States and Canada this year, and attendance has, in fact, increased each year since 1910 by about 2,000,000. Investments in buildings and grounds is put at $270,000,000 and prizes each year amount to $8,000,000.

FOR SALE.—Pure Bred Buff Orpington cockerels. Good thrifty birds and good color. $2.25 each if taken before February 1st. 'Phone 409, Mrs. Herman Lawson.

MILTON SILLS

In the Colorful Drama

"Puppets"

Here's an actor who spurns money! sought religion; found the stage. Milton Sills starring in this picture has had only two weeks vacation since 1925. Nothing more dramatic has ever been shown in the last five years. It is mighty with the strength of the man who had courage enough to give sacrifice where any other would take revenge.

Van Brundt Grain Drills

We will have again this year a full supply of the famous VAN BRUNDT GRAIN DRILLS We sold many of these drills in this district last year and they all gave great satisfaction. The Van Brundt's Special Adjustable Gate permits the sowing of various seeds, and all seeds are sown at an even depth. This means early and even germination and even ripening. There are many other points of advatage to the Van Brundt and we would be pleased to tell you about them.

LOCAL and PERSONAL

Born.—To Mr. nd Mrs. Emile Goubeault, Lindbrok, Alta., on January 10th, a son.

Born.—To Mr. and Mrs. Tebo, at Wetaskiwin, a daughter.

Mrs. C. M. Simmons, now of Edgerton is up this week for the Ladies' bonspiel.

Mr. Jobb, who left immediately after Christmas for a visit to his home in the Maritimes, returned home to Tofield last Friday.

Mrs. Noland returned on Saturday last after spending a few days in the city.

Miss Lorett Ross, who has been taking a brief rest in the city, returned to Tofield on Wednesday last.

Mrs. Booth and Mrs. Ferguson are attending the U.F.W.A. convention being held in Calgary this week.

Dr. Law, Mrs. Carmue and Mrs. Brenner motored to the city last week.

Mrs. Barden underwent an operation in the Royal Alexandra Hospital on Monday last. Latest reports are that she is doing as well as can be expected.

Miss Edith Barden is visiting at the Easton home in Camrose during her mother's stay in an Edmonton hospital.

Miss Argue, of the local teaching staff is in the Camrose hospital undergoing medical treatment. Miss Audrey Jobb is taking her place while she is absent.

Mr. Stone, the recent baker at Tofield, and who recently was the victim of fire, left for Edgerton on Monday. We understand he will commence a bakeshop there.

Miss G. Wahlston is returning to Wetaskiwin on Thursday.

Mr. A. W. Wallis will take treatment at an Edmonton hospital on Monday next. The shoe shop at Tofield will be closed on Monday and Tuesday.

Robert Hopgood is the new bank junior, taking Gordon Jobb's place, who we understand will shortly be moved to another branch.

Mrs. Daley and two sons of Little Gem, near Chinook, are visiting at the Snell home for a few days.

VEGREVILLE BONSPIEL

The nineteenth annual bonspiel of the Vegreville Curling Club will be held at Vegreville on January 24-25-26. There are five events, all carrying splendid prizes. The Vegreville Curling Club extends a cordial welcome to all visiting curlers.

MR. BOONE DONATES TROPHY

Mr. Boone of Edmonton, donated a trophy to the Tofield Ladies' Curling Club. This trophy will be used as a consolation event at their annual bonspiel now being held.

WEDDING OF LOCAL INTEREST

The marriage of Miss Hilda Hershberger, daughter of Mr. and Mrs. John A. Hershberger to Melvin Roth, son of Mr. and Mrs. V. L. Roth of Tofield, Alberta, Canada, was solemnized this afternoon, Thursday, January 12th, at 2:30 o'clock at the East Fairview Church. Rev. J. E. Zimmerman performed the ceremony. The bride wore a lovely gown of white satin back-crepe and her bridesmaid, Miss Elva Hershberger, a sister and Miss Norma Schweitzer wore crepe-de-chine dresses of a light blue shade. The groom wore the conventional blue and was attended by his brother, Reuben Roth and his cousin, Earl Roth, both of Tofield, Canada.

Following the ceremony, dinner was served to 140 guests at the home of the bride's parents, where a color note of blue and white was used in the decorations.

Mr. and Mrs. Roth will be at home in Tofield, Alberta, Canada, after March 1st.

NOTICE OF ANNUAL SCHOOL MEETING

PUBLIC NOTICE is hereby given that the annual meeting of the ratepayers of Tofield School District No. 1939, will be held in the Town Hall, Tofield, on Friday the 27th day of January 1928, at eight o'clock p.m.

J. W. CHAPMAN,
Secretary-Treasurer.

Ladies Bonspiel Big Success

The first Tofield Ladies' Curling Bonspiel, held at Tofield this week, was a complete success. The weather, especially upon the opening day, tended to make the ice heavy and it was hard going for the players. The second and third days, however, were considerably better and some very close and exciting games were played.

Besides quite a number of local rinks, there were eleven visiting rinks, viz: six from Royal Victoria, Edmonton; two from the Granite Curling Club, Edmonton; one from the Scona Curling Club, Edmonton; and two from the Viking Curling Club.

There were four events, viz: the Ash Cup, Young trophy, Kline trophy and Boone trophy (hard luck.)

The prizes in the Ash Competition were:

1st., Four Salad Sets.

2nd, Four Hand Painted Fruit Bowls.

4th, Ansley Cups and Saucers, (Indian Tree.)

Young Trophy.—

1st, Four Vases, French Pottery.

2nd, Four Brass Candlesticks.

3rd, Four China Teapots.

4th.—China Flower Baskets

Kline Trophy (Third Event)

1st, Four Tiffany China Vases.

2nd, Four China Powder Boxes.

3rd, China Cups and Saucers.

4th, Four Mantle Ornaments.

"Special" Hard Luck Prize—Four Pickle Forks.

At time of going to press, the finals were about to be played. The rinks reaching the final stage of the Grand Challenge were Sellars of the Granite and Millar of the Royal.

The finals in the Young trophy were to be played by Collier of Viking and Lambert of the Royal.

On Wednesday night a splendid banquet was held at which some 96 ladies were present. Mrs. McCauley occupied the chair and gave an address of welcome to the visiting curlers. This was responded to by a representative of all the visiting clubs who had rinks present.

Some musical and vocal numbers were given and thoroughly enjoyed. If possible a more detailed report of the banquet will appear next week.

HOCKEY

Two hockey contests have occured since the last issue. The first at Holden on Saturday, when a team from Tofield journeyed to that town to play an exhibition game. The Holdenites were successful in retaining their honors, by beating the invading team by the odd goal. The other game was held at Tofield on Tuesday night between the same teams. Again the Holdenites won by the odd goal. On Tuesday the ice was soft and heavy and the puck hard to control. Ambrose Yakibuski was responsible for one goal and Bud Hannan for two. The Holdenites have a good team, their strong points being good team work, of which the Tofield team were entirely lacking.

We were a bit premature in our statement regarding the Dawson Cup. A challenge for this cup has to be sent to both Holden and Wainwright before a game can be played. This has been done and a game will most likely be played in the near future.

LINDBROOK

The warm weather is pleasing everyone here, although even now some are heard to mourn the loss of snow having loads to haul. Cheer up, "haulers" you've two or three months for it to come in yet.

Mr. L. Hooper is home on a short holiday from the city.

The annual ratepayers meeting was held here in the school last Friday. Mr. J. Bailey Jr., being elected trustee, vice Mr. W. Glenn retiring trustee Mr. Glenn was nominated but declined the nomination. The annual "moving of the school" was discussed and some seem to favor forming a new district, if possible.

We learn that Mr. R. Rogers has purchased the S.E. qr. of sec. 10-51-20, w 4, from the S.S.B. at a low figure. It was formerly held by Mr. W. Jenne.

Mr. Otto Lindgren has purchased the N.W. qr. sec. 12-51-20, w 4.

All of section 1-51-20 w 4 is now sold.

BARDO

At the joint meeting of the U.F.A. and the U.F.W.A. last week, Monrad Finseth and Mrs. John Jevning were chosen delegates to attend the convention at at Calgary this week. They went on Monday. Others from here who are in attendance are, Mrs. Monrad Finseth and Messrs. Foshaug, Raymond Nordlum and Anton Larsen.

The Misses Burghild Foshaug and Nora Rude are caring for Mrs. Finseth's children in her absence.

Mr. and Mrs. Bennie Anderson, the Misses Betsy and Ingval Ness and Olaf Anderson, attended the young peoples convention at Camrose last Sunday.

Friday the ladies in the south part of the district attended a quilting party at the Dave Roth home. On Tuesday Miss Eva Wideman had the young ladies for a similar party.

Mr. and Mrs. Johannis Eide and children and Mrs. Jennie Haakstad who have been visiting here for some time, left for their home in Grande Prairie on Sunday evening.

Mr. and Mrs. Lerbekmo, visited in the Rude home on Sunday.

On Friday vening a shower was given Mrs. Pete Eggan at the Jacobson home. The bride received a gold band set of dishes and numerous other useful and nice presents. Mrs. Eggen sr., and Mrs. Jeobson served an appetizing lunch.

A sleigh load of young people out for a frolic on Saturday night, capsized. A young man from Norway who is staying at Mr. Jacobson's had his shoulder and arm so badly hurt he will be unable to work for some time. Others were bruised considerably.

J. King and J. Yoder motored to Edmonton on Monday. Mrs. Joe Stauffer and Joe Eide were among those who visited the city on that day.

Clarence Rude has bought and moved the barn from the Emil Rude farm to his own farm.

Mr. Jacobson sawed wood for Mr. Johanson and Mr. Foshaug this week.

Mr. and Mrs. Steenvisited with friends at Amisk Creek over Sunday.

LAKE SHORE

Mrs. A. N. Booth went to Calgary on Monday morning to attend the annual convention of the United Farm Women of Alberta which is being held there this week.

Mr. and Mrs. Oscar Barnes and Mr. Hull of the Ketchamoot district visited Mr. and Mrs. R. C. Phillips on Sunday.

Mr. and Mrs. Earl Ferguson of Rosemont spent Friday night at the Booth home. They were enroute to Ryley by motor.

Lynn Phillips was unfortunate in spraining his ankle while coasting on Sunday afternoon at the Henry Tiedeman home. Meanwhile he is confined to the house with the injured member.

Mr. and Mrs. T. A. Jones visited Mr.and Mrs. Bethel on Sunday evening.

We are sorry to report that Mr. Hawley has been quite ill for some time.

Mr. and Mrs. T. E. Seale visited the latter's mother Mrs. J. S. Munro east of town on Sunday.

The Baptist family visited at the Bethel home one evening last week.

Mrs. Roe Phillips is visiting her mother, Mrs. C. Wolfe at Rose Creek, this week.

The annual meeting of the ratepayers of this school District was held on Saturday with the usual attendance of three.

Mrs. W. Schroeder, and son Wilfred, of Woodlawn, visited Mr. and Mrs. McLean of this district on Sunday last.

U.F.W.A. NOTES

The first meeting of the new year was held on January 14th at the home of the president. The attendance was smallerthan was expected, but our sloganis "Hope for the best, prepare for the worst, and take what the committee gives you," so we are hoping for better next time.

The roll call was answered by "How I spent my Christmas Holidays." Turkey figured prominently in most of the answers.

Mrs. Ferguson gave a splendid demonstration of making tailored buttonholes and pockets. (No excuse for us to use dome fasteners hereafter.) She was given a hearty vote of thanks.

The meeting then adjourned and Mrs. Ferguson served a dainty lunch and a very pleasant hour was spent over the tea cups.

The next meeting will be held on Saturday, January 28th at 2:30 p.m., in the Town Hall; a joint meeting with the U.F.A. The reports of the delegates to the annual convention will be given at this meeting, so do not fail to be there.

Remember time and place.

KETCHAMOOT

Miss Emma Bruhs visited several days with her sister, Mrs. Henry McGinitie last week.

Mr. Dick Turner and sister, Miss Edith Turner moved last week to their new home on what is known as the Grant farm where they built a nice comfortable house.

Four of our little sports, Herold and Alvin Shultz, Jimmy Ingram and Charlie Sears were passengers to Tofield on Friday evening to play hockey with the Tofield team. They were in the Bardo team.

Mr. and Mrs. Henry McGinitie entertained some 40 young people at their home on Tuesday to a whist drive, ten tables playing. Gertrude Ingram and Glenn Carlisle were 1st prize winners; Janet Brown and Martin Lawson, took the consolation prizes. Refreshments were served and all reported an enjoyable evening.

Little Miss Eileen Stirritt, daughter of Mr. and Mrs. Sam Stirritt, underwent an operation for appendicitis at the St. Mary's hospital in Camrose on Saturday. She is doing as well as can be expected.

Mr. Gladue, sr., Mr. and Mrs. Trelenburg of Lindbrook, moved into the Dick Turner house recently vacated. They will do brushing for Chester Coombes.

A splendid crowd of some 20 members and visitors turned out to the M.A.S. meeting on Wednesday afternoon at the Sears home, which we were pleased to see, this being the annual meeting. Visitors included Mullen, Mrs. John Wilson, Mrs. Haukdal,Mrs. J. H. Ingram, Mrs. C. Coombes, Mrs. Henry McGinitie, and Misses Mildred Lawson and Lillian Carlisle. A very satisfactory report was read by the secretary, Mrs. Appleby, of the year's work. Money and work included, money put by towards church fund, money towards minister's salary, missionary budget, sunshine fund, Christmas treats, Sunday school fund, fruit and flowers for the sick. Work included, Thanksgiving supper and bazaar, picnic and socials, but not the least, the pleasant afternoons spent once a month at the different members homes. Officers electedfor the coming year, President, Mrs. L. Carlisle; vice-president, Mrs. B. Widman; secretary-treasurer, Mrs. J. Appleby (re-elected); assistant, Mrs. C. Whillans Refreshment committee, Mrs. C. A. Ingram, Mrs. W. A. Mitchell, and Mrs. W. Sears. We wish to thank Mr. Worton who has kindly published our activities free of cost since the Red Cross days.

The annual school meeting was held at the school house on Friday afternoon with nine ratepayers present. Mr. Marsh Mitchell was elected trustee to fill the vacancy of Mr. Williams, but after the meeting had closed, it was discovered that Mr. Mitchell was not eligible for office. The meeting was re-opened nd Mr. Williams was re-elected trustee. Three of the ratepayers had gone home and not a chance to vote at the second meeting, therefore we will wait to hear from the department to see if it will be necessary to call another meeting.

A social evening will be held at the Whilans home next Friday night, January 22nd, under the auspices of the M.A.S. A pleasant evening is promised to all who will come. Everybody welcome.

Mr. and Mrs. Joseph Brown, Mrs. John McGinitie, Leslie McGinitie and Joe Brown motored to Edmonton on Wednesday. Mr. Brown remained in a hospital for X-Rays. Mrs. Brown returned home on Saturday.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is the finest tea in the best package—Aluminum

Grain Crops In 1928

The prediction has been made from many sources, and with but few reservations, if any, that the year 1928 gives promise of being one of the greatest years of development in Canada's history, marked by unprecedented activity in mining, manufacturing, building, water-power development, transportation, and a rising tide of immigration. Authorities in banking and finance are a unit in declaring that Canada is now in a position to take a great step forward, and that apart from the financial ability and resources of Canada itself, both British and United States money will be available for sound development enterprises.

What of agriculture, the basic industry of Western Canada, and upon the prosperity of which much of the growth and prosperity of all Canadian industry depends?

It is generally recognized that agriculture occupies a stronger position today than it did a few years ago and that conditions have been steadily improving year by year. There is a feeling of hopefulness abroad that this situation will continue. But if 1928 is to prove a successful year for our Western farmers they must themselves take time by the forelock and lay the foundations of that success. It is now when the snow is on the ground and the temperature hovers around the zero point that the first step towards ensuring good crops in the fall of the year must be taken.

Later in the year everybody, and especially the farmers, will look anxiously for adequate rainfalls at the right season, for bright sunshiny days, for an absence of frosts and, rust and other blighting agencies, and for good weather for harvest and threshing. But a combination of all these favorable conditions will not in themselves assure the West a bumper crop. Something more is required, and now is the time to provide it. The conditions noted above are not within the power of man to determine, but, fortunately, it is in his power absolutely to provide the first essential requirement, namely, good, clean seed possessing a maximum of germinating qualities.

Unless the best of clean seed is sown, the best and cleanest crops cannot be obtained. If weed seeds are sown, weeds and not wheat, oats, or other saleable grain will result. This fact is so obvious that it would seem quite unnecessary to lay any stress upon it. But what is the situation?

All Western farmers can profit from the lessons learned from a seed drill survey conducted by the Saskatchewan Department of Agriculture last year. In 35 townships samples of grain were taken from the seed drills of the farmers and tested as to grade. Out of each ten samples submitted in wheat, three graded No. 1 or No. 2, four graded No. 3, and three graded rejected.

The oats being sown did not make as good a showing. 16 per cent. graded No. 1 or No. 2, 16 per cent. graded No. 3, and 68 per cent. rejected. [illegible]

MUCH INTEREST IN COMING SESSION OF PARLIAMENT

Ottawa.—Questions which arise out of the recent Dominion provincial conference promise to have considerable predominance in the legislation of the impending session. It is hoped to bring in a bill to meet the views of the western provinces, especially for regulation of the sale of shares and generally to harmonize federal and provincial authority in respect of company incorporation, it was learned here.

Possibly there may be a bill respecting Alberta's resources, that is, if, before the session ends, a final judicial determination is reached in the educational aspects of the autonomy bill. It is thought possible that Alberta may intervene in the case so that it may be taken before the Privy Council. That tribunal has demurred against hearing it because the Dominion Government, in its anxiety to have a final decision once and for all, is really appealing from the Supreme Court judgment here sustaining its own contention. This is unusual and the matter hangs fire.

Now that, on the lines previously indicated, the St. Lawrence advisory [illegible]

Death Of Noted English Writer

Thomas Hardy, Dean Of English Literature, Passes In 87th Year

Dorchester, Eng.—Thomas Hardy, aged dean of English literature, is dead at his home here after a month's illness.

The famous 87-year-old novelist had a chill December 12, and thereafter his condition was alternately hopeful and then critical, but his age imposed heavy odds against recovery.

With Hardy's death one of the greatest of the Victorians, scenes of whose novels of English life were laid in his beloved Wessex where he lived most of his years, passed from the literary world.

Hardy died in surroundings which he, no doubt, would have chosen for his end. The historic country side of his home was to him the most loved of spots. More than 40 years ago the novelist planned and built a fine red brick and stone country house which has been his home and sanctum ever since. It was in this home that he produced some of the greatest literature of modern times.

OLD-TIMERS HAVE GOOD TIME AT EDMONTON

The old-timers of the Tofield district who attended the old-timers reunion held at at Edmonton last week, came home with glowing tales of the wonderful time they had had there.

"It was just like old times" said one Tofield old-timer, "no fuss or style, just a dandy social time."

Among those from Tofield who attended, were Mr. and Mrs. Wm. Roberge, Mr. and Mrs. Albert Roberge, Mr. Wills, Mr. Bloss.

There were probably others present andwe would be glad to have their

Here and There

Evidence of reconstruction work in Yokohama is seen through the fact that a five storeyed steel and reinforced concrete hotel was officially opened recently. The building, known as the Hotel New Grand, is of fireproof and earthquake-proof construction and is modelled after the style of the best Canadian hotels.

Toronto.—The Province of Ontario is at the close of the greatest gold producing year in its history, according to officials of the Department of Mines, who forecast an increase in gold production this year of $2,000,000 as compared with last year's output. In addition, the total mineral production is expected to be more than $31,000,000—a gain of $4,000,000 over 1926.

Halifax.—Boys' and Girls' Swine Clubs are now well established here. Calf Feeding Clubs are also on the increase and it is expected that in 1928 the latter will attain the same number in the province as the former. Egg marketing circles are also being organized and much good work is already reported. These should prove a valuable aid to the poultry industry.

Preparations for the Banff Winter Carnival, to be held February 4-11, are well under way. Canadian mushers are training and intend to make a strong effort to bring back to Canada the "Strongheart Trophy" which was carried to the United States by Warren Cordingly, of Ashton, Idaho. It is anticipated that there will be several teams from the United States competing again this year.

Saint John.—An epoch in the transportation of cargo between Canada and the United Kingdom was feted here recently when W. R. MacInnes, vice-president in charge of traffic of the Canadian Pacific Railway; W. A. Wainwright, assistant to the chairman, with other officials of the railway, inspected the C. P. fast-cargo liner "Beaverburn," which recently docked here, completing her maiden voyage.

A CHRISTMAS SURPRISE

(By Elsie Bartels, Barrhead)

When we first came to the homestead we did not have very good Christmases because we were very poor. The only presents we would get would be what mamma could make or what grand-ma or grand-pa would send us.

One Christmas it seemed as though it was going to be the worst one of all because we had got nothing through the mail. Christmas Eve we all got ready and went to the post-office to see if anything had been sent. When we got there we were all disappointed because nothing had come. As we were coming home we saw a light in our house and we made our horses go fast because we thought our house was on fire. When we reached the house we found that grand-ma and grand-pa had come while we were gone. They had brought in a little tree and decorated it. They had brought all kinds of candy, nuts and presents. Also a Christmas cake and a big fat turkey. That was the best Christmas we ever had. I wish they would come and surprise us again.

RED CROSS SEEKS INFORMATION RE THE BLIND IN ALBERTA

A request has been received by this paper from the Red Cross Society, 498 Civic Building, Edmonton, that we obtain for them the names and postal addresses of all those in our district who have the misfortune to be blind.

The statistics thus obtained are for the use of the Society of the Blind, who hope to get in touch with all blind people in the province. We shall be very glad to co-operate with both the Red Cross and the Society for the Blind, and trust our readers will make an effort to do their part also.

The Red Cross asks that anyone knowing the name of a blind man, woman or child living in Alberta (not ex-soldiers) should report the same to their headquarters, at 498, Civic Building, Edmonton. Kindly assist the efforts of these societies by giving thp matter your immediate attention, and it is hoped that all names and addresses will be written in a clear handwriting, preferably in printed letters.

POT-POURRI

Important Young Man (indignantly:) "How long will the next train be, porter?"

Porter (who had had enough of it when the last train was missed: "How long? Can't say. I'm sure, to a foot or two. Four or five coaches and an engine or so."

—:o:—

The Retail Merchants Association is asking for more stringent legislation against those giving worthless checks. What about the fellows who don't give checks, either good or bad?

—:o:—

"When I was young," said aunt Jane, "girls never thought of doing the things they do to-day."

"That's probably why they didn't do them."

—:o:—

The Labor and Trades Union also desires legislation giving fuller dinner pails, or something along that line.

—:o:—

Molly (wearying of sermon, in very audible whisper) —Mummy, if the church caught fire, would he stop then?"

—:o:—

There is no peace for us dads. When we keep busy we are callous. When we are idle we are lazy. So the little girl must have been right. "Mother," she exclaimed, "are we going to heaven some day?" "I hope so," was the reply. "I wish papa could go too." "Well, don't you think he will?" "Oh, no. He couldn't get away from the office."

—:o:—

"Don't you know it's wicked to catch fish on a Sunday?"

"Who's catching fish? Haven't caught a fish all day!"

—:o:—

THE SMILE

It's never worth while to forget
how to smile
However we're longing to frown
For hearts that are plucky are usually lucky.
And find the gold edge to the brown.
Life isn't all fun—and we know, everyone,
We're subject to troubles and trials;
But courage and grit keep the journey sun-lit,
So always remember your smiles!

MISS L. E. SKINNER, R.N.
(Registered Nurse)
Graduate of General Hospital, Stratford, Ontario.

Banff Winter Carnival Will Be Colorful Event

Girl ski jumper and Mt. Rundle

Fancy skaters, Banff

Banff, the capital of Canada's National Park of that name, is known to the world as one of the most beautiful and fascinating of summer resorts. It is, however, not generally known that Banff in winter is equally delightful, and that many people prefer it at this season, especially during its Carnival Week. The dates for this colorful event are February 4-11.

The town is always a blaze of colored lights; Indian tepees are at intervals along the main street, for the Stoneys also take part in Winter's pageant. Fireworks gleam on the Ice Palace, from which many events will start. They move quickly and are kaleidoscopic in color and swiftness, sports are varied and masquerades are an additional excuse for more excitement and hilarity.

There are many competitions in all lines of sports during Carnival Week, and even sportsmen will have their fun, for trap-shooting is on the programme as the Banff Gun Club holds its annual competition at this time. Another novel event for a Winter Carnival is packing, making and breaking camp, and also the famous diamond hitch is staged by members of the Rocky Mountain Guides Association, who evidently are not afraid of rivals during the next annual meet of the Trail Riders of the Canadian Rockies.

Skiing is possibly the most popular sport, and the country affords all that could be desired. There are competitions in ski-jumping for professionals, amateurs and young boys; ski-racing, ski-joring races, snow-shoe races and novelty events. Hockey, Canada's great national game, is one of the drawing cards of the Carnival. Teams come from all parts of the West to compete, as many clubs enter for the speed and figure skating; among them the Winnipeg Skating Club. The Banff Dog Derby is one of the outstanding events which should be mentioned. The course, from Calgary to Banff, is 84 miles. The annual bonspiel of the Banff Curling Club will be held during this week. Recreations are so numerous that all visitors can find the form of diversion that pleases. One great novelty is swimming in the Government hot sulphur baths in the open air, with snow and, possibly, icicles around.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

PAINTED FIRES

COPYRIGHT, CANADA, 1925

CHAPTER XVI.—Continued

Jack kissed her again. "Forget him, Helmi," he said; "he is a poor, dirty, miserable old crab, and he cuts no ice in our lives."

Helmi, who knew that weddings should be stately and dignified ceremonies, was deeply distressed. "Jack, I cannot feel that we are married by just those little no-good words; no prayers; no good wishes; no solemn words at all. It's a wicked way—I not like it."

"I don't like it, either," Jack replied, "but it is legal."

"I'll tell you, Jack." She was recovering her good spirits now. "I know what we will do—we'll make it good. When we come to little pure—what you call creek—on the way home, we'll stand one on each side and say good words across the running water, and then we will be married sure. I will feel better then."

"All right, Finn anything you say."

They stopped beside a Little brook that found its way down to the river, following one of the flutings in the saucer's edge, and there, with the horses looking wonderingly on, they held each other's hands across the running water and plighted their vows:—

"I take you, Helmi, to be my wife," said Jack, "and I will love you always." And Helmi said, "I take you, dear Jack Doran, for my man, forever."

And then, still holding each other's hands across the little stream, they repeated the words that Helmi had learned that night so long ago now at the Girl's Club.

"These are good words, Jack, I learned them in God's house. They are religious words that God understands. I'll say them first, then you.

"Cherish health; seek truth; know God; serve others."

Jack repeated the words after her, and then they kissed each other and stood silent for a moment. And for their witnesses, besides the angels in heaven, who surely were looking down, they had two honest bay livery horses that bore upon their shoulders the honorable scars of patient service.

And in the woods near by a robin, which really had retired for the night, opened one sleepy eye and sang a little song because it was the Springtime and he, too, had a pleasant dream.

CHAPTER XVII.

The tops of the mountains still held the glow of sunset although the valley was filled with mountain darkness. The lights in the curtainless windows of the little houses made bright holes in the platinum curtain of night. Helmi lifted her eyes to the hill-tops for some sign of encouragement—the hills had never failed her—and, flinty-hearted, stern and rock-ribbed though they were, they smiled back at even mountains smile at young lovers. The sky above them was clear and blue, with every cloud tidied away for the night.

As Helmi and Jack drove into the one little street of Eagle Mines there came to them the heartsome smell of frying bacon.

"Good luck, Helmi," said Jack, "it's good luck to smell bacon frying when you're hungry, isn't it?" He liked to laugh at her Finnish superstitions.

Helmi breathed deeply. It seemed to her that the magic hour of love would last forever, and that each night of her life would come to meet her as this one was coming, on wings of gossamer and gold.

Helmi and Jack together took the team to the stable, and while Jack paid the bill Helmi patted the horses' heads and talked to them in Finnish.

"Come on, Helmi," Jack called, starting to walk toward their house.

"Wait a minute," she replied, running after him. "Can't I say thank you and good-night to my two [illegible]—what do you call them?"

When Helmi entered the little house all her fears fell away. Here was her home, and the gates of hell could not prevail against it. The lamp was lighted on the table, her new, shining kettle was boiling on the stove. These little attentions had been shown them by old Sim, the night watchman. Old Sim had had a checkered career matrimonially, but some old memory, which unfortunately he was not able to catalogue accurately, stirred in him when he saw Jack and Helmi drive away, and in a sudden rush of sentiment he had thrown after them his one gaiter for good luck. All the afternoon he had thought of them in his waking moments, and just before he went on duty he went over and lighted their lamp and fire, just to remind them that someone was wishing them well. As he settled down for his long night vigil at the mine Sim tried to decide once and for all whether it was of Maime, Lucy or Min that the Finn girl always reminded him.

Helmi pulled a chintz apron over her black dress and began to get the supper ready. Jack had gone to the postoffice to see if there was any mail—anyway, there would be the paper. Helmi stepped about lightly and happily in her new home. Oh, what a letter she would write home to Finland! Anna would be glad, and her grandmother, too. Now she knew what the river was singing—the river was right—home is best.

Jack came in then and hung his coat behind the door, and stood smiling at her. The bacon was frying—the kettle singing. Helmi drew the blinds on the three little windows.

That night, after Helmi had gone to sleep, Jack lay for a long time looking into the darkness. The fire in the stove had burned low, giving out but a faint glimmer through the mica windows. What a lot had happened since morning! He tried to forget the terrible ten minutes in the magistrate's house. Maybe Helmi would tell him after they got to know each other better. Anyway, he was glad he had her here right beside him, and even if he never should know the truth he would trust her. Then he tried to turn his thoughts to the great secret he had to tell her.

She thought he was a common miner, and had married him as such. Helmi, he knew, would be happy to live in this little house all her life with him. But better things awaited her. He tried to picture her surprise; and still he knew she would be anxious, too, when she heard he would have to leave her before long. That was the worst of it . . . Hang that old magistrate!

The wind began gently in the mountain pass, coming in from the sea so far away, a soft Spring wind, sent to ferret out the last snowbanks hiding in river-bottoms and below trees—a sighing, singing wind, that went by the little house with gentle whisperings. But tonight Jack started at its voice, because it had something sinister in it and full of malice—a sort of double meaning for all it was so spring-like and so velvet-footed. He could hear in it the cackle of evil tongues, searing and stabbing, behind doors, in corners.

Helmi, knowing nothing of this, and having no sense of guilt or doubt, slept peacefully on.

They were married on Friday. On Sunday Jack told her his great secret.

He had been on an exploration party the year before, up on the Liard River, and had seen the gold in the sands, and knew there must be great deposits farther up. He had seen oil dripping into the river and running away, red and blue and green, and once had put his can below the drip and put the oil in a basin of the rock and cooked his supper on it. But the gold, it was the gold he was going to find. When he was in the city at Christmas time he had met a man whom he had often heard of in the North, a prospector who had been there fourteen years searching for gold, and now he had found it away up on the Nehanni River. He had found the motherhole, and had showed Jack specimens of the quartz with gold shining in it. Jack had seen it with his own eyes, and while he told her of it, his eyes gleamed with man's ancient lust for gold.

"That's our secret, Finn," he said, "aren't you glad? Oh, Helmi, there are silk dresses and diamond rings in this for you. I want my girl to have every good thing in life—English, education, poetry, music, fine pictures all the lovely things her heart craves, yes, and a trip to Finland, and plenty of money for anything she wants to do with it.

(To Be Continued.)

Women Like To Sew

Two Thousand Women Tell Why They "Sew Their Own"

Through a recent questionnaire 2,000 women in thirty-two states have agreed upon one principal reason why they sew their own clothes despite the fact that ready-made garments are so inexpensive and time so precious.

"The chief reason," says Farm & Fireside, "is that women love to sew for the joy of sewing as well as for the satisfaction of saving a few extra dollars. Seventy-five per cent of the women added as another reason the fact that what they save by sewing they can put into better materials. Ninety-five per cent. of the answers contained the recommendation that more stress should be put upon teaching girls to cut, fit and sew fine seams as early as possible in life. Scores of other women recounted the advantages of home sewing, but said that, regardless of saving or better materials, they loved sewing and would make their own clothes at any cost.

"The survey showed that nearly all of the 2,000 women make from six to ten kinds of garments, the biggest home saving being in pajamas and nightgowns. The obvious reason for this is the fact that fitting is the most difficult part of home sewing, largely as the result of not employing properly made patterns. It was also shown that a remarkably few women use their sewing machine attachments despite the great time saving that can be effected by their employment."

Ambitious Highway Project

Good roads from Canada to Chile in the greatest highway project ever planned by world engineers will do more to establish friendly relations between nations of the western hemisphere than the combined strength of the world's greatest armies, stated Jose Rivera, secretary of the official Mexican delegation to the American road Builders' Association, at Cleveland.

Eve—"I think a man should give his wife plenty of rope."

Ernest—"Yeh, I did with mine and she skipt."

Perhaps love is blind, but it manages to find its way to the ministers.

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash."—Mrs. L. LAJEUNESSE, Box 103, Coniston, Ontario.

LESSON No. 18

Question: Why is *emulsified cod-liver oil so needful* for a child who is pale and losing weight?

Answer: It is food and tonic rich in vitamins and other nourishing factors *that are particularly helpful* to a weakened child.

For your child—old reliable

SCOTT'S EMULSION

Cannot Be Accounted For

No Reason Yet Found For Increase In Sudden Deaths

In glancing over the death notices in a recent issue many of our readers must have been struck by the frequency with which the words "suddenly" occurs. In a column of twenty-five items headed "Deaths" the word "suddenly" is printed nine times. Whether or not others of the deaths reported were sudden we cannot say, but not improbably some of them not so described were. Only in some of the cases were the ages given of the persons who had died suddenly. In two of these the deceased were children, in one a young person of 21 years. So it is not only among the aged that life closes without previous illness. Nearly every day there are among the notices an impressive number carrying this word "suddenly."

This has no doubt come under the attention of all who are engaged in the practice of medicine and in the service of public helath. These authorities may be able to account for the fact that so many deaths are sudden. It is unlikely they will tell us that this is at about the normal rate. They may point to conditions in our way of living or to the present-day prevalence of disease of the "grip" type as the explanation for what is evidently an increasing curve in the sudden-death line.

Work For the Scientists

Might Isolate Germ Which Makes People Invest In Worthless Stocks

It is a pity that scientists have not already done something for the suckers of the country. Surely there is some way of curing the disease that makes people invest millions of dollars annually in worthless stocks and in other things promising big returns.

The sucker must have a mental trouble or he would know that everything isn't exactly right when enormous returns are promised. He could reason that wealthy men are just as smart as he is and that if the investments were safe these wealthy men would take advantage of them. But he doesn't reason this out. He just invests, loses his money, and then goes to work to earn more to invest in something worthless.

The scientist should strive to isolate the sucker germ and find a means of destroying it. A cure for the sucker disease would keep many honest, hard-working men from giving away the fruits of their labor.

Wrinkled Old Party—I think I'll give you myself for a Christmas present, my dear.

Miss Bright—Please don't. People would say I didn't do my Christmas shopping early enough.

Owing to scarcity of wood and cost of labor, wooden toys have increased in price about 100 per cent. in the last ten years.

Tobacco is one of the principal products of Persia.

Story Of Famous Statue

Statue Of Venus Cost $50 and Nearly Brought On War

Venus de Milo, the world's most beautiful and absolutely priceless piece of sculpture, cost the French nation only $50 a century ago, but her preservation for the art world nearly caused a war.

This new story of the incomparable, armless goddess has just arrived in New York from Paris and is retold by the Women's Home Companion. The statue originally was dug up on the Greek island of Milo more than a century ago, so the story goes, and when the news filtered to the western world, English, Dutch and other foreign expeditions were rushed to the island to obtain the prized work of art. The French emissary arrived first, however, with orders to obtain the statue at any price.

The islanders did not want to sell Venus as they planned to send her as a gift to a Greek nobleman. The Frenchman coolly gave an ultimatum, however, that if the statue were not sold at once his country would send ships and troops to occupy the island.

The Greeks capitulated and Venus was purchased for a sum equivalent to less than $50. The statue was transported at once to Paris, where it has since been viewed in the Louvre by art lovers from the entire world.

Find Old Flint Axes

Swedish Pedlar's Stock Was Of Exquisite Shape and Workmanship

The 4,500-year-old stock in trade of a stone age peddler in flint axes has been found by some workmen in a gravel pit in the Swedish province of Soedermanland. The peddler's hoard consisted of a number of light gray flint axes of exquisite shape and workmanship, evidently hidden in the ground by the trader, who seems to have wandered a long way from the South of Sweden to barter his axes for the precious furs of the hunters of the Soedermanland forests.

The poor peddler seems to have met his death, for he never returned for his axes, that now are said to be the best find of its kind ever made in that part of Sweden. Almost every week new important discoveries of treasures hidden thousands of years ago, runic stones, grave mounds, and wall drawings, are reported from different parts of Sweden, the soil of which has turned out to be a vast treasure house for archeologists.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

No Interference In Irish Affairs

Retiring Governor-General Healy Has Good Word For English Government

Strong testimony of the non-interference by the British Government in Free State affairs was given by Retiring Governor-General Healy at a banquet in his honor held in Dublin, at which President Cosgrave presided.

"The English Government, in my few years in office, has never interfered—I pledge my faith and honor to this—to the extent of a tittle or a scintilla in any Irish matter," said the Governor-General.

"The British Government has left the ministry absolutely free; left them in fact, untouched and unadvised, and that tribute should not be left unpaid. I have heard much talk about 'our foreign King,' but there is one thing about 'this foreign King,' he is a gentleman and we know his pedigree. I wish we knew as much about those who talk about his 'interference' in Irish affairs."

First Agricultural Pool

"The first recorded 'pool' in agricultural produce" remarks the Scottish Farmer (Glasgow), "was Joseph's effort in Egypt, as set forth in Genesis xli. By his foresight in controlling the surpluses during the seven years of plenty, Joseph fed not only Egypt, but neighboring peoples during the seven years of famine."

Ready For Anything

A well-known pessimist of a western town had wrestled with dyspepsia for years. He stood in front of the post office as the noon whistles sounded. "Twelve o'clock, eh?" he said, half to himself and half to an acquaintance. "Well, I'm going home for dinner. If dinner ain't ready, I'm going to raise thunder; and if it is ready I ain't going to eat a bit!"

Mrs. Petunia Riggs has at last located the squeak in the gear of her car which has been bothering her for the past few days. It was her husband requesting from the back seat that she drive a little slower.

Little Helps For This Week

"I will lift up mine eyes unto the hills, from whence cometh my help."—Psalm cxxi. 1.

If we look down then our shoulders stoop. If our thoughts look down our character bends. It is only when we hold our heads up that the body becomes erect. It is only when our thoughts go up that our life becomes erect.—Alexander McKenzie.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Moise Cabotte, Makamik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For Frostbite use Minard's Liniment.

Abraham Bricken, an immigrant tailor, who came to New York from Russia 22 years ago, now owns several skyscrapers, including the world's third tallest office building.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

INSTITUTE HEALTH COURSE

Local secretary's Note.—The following letter which is self explanatory was received by the local Institute.

Dear Institute Members:

In response to a request from our organization that a free training course for emergency home helpers be given by the Departments of Health and Agriculture, the Minister of these departments has signified his willingness to put on such a course if a suitable number of suitable women desirous of taking the course can be secured. It now up to us to see that a sufficient number of applications are sent in.

Following are the requirements:

1.—Applications would be received from any woman of mature age, of sound health and of good standing in the community.

2.—Each candidate will be required to sign a statement to the effect that she will put her training to practical service for one year.

3.—The application (which may be sent in on the attached form) along with the applicants signed statement and a confidential report from the Branch Institutes are to be sent to the Provincial Secretary, Mrs. D. R. McIvor, Stettler.

When a sufficient number are received they will be forwarded to the Department.

Send in the application early, for if the course is put on it will start approximately April 1st, and will cover a period of six weeks or perhaps eight.

Tuition will be given free of charge and will include: Household administration, cooking, sewing, laundry, care of poultry, first aid and elementary home nursing and dairying.

The charge for board will be (approximately) $20.00 per month.

If a sufficient number of applicants can be secured for the course to be put on, we will have taken one step in our nation wide campaign to lower our maternal death rate.

Trusting we can make this a success. MABEL HUYCK, Pres.

KINGMAN

Miss May Welsh spent a couple of days in Edmonton last week.

Miss Ray Hardin of Bruce is visiting with her brother, Jack Hardin, for a few days.

Miss Lily Erickson who is taking up music in Edmonton visited at her home for a few days.

Mr. and Mrs. T. Horte and family, Mr. and Mrs. C. R. Blyckert and H. Sparby were the guests of Mr. and Mrs. Roy Molvik on Saturday evening.

Van Brundt Grain Drills

We will have again this year a full supply of the famous VAN BRUNDT GRAIN DRILLS We sold many of these drills in this district last year and they all gave great satisfaction. The Van Brundt's Special Adjustable Gate, permits the sowing of various seeds, and all seeds are sown at an even depth. This means early and even germination and even ripening. There are many other points of advatage to the Van Brundt and we would be pleased to tell you about them.

LOCAL and PERSONAL

Born.—To Mr. and Mrs. Worobits, on January 22nd, a son.

Born.—To Mr. and Mrs. Prestbakmo, on January 22nd, a son.

Miss Thelma Jobb leaves on Friday for Edmonton, where she will enter training at the Royal Alexandra hospital in order to become a nurse.

Miss McCullough of Lacombe, is visiting her brother, Mr. McCullough, principal of the Tofield School.

Mrs. Firth is spending the week in Edmonton as the guest of Mrs. Hall.

A rink of Tofield curlers, skipped by A. B. Sinclair journeyed to Ryley on Tuesday. Better ask Ab how they fared.

Mrs. Constantine is spending the week in the city.

W. Swift of Alberta University attended the Tofield-Edmonton game at Edmonton on Saturday night last.

There was an error in the advertisement of Leslie Jones regarding Garnet seed wheat as appearing in our issue of two weeks ago. The price should read $1.50 and not $1.20.

HOCKEY

Hockeyhas been pretty much on the map this last week. To start off with there was a junior game between Tofield and Camrose on Friday night last at the local rink. Then on Saturday the Tofield United (or whatever they choose to call themselves) played a game in the city with a South Side all star (so says the Bulletin) team. Then on Wednesday the same team had an encounter with the boys from Bardo at the local rink.

The game at the rink here on Friday last between Camrose and Tofield, resulted in a win for Camrose by a 10—5 score. The Tofield Players were in the limelight considerably more than the score would indicate. On the whole the Camrose boys were heavier than the locals and to make a game of it, an older player was put on. The game was obviously Camrose's, but the spirits of these juniors are hard to keep down and they are already looking forward to a second encounter, when they hope to turn the tables.

The second game, that between Edmonton and Tofield at Edmonton, was a real hockey game from start to finish. The game was played at the South Side covered rink, on ice that was as smooth as glass and as white as snow. The lights were good and the boys sure took advantage of the opportunity.

The score of the game was 8—5 in favor of Edmonton but it was a real battle throughout. To play fast hockey it is absolutely necessary to have nine first-class players. The Edmonton forward line changed every five minutes, while the Tofield forward line mostly had to go the full sixty minutes.

The first period was fast and although Tofield had the advantage in territory play, Edmonton rung up three goals to Tofield's one.

In the second period Tofield hit their stride, caught up to and passed the Edmontonians and went to the dressing room one goal in the lead.

The third period was disastrous for them. There was a scrimmage in front of the Tofield goal and the goal umpire half heartedly put up his hand and then brought it down again. The usual argument was on and Edmonton won the argument. This decision and the rapid pace had the effect of slowing up the Tofielders and in a few minutes one more goal was marked up against them. They tried hard to save the situation, and succeeded in scoring one more, but Edmonton came back and scored two which gave them the game.

It is expected the same teams will meet again at Tofield in about a week.

Line-up.—Tofield—Goal, Bowick; defence, Whyte, H. Martin; forwards, S. Worton; W. Worton; Ray Martin. Subs. Ball; Swinton; Craig.

Edmonton: goal, Pearson; defence, Morris; McGuire; forwards, Rule; Richards; Fisher. Subs, Starkie, Angus Morrison, Good.

Referee: Ted Paridis.

Scores: Tofield: Bob Whyte 3; W. Worton 1; S. Worton 1.

Edmonton: McGuire 4; Richards 1; Rule 1; Starkie 1. Morrison 1.

After the game the Tofield team were entertained to a party which was very much enjoyed.

TOFIELD MEN'S BONSPIEL ON NEXT WEEK

Tofield men's bonspiel will get underway on Tuesday of next week, aided by a new rink, good ice and unbounded enthusiasm.

The bonspiel committee have been very active and a full and complete and withal valuable list of prizes have been assembled.

The Grand Challenge is the main event with which is associated the McCallum Cup, a handsome trophy. There is also the Boone Trophy, which in our issue oflast week was wrongly attributed to the ladies' bonspiel. This is a new one this year. There is also the Terwillegar Shield and the Pincott trophy. And for those fellows who find it hard going, the Hammond cup. All these trophies are accompanied by handsome prizes for the winner.

There will be a large number of visiting curlers, including rinks from Viking, Holden, Ryley, Edmonton, and other points.

The only one that will have any trouble will be Tom Shultz, ice maker de luxe, but he is busy flooding, leveling and sandpapering the sheets to the glossy smoothness known to all curlers.

These in addition to an entry of twelve rinks from the local club, ensures the succes of the spiel.

TOFIELD RINK WINS PRIZES AT CAMROSE

The Tofield entry into the Camrose Bonspiel came first in the Wholesalers and Retailers competition. The rink was skipped by John Lee sr.; D. L. Abbot 3rd; C. J. Craig 2nd and Chas Hobson 1st. The prizes are four Hudson Bay all wool auto robes.

TOFIELD LADIES' IN EDMONTON BONSPIEL

Thefollowing Tofield lady curlers are taking part in the Edmonton ladies' bonspiel which is underway this week.

Mesdames Hannan, Hammond, McCauley, McCann.

Mesdames Beirnes, Lee jr.; Jobb; Cluttcham.

Mesdames Chapman, Brace, McLaughlin, Calvert.

Mesdames Bissett, Abbott, E. W. Rogers, Spencer.

W. I. NOTES

At an executive meeting it was decided to postpone our Institute banquet until February 3rd. We are very sorry to do this but owing to some of our members attending the bonspiel in the city, we felt we had to. However, we promise a grand old time when we put it on, so all come and join our Institute for 1928.

THE GEORGIAN SINGERS AND PLAYERS COMING TO TOFIELD WEDNESDAY, FEBRUARY 1st.

The Georgian Singers and Players, will visit Tofield on Wednesday next, February 1st. These singers and players are well known throughout the country as popular and talented artistes. Their programme includes many phases of musical and dramatic interpretation—quartettes, duetts, ballads, madrigals, humorous monologues, readings and dialogues; gems from grand opera and sentimental songs of by-gone days. Sixty minutes with the old time minstrells, bringing back to tender recollection some of the old songs, plantation melodies and bits of humor.

Admission, children 25c., students 50c., adults 75c.

Those who love to hear a really good tenor should not fail to hear David Morgan, a vocalist of very high standing with an international reputation.

KEN RISKS DEATH IN THRILLING SHOT

Riding stunts which absolutely top anything ever attempted for the screen are a feature of Ken Maynard's performance in "The Overland Stage," which will be shown at the Variety on Saturday.

One of them is Maynards leap to the near horse of a run-a-way team, going at breakneck speed. He intentionally falls—for the purpose of the story—between two running horses, braving their flying hoofs, and having the wagon pass over him, after which he sits up in the road and gazes after the fast flying team.

This breath-taking bid for suicide was all accomplished in one continuous scene, so that no camera-trickery could possibly be employed.

KETCHAMOOT

Mr. Lorne Lee and Fred and Arthur Williams attended the tractor school in Edmonton last week.

Mr. J. R. Ingram attended the U.F.A. as delegate held in Calgary last week.

Mrs. Chas Whillans and Mrs. Chas. Ingram were Edmonton visitors for a few days last week.

The Misses Lawson entertained the Bardo Thimble Club on Friday afternoon.

Several families from our district attended the card party at Mrs. Davison's on Monday evening and all reported an enjoyable evening.

Mrs. Frank Shupe is recovering from an attack of LaGrippe which has confined her to the house for about a month.

Messrs. John McGinitie, Henry McGinitie and Ralph Barnes motored to Edmonton on Thursday.

Mr. and Mrs. L. Carlisle and Mrs. B. Wildman motored to Edmonton on Wednesday.

Miss Edna Lawson spent a few days at the home of her brother, Herman Lawson, the first of the week.

Mrs. Sam Stirritt spent a few days in Camrose the first of the week to benear her daughter, Eileen, who is improving splendidly.

Mrs. Treisenburg, who recently moved into the Dick Turner house was taken suddenly ill with appendicitis on Wednesday. She was taken to an Edmonton hospital where she underwent an operation. On Thursday morning the report of her condition was favorable.

George and Herman Lawson and the Stirrit families were entertained at the Roy Fleming home near Kingman on Friday evening.

Mr. and Mrs. A. McMullen, Mr. and Mrs. J. Wilson were guests of Mr. and Mrs. Chester Coombes on Friday evening.

A pleasant evening was spent at the Henry McGinitie home on Friday evening, when Mr. and Mrs. John McGinitie entertained a few friends and neighbors to a whist drive. Eight tables played. First prizes went to Mrs. Howard Stine and Mr. Wm. Lee. Consoladation prizes, Mrs. Thompson and Jason Henderson. A delicious lunch was served by Mrs. J. and H. McGinitie.

The annual congregational meeting of the Ketchamoot branch of the United Church was held on Thursday afternoon at the W. A. Mitchell home. A goodly number of the members were present. A delicious dinner was served by the ladies at one o'clock after which the meeting was opened by Rev. Gordon as chairman. Mr. Mitchell read the treasurer's report which was very satisfactory considering the year was only from April to the first of January. Mrs. Appleby read the M.A.S. report, and it was as usual, up to the standard. After business discussions, officers were elected for the coming year, Chairman, Mr. McCowan; Secretary-Treasurer, Mr. W. Lee; Board of Manageers, Messrs. Wm. Lee; C. A. Ingram, W. C. Mitchell, Chas. Whillans and Mr. McCowan.

LINDBROOK

Congratulations to Mr. and Mrs. Emil Goubault of Lindbrook North, on the birth of a son at Edmonton. Both mother and child are doing nicely.

A conflagration nearly occurred in Mr. M. E. Goubault's house last week. It is supposed that gas igniting in the stove or pipes during Mr. Goubault's absence doing chores, blew some pipes loose. Luckily Mr. W. Harris was calling on Mr. Goubault at the time and they went to the house, and as the fire had hardly got started, they were able to subdue it.

Mr. H. Burton was elected school trustee vice L. Janet retiring one at the annual meeting of Westlake S.D. ratepayers.

Welcome to Mrs. D. Marow who arrived this week to take up her residence in the new house Mr. McCaw has built on his newly acquired property here, the N.W. 19-51-19, w 4.

KINGMAN

Mr. and Mrs. Jack Erickson and daughter spent a couple of days visiting friends in Edmonton.

Mr. and Mrs. Charlie Johnson and family visited with Mr. and Mrs. Oscar Bard on Sunday.

Mr. and Mrs. Roy Molvik and family were the guests of Mr. and Mrs. C. R. Blyckert on Saturday evening.

Mr. and Mrs. Andrew Johnson and daughter and Mr. Bjeld were dinner guests of Mr. and Mrs. T. J. Rognes on Sunday.

Wm. Christenson and family were seen driving to church last Sunday in a new Pontiac sedan, recently purchased. Congratulations.

The Gospel service held at the Kingman church on Sunday by Rev. Bjelde of Ryley, was well attended.

The new Kingman hall is nearly completed. It will be one of the most modern halls in Central Alberta.

Miss Inez Erickson spent the week end visiting girl friends in Camrose.

Mr. and Mrs. E. Erickson and Mr. and Mrs. C. R. Blykert were the guests of Mr. and Mrs. T. Horte on Sunday evening.

Mrs. Ed Johnson has been taken ill and has been confined to bed for the last week. We all hope that she will soon recover.

Business visitors in Edmonton last week were Roy Molvik, T. W. Olson nd Thor Grahn.

BARDO

About thirty members of the Ryley choir came to Bardo on Sunday afternoon and gave their Christmas Cantata to a large and interested audience. The music was good and Mrs. Dr. McPherson's explanation of the story, added much to the programme. The Girls' Club furnished lunch to the Ryley people after the program.

Those who attended the U.F.A. and U.F.W.A. conventions in Calgary, returned home on Saturday.

The Misses Lawson entertained the Thimble Club last Friday.

Ladies' Aid and Thimble Club will meet Wednesday with Mrs. Simonson.

Mrs. John Riel is visiting in the Henry Stutzman home this week.

Mr. and Mrs. J. E. Kaufman entertained the J. L. Stauffer, J. King, J. Voegtlin, V. L. Roth and Dan Brenneman families on Sunday.

AMISK CREEK

Ladies'Aid held their meeting at Mrs. E. A. Moen on Tuesday of last week. The meeting was very well attended by members and visitors. Six ladies from Ryley were present. Those from Ryley were Mrs. H. Fobs, Mrs. E. Mehus, Mrs. Bendikson, Mrs. R. Hulbert, Mrs. Wang and Miss M. Wang and Mr. N. Stenerson.

Mrs. T. Anderson's house has been moved to Ryley. E. A. Moen and Mr. A. Steen being in charge of the work while several of the neighbors were helping.

R.O. Berg and Arnold motored to Edmonton last week and attended the tractor school being held there. They also motored out to Leduc to visit Will Bolton and familie at their farm.

Mr. A. Erickson and Carl motored to Edmonton on Tuesday of last week, returning home the same evening.

Mrs. I. Eggen from Bardo was visiting friends and relatives in this vicinity for a few days last week.

The Steen family from Bardo visited at the E. A. Moen home on Sunday of last week.

Mrs. T. Anderson nd her twin daughters have been visiting with her daughter, Mrs. E. A. Moen, while her house was being moved to Ryley. Mrs. Anderson have sold her farm to A. Patterson and her intention is now to live in Ryley.

E. A. Moen shipped a carload of hogs and cattle from Ryley to the Pool last Tuesday.

RED ROSE TEA "is good tea"

The Orange Pekoe is something extra—a special tea

In clean, bright Aluminum

Government vs. Private Ownership

The initial stages of the gigantic financial battle are now being waged over the subject of control and development of vast water-powers in various parts of the Dominion. In more than one instance these are linked up with ... canalization, as for example the Great Lakes-St. Lawrence ... and the long discussed Georgian Bay Canal project ... must be carried out in the East ... to Western Canada.

Financial, commercial and industrial interests in Montreal and Toronto ... more or less directly affected by the deepening of the ... between the present head of ocean navigation at Montreal and the head of the Lakes ports of Port Arthur and Fort William ...

Millions Spent On Roads

Canada Has Built 7,436 Miles In Last Few Years

Out of a total of 8,415 miles of road provided for under agreement authorized by the Canada Highways Act of 1919, 7,436 miles has been completed at the end of the fiscal year ending March 31, 1927. This is shown in the annual report of the Commissioner of Highways.

This mileage was constructed under the provisions governing the Federal subsidy whereby the Dominion Government undertook to furnish 40 per cent. of the cost, the province taking care of the remainder.

The estimated subsidizable cost of the highways was $16,509,972.

WOMEN WHO ARE WEAK

Gain New Vitality By Building Up the Blood

There are many women who pass their days in a constant state of weariness. They have barely sufficient energy to enable them to perform their manifold duties. Often they have an aching head, a miserable pain in the back, and limbs that feel as heavy as lead. The whole trouble is due to bloodlessness. No woman need suffer in this way. It is easy to obtain a supply of rich blood by taking Dr. Williams' Pink Pills. The new blood created by these pills rapidly builds up the system, headaches and backaches disappear, energy returns and the joy of living is felt once more.

Proof of these statements is given by Mrs. ... Latour, Stoney Point ...

Manitoba Agricultural College Re-Union

400 Ex-Students To Celebrate the Coming Of Age Of the Institution

Friends and ex-students of the Manitoba Agricultural College are preparing to celebrate the coming of age of that institution at a re-union to be held February 16 and 17, for it is twenty-one years ago since the charter class foregathered.

Re-unions come with unfailing regularity in M.A.C. circles, but this one, on account of its historic significance, is to be the daddy of them all. A big committee under the energetic leadership of J. H. Evans, deputy minister of agriculture, is making a special drive to get in all ex-students, particularly those who went through the mill on the old site at Tuxedo, now the military barracks. The first evening of the re-union will be given over to a banquet. Efforts are being made to secure the attendance of Dr. W. J. Black, Montreal, President Reynolds, of O.A.C. and Hon. John Bracken, the three ex-presidents of the college. Mr ... Aggies and Household Science graduates will be on hand, every one of them ... to leave ... at home.

The afternoon of the second day will be spent in visiting the classrooms and laboratories at St. Vital. Students now in attendance at the college stand prepared to take the ...

ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

U.F.A. MAY SPLIT WITH COUNCIL OF AGRICULTURE

Calgary. Early severance of relations between the United Farmers of Alberta and the Canadian Council of Agriculture loomed as a possible development in the passing of a resolution at a session of the United Farmers of Alberta convention, following presentation and acceptance of a report on the year's activities of the council.

The resolution, which was introduced at the suggestion of H. W. Wood, president of the U.F.A., instructs the executive of the organization to prepare a report containing recommendations as to the future relationship with the Canadian Council of Agriculture and to reveal its findings at the annual convention of the organization next year.

This recommendation was submitted as a substitute for another resolution which urged the immediate creation of a committee with powers to enter into negotiations with other provincial farmers' organizations, in an effort to bring into being a new central body.

Following brief discussion by a number of delegates in which the merits and shortcomings of the Council of Agriculture were set forth, Mr. Wood was appealed to for advice.

Spies Are Convicted

Two Men Are Sentenced In Britain For Espionage

London. An Old Bailey jury convicted two men of trafficking in British official military secrets in the interests of Soviet Russia and dealt a heavy blow to what the prosecution termed "a dangerous spy organization operating against the safety of Great Britain."

Wilfrid Thomas McCartney, variously described as an Englishman and as an Irish-American, and George Hansen, a youthful German, were sentenced to ten years' penal servitude each on their conviction.

McCartney was accused of being the chief spy and Hansen his aide, in obtaining and communicating information useful to opponents of Great Britain in warfare. While admitting that not all those engaged in the espionage organization had been trapped, Attorney-General Hogg declared the activities of the arrested men had been halted before material damage could be done the country.

Summing up, the Lord Chief Justice said the accused had been convicted of "terrible offences" and denounced them for trafficking in official secrets for gain, uninspired by any thought of serving their own countries.

MANY WESTERN MATTERS ARE TO BE DEALT WITH

Ottawa. Western matters will have considerable prominence in the legislation of the forthcoming session of parliament. There will be a large additional vote for the Hudson's Bay Railway and if the anticipated agreement is reached regarding the policing of Saskatchewan, legislation may be required, although it may be effected by order-in-council. In any event, the subject will be before the House.

Alberta and British Columbia also figure in the sessional program and in legislation defining the boundaries of national parks in Alberta. An agreement on long standing points of dispute will be sought.

The re-survey of boundaries made in the last few months paves the way. The fundamental interest in the parks which the Dominion proposes to retain will be the scenic beauty, leaving to the province the water powers and minerals to a large degree. The Dominion Government is willing to exclude Spray Lakes and other powers from the parks, along with the principal coal fields, providing it is guaranteed against future claims by the province respecting any mineral deposits which may be incidental to the essentially scenic portions of the domain. In other words it is proposed to establish a new boundary and exclude the villages, water ...

Liverpool Greets Canadian Farmers

Miss Cora Hind Replied To Address For Visitors

Liverpool. The touring Canadian farmers spent 48 hours visiting Liverpool, Birkenhead and other points on the Mersey River, and their visit created considerable interest here.

One Liverpool paper says of them: "They are dressed like Englishmen in their Sabbath best, except for a few who give distinction to the party by wearing fur coats."

The farmers were welcomed on the corn exchange by President Harker who assured them that Canadian wheat graded as reliably as a bank note.

Miss Cora E. Hind, Winnipeg, replied for the visitors in an address that was replete with information about the Dominion's resources, advantages and progress.

The visitors were received at the city hall by the Lord Mayor, Miss Margaret Beavan. Short speeches were made by many of the leaders in Liverpool's great commodity handling business. Conferences were held in the fruit and general produce exchanges.

The party visited the Liverpool cathedral of which after 20 years building, only a part has been completed and the complete construction of which may occupy a century.

New Ruling At Ottawa

BRITISH ENVOY AT OTTAWA IS IN PROSPECT

Toronto. In the course of discussion with Mr. Mackenzie King, in Ottawa, this week, on various matters arising out of the last Imperial Conference, Right Hon. L. C. M. S. Amery, British Secretary of State for the Dominions, expects to take up the suggestion for the appointment by the British government of a representative to be permanently resident in the Canadian capital and in close contact with the Canadian government in Imperial affairs.

This officer need not necessarily have a title as high sounding as High Commissioner, but he will be in a position to act as a sort of liaison officer for the British government, Mr. Amery said, and pointed out that the principle of such an appointment was considered at the last Imperial conference. It was decided by resolution that such a representation between Great Britain and the Dominions would be an excellent thing for the Empire.

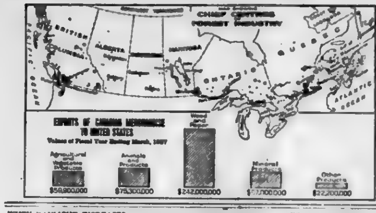
Sale Of Forest Products Is Big Factor In Keeping Trade Balance With U. S.

Canada's far flung line of forest industries stands out as perhaps the most striking feature of the Dominion industrial landscape.

Only when one realizes what an enormous volume of commerce these forest industries support, and what a dominant role they play in keeping Canada's trade with the United States on a fairly even keel, can one clearly appreciate what a huge stake the Canadian people have in forest protection.

These hundreds of mills together form the main supporting pillar of Canada's export trade with her neighbour to the south. The mounting sales of forest products alone have enabled the Dominion in recent years to keep her trade with the United States from becoming altogether lopsided. Last year Canada sold to the United States roughly $242,000,000 worth of wood and paper products, this class of goods representing more than half of the total value of our exports to that country.

How long Canada can continue to export forest products at such a rate is a question which few persons would care to try to answer, for there is a pretty unanimous agreement that the Dominion's forest resources are being steadily and rapidly depleted. In the light of this situation, efficient forest protection and management must take rank as one of Canada's commanding problems. It is a question which commands the active concern not merely of those who find employment in forest industry, or of those whose capital is invested in that field but of every individual and institution interested in seeing that the Dominion's commercial position is maintained on an even keel.



Television and Radio

New Perfected Device Makes It Possible To Both See and Hear Performers

The magic wand of science, passing over the factory of the General Electric Company, at Schenectady, N.Y., disclosed to a small group of radio engineers, scientists and newspapermen, a vision of the future of radio broadcasting—a future designed to bring to broadcast fans the sight as well as the sound of the radio performers.

Sitting in comfortable chairs in three Schenectady homes, several miles from the company's broadcasting studio, the visitors were enabled both to hear and see the studio program.

Simple boxes of the dials on the home television sets brought to these men the minute reproduction of the characters who appeared before the microphone, even to the curl of cigarette smoke from their lips and the blinking of their eyes.

The sound of their voices was heard in the usual way through a loudspeaker supplementing the visual apparatus.

WILL TRY OUT NEW WHEAT

Reward Will Be Tested By Saskatchewan and Alberta Farmers

Experiments in the cross-breeding of wheat of different varieties that are carried on by experts on the staff of the Department of Agriculture of Canada have produced still another strain that is declared to be suitable for growth in the prairie section of the Dominion. This new strain, notes the Quebec Chronicle-Telegraph, is known as Reward wheat. It has been revealed that the sample of wheat with which the Manitoba Agricultural College won a first prize at the Royal Winter Fair in Toronto was of the Reward variety. And more recently, Hon. W. R. Motherwell, Minister of Agriculture, has disclosed that the sample of hard Spring wheat with which Mr. Herman Trelle, of Wembley, Alberta, won a first prize at the International Exhibition in Chicago was of the same variety.

Hon. Mr. Motherwell announces that a thousand bushels of the grain have been distributed to some four or five hundred farmers in Saskatchewan and Alberta to be tested on their farms and also, no doubt, to be multiplied, so that larger supplies of it may be available as seed next year. The new wheat has been subjected to certain tests already on experimental farms, on the experimental plots of agricultural colleges and on the farms of certain seed growers. These tests are said by Mr. Motherwell to have shown that Reward has the strongest straw of possibly any known wheat, that it ripens earlier than Marquis wheat, but not quite as early as Garnet, that it is less liable to rust infection than any other varieties, and that it yields a flour "without spot or blemish."

Reindeer Industry

Company Leases Big Area In McKenzie River Territory

Reindeer meat may find its way to the dining rooms of Western Canada if the plans of the Dominion Reindeer Company are successful. This organization, which is now actively engaged in the reindeer business in Alaska, is moving 4,000 fawns in the spring to a lease of 300,000 acres in the McKenzie River territory, which is being granted by the Federal Government. It is estimated that sales of reindeer meat in 1929 will be $9,000, increasing to $45,000 in the following year.

An All-British Airship

An airship firm here announces its intention of building a machine which it is hoped will be the first absolutely all-British airship to land in Canada. It will be able to carry 30 persons in addition to a crew of six or ten. Its flying range will be 1,860 miles but it will compass the Atlantic by calling at the Azores.

In after years the girl with the beautiful auburn hair becomes a red-headed wife.

Canadians Are Urged To Turn Their Gaze Northwards For Great Future Developments

Every Farm Potential Aerodrome

Vision Of the Aeroplane In Daily Use On the Farms Of Western Canada

That aviation today is rapidly taking its place in the economical life of Canada, linking up airports and remote areas by fast aircraft which have a speed range from 70 miles to 300 miles per hour, disregarding the natural topographical barriers and eliminating time and distance, is the opinion of W. S. McCardell, a Canadian air pilot with much experience in flying in Western Canada. He points out that the era of aerial transportation may have a profound effect on the destiny of the Dominion and the remote areas now far from communication and contact with social centres may, through the medium of a network of airways, become in terms of time a few hours distant from the largest cities.

In view of the advent of the light aeroplane which costs no more than a good automobile and in view of the ease with which flying can now be mastered the stretch of farms in Western Canada may be only a short hour or so away from the city landing ground, independently of the conditions of roads the aeroplane may carry the rural dweller over the sky lanes in the span of an evening, permitting him to attend the theatre and return again the same night. Certain areas which would ordinarily wait long for economic conditions that will permit the construction of roadways, will find in the aeroplane a vehicle that will enable them to reach desirable centres.

All these possibilities and a host of others greatly affecting rural life hinge on the use of the aeroplane in the daily life of the people as a vehicle for fast travel. In the rural areas of Western Canada every farm becomes a potential aerodrome and the cities and community centres only a short flight away.

The map of Canada is gradually being unrolled Northwards, and bit by bit the secrets that have hitherto lain hidden in that vast empire to the north of the 60th parallel are yielding themselves up to investigation and research.

It is only within the last few years that Canadians have definitely turned towards the great possibilities for expansion of the Northland and have satisfied themselves that the popular belief that the Northern areas of their country are barren and uninhabitable is, like most popular beliefs, utterly erroneous. With a quiet determination they have tackled the problems of exploring and exploiting the territories beyond the 60th degree of latitude and have within the past year committed themselves to spending many millions of dollars to development work in that part of the continent.

The establishment of post offices, police posts and customs houses in the Northern islands off the Canadian mainland has been steadily pursued, the most Northerly administrative post in the world is that of the Royal Canadian Mounted Police at Bache Bay on Ellesmere Island, 700 miles south of the North Pole. There is no end to the surveys that are being carried out among the islands themselves and to the investigations conducted into every feature, geographical and biological that these islands contain.

Coming nearer to civilization, Canadians are seen creating for themselves new transportation routes and new outlets to the ocean. At the moment an "expeditionary force" of flying men are operating in the Hudson Straits, that spacious channel which connects the inland ocean Hudson's Bay with the Atlantic.

This force has for its duty the making of observations in daily flights over vast expanses of water in order to note the tidal conditions, currents, prevailing winds, ice and all other elements that enter into navigation. Three air stations are located in the straits, one at Port Burwell at the extreme point of the Labrador Peninsula; the second, at Wakeham Bay on the south shore and midway up the straits, and the third at Nottingham Island, in Hudson's Bay itself, at its western entrance.

Day after day flights are made and reports transmitted by wireless to the Canadian government.

The whole idea behind this is that the government should possess all information as to how navigation can be lengthened, for although the Hudson Straits have been navigated for three hundred years and at one time were the main highway to the Canadian West in the days of the old fur-trading companies, the development of the southern lanes of traffic left that route far behind.

Linked up with these investigations is the definite effort now being carried out to finish the Hudson's Bay railway—a line which will when completed, run from a point in Saskatchewan, near the Manitoba border, to Fort Churchill on Hudson's Bay.

As originally planned the road was to end at Port Nelson, but an exhaustive investigation into the merits of the two terminals resulted in Fort Churchill being decided on. It will lengthen the railway by nearly 100 miles, but the report of engineers who made a study of the situation [illegible] enjoyed by Nelson and that despite the 100 miles of railway building, the expenditure involved will be smaller.

This line goes right into the heart of the Canadian West, bringing it only a few hundred miles from the sea coast.

Exploration is being pushed forward. At the beginning of this year a small expedition will start out from Ottawa to study the fauna of 15,000 square miles of territory which the government in 1927 set aside as a game sanctuary. This region lies between the Great Slave Lake and Chesterfield Inlet, near the junction of Hanbury and Thelon Rivers. It has been traversed by many exploring parties, but the region is so vast that much remains to be told of it.

Canadian statesmen are urging their compatriots to turn their gaze northwards, and the next few years should witness some great developments in that portion of the American continent.

WHEN DAYLIGHT INCREASES

Lengthening Process Does Not Begin Until Middle Of January

W. G. Sibley writes as follows in the Journal of Commerce. When we remark that "the days are beginning to lengthen" we do not mean that any time is added to the twenty-four hours which constitute a calendar day, but that the period between sunrise and sunset increases. It is a popular belief that the lengthening begins on December 21 or immediately after, and that the increase begins at both ends of the day; that is, that the sun rises earlier and sets later. This is an error. The sun really begins to set later on December 14, but it does not begin to rise earlier until about the middle of January. For instance, in the northern states the sun rises at 7:18 and sets at 4:28 on December 21; and on January 12, rises at 7:22 and sets at 4:45. The day (forenoon) shortens four minutes in that period, while the afternoons lengthen seventeen minutes, a net increase between sunrise and sunset of thirteen minutes. Not until after January twelve does the "day" lengthen at both ends.

In the six months after December 21, sunrise speeds up from 7.18 to 4:31, increasing the length of forenoons two hours and forty-seven minutes, while the afternoons lengthen from 4.28 to 7.22, a gain of two hours and fifty-four minutes. This daylight increases five hours and forty-one minutes in the northern states.

Area Sown To Crops

The total area sown in Canada to the principal field in 1927, was 54,673,210 acres. Wheat occupied 22,460,154 acres, oats 13,239,963 acres, barley 3,500,713 acres, and the remaining 15,469,450 to a variety of other crops such as rye, flaxseed, corn, peas, potatoes, alfalfa, mixed grains, etc.

The smoke over the city of Prague is estimated to contain 70 tons of solid matter daily.

WHAT A STOMACH

"Is it true that Ernest has consumed the dowry of his wife?"

German Subs Discovered

Sunk in the Baltic, off Windau Harbor, when they came into collision during the war, two German submarines, from which there were only three survivors, have been discovered by fishermen. The latter have recently hauled in their nets portions of the wreckage and six skulls and other bones. Divers have been sent down and have reported the submarines to be apparently little damaged.

A flea can jump 200 times the length of his body.

When a Sparrow Falls

Save the Birds and Destroy the Insect Pests

According to scientists, we are now on the verge of a struggle between the insect world and mankind. If each insect born lived until its natural death, it would not be long before fields and woods would be bare and our source of food gone.

One bird devours hundreds of insects in a day, and millions in a lifetime. Millions of birds devour—well the problem is too difficult to solve, but at any rate, they enable us to overcome the insects that remain.

Worth remembering, isn't it? Particularly when the rifle of the small boy is pointed toward one of our feathered friends.

The world's output of petroleum for 1927 is estimated at 1,220,000,000 barrels.

West Pays Visit to East

More and more every year Canadians are exploring Canada. From the East — Montreal and Toronto — the Canadian Pacific Railway sends special trains right across the Dominion to Victoria, returning by routes different to those by which the outward journey was taken and thus giving easterners a more thorough idea of the land and cities of the west. In the other direction, from west to east, the flow is almost equally great by reason of the large number of westerners who travel across Canada to take ship overseas for the Christmas holidays. But the "Survivance Francaise" is something different to this. In this case, some hundreds of French-Canadian settlers in the west make the trip back for a week or two to the land of their origin, the Province of Quebec. They arrived at the Windsor Street Station of the Canadian Pacific Railway in Montreal, and from there went to Shawinigan, Sherbrooke and Quebec City, where they were enthusiastically feted by local organizations, municipal, government and ecclesiastical bodies. Photograph shows this season's party assembled in the Windsor Station just after their arrival in Montreal recently. The lads in white uniforms of the old French regime were a guard of honor drawn up to greet the party and come from a local Montreal school.

Plan Industries Fair

Everything Made In Great Britain Will Be Exhibited

Almost everything Great Britain makes, from huge electrical equipment for a power house down to the daintiest jewelry, will be seen at the British Industries Fair, which is to be held simultaneously in London and Birmingham from Feb. 20 to March 2, 1928.

The aim of the organizers is to make each section thoroughly representative of its own branch of British industry and to establish the fair more firmly as an annual commercial event of first class importance—the manufacturer's means of launching new products and establishing new contracts, the trade buyer's means of keeping in touch with the latest developments in British production and of taking a complete survey of that section of it which interests him most without having to make a tour of the country.

Ship Live Cattle To Japan

Forty Head Obtained In Alberta Were In Prime Condition

Shipments of dressed beef in the half or quarter carcass have been exported to Japan from Vancouver for several years past and consignments of [illegible] the first shipment of live beef cattle [illegible] the Vancouver Livestock Exchange. The shipment consisted of 40 heifers, averaging 1100 lbs. each, which were obtained in Alberta, it being found impossible to get them in British Columbia. The animals, which will be slaughtered on arrival at Kobe, were in prime condition, but, never having had a rope on them since they were branded the longshoremen had a lively time getting them on board and tied up in their stalls.

Ensures Safety

The trains on the Paris underground railways are being fitted with an ingenious invention by which it will be impossible for them to leave to station unless all the doors are closed and locked. No signal to start will be given by the guard; he will simply press a button. Unless everything is in order the electric motors will not respond to the starting-handle.

Tom: "How did you enjoy your automobile trip?"
Jim: "Fine."
Tom: "And the scenery?"
Jim: "Wonderful! I saw three sign boards I had never seen before!"

Girl: I want a nice book for an invalid.
Librarian: Something religious?
Girl: No, not now. He's convalescent.

A CANADIAN RIVER THAT LOSES ITSELF

Maligne River, In Jasper National Park, Has Interesting Feature

A river that loses itself so completely that no trace of its course can be found for several miles, is one of the interesting features of Jasper National Park, Alberta, which, with an area of more than 4,000 square miles is the largest national playground in the world. The name of this river is the Maligne, French for "bad" and given to it because where it joins the Athabaska there was a ford which was much feared by the trappers and voyageurs of early days in western history.

The Maligne River finds its source in Maligne Lake, about thirty-five miles from its confluence with the Athabaska. Maligne Lake is about fourteen miles long, more than a mile wide and the largest glacial fed body of water in the Canadian Rockies. From this lake the Maligne River flows swiftly down-hill for about four teen miles to empty into Medicine Lake, a body of water four miles long and from a half to a mile wide. This lake, in some places, reaches a depth of 1?? feet.

Out of this lake there is no known outlet. At the foot of it and for a mile or so below there is the dry course of what was once a river. But this bed is dry and there is neither sight nor sound of water in or near it. After about a mile, a trickle of water makes its appearance and within a comparatively short distance a river is once more flowing through the valley.

This is again the Maligne River, although from this point to the Athabaska the volume of water is never as great as that which flows into Medicine Lake. A mile above the Athabaska River, the Maligne hurls itself down into a great canyon, hundreds of feet deep and, in places, less than a yard wide at the top.

London-Dublin Air Service

Would Cut Journey From Ten To Four Hours

An air service between London and Dublin is the object of negotiations now in progress between Imperial Airways, Limited, and the Air Department of the Irish Free State. Passengers would fly from London to Liverpool in air expresses. At Liverpool [illegible]

Some people are proud of their past, probably because it is past.

Receives New Appointment

A. Ledingham who was recently appointed assistant general freight agent of Western Lines of the Canadian Pacific Railway with headquarters at Winnipeg. Mr. Ledingham who, prior to his recent appointment, was city freight agent, joined the services of the Canadian Pacific in 1907, and has been identified with the freight department since that time. His first services were in the freight traffic bureau where he remained until 1911, when he was appointed chief clerk in the office of the assistant freight manager. In 1913 he was appointed contracting freight agent and city freight agent in 1916. His entire services have been with western lines of the company.

International Friendship

Exchange Of Visits Between Canada and United States Creates Good Feeling

The significance of the many recent exchanges of official and unofficial courtesies between Canada and the U.S. were enlarged on before the Canadian Club, Montreal, by Hon. William Phillips, United States Minister to Canada.

Mr. Phillips referred to the visit of Col. Lindbergh to Ottawa at the time of Canada's diamond jubilee celebration in July, the dedication of the peace bridge across the Niagara River in August, the erection and unveiling of the monument to United States citizens who fell while serving in the Canadian army during the war, in Arlington Cemetery, the laying of a wreath upon the altar of remembrance at Ottawa by himself, and the visits to Washington of the Governor-General and Lady Willingdon, and Premier King.

Mr. Phillips reminded his audience that these personal visits were to be returned in February by the United States Secretary of State, Hon. Frank B. Kellogg.

Saskatchewan Honey

Saskatchewan honey production has grown from 24,000 pounds in 1922 to 500,971 pounds in 1927 according to a report issued by the field crops branch of the provincial department of agriculture. The 1927 production was made up of 64,943 pounds of comb honey and 436,028 pounds of extracted honey.

SUNDAY SCHOOL LESSON

JANUARY 29

THE GROWING FAME OF JESUS

Golden Text: "The common people heard him gladly."—Mark 12.37.

Lesson: Mark 3.7-12; 6.30-56.

Devotional Reading: Isaiah 60.1-5, 8, 9.

Explanations and Comments

I. Why the Crowd Followed Jesus, 3.7-12. Because of the hostility of Scribes and Pharisees, Jesus withdrew with his disciples to the Sea of Galilee. The opposition of the religious authorities was growing, and at the same time Jesus was becoming increasingly popular with the masses. Great crowds followed Him, for His fame had gone throughout the land. Crowds came from Galilee and from Jerusalem, from Idumea and beyond Jordan, from the region of Tyre and Sidon. One day when the pressure upon Him of the throng was great Jesus bade his disciples secure a boat in which He could take refuge. It was the fame of Jesus as a wonder-worker which drew them. They knew about his wonderful cures and many afflicted ones pressed upon Him to touch Him. Those afflicted with unclean spirits fell down before him crying "Thou art the Son of God." He charged them not to make Him known. Popular enthusiasm was dangerous for His cause; it might lead to an outbreak.

"What attracted the crowds? His power to heal." Yes. His sermons that were so easily understood? Yes. But above all it was Himself. It was His personality. It was the Christ that attracted the people. And isn't it true today that where Christ is held up to the people, there we do find the crowds, and there we do find the Church taking her part in the life of the people.

Find Germ Of "Moon Blindness"

May Be Possible To Produce Serum To Stop Disease

Discovery of the bacteria which is believed to cause "moon blindness" in horses, and which results in the death of many valuable animals, was announced recently by Dr. Edward C. Rosenow, of the Mayo Foundation, Rochester, Minnesota. Speaking before the 29th annual meeting of the Society of American Bacteriologists, Dr. Rosenow declared that through tests and experiments he had found an organism which injected into animals, produced symptoms identical to this disease.

Dr. Rosenow said if further tests corroborated his findings, it should be possible to produce a serum to stop the spread of the disease.

Manitoba Industries

Last year 22 new industries began operations in Winnipeg and district and 31 existing industries in the city and its environs enlarged their plants. It is estimated that the total value of the output of industrial plants in Manitoba in 1927, was about $170,000,000.

The furthest north police station in the world is on Herschel Island on the Arctic Ocean, a post of the Royal Northwest Mounted Police.

There are men with whom an hour's talk will weaken one more than a day's fasting.

Many a reputation has been gained without merit and many a one lost without fault.

LESSON No. 19
Question: Why is cod-liver oil food a wonderful food-tonic for young girls and women?
Answer: Because it abounds in nourishing factors that are particularly beneficial to people prone to anemia and other conditions due to malnutrition.
Keep your system vitamin-nourished take
SCOTT'S EMULSION

SAYS TRAINS ARE SAFER THAN AUTOS

Railways Are Not Dangerous Says Railway Official

"The most dangerous part of the machinery of transportation is the nut that holds the steering wheel of the automobile." So says W. Jones of Montreal, Assistant to the Director of Safety and First Aid on the Canadian National Railways. Speaking in Winnipeg at the recent presentation of 130 certificates, vouchers, medallions and labels, as well as a number of special prizes to Canadian National employees who had won them through proficiency in First Aid work and home nursing, Mr. Jones declared that the system spent a good deal of money and energy in protecting people who neglected to protect themselves.

"Railways are not dangerous," said he. "It was once thought they were and perhaps this was true, but today there is not a safer avocation in the world. We are highly organized and ready for any emergency. The danger of accidents comes from the general public, which is not yet educated away from its carelessness and recklessness.

"Among its employees the National system stimulates an interest in First Aid work, and I think I may say our department has succeeded in its efforts when I tell you that of the 93,000 on the system more than 37,000 are ready to give first aid to the injured promptly when the occasion demands it. And every year sees an increasing membership in the Canadian National branch of the St. John Ambulance Association.

"Next to First Aid, and perhaps even before it," said Mr. Jones, "is Safety First. This I call 'first aid to the uninjured.' Some day we shall get the careless motorist to see that it is better to be safe than sorry."

Do Not Eat Turkey

Little Demand In New Zealand For This Fowl

[illegible] 77,000 turkeys in New Zealand (or were at a recent census) according to a report contained in the National Poultry, Butter and Egg Bulletin. There is little demand for this fowl and this is more than taken care of by the local producers states Trade Commissioner Julian D. Porter, in a report to the Department of Commerce. New Zealand gobblers generally cost from $3.40 to $4.00 according to weight, hens cost about $2.40 and younger birds from $1.70 upwards. New Zealanders are surely missing something besides winter at Christmas.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1926

CHAPTER XVII (Continued)

Helmi's eyes were two deep pools of wonder and delight. Then over them swept fear, like a raw east wind.

"But Jack, have you to go? Will you have to leave me and go away to the north? I don't want gold, dear Jack, I just want you—big lot money makes only trouble."

Jack kissed her and laughed. "O Helmi, you will not mind my going. This man I am going with knows the North. He has lived in it for fourteen years, and he has the maps and all, and it's a great thing for me that he is taking me with him. There's hundreds of fellows who would wish they were in my place if they knew. But it is just the two of us and a half-breed guide. We have to keep it dark, because the oil syndicate are watching him. They know that he knows where the oil springs are. Helmi, he told me of a hot spring valley there where the rocks are always warm, and tropical plants grow, and the creeks come boiling out of the mountains. He is a wonder, this man, and to think he asked me to go with him, and he will let me stake my claim with his and give me a share in everything."

Helmi looked at him with deep troubled eyes. "I wish you had never found gold in the sand, and never met this man," she said. "Now all our good times will be spoiled by thinking you have to go, Jack. I hate money, plumes on hat, and big rings and trip to Finland—now I just want you—and my nice little house to work in and make nice. Don't go, Jack—just stay with me."

"Poor little kid," Jack said. "I know how you feel. That was the reason I did not say anything about getting married when I came at Christmas. I thought we would wait until I came back from the north, but the better that we did get married, dear. I am glad we did, even if you are pretty cross at me leaving you so soon."

"Not cross, Jack, but just sad. My heart is cold and heavy, just like a stone."

"Now cheer up, Helmi, and listen. I want to tell you what sort of a dress we will buy first when we get the money. The color for you, with that top-knot of yours is green, and you shall have a clinging dress of green satin, with jade ear-rings and necklace, and a cloak of sea foam green, lined with a sort of flame color that will show a little when you walk. Now, what's the matter?"

Helmi was looking at him in horror. She could see herself in Mrs. St. John's room before the glass. "Don't, don't," she cried excitedly; "that dress brings bad luck."

"Goodnight!" cried Jack, "what dismal old Finnish superstition have I jarred loose now?"

"No, no, not Finnish—but I will never wear a green dress Jack, not even to please you."

Jack could see he had awakened a very poignant memory and again he wondered, wishing the magistrate had not told him. Was he always to be haunted by these evil spirits of the past?

If Jack had not been told anything he would no doubt have asked Helmi more about her past. As it was he avoided the subject. He hoped she would tell him everything, and to this end he told her all there was to tell about himself. His father and mother had died when he was five, and his sister, ten years his senior, and himself, were brought up in Toronto by his mother's sister. His sister had been very kind to him, and he adored her. When she was old enough she trained for a private secretary and got a position with a very wealthy woman, and travelled with her in Europe for several years.

"And then I seemed to lose her," continued Jack, "for when she came back she had such extravagant tastes my aunt was at a loss to know how to get along with her. She hated our way of living and all our little economies. She made no secret of the fact that she was going to marry a man with money—and she did, a very decent old scout, too, who worships her. I can understand that, too, for she has a way with her, I can tell you. She is good to look at, and she is so frankly selfish. She loves beauty more than anything on earth, and would sacrifice principle for it. Now she may love this husband of hers. I hope she does—but I know this that if he had been poor she would not have looked at him.

"I must tell her about you, Helmi, and send her some snaps of you. She would love you for your beauty and I daresay when you meet her you will fall in love with her, too, as most people do. But I like to remember her best when she was such a good sister to me—before she went away. I am going to write to her right now."

This was Sunday afternoon, a dull, gray day, with a high wind and low hanging clouds. There was no pleasure in going out, so they stayed beside their own cheerful fire all day. The mountain tops were hidden in the clouds, which seemed to be slipping lower and lower down their rugged sides.

Jack was writing his letter on the table. "I will read it for you when I am done," he said, "and I want you to write too. It is rather nice to have a relative to write to in case of marriage," he said smiling. "I want to show pictures of my lovely Finn girl to someone."

Helmi smiled back at him. Her mind was concerned with the one overwhelming thought that he would have to leave her some day soon. She could not think clearly because of this. Away in the North where there were whirling rapids, deep crevices in the mountains, and horrible roaring canyons, where there were bears and wolves, the possibility of starvation, and blinding storms and lost men going mad [illegible].

Helmi cursed this man, this prospector who had put this wild scheme before her Jack. She wished the lightning had struck him dead. She interrupted Jack's writing. "What is the name of this man you will go with?"

"His name is Keith, Tom Keith. He has his house in Winnipeg, but is seldom there. His wife and family live [illegible]."

Helmi's eyes blazed with sudden Finnish anger. Keith—a prospector—gold on the Nahanni! Again she could hear Minnie, poor little Minnie, broken and ashamed, telling her pitiful story. "He said he would stake a claim for me if I would never tell."

"He's a devil—he's a devil and a liar!" Helmi screamed. "I know about Mister Tom Keith!" and she poured out curses in Finnish which made Jack shudder, even though he understood not a word.

"Helmi, Helmi! What is wrong? How do you know this man, where could you have met him?"

"I knew Minnie," she said, quite off her guard in her excitement; "the poor little girl he fooled. He's a devil. I tell you and you are not to go with him."

"Come here, little wildcat," Jack laughed, "calm down and tell me what you know. Don't scream like that, Mrs. McMann will think I am beating you. I may have to yet, too—I can see that."

Helmi stood looking at him; she would tell him everything, she must tell him. She had sworn never to tell, but surely when one is married it is different. Jack would keep an oath too, with her—it would still be kept! Oh, it would be such a relief to tell her dear Jack—he would be sorry for all she had suffered. Yes, she would tell him everything. Her anger was all gone now, and the happy light had come back to her eyes. It would be so good to tell him.

She came over to him and put her arms around him. "Forgive me, Jack. I am a wild-cat, but it's all for love of you. Have you finished your letter? No! Well, I will wait."

Jack was just writing the address—

Mrs. (Dr.) St. John,
Chestnut Street,
Winnipeg.

"I forget the number," he said, "but everybody knows the Doctor. Now, come, Helmi, and tell me who Minnie is, and where you met her; in fact I want to know a lot of things."

Helmi stood staring at the name, pale with emotion. She choked back a sob by biting her lip until it bled.

"Oh, there is not much to tell," she said, as carelessly as she could with her heart beating so wildly. "Minnie was a girl who lived in the same house in Winnipeg, and she said this man had said he would do big things for her, and he was just lying. He broke Minnie's heart—he is a bad man Jack—that is all." She did not look at him when she spoke; she was afraid he would read in her face what she must not tell.

(To Be Continued.)

Fresh Supplies In Demand.—Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

The Irish harp was originally quadrangular instead of triangular, as at present.

One way to prevent seasickness is to remain on shore.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter, Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could cry from morning till night. I had another baby, a two-year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. It sure did help me and I had taken just five bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at these times."—Mrs. Olivier Menard, 24 Harvey St., Chatham, Ontario.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

Every "Chip" always crisp and fresh
Buy Christie's Cheese Chips. Fine old cheese cunningly blended with purest ingredients into deliciously crisp and wholesome little wafers.
In the store or on the 'phone always ask for
Christie's Biscuits

Genius At Making Violins

Has Gone To Europe In Search Of Fine Woods

Nicholas Vasich, a young violin maker, who was "discovered" a year ago in Seattle, Wash., by Mischa Elman, has sailed for France to begin a six months' search among old cathedrals and churches of France and Germany for the finest violin woods money can buy. When he returns Vasich will convert this material into a quartette, consisting of two violins, a viola and a cello, for Elman.

Vasich said here that he expects to find most of the wood he wants in old organs. Wood for the violins is already at hand, and he has tentatively located several pieces suitable for the other instruments in an organ installed in the church of a French municipality more than 200 years ago.

The violin maker is 36 years old. He was born in Bosnia-Herzegovina, of Serbian stock, and he began making violins at the age of 16. Two years later he left his native country for Vienna. Then he drifted to Switzerland, to Schonbach, in Czecho-Slovakia, and finally to Germany, where he made violins in Hamburg and Berlin.

At the start of the war in 1914 he was in Berlin and fled to Russia. Finally he got to Shanghai and then to Seattle in 1920. He immediately set up a shop in Seattle, but found its people were little interested in his instruments. It was not until Mischa Elman, late in 1926, tested one of his instruments and called him a genius that he became known in this country.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Rich Treasures Found

One Of Most Remarkable Graves Discovered In Ur Of Chaldees

Rich in treasures, and strewn with bodies of musicians, servants and gold-decked women of the harem, who accompanied their master in death, one of the most remarkable graves found thus far in Ur of Chaldees has been discovered by the joint archaeological expedition of the University of Pennsylvania and the British Museum, says a report just received.

The body of the king was not found but presence of the bodies of more than a score of men and women who constituted the king's household offers proof that in the fourth millenium, B.C., there were practiced in Mesopotamia burial rites and ceremonies about which later tradition is silent, and archaeologists hitherto knew nothing, Director Leonard Wooley, of the expedition, states.

A magnificently decorated chariot and harp, gold and silver vessels, an exquisite toilet set and various other treasures, yielded by the grave, served to illustrate the extraordinary degree of material civilization which Mesopotamia enjoyed more than five thousand years ago, according to the director.

Old Country Travellers

Canadian Pacific Operates Through Service To Seaboard

A through tourist sleeping car service from Winnipeg to Saint John, N.B., will be operated by the Canadian Pacific Railway, for the convenience of overseas travellers. These cars will make a direct connection with each sailing of the Company's steamers, thus providing a fast through service and assuring connection.

RAILWAY EQUIPMENT COSTS MUCH MONEY

One Sleeping Car Is Worth Price Of Five Average City Dwellings

Canada's first railway was sixteen miles long. It was called the Champlain and St. Lawrence Railroad and it ran between Laprairie on the St. Lawrence River and St. Johns on the Richelieu River. It began operation in 1836. The tracks were made of wood and the carriages were pulled by horses. The following year a steam locomotive was built to pull the train and the wooden tracks were covered with an iron surface.

Railroading in Canada has progressed somewhat since then. In 1926 almost thirty-five million passengers were carried by the railways of Canada and it is safe to assume that almost every citizen in the Dominion has been on board, or at least has seen, a modern railroad train.

If, however, the average traveller were asked to hazard a guess as to the cost of building a modern sleeping car, the chances are he would be many thousands of dollars short of the correct figure. There are few who know that one sleeping car is worth almost as much as five average dwellings and that it takes as long to build one as it does to erect a modern six-room house.

Some information on this subject was given by the Hon. C. A. Dunning, Minister of Railways and Canals, when he tabled the equipment order of the Canadian National Railways in the House of Commons during the 1926-27 session. Some of the figures quoted by him at that time are as follows:

A mountain type locomotive, such as is used in passenger service by the Canadian National Railways between Montreal and Chicago, costs $53,000; a mikado type locomotive used in freight handling on various parts of the system costs $73,000; a first class coach, $34,000; a baggage car, $25,000; a dining car, $47,500; a compartment-observation car, $58,000; a sleeping car, $47,063; an express refrigerator car, $10,000; an automobile car, $2,400; a box car, $2,700; a caboose, $3,000; a rotary snowplow, $61,000; and a wing snowplow, $10,000.

Increase Railway Traffic

An average of 76 railway trains per day have registered in or out of Calgary each week day during the late fall and early winter, a new record for increasing railway traffic of the Canadian West. Twenty passenger trains in all directions register in and out of Calgary daily.

The King of Pain—Minard's Liniment.

Little Helps For This Week

"Whatsoever ye do, do it heartily as to the Lord, and not unto men."—Col. iii. 23.

The ministry of little things
Not counted mean or small
By that dear alchemy which brings
Some grain of gold from all.
The faith to wait as well as work
Whatever may befall.
—Susan Coolidge

Little self-denials, little honesties, little passing words of sympathy, little nameless acts of kindness, little silent victories over favorite temptations,—these are the silent threads of gold which, when woven together, gleam out so brightly in the pattern of life that God approves.
—Frederic W. Farrar

NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands Of Mothers Say Of Baby's Own Tablets

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them Mrs. Charles Hutt, Tancook Island, N.S., writes: "I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 20 years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

A Valued Gift

Made of timber from the residence of Sir John Logan Campbell, the first house built in Auckland, New Zealand, a handsome ink-well stand has been presented to the Auckland Chamber of Commerce by Mr. F. A. Holliday, the immediate past president.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonical in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Building and Construction In Canada

It has been estimated that a total of $418,967,000 was spent in building and construction in Canada in 1927. Of this amount $124,930,000 was for residential buildings, $163,426,800 for places of business, $39,966,500 for industrial plants and $90,394,200 for engineering works.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

"Have you ever been seriously ill?" the doctor asked a new patient.

"No, sir," was the reply, "but some time ago I was tossed by a bull!"

"Well, don't you call that an accident?"

"No, sir. He did it on purpose."

First Boy: "My father is a fine artist. With a few strokes he can turn a laughing face into a sorrowful one."

"Second boy: "So can mine, but he uses a cane."

STABLE VENTILATION

(Experimental Farm Note)

The horse stable at the Experimental Station at Beaverlodge is considered by most of the visiting farmers as very cold. The temperature frequently reaches below zero and there are no horse blankets used except occasionally when a horse comes in warm from a long drive. Nevertheless the horses are never seen to shiver and are in good health. There are no drafts in the stable but sufficient change of air to prevent that "horsey" smell so common in warm stables. To accomplish this there are four shafts each two feet square reaching from the ceiling of the stable to the roof. The stable holds twenty horses. The intakes are eight smaller openings from the outside at floor level, extending up between studs and opening into the stable at the ceiling.

More difficulty is experienced in ventilating a cattle stable but the same principle holds. The heifers and bulls at the Experimental Station have been wintered for years in corrals with a straw shelter over one end. They have been fed well and were always healthy. The milch cows have been stabled and although there is more difficulty in maintaining a dry air condition in the cattle barn than in the horse barn the same principles prevail.

Province of Alberta

PUBLIC SALE OF LAND

DEPARTMENT OF MUNICIPAL AFFAIRS

TAKE NOTICE that under the Sales of Public Lands Act, the following described lands will be offered for sale by Public Auction, at: The office of A. G. Brown, Sec. Treas. Village of Holden, Holden, Alta., on Wednesday, the 8th day of February, 1928, at the hour of 1 o'clock P.M.

Municipal District 488

N.E. 10-50-14-4 — 160 acres

The above land will be offered for sale subject to a reserve bid which will not be announced prior to the land being offered for sale, and subject to the reservations contained in the existing certificate of title, and on terms which will be announced at the sale. For further particulars apply to

W. D. SPENCE,
Deputy Minister of Municipal Affairs,
Edmonton, Alberta.

Doctor: "Why, Pat, what's the matter with you?"

Pat.—"Well, doctor, I swallowed a potater bug, an' although I took some Parris green right after, to kill the baste, still he's just raisin' th' devil inside o' me."

The mistress was interviewing the new cook and asked: "Have you been married, Susan?"

"Twict, Mum," Susan told her.

"Have any children?"

"Yes, Mum. I've three. One by th' third wife av me second husband, an' two by th' second wife av me first."

C. HOBSON, Proprietor

LOCAL and PERSONAL

Born—To Mr. and Mrs. Elmer Maurer, on January 29, a daughter.

On Tuesday, January 17th, Mr. W. W. Hill shipped six pigs to the Live Stock Co-operative Association. Five were graded select and one heavy. The select pig is something of a rarity and to get five selects out of six pigs is a feather in Mr. Hill's cap.

Gordon Jobb and Archie Evenson spent the week-end in the city.

Miss I. McCullough returned to her school at Athabasca, after spending a few days with her brother, Mr. McCullough.

Miss Thelma Jobb entered the Royal Alexandra hospital on Monday to train for a nurse.

Miss M. Argue returned to school on Wednesday, after a week's illness.

Mrs. Firth and Mrs. McCauley returned on Sunday morning after a few days in the city.

Mrs. Jobb returned home on Tuesday after a short visit spent with friends in the city.

Mrs. J. W. Carter, of Holden, is visiting with friends in town.

FORMER TOFIELD BUTCHER, NOW IN TORONTO, IS UNDER ARREST

The criminal investigation department of the Alberta Provincial Police only came into being on Tuesday last. Its first case was handled on Wednesday—a charge of forgery against one George Gleeds.

Its second case, a charge dating back to February, 1921, of false pretences, involving some $1,000, has just been concluded, with the arrest, by the Toronto city police, of William T. Jiggins, former Tofield butcher.

Interesting Story

The story of Jiggins is an interesting one—the possible sequel, still more so. In February, 1921, Jiggins bought cattle and hogs from several Fort Saskatchewan farmers, giving checks as follows: To J. H. Schuler, $122.86; Wong Lee, $220.00; John Woany, $191.60; Nick Yerash, $264.80 and W. D. McMillan, $204.75.

All the checks, which were on the Imperial Bank of Canada, Edmonton branch, were returned marked "N.S.F." Meantime, the cattle had been sold and Jiggins had disappeared.

The A.P.P. kept up an unremitting search for the missing man, against whom warrants had been issued, but beyond a few vague rumors, nothing was heard of him.

Letters From Toronto

Then recently a letter came to Inspector Piper from one H. C. Payne, of Toronto, asking if there were any warrants against Jiggins and offering to locate the wanted man.

The Toronto city police, were supplied with a photograph of Jiggins and details of the charges against him. Back came the laconic wire. "Have arrested Jiggins." And now Inspector Piper is figuring that "Mr. H. C. Payne" and Mr. William H. Jiggins are one and the same person.

Detective Skelton, of the criminal investigation department, left the city Friday morning to bring Jiggins back for trial.—Edmonton Journal.

FACTS ON THE FILM "RESURRECTION"

Leo Tolstoy, who died in 1910, wrote the novel which was published in 1899, and later translated into eleven languages. The film is presented by Inspiration Pictures and Edwin Carewe, Mr. Carewe having directed it. Rod La Rocque, the star, plays Prince Dmitri. Dolores del Rio, the featured player, is Katusha Maslova. Ilya Tolstoy, son of Leo, plays his father in a special prologue to the film. The film was made in California. It is released by United Artists Corporation.

The cast includes, aside from La Rocque, Ilya Tolstoy, and Dolores del Rio, Marc MacDermott, Lucy Beaumont, Vera Lewis, Clarissa Selwynne, Eve Southern and Rita Carewe.

The 1903 stage version of "Resurrection" was played in London by Sir Herbert Beerbohm-Tree, in America by Blanche Walsh. Mary Garden is now singing Alfano's opera "Resurrection" throughout the world, having introduced it at the Auditorium, Chicago, Dec. 31, 1925. "Resurrection" is the story of a Prince and a peasant maid who loved and sinned and sorrowed and loved again.

This great internationally known picture will appear at the Variety on Friday and Saturday of this week.

LARGEST BONSPIEL IN TOFIELD'S HISTORY

The largest and best bonspiel in the history of Tofield is underway as this paper is being printed.

Curlers from many visiting rinks, including Edmonton, Viking, Holden, Ryley, are competing for the handsome trophies and the prizes which accompany them. Altogether there are 112 curlers in town and a merry time they are having playing the roarin' game. A full list of winners and prizes will be published next week.

W. I. NOTES

The Women's Institute are fortunate in obtaining Mrs. C. Davidson to give lessons on "Home Nursing" in their rooms beginning February 13th, at 2.30 in the afternoon.

A fee of one dollar will be charged for 12 lessons and the manual. It is a grand opportunity for all—so everyone be on hand. A large class is requested by Mrs. Davidson. We want all the women and young girls interested.

U.F.W.A. NOTES

The meeting was held on January 28th, a joint session with the U.F.A. The delegates to the annual Convention gave reports which were voted the best ever given. They were certainly packed full of interesting news to farm folk.

The next meeting will be held on Friday, Feb. 10th, in the United Church at Tofield. Mrs. Gunn, Provincial President of the U.F.W.A. will be present, also Mrs. McNaughton, director for our district. Mrs. Gunn will address the meeting and all who have had the privilege of hearing Mrs. Gunn in the past will realize what a treat we have in store.

Mrs. Gray will give a paper on "Women of Other Lands." A cordial invitation is extended to all to come and share in our pleasure of listening to Mrs. Gunn. The members of the U.F.A. are especially invited. The meeting will open promptly at 2.30 p.m.

WEDDING

Roth—Schweitzer

Miss Nora Schweitzer, daughter of Mr. and Mrs. C. J. Schweitzer, became the bride of Ruben Roth of Tofield, Canada, this afternoon at 2:30 at East Fairview Church. Rev. J. F. Zimmerman read the marriage lines.

The bride was gowned in white satin back canton and her bridesmaid, Mrs. Melvin Roth wore a dress of pink flat crepe.

The groom was attended by his brother, Melvin Roth.

After the ceremony, dinner was served to 150 guests at the home of the bride's parents, where a color note of pink and white was used in the decorations.

Mr and Mrs. Roth will be at home on a farm near Tofield, Canada, after March 1st.—Melford, Neb., Review.

HOCKEY GAME SATURDAY

The Edmonton Arenas, a fast and skillful team of hockey players will play at Tofield on Saturday. This team and the Tofield team have tangled three times this season. Tofield won the first two games and the Arenas the third. These teams are evenly balanced and a good game ensues when they meet. Game starts at 2:30 p.m.

TOFIELD LADY CURLERS WIN PRIZES AT EDMONTON

At the Edmonton Ladies' Bonspiel, the rink skipped by Mrs. Hammond won third prize in the King Edward Hotel trophy Grand Challenge). Other players on the rink were Mrs. Cap Lee, Mrs. Bruce, Mrs. Abbott.

In the McDonald Trophy (Consolation) the rink skipped by Mrs. McCauley came third. Other players were Mrs. Jobb, Mrs. McLaughlin, Mrs. E. Rogers.

L. P. Woodhams, optometrist of Camrose will pay his regular visit to Tofield, on Tuesday, February 7th. His headquarters will be at the Royal Alexandra Hotel.

Nursery Rhyme for Grown-Ups
Mary had a little lamb,
Given by a friend to keep.
It followed her around until
It died from want of sleep.
—Exchange.

KETCHAMOOT

The Missionary Aid Society will meet at the home of Mrs. A. Williamson next Wednesday, Feb. 8th. A cordial invitation is extended to all.

Mr. Roy Lee played ... with the Tofield team at Holden Friday night.

The Bardo and Ketchamoot hockey teams played a game on the Ketchamoot ice Saturday afternoon. Score was 3 to 4 in favor of Bardo.

Mr. Geo. Lawson was a passenger to Edmonton Friday evening.

Mrs. McDowell and little daughter, of Edmonton, were guests of their cousin, Mrs. Whidane over the week-end.

Messrs. A. F. Schultz, O. Barr... and J. Appleby attended the tractor school for a few days in Edmonton last week.

Mrs. G. W. Sears spent Monday and Tuesday with her mother and children in town.

Mrs. B. Wildman and daughter Mrs. F. Shupe, Mr. Frank Hull and Jason Henderson motored to Camrose Friday and spent the day.

Little Miss Eileen Sterritt was able to return home from the hospital the first of the week.

Mr. and Mrs. John Brown and Mr. and Mrs. Leslie McGinnis motored to Edmonton on Friday.

The Millinery Social at the Whitlane home on Friday night was a success both socially and financially. A large crowd filled the house at an early hour. After which an entertaining evening was spent. The first of the porgram was music by Miss Mabel Lawson, organ; Martin Lawson, violin, and Mr. Sparby of Kingman, guitar, who furnished music throughout the evening. Miss Lillian Carlisle read a humorous news paper "The Ketchamoot Tell It All." Rev. Gordon favored with two vocal selections. A guessing cake contest was taken in order. Miss Hazel Sears and Arthur Cookson carrying off the first prizes, two pretty vases. Then our local auctioneer, Mr. Schultz auctioned off the hats done up in paper bags for the men to trim which caused much merriment especially when they marched around the room exhibiting them. Our minister exhibited the most skill in millinery work and was awarded first prize, hat worn by Mrs. McDowell. Lunch was served at midnight, after which an hour was spent in community singing. The ladies were well pleased with the proceeds, which netted them around $40. We wish to thank Mr. and Mrs. Whitlane for their kind hospitality, also all who helped in any way to make the evening a success.

Mr. and Mrs. John Lee entertained the young people of the neighborhood to a whist party at their home on Tuesday evening. Six tables playing. First prizes went to Mr. and Mrs. Henry McGinnis, consolation to Mrs. Leslie McGinnis and John Thompson. Delicious refreshments were served by the host and hostess and a pleasant evening was enjoyed by all.

KINGMAN

Mr. T. J. Rogness was a business visitor in Edmonton last week.

Mr. and Mrs. J. Bones and family were the guests of Mrs. F. M. Simonson on Sunday.

Mrs. C. F. Sealund is a patient at the St. Mary's hospital in Camrose.

The opening dance in the Kingman Hall last Saturday was a great success. A tremendous crowd was present. The music was furnished by Holroyd's Orchestra from Camrose.

A little surprise was sprung on Mr. C. R. Blyckert by a number of friends on Wednesday evening, January 25, it being his fifty fifth birthday anniversary. He was presented with a number of gifts and all spent a very enjoyable evening.

A dance will be held in the Kingman Hall on Friday, February 3rd. Everybody welcome.

TENDERS WANTED

Tenders will be received up to noon Saturday, February 11th, 1928, for 20 cords of green wood, cut 16-inch lengths, delivered at Lakeshore school grounds. Lowest or any tender not necessarily accepted.

MRS. JOE PHILLIPS,
Sec.-treas., Lakeshore School District.

LOWER ROSS CREEK

The summer school has been closed for a week owing to an outbreak of scarlet fever. The only case reported so far is in Mr. ... Ackley's family, and it is hoped that it can be confined to the one family.

Mr. Geo. Wood and Mr. Wm. Lennie attended the annual meeting of the Blackfoot ... Association in Edmonton.

At the annual school meeting of the Summer S... Mr. McNeil was elected to take the place of the retiring trustee Mr. ... Wood and Mr. Mazur to take the place of Mr. Lennie, who has moved from the district. Mr. Lennie was re-appointed as Sec-treas. and Mr. McNeil was appointed chairman.

Mr. ... has moved to his farm by the ... and two Mennonite families from Swalwell have moved into his old place.

Joe Murray is attending the tractor school in Edmonton for two or three months.

Some of our youthful hunters have been quite successful snaring coyotes the last month.

LAKE SHORE

Little Miriam Seale was quite ill last week with a threatened attack of pneumonia. We are pleased to report that she is much improved at present.

The board of trustees of this school district held their organization meeting at the home of T. R. Murray last Wednesday. Quite a lot of business was transacted in connection with the operation of the school for the current year.

Miss Emily Ferguson went to Westlock on Sunday evening where she re-opened school on Monday. The school being closed during the month of January.

R. C. Phillips made a business trip to Vermilion on Monday.

The many friends of Mrs. Will Abernethy will be sorry to hear she is not very well since about Christmas time.

Mr. Wm. Hawley also has not been well for some time.

H. H. Phillips who is working near Mundare spent Saturday evening and Sunday at the home of his brother, Roe Phillips.

BARDO

Married at Milford, Nebraska, on Thursday, Jan. 26, 1928, Mr. Ruben Roth of Tofield, to Miss Norma Sweitzer.

Born—To Mr. and Mrs. Elmer Maurer, on Jan. 29 a daughter.

Born—To Mr. and Mrs. Ben Owens, of Alden, Iowa, on Jan. 17th a son.

The Aid Society ... Thimble Club met with Mrs. Willie Simonson on Wednesday, Jan. 2... The Thimble Club meets every week and will have their meeting this week with Mrs. Haakedal.

The Young People's Social, which was to have been at the Simonson home on Friday evening the 27th, was postponed to Friday evening Feb. 3rd.

The next meeting of the Aid Society will be on Feb. 8th, at the Foshaug home.

The joint meeting of the U.F.A. and U.F.W.A. held in the basement of the church on Friday the 27th, was well attended. Full and interesting reports of the Convention at Calgary were read by the delegates M. Finseth and Mrs. Jevning, for which they received a vote of thanks. The members of the U.F.A. then served a bountiful lunch in the most approved style. The ladies greatly enjoyed the same and were loud in their praise.

The U.F.W.A. will have a basket social on the evening of Feb. 14th, in the basement of the Lutheran Church.

Bennie Anders... and Ingval Ness are attending the short course in farming at the University in Edmonton.

Mr. Steen and Joe Fide went to Edmonton on Friday to hear Kathleen Parlow, the lady violinist.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe —Top Quality

In clean, bright Aluminum

Peace and Agriculture

[…] the world is still staggering under the enormous burden of the war […] which each and every one is carrying. Even countries […] were not engaged in the Great War were none the less put to […] and sustained huge losses as a result of that titanic struggle. […] people of Canada know what it is costing them. They have been called […] income tax, excess profits and business profits taxes, sale tax, […] taxes on cheques, receipts, matches, increased postage rates, etc., etc. […] loss of life and in maimed and suffering humanity, the […] monetary loss of war is every day being brought home to the peoples […]

Only recently announcement was made that fourteen shillings of every […] paid to the British income tax collector goes to pay for past wars and preparations for future wars. And now the Secretary of the United States […] reports in his annual report how approximately eighty-two cents […] into the Treasury is expended for past, present or future […] slightly less than eighteen cents for financing the […] functions of government.

In other words, as one paper puts it, while eighty-two cents of every […] collected from the tax payer is devoted to war purposes, only eighteen […] to the Government for the purposes of peace: agricultural […] erection of public buildings, scientific investigation, the maintenance of diplomats abroad, the making and enforcing of laws and all the […] ordinary civil functions added together.

These figures would seem almost incredible even for a country in […] Europe, but stated officially by a member of the United States Government as applying to that country enjoying such a large measure of isolation from the entanglements forced on many European nations, and itself […] immune from attack, the facts and the thoughts to which they give rise are appalling.

Faced with such a situation it is small wonder that the masses of the people of the world are crying desperately for international agreements and […] outlawing all war, and that the more far-seeing statesmen in all countries are anxiously striving to find some formula, some basis, of common agreement.

But human nature continues to be very much what it always has been, and so, while the world is crying for peace, and the United States loudly proclaims itself as the great apostle of peace, its people are nevertheless being incited through a flag-waving campaign, and in the name of one hundred per cent Americanism, to sanction the inauguration of a "world's greatest navy" policy and the expenditure of billions of dollars upon battleships and more battleships, which will be obsolete and placed upon the scrap heap before the babies of today reach middle age, unless, indeed, the very existence of such a navy does not invite a struggle in which some of the ships will be destroyed in battle amid the flare and roar of their own guns.

And while this madness continues, and debt is piled upon debt for the people to bear, civilization is demanding better schools, better roads, better housing, more of the joy and happiness of life. The cost of one modern battleship devoted to agricultural research would work a reformation in food production, and every dollar so expended would add hundreds to the wealth of the world, as contrasted with every dollar expended in war preparations being for the avowed purpose of destroying both life and wealth.

Among all classes of people, agriculturists should be the foremost in their insistence upon peace and in setting their faces with determination against war and preparations for war.

Revising Trade Agreement

Greek Government May Ask For Treaty With Canada

Dr. Cachimaros, the Greek minister at London, called on Hon. P. C. Larkin, Canadian high commissioner in London, recently and conferred with Mr. Larkin nearly an hour with regard to a trade treaty between Greece and Canada […]

Business Men Meet Farmers

Plan In Manitoba To Establish Closer Relationships

Representatives of the United Farmers of Manitoba and members of the Greater Winnipeg Board of Trade conferred recently in an effort to establish closer relations between business men and farmers of Manitoba in solving special problems of agriculture.

Under a plan discussed, representatives of business and of agriculture might get together as occasion might require to deal with specific problems affecting the farming districts.

The conference followed the suggestion of Premier John Bracken, of Manitoba, made at the 1927 annual meeting of the Canadian Chambers of Commerce that a closer relationship be established between commercial and agricultural interests of the Dominion.

A REMEDY THAT INSPIRES FAITH

People Who Have Used Dr. Williams' Pink Pills Speak Of Them With Praise

"Going into a decline" is an expression that has come to be known as one of the most difficult conditions with which physicians have to deal. It often describes an alarming condition because it does not yield to ordinary treatment and the debility continues with loss of flesh and strength until the patient feels hopeless. In the majority of such cases the victim suffers from lack of good red blood, and if the blood can be restored to normal no other medical treatment is necessary. Proper food […] the test.

Every man, woman and child who lacks health and strength should at once take Dr. Williams' Pink Pills to build up their blood supply. The mission of this medicine is to make new rich red blood, which speedily restores health and strength. "I am writing to tell you what Dr. Williams Pink Pills have done for me," says Mrs. J. H. Gollan, Pirdale, Man. "A few years ago I was in a badly run-down condition so much so that I was subject to fainting spells which would leave me in such a condition that I could hardly go about. Then I was stricken with influenza and this further weakened me, and throughout the winter I remained in this condition. I was taking doctor's medicine but as it did not seem to help me my mother advised me to try Dr. Williams' Pink Pills […]"

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Extensions Recently Made Connect Western Europe With America

The most far reaching developments in the history of wireless telephony were put into operation when the service to England from Canada and the United States was extended to Brussels and Antwerp as a preliminary to further extensions linking the whole of western Europe with the whole of North America.

Simultaneously it was announced that successful tests in television between London and New York have brought this latest scientific marvel appreciably nearer the stage where it can be operated commercially making it possible for London to see events […] in New York or vice versa.

The expansion in trans-Atlantic telephoning, however, is more important at the present time because of the trade possibilities it fosters. In this connection, it is pointed out that it is now possible to conclude deals verbally between merchants, say in Danzig, Vienna or Budapest on one side, and merchants in Vancouver, San Francisco, or Havana on the other.

This remarkable achievement has led to the appointment of an international advisory board to standardize […]

Aviator's Adventure In North

Squadron Leader T. A. Lawrence Makes Report To Ottawa

Forced down by darkness at a lonely trading post, with the temperature hovering around 30 degrees below zero, isolated by snow storms and powerless to take wing again for more than a week, Squadron Leader T. A. Lawrence, Ottawa, in charge of the R.C.A.F. detachment assigned to survey the Hudson Straits, was the principal in a thrilling adventure in the frozen North.

Rumors reached the capital that the leader of the Government's survey and patrol fliers had been lost. Later officials of the Department of Marine and Fisheries who are in touch with the Hudson Straits posts by radio, reported Major Lawrence safe.

The squadron-leader's report reached headquarters by radio from his winter headquarters at Wakeham Bay, Ungava.

After being forced down January 10, the aviator reported, he was weatherbound until January 18, when a companion flier, Carr Harris, sent to search for him, arrived. High winds which accompanied the extreme cold made heating of the plane's motor impossible, and subsequently Squadron-Leader Lawrence was stranded back of the Hudson Bay sub-post at Little Ruglak.

With the coming of […] January 17, the airmen dug their machine out of the snow and took off, finally reaching Wakeham Bay despite poor visibility.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines, Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

FRIENDLY SPIRIT AT THE OPENING OF PARLIAMENT

Ottawa. A felicitous atmosphere pervaded the House of Commons when Parliament opened, Right Hon. W. L. Mackenzie King, the Prime Minister, embracing the occasion to welcome Hon. R. B. Bennett, the new leader of the Opposition, and in doing so paying warm tribute to Mr. Bennett's qualifications for the post.

"The member from West Calgary, through his scholarship, great natural endowments, ability in business and politics is qualified for the position he now holds, and he will at all times have my best wishes," declared the Prime Minister. Mr. Mackenzie King felt sure Mr. Bennett would co-operate in upholding those ancient traditions of Parliament which meant so much to its proceedings.

In the same strain, Robert Gardiner (Progressive, Acadia), speaking for the Progressive Party, welcomed Mr. Bennett and voiced the appreciation of Western Canada at the choice of the Conservative Party in its leader. He drew attention to the fact that Mr. Bennett represented an Alberta constituency, and declared this fact would probably create a very strong sentiment between Eastern and Western Canada."

Mr Gardiner entered a plea for co-operation in the House. "We are of the opinion that co-operation in Parliamentary work is just as essential for the welfare of the Canadian people as is co-operation in other lines of endeavor," he said.

Mr. Gardiner also paid tribute to Hon. Hugh Guthrie, who had led the Opposition in the Commons last session.

"While I have not been a member of this House for very long, in the few years I have been a member I noticed a great difference in the temper of the House last session, primarily due to the very able leadership of the honorable member for South Wellington." […]

Saskatchewan Legislature

Notice Of Seven Bills Is Given By Ministers

Regina. — Premier Gardiner as minister of education, Hon. T. C. Davis, attorney-general, Hon. S. J. Latta, provincial secretary, and Hon. Dr. J. M. Uhrich, minister of public health, by giving notice of seven bills between them in the Legislature, took the preliminary steps towards setting the legislative machinery in motion.

Notice of a bill to provide scholarships for Canadian students in Paris was given by Premier Gardiner. Whether this bill will provide for an increase in the number of $1,200 scholarships already offered under the Act passed during the 1919-20 session or make provision for a new system of granting them is not known.

Attorney-General Davis will have three bills to introduce. All of them are amending bills to existing legislation, as follows: amending the Saskatchewan Evidence Act, the Crop Payments Act, and the Assignment of Book Debts Act.

Hon. Mr. Latta will introduce bills providing for the imposition of a tax on wild lands and respecting villages, the latter being, it is believed, a consolidation as mentioned in the speech from the Throne.

Dr. Uhrich will introduce a bill confirming an agreement between the Crown and the Anti-Tuberculosis League.

Prince Receives Farmers' Party

Remembers Acquaintances Made During His Ranching Experiences

London. At the reception tendered them in the state room of St. James' Palace, the Canadian farmers touring the British Isles were especially struck by the readiness with which the Prince of Wales remembered acquaintances made during his ranching experiences at the "E.P." ranch at High River, Alta.

"Have you brought your bagpipes with you?" the Prince asked W. Sharpe, who had reminded the Prince of having played them on the E.P. ranch. To a former resident near the E.P. ranch the Prince addressed many inquiries about affairs in Western Canada.

Those members of the party who came from the Peace River district of Alberta asked the Prince to visit them on his next trip to Canada.

"I will do my utmost to make it," he replied. "I am sorry I have not been there before."

The visitors remained at the palace about half an hour and prior to being received by the Prince, were given a reception by Hon. P. C. Larkin, Canadian High Commissioner in London, at Canada House.

RAILWAY PLANS EXTENSIONS IN NORTHERN AREAS

Winnipeg. Extension of the Canadian Pacific Railway into the Northland of Saskatchewan was forecast by the president, E. W. Beatty, K.C., on his arrival here.

The work will be a continuation of the branch line which runs North from Wadena and ends at Nipawin, almost due East of Prince Albert. Connections with Prince Albert will be made by a line joining that city and Nipawin.

Growth Of Freedom

Bonds Uniting Empire Are Those Of Responsibility

Ottawa.— "We are witnessing a growth of responsible freedom," said Rt. Hon. L. C. M. S. Amery, British Secretary of State for the Dominions, addressing the Canadian branch of the Empire Parliamentary Association here. Speaker Lemieux presided.

Mr. Amery sketched the growth of responsible government in England indicating, in this, the centralizing effect of the crown. "There are critics," he went on, "who have felt that the complete recognition of responsibility which was accepted at the Imperial conference a year ago has left no bonds which can in fact hold the Empire together. That is quite true. There are no bonds except the sense of responsibility itself. That is the bond."

Immigration Plan Has Been Criticized

Poor People May Resent Examination By Strange Doctors

London. —Canada's new system of having prospective immigrants examined by Canadian doctors on this side of the Atlantic ocean instead of in the Dominion upon their arrival there has been criticized as being likely to discourage migration of British people who may resent being examined by strange doctors at certain appointed places.

Canadian officials reply that under the old rules migrants had to undergo examination before strange doctors with this important difference that such examination took place upon their arrival in the Dominion where they ran the risk of being refused entrance to the country. The new system, it is explained, is only experimental, and if it proves successful the number of examination centres will be increased.

Dr. Alfred Cox, secretary of the British Medical Association, states that no friction has arisen between British medical men and the Canadian doctors who are examining emigrants, and he expresses confidence that no slight of the British doctors is intended in the new arrangement.

THE SUPPLY OF REWARD WHEAT NOW EXHAUSTED

Ottawa. "The demand for seed of Reward wheat, a new […] variety originated by the Dominion experimental farms, has been such that hundreds of applications for seed cannot be filled this year, as the supply of seed is now entirely exhausted," said L. H. Newman, Dominion cerealist, in a statement here.

"Those who desire to obtain seed of this variety for sowing in the spring of 1929 should get in touch next winter with their nearest experimental farm and obtain information as to sources of supply. There probably will be upwards of 1,000 acres of Reward seeded in the spring of 1928. From 250 to 300 farmers will have from two to three acres each. The rest of the area occupied by this wheat will be located chiefly on the Dominion experimental farms in the three prairie provinces.

"A report on the performance of Reward on the above farms in 1928 will be prepared next winter and probably will be available for the consideration of western wheat growers before the seeding season of 1929. This report should indicate to a considerable extent at least, the districts in which Reward may be regarded as a promising variety. It is always advisable, however, to withhold enthusiasm for any new variety until it has been thoroughly tried out by farmers for two or three years at least."

Toronto. Reward wheat is the wheat which won the sweepstakes at the Royal Winter Fair at Toronto last fall. Some excitement was caused when it was charged that the placing of the wheat on exhibition was not authorized. No action, however […] by the authorities […] in the contest, and the award stands.

FORMER TOFIELD GIRL'S NARROW ESCAPE FROM CHINESE HORDES

Trapped in the midst of the furious street fighting in Canton, China, early in December Mr. and Mrs. John D. James, missionaries, and their two children, well known locally, escaped without injury, and are now safe at Hong Kong.

A graphic description of the conflict is given in a letter just received by Mrs. E. J. Hill, 124 Eighth avenue east, from her daughter Mrs. James. The family left Vancouver on the C.P.O.S. Empress of Asia on October 13 last to take up residence in Hong Kong. They had just completed a lengthy tour of Canada and the United States.

It was the first trip to the Orient for Mrs. James, formerly Miss Blanche Hill, although her husband had previously spent 13 years in China. The two children, Ruby and Paul, are six and five years of age respectively.

To Battle Area

For the purpose of conducting evangelistic services in Canton the family left Hong Kong for the battle area [illegible] December 8, according to Mrs. James' letter to her mother.

"We could sense the feeling in the air that something was wrong," wrote Mrs. James. "On Saturday evening war began. The Reds were making a move to capture Canton."

The family had left its effects, including Mrs. James' purse, money, passport and other articles, at the home of a Miss Williams, and was staying with an old Presbyterian missionary and his wife in another part of the city when the street fighting began. They made two attempts to get their belongings, but it was impossible. It was also futile to attempt to leave Canton by train, the way they had arrived, as the fighting centred near the railway station.

The crisis came about 2 o'clock on the Monday morning. They had reached Canton on the Friday previous. Mrs. James described it in her letter. "There was shooting all around us," she wrote. "We went down stairs and sat still and prayed as that was all we could do. We did not know what moment the door would be broken open and we would be shot or taken for ransom."

Mrs. James continued that about 6:30 a.m. the fighting began to quieten down. Further telling of their experiences she wrote "About 9 o'clock we ventured out and made our attempt to reach the British and American concession. We learned that many had been killed and homes burned. We were discouraged by some Chinese as we went along saying it was no use trying to reach the 'Shameen,' as the soldiers at the waterfront would not let us pass. Dixon (Mr. James) went straight to the guard and asked him in Chinese if we could get across and he nodded his head and the other soldier, who was assisting him, called a sampan for us. We landed safely in the 'Shameen,' that is the foreign concession, and made enquiries as to boats for Hong Kong.

Aboard Steamer

"We were told there would be an English boat in at 3 p.m. We made arrangements for cabins. This was about 10:30 a.m. We went aboard the steamer 'Fatshan' about 4 o'clock and already refugees had taken almost every available space. Many, many people and little children slept on the deck. There was hardly room to move. However, we were very fortunate in having a first class cabin.

"The boat did not leave until the following morning at 8 a.m. We had a gunboat on each side of us through the night. We went out on deck and saw the city in flames rising up on the horizon and heard the cracking here and there of the guns and now and then a cannon."

Narrow Escape

The 'Fatshan' encountered no trouble on the short voyage to Hong Kong, according to Mrs. James, who in concluding her letter declared that she does not know if their effects will ever be recovered or if Miss Williams is still alive.

Mrs. James wrote that they narrowly escaped even greater danger [illegible] [illegible]

Editor's Note:—Mrs. James is a daughter of Mr. and Mrs. Hill, formerly residents of Tofield. Mr. Hill is at present following his trade of carpenter in the district.

AN EARLY BANK OF MONTREAL "TOKEN"

FOUNDED before Canada had any currency of its own, the Bank of Montreal early obtained authorization from the Government to issue copper tokens for small change.

Reproduced herewith are the two sides of the "Bouquet" token, one of the earliest coins issued by the Bank. The intermingling of the rose, shamrock and thistle indicates the three branches of the British people—the English, Scotch and Irish—while the use of English on one side of the coin and French on the other is significant of the mingling of the two races in this country.

"Trade and Agriculture" indicates the early connection of the Bank with both urban and rural life in Canada.

Throughout its long history the Bank of Montreal has always been active in serving the financial needs of all the people.

Good Prices Are Obtained From The Sale Of School Lands In Western Provinces

Since vast areas of fertile land constitute Canada's greatest single natural resource, the demand for land as shown by its price under conditions which preclude speculation, is one of the best barometers of the state of the country's agricultural program. It is, therefore, gratifying to know that the prices obtained for school lands in the Prairie Provinces at the general sales held during 1927 were the best on record. Altogether 480,408 acres were sold for $6,363,967, which represents an average of $13.70 per acre. The [illegible] price [illegible] was $7 per acre, and the highest $79, and while the latter has been exceeded in previous sales it [illegible] these few extreme figures, caused by local circumstances, that are of importance but the general trend of prices.

The significance of these sales as an index of agricultural prosperity in Canada's Middle West is seen when the nature and distribution of the school lands are explained. Under the Dominion Lands Act one-eighteenth of the land area of the Prairie Provinces was set aside to provide funds for educational purposes in these provinces. As surveyed, each township consists of thirty-six sections of 640 acres each and two of these (sections 11 and 29 in each case) are designated school lands. They are sold by auction, after an upset price has been [illegible]

Sterilizing Milk Pails

Utensils, Apparently Clean, May Contain Thousands Of Germs

Pails and cans used when milking cows must not only be washed, but they must be made bacteriologically clean. Utensils which appear perfectly clean after washing may still contain thousands of germs which can easily be destroyed by sterilization. The proper method of sterilizing these utensils is clearly described in a pamphlet on "Producing Clean Milk," available at the Publications Branch, Department of Agriculture, Ottawa. To sterilize thoroughly, a plentiful supply of boiling water or steam is a necessity. The utensils should be rinsed in cold or luke-warm water immediately after using, before traces of milk have had a chance to dry on. They should then be washed well with warm water to which soda or a dairy cleansing powder has been added, using a brush rather than a cloth. After this the utensils should be rinsed in clean hot water to remove traces of the cleansing solution, then sterilized. For this, steam treatment is the most efficient and is best carried out by placing the utensils into a closed container into which steam can be blown for 15 minutes. Inverting the cans or pails over a steam jet for a couple of minutes is also satisfactory. [illegible]

Surveyors Providing Detailed Topographical Maps Of Settled Areas Of Western Provinces

In a new country such as Canada, where pioneering conditions have been, and still are accepted as part of our national life, the surveyor stands out as one of our romantic figures. His place in the popular mind is in the vanguard of progress along with the discoverer and explorer, the fur-trader and all those whose efforts go toward the initial development of our unopened lands. In the colonization period after Confederation he played a major part. During these formative years of our country's growth he was entrusted with the distinctly important task of subdividing the untracked expanses of Canada's West into farm units, a work which was carried out by the organization now known as the Topographical Survey, Department of the Interior. He was ever crowded by the increasing waves of settlement behind him and ever alive to the necessity of keeping ahead of them.

Occupied with such an urgent task wherein time counted for so much, he could not allow himself to be delayed in his work by attempting much beyond the actual immediate requirements. Thus it was, for instance, that he could not take time to record topographical data except in so far as the main purpose at hand was affected. That would have to wait until some more opportune time.

[illegible]

It is the office staff, however, who have made the greatest change in converting the primitiveness of the former survey camp to its present state. Their canvas office is not the less efficient in that its folding standing desk may be home-made, and that perhaps an oblong case, somewhat resembling a coffin on legs, which carries the instruments when the camp is on the trek, may do service as a bench. As a rule two draftsmen comprise the office staff. Their duty it is to check up the work of the topograph and make the necessary computations so that when the field work is completed the actual process of compiling and plotting the finished map at Ottawa will not be delayed by unnecessary checking of field data. Their equipment usually comprises plotting machines, mathematical tables, slide rules, and other drafting appurtenances, with possibly a typewriter, a stereoscopic drawing board for use in the interpretation of aerial photographs and a high-powered gasolene lamp, the latter an invaluable aid for working at night. There are filing racks for field notes, correspondence and aerial photographs (a modern aid to mapping, largely developed in Canada).

When it is remembered that camp must be moved far and frequently, without undue loss of time, the necessity for an orderly and businesslike [illegible]

WORLD HAPPENINGS BRIEFLY TOLD

The Aviation League of Canada is considering extending an invitation to Sir Samuel Hoare [illegible] to visit the country to lecture in Canada.

[illegible] represented Canada's exports of asbestos and asbestos products last year, an increase of about [illegible] over the preceding year.

Dr. [illegible], who has had charge of the Dominion rust research laboratory since its inception, has resigned to accept a professorship in the Department of Botany, Toronto University.

Canada exported [illegible] worth of bacon and hams in December, 1927, a drop of about [illegible] from the preceding month. The United Kingdom was the country's best customer, taking [illegible] of the total export.

Admiral of the Fleet, Sir John Michael de Robeck, who was commander of the British Mediterranean fleet in 1915, on the memorable occasion of the unsuccessful attempt to force the Dardanelles, died recently in London.

Sixteen seamen from the Canadian naval base at Esquimalt, Vancouver Island, have arrived in Liverpool to take six months instruction in gunnery and torpedo practice at Port Sunlight. They intend qualifying for senior ratings in the Canadian navy.

President Coolidge was urged by a delegation representing a number of women's organizations "to do everything possible" to re-open negotiations looking toward the entrance of the United States into the world court.

Lady Roblin, wife of Sir Rodmond Roblin, former Premier of Manitoba, died at her home in Winnipeg, recently. She had been in poor health for the past five years. Lady Roblin was a native of Prince Edward County, Ontario.

Substitute For Human Tendons

German Doctor Has Had Great Success With Silk

According to a reliable Munich medical weekly, Prof. Fritz Lange, of the University of Munich, has found a successful way of using silk to support and even replace tendons.

In a Munich orthopedic clinic, 855 silk grafts have been attempted by the Lange method, with 97 per cent of the cases successful. One remarkable formation that attends the grafting is a natural tendon growth around the silk substitute, thus protecting it from wear over the bone edges. Silk is also used successfully in strengthening torn muscle bands.

Using the Telephone

The telephone cannot over one fail are to use it properly. It works best when a person talks directly into the mouthpiece with the lips not more than an inch away. If the person at the other end of the line fails to understand clearly, use a full natural tone and take extra care to pronounce each word clearly and distinctly.

Driver: "[illegible] here officer, that light was green."

Cop: "[illegible] Man, what color was your [illegible]?"

Get angry occasionally if you must, but keep your mouth shut.

That Stomach of Yours!

London, Ont.—"I was in a general rundown state of health. I had indigestion and my stomach was weak. I was so I could not eat [illegible]. I did not have any health [illegible] and I [illegible] Dr. Pierce's Golden Medical Discovery recommended for stomach trouble so I decided to try it and it relieved me of my indigestion and weak stomach and left me in good health. I am highly recommend the 'Discovery' to anyone who suffers as I did. It is excellent."—Francis Henry Cook, 471 Elizabeth St.

All dealers. Extra large bottle, liquid $1.35; Tablets $1.35 and 65c.

LORD SELKIRK AND CANADIAN PLACE-NAMES

His Activities In Various Parts Of Dominion Are Commemorated

Perhaps no figure in Canadian history is more widely commemorated in the place-nomenclature of the Dominion than Thomas Douglas, fifth Baron Daer and Shortcleugh and Earl of Selkirk in the peerage of Scotland. The name of the Scottish peer who controlled the Hudson's Bay Company and colonized in three provinces, is preserved in the four corners of the Dominion. In Prince Edward Island, in the east, Selkirk settlement and Selkirk point mark where he personally established 800 Highland settlers in 1803. In the west, Selkirk water has been shown on charts since 1846 as the name of a portion of Victoria harbor, Vancouver Island. In the north Arctic explorers have bestowed the Earl's name on several places including Selkirk, a bay in Melville peninsula, and Selkirk, a cape in Boothia peninsula. In the south, in Kent county, Ontario, Baldoon, named after one of the Selkirk estates in Wigtownshire, Scotland, is a memorial of the small colony, established there in 1803, with which the Earl was associated. In Manitoba, the town of Selkirk and Selkirk Island, Lake Winnipeg, and Point Douglas, a district of the city of Winnipeg recall the settlement in the Red River Valley by Lord Selkirk in 1812 of the first body of colonists in [illegible].

Selkirk is also the name of a village in Haldimand county and of a township in Sudbury District, Ontario; of a mountain range and of a mountain peak in British Columbia, and of a settlement in the Yukon, at the confluence of Pelly and Lewes Rivers where Fort Selkirk of the Hudson's Bay Company was built and named in 1843. In British Columbia also, Mount Daer and Daer Creek named after a title of the Earl, and at one time in Alberta there was a trading post, St. Mary's House, on Peace River probably named after Selkirk's birthplace and family seat, St. Mary's Isle, Kirkcudbright, Scotland.

Winnipeg Newspaper Union Fashion

1701

Has Tied Neckline

The smart jumper dress shown here will particularly please mother because it is so easily made. Design No. 1701 is a copy of an elder's frock, boasts the new square necktie finished with attached bands that tie in a bow at centre-front. There is an inverted pleat at each side seam and the long sleeves are gathered to narrow wristbands. It would be very attractive if fashioned of French blue wool jersey with a suede belt and the neckline piped in black. Novelty woolen, wool crepe and velveteen are interesting fabrics for its development also. No. 1701 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 1⅞ yards 36-inch or 1¼ yards 54 inch material, and [illegible] yards binding. Price, 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

ENGINES AND MOTOR CARS

Former Has Greater Drawing Power But Latter Greater Speed

A remarkable feat has just been performed by the Hon. Vincent Bir[illegible] and his wife, driving alternately to break the world's record for 15,000 miles.

Using a British-made car, they drove across France and around a speedway the whole 15,000 miles at an average of over 60 miles an hour, and but for the fact that they had to stop twenty-one hours, owing to a mishap, they would have averaged over 70 miles an hour, this being their actual running speed. They broke the existing record by forty-eight hours, notwithstanding that the attempt was made in wintry weather and on one occasion they had a bad skid when going at 80 miles an hour.

During that time the piston travelled 27,000 piston miles; the engine made 33,21[illegible],250 revolutions; the magneto revolved 53,000,000 times, and supplied 1[illegible],000,000 sparks.

Greatly as the steam engine has improved, it has never approached and probably never will, the standard of running 15,000 miles at an average of 60 miles an hour within a limited time. On the other hand, the gasoline car never has approached, and probably never will, the hauling power of the railway engine.

But the day may come when the ingenuity of man will succeed in combining the principal features of these two methods of transport. If it does travel will be more revolutionized than it was when the horse first had a rival. Then again, when these principles are applied to the air, the limits of speed and power will have been reached, so far as present imagination can envision, unless it be that humanity and merchandise are "broadcast."

Recipes For This Week

(By Betty Barclay)

Chicken Tetrazzini

1½ cup cooked shredded chicken.
¾ cup cooked shredded ham.
¾ cup cooked spaghetti.
1 small green pepper shredded.
½ red pimento.
3 tablespoons butter.
2 cups cream.
3 egg yolks.
1 tablespoon salt.
½ tablespoon paprika.
2 mushrooms chopped fine.

Simmer slowly green pepper, mushrooms and butter in a covered dish. Add ham, chicken and paprika, and cook together 2 or 3 minutes. Add spaghetti, pimento, cream and salt, boiling about 4 minutes. Mix yolks of eggs with 2 tablespoons of cream and stir into the mixture. Take off fire at once.

Egg-Nog

1 egg.
1 tablespoon sugar.
⅛ teaspoon salt.
Juice of 1 orange.
Juice of ½ lemon.
¼ cup of crushed ice.

Beat white of egg until stiff, add, gradually, one-half the sugar and salt, and one-half the orange juice. To yolk off egg add remaining sugar and fruit juices and beat until thick. Put ice in glass; pour in first mixture; then gently fold in second mixture and serve.

Additional Post Offices Opened In Manitoba

Two Have Been Established In Gold Fields Of North

Inspector J. W. T. Dickson, of the Winnipeg postal service, recently visited the gold fields of Northern Manitoba to oversee establishment of two new post offices, one at Narrow Lake, and the other at Woman's Lake.

The post office at the latter place is known as Jackson Manion. Mail to this district will now be carried by plane, eliminating the dog team mail which has served the miners for the past two years. Once a week a plane of the Western Canada Airways Company will bring mail to the miners. The service was inaugurated Jan. 25.

The longest railroad line is between Leningrad and Vladivostok 5,485 miles.

Pride is usually too high in the instep to wear another man's shoes.

THE DANGERS OF LEISURE

Most Accidents Happen When People Are Off Duty

The Chicago, Burlington & Quincy Railroad Company has a relief benefit system and the annual report of this service is gratifying to the corporation. It shows that accidents are decreasing, as, while in 1906, 60 per cent of relief benefits paid were on account of accidents, only 30 per cent of the payments last year were so made.

On the other hand deaths due to accidents while off duty greatly increased in the same period. Last year there were sixteen, over three times as many as in 1906. The additional information is given that of the sixteen deaths ten were due to automobile accidents. One gathers from these statistics that employees accustomed to the management of railway trains, the operation of which are most carefully safeguarded, find themselves at the mercy of motor vehicles which are operated by pretty nearly every person who can secure even temporary possession of one.

We find ourselves greatly impressed by the steady increase in the number of fatalities occurring to the employees who are off duty, who are striving to enjoy the leisure which is rightfully theirs, but it shows that leisure is a deal more dangerous than work unless the employment is especially fraught with danger. If proof is required of this it may be found by examining any issue of a daily paper for any Monday following a clear Sunday in summer, or the issue for July 5, or that for the day after Labor Day. It seems to be an established fact that when men and women start out for a holiday they leave their usual caution at home.

Seventy-Year-Old Mail Man

North Dakota Postman Still Keeps On With Work

Frank Gilby, of Grand Forks, North Dakota, figures he has walked 175,000 miles as a postman in the last thirty-five years, and at seventy he is as actively on the job as ever. In his years of employment with the government he has lost but one day because of illness.

Gilby delivers mail twice a day to an average of 1,000 addresses. He climbs thirty-six sets of stairs twice daily and carries some 600 pounds of mail each week.

In the last thirty-five years he estimates he has delivered 10,500,000 Christmas cards, and says he will never retire on pension as long as he can walk.

Jerry: What a beautiful tie—rare good taste. Er—could you lend me $5?

Ted: That's my roommate's tie.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria, its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation, diarrhea, or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

SUNDAY SCHOOL LESSON

FEBRUARY 5

JESUS MISUNDERSTOOD AND OPPOSED

Golden Text: "He came unto His own, and they that were His own received Him not. But as many as received Him, to them gave He the right to become children of God, even to them that believe on His name."—John 1:11, 12.

Lesson: Mark 3:19b-35, 6:1-6.

Devotional Reading: Isaiah 56:4-8.

Explanations and Comments

I. Jesus Accused By His Family Of Being Out Of His Mind, 3:19b-21. So great was the crowd which tried to see and hear Jesus at His home in Capernaum, that He and His disciples could find no opportunity to eat. His friends became alarmed and tried to have him put under restraint. "A man's foes shall be they of his own household," Jesus declares in Matthew 10:36. Recall John 7:5: "For even His brethren did not believe in him."

"He is beside Himself." He is out of His mind, His mind is unbalanced, they said. So Festus said of Paul: "Paul, thou art mad, thy much learning is turning thee mad" (Acts 26:24). This was one of the cruelest things which Jesus had to bear. His own friends, who should have spared him every distress possible and shown him every kindness in their power, his own mother, brothers and sisters stabbed him to the heart with their unbelief and cruel explanation of his power.

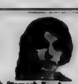
"What cracked-brain fanatics" was the remark the gentlemen of the eighteenth century made about Wesley and Whitfield. When Christian and Faithful refused even to look at the wares of Vanity Fair, but turned their eyes to heaven, what could the dwellers of the Fair who regarded those wares as the only things worth having, think of them but that they were Bedlams and outlandish men? And when men like Henry Martyn in modern times let themselves 'burn out' for God, when they cheerfully sacrificed every hope of worldly wealth and fame and think only of the soul and heaven and the unseen Christ, what can men who regard worldly wealth and pleasure and fame as the only things worth living for think of them, except that they are beside themselves?"—J. D. Jones.

HAVE STARTED CAMPAIGN AGAINST COMMON COLDS

John Hopkins University Would Find Cause and Discover Cure

Johns Hopkins University, of Baltimore, Maryland, is now mobilizing the many units of its great medical school, and organizing a concerted co-operative campaign against the common cold for the purpose of fixing its cause and discovering a cure. At first thought the cursory reader may be inclined to ridicule the proposal as something akin to employing a steam hammer to crack a peanut, more especially when he learns that this major offensive will be financed by a $195,000 gift from the Chemical Foundation, its President, Mr. Francis P. Garvan, having always been deeply interested in chemistry as a weapon in the war on disease. But when it is remembered that these "minor" respiratory ailments, because of the working days thus lost to industry, result in a heavier economic handicap than any other single variety of disability, the reason for the campaign becomes plainly obvious. Surveys of the United States Public Health Service reveal that colds yearly disable four in every ten men and seven in every ten women, a direct loss to industry of 1.4 days a year to each man on the payroll and 2.1 per annum in every ten women. This does not include the loss due to the lowered efficiency of those who refuse to give in and bungle through their jobs. This has never been computed, but cannot be other than heavy.

Despite the fact that every doctor handles more cases of colds than of any other disease, and despite the tribute it exacts from industry, not to speak of the inconvenience and danger to which every sufferer is exposed, little or nothing is known of their cause or cure. Johns Hopkins investigators declare that they will virtually have to start at scratch or zero. The common cold occupies the field completely, hurling defiance at all comers. Like the weather, closely associated with cold, every one talks of it but does nothing. Possibly one of the reasons, or the main reason, for the lack of real knowledge concerning colds, is the plurality of the term and the many fancy names given its various manifestations, referring rather to the place in the patient's anatomy where he feels worst, than to the nature of a cold. Among the most important of the divisions of the campaign will be carried on in the Johns Hopkins hospital with the definite object of fixing the exact symptoms of the common cold, with particular attention to the bodily organs affected. Another division of the research will examine the problem of how colds are spread. By the time the exhaustive investigation is completed, much more knowledge than now exists will have been collected regarding this ubiquitous malady.



Sick Stomach Teaches Her a Good Lesson

Miss Jeanne Ginsberg, Bronx, N.Y., writes: "I had become accustomed to arising each day with a heavy head, dizzy and a bad taste in my mouth. My bowels were frequently clogged and constipated. I feel greatly relieved since taking your purely vegetable laxative." CARTER'S LITTLE LIVER PILLS. All druggists—25c and 75c red pkgs.

CANADIAN AVIATION LEAGUE ORGANIZED

Promotion Of Aeronautics In Every Way Is Objective

The Aviation League of Canada was the name decided upon when 30 delegates from all parts of Canada, including representatives from McGill and Toronto University and some of the Dominion's most famous airmen, met under the leadership of Major General J. H. MacBrien to form a Dominion-wide organization.

Representatives were present from commercial, aircraft manufacturing companies and men prominent in other lines of activities. The meeting endorsed government action to provide this country with an adequate defensive air force.

Speakers were strongly in favor of the encouragement of Canadian aircraft industries, and it was felt that in 25 years the Dominion would be independent in this regard. A motion to affiliate with the Air League of the British Empire will be taken up later.

The following aims and objects of the league were adopted:

To ensure the fullest development of civil and commercial aviation in Canada; to encourage establishment of the aircraft manufacturing industry in Canada; to encourage research experiment and education in science of aeronautics. To support the requirements of defence and to secure Canadian and other British interests in aviation and to be entirely independent of all political parties.

It was decided that for the present headquarters shall be in Ottawa, with branches all over Canada.

Good Year For Construction

Building Returns For Calgary and Edmonton Show Increase Last Year

The year 1927 was a banner one for construction for both of the cities of Calgary and Edmonton. For the first eleven months of the year (as shown in MacLean Building Reports Limited) Calgary has taken out building permits to the value of $2,290,518, as compared with $1,980,046 for the whole twelve months of 1926, and $1,197,179 for the year 1925, complete. Edmonton in the eleven months ran up a record of $2,065,540, compared with $1,943,735 for the whole of 1926, and $1,460,865 for 1925.

Would Like Patrol System

Force Patterned After R.C.M.P. Wanted In Alaska

Agitation for a patrol system like that of the Royal Canadian Mounted Police has grown out of the recent disappearance of two old-time prospectors in Alaska.

Kris Kline, one of the missing men, was traced to a crevassed across a glacier trail. The other, Mike Trapke, disappeared while journeying from Talkeetna to Rustine, a distance of 60 miles. Both are believed to have perished.

It developed that regulations do not permit a marshal or deputy marshal to leave the beaten highways to investigate alleged crime or to give aid to men in distress, unless so ordered by the district court and by it provided with funds to defray expenses.

A force, patterned after the Canadian organization, it is pointed out, would find much useful service to perform in this territory, searching out lost men and running down fugitives.

LESSON No. 20

Question: Why is emulsified cod-liver oil so very helpful as a vitamin-food for expectant and nursing mothers?

Answer: Because it provides an easily assimilated food rich in the essential vitamin that aids in building strong bones and good teeth.

Take pure, wholesome, pleasantly flavored

SCOTT'S EMULSION

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XVII.—Continued

Jack could see that Helmi knew far more than she was telling, and a miserable black suspicion, in spite of all his efforts, began to grow in his heart. After thinking the matter over he decided he would not tell his sister in Winnipeg about his marriage. It was just possible that she would remember the name of the girl who had been arrested in the Chinese place, and there was no use in having the matter stirred up again. He kept telling himself there was some mistake about it, and he was not going to let it trouble him. But none of us can quite control the thoughts that come to us. Jack threw his letter into the stove one morning when Helmi was out.

CHAPTER XVIII

Jack had told Helmi that his partner had stayed in Edmonton to raise money to buy their outfit, which they would ship to Peace River. People were investing their money gladly, and paying five hundred dollars for a claim. Helmi tried to reconcile herself to Jack's going, though she had no faith in the project. In her simple code of ethics, a man who would fool Minnie, taking advantage of her innocence and her poverty, would fool Jack and all the other people who paid him money. He was a bad man, this Keith, and there was no health in him. It was not possible that he could find gold—Why should God let a bad man fin gold? But she knew she could not turn Jack aside from his purpose, he would go. That he would be disappointed she feared, and in that she was only sorry for him; but he would come back then and settle down at the mines, and they would be happy, yet.

All this time Helmi was wondering what Mrs. St. John would do when she got Jack's letter, thinking, of course, that it had been sent. She understood her character well enough not to expect that she would square the matter by a full confession. She would "let it ride," as she so often said about anything that was disagreeable. She always hoped that time would work for her and solve her difficulties. Mrs. St. John would never face a disagreeable situation squarely. As Helmi grew older she grew more resentful of Mrs. St. John and the easy way in which she had stepped from under the responsibility, leaving all the blame on her. Still she was Jack's sister, his only relative, and besides she had sworn by the good words she had learned in God's house not to tell—the same words she had got married by—and they were still more sacred to her now.

Helmi made great progress with her lessons, now that she had no work to do other than her light household duties, which were just fun, and with Jack to help her when his work was done. She could read every word in the Blue Book now.

One day when she came to the place in her speller where girls' names were given, she asked him which one he liked best. Jack replied he did not like any of them very well, for the best name of all, 'Helmi,' was not among them.

She said she liked Lela the best, but the way she would spell it would be "Lili," the Finnish way. "And which boy's name, Jack?" she queried.

Jack read the names and decided in favor of Charles. Helmi wrote, in her large, clear hand:

Charles Doran
Lili Doran

Jack looked at her and laughed. "Now, look here, Finn," he said, "we do not want either Charles or Lili for some time yet. Wait till I get the gold, and then we will go to live in Edmonton, and buy a big house in Glenora, and have a Chinaman to do the work, and two maids and a car, and we can have a whole flock, all with fiery gold hair just like your's—Lili and Charlie and Emil and Anna, and we will put up a high board fence around the whole place, so they cannot run away and fall into the river. Do you remember what you said when we were putting in the windows?"

Helmi looked up at him, laughing with something in her face which made him kiss her very tenderly. With her face buried on his shoulder, he did not see the fear in her eyes, the cold, gaunt fear for the face that she saw was Aunt Lili's, white with death, her great eyes burning, and Aunt Lili was saying was: "Men don't want kids—and settle down like we do—they may say they do—but they don't. Kids are trouble, men are all for self."

Two days after this the message came for Jack to go. Now that the time had come Helmi was cheerful and brave. She helped him to get ready, squeezing back the tears which were disposed to gather. He was going to leave quietly, letting people think he was just going to the Crossing. The plan was to go by boat on the Peace River as far as they could. Jack's partner knew every inch of the way; and he was so happy and excited Helmi knew he felt just the way she did when the money came from America.

"I will write when I get a chance to send a letter back, it is just possible we may not get a chance after we leave Fort Saint John, but I'll write from the Crossing anyway. Just say to yourself, Helmi, every day, your good words, and be a brave girl. I know you are that. There's two hundred dollars coming to me from the Mines. You can get that if you need it. I did not want to draw out everything and make them suspect I was going for good. For they've been watching me. Every one has his eye on Keith—he's the biggest man in the exploration world in Canada, Helmi!"

Jack was rolling his blankets as he talked. Helmi had his lunch ready and stood watching him, her heart beating chokingly. There was something she wanted to tell him. Still, why should she worry him now? He had to go—he had promised—and besides, she remembered Aunt Lili's words: "Mike was all right with me until—"

No, no, no, she could not take the risk, and maybe it was not so. Jack was so gloriously happy, so confident,—she must not worry him. Men cannot bear worry like women.

"Oh, I will be fine, Jack," she said. "Mrs. McMann is all over her little mad, and she will be glad to have me back again. Her Chinaman made a pudding in the washbasin, and the men did not like it."

"I don't want you to work for her, or for anyone, Helmi. Just make your garden and do what you like. You have plenty to live on, even without the money at the mine."

"Sure," agreed Helmi. "It will be company for me—that's all. I like to work; but every night I will be home here, and I will say my words, and 'God bless Jack and keep him safe' prayers help a good lot."

"You're a good kid, Helmi," Jack said, giving her a hurried caress. The excitement of the chase was on him.

Helmi went with him that night over the hill and a mile beyond. Then he insisted on her returning. "It is just as easy to say good-bye here as anywhere," he said.

It was a mellow evening at the end of April. In a pond near by the frogs churred, and all the air was full of nature's awakening. There were strange creepings, rustlings and whisperings around them. It was a night of sweet odors and hushed bird voices.

"It may be a long summer, dear, but it will come to an end, and I think I can safely promise I will be home for Christmas. Don't expect me till you see me. Home for Christmas, with a gold mine for a present! How will that be?"

"I just want you, Jack," Helmi said, holding him in a close embrace.

Mrs. McMann welcomed Helmi's return to the boarding house. The Chinaman's way of muttering under his breath was disquieting to her peace of mind. She believed he was uttering Chinese curses. Helmi baked bread and biscuits, opened windows, scrubbed floors and polished glasses. She worked in a frenzy of energy which soon brought improvement to the disordered boarding house.

Mrs. McMann regarded her curiously. "Helmi is worried over something," she said, "maybe they haven't got along just as well as she thought. Good-lookin' men are notoriously hard to live with. Actors, musicians and preachers are perfect pills when you come to live with them. Well, she can't say I didn't warn her. I am thankful for that!"

Mrs. McMann prided herself on her faculty for eliciting information painlessly, and, as method one, used the familiar device of pretending to know all about the gold find.

"Ain't it wonderful the wealth of this country all hid away from eyes that pry, and yet revealed when people go to the right spot. My! you must be proud of Jack—he's a lucky boy."

(To Be Continued.)

Some marriages are failures because both parties quit dishing out polite falsehoods after the ceremony.

"High Rigger" Knocked Out By Extremely Painful Back

Gin Pills Saved Him Pain and Money

Mr. J. F. Miller's letter contains priceless advice to people who suffer from backache, and shows clearly the value of Gin Pills as a prompt relief for ailing kidneys.

"In the woods last Fall I was rocked to the [illegible] for days, I could not go to the back. I was so bad the woods boss wanted to send me to the city for medical treatment. One of the boys [illegible] Gin Pills. In four days I was back on the job. Now [illegible] Gin Pills in the [illegible] pack."

Neglect of kidney trouble is very dangerous. Backache is not the only symptom—dizziness, brick dust in urine, spots before the eyes, headaches, swollen joints, painful, scanty or too frequent urination are others. Take Gin Pills immediately and prevent Rheumatism, Sciatica, Lumbago, acute Bladder trouble. All druggists carry Gin Pills, 50c a box. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada.

Swollen Joints

Sore muscles and strained ligaments quickly relieved by application of Minard's Liniment.

MINARD'S "KING OF PAIN" LINIMENT

TRAINING IN SCOTLAND YARD

Would Be Detectives Have To Absorb Fund Of Knowledge

The course of instruction which every budding detective must attend before joining the Criminal Investigation Department of Scotland Yard, lasts two months, and at the end of that time he must pass stiff examinations in all the manifold subjects he has been taught.

First of all he must master the elements of criminal law and the law of evidence, and have a knowledge of photography, and be able to draw plans. Then he is taught fingerprints and footprints, and how to record personal descriptions of men and women. With the aid of lantern slides lectures are given on the different shapes of heads and noses, the color of eyes and hair, special marks and peculiarities, gait, boots and clothes. Thousands of pounds worth of jewelry are produced from the strong rooms so that the students may learn the color and setting of precious stones and be able to tell the difference between a bracelet and a bangle.

A "wanted" man is described and put among thirty or forty others who are walking in a yard. One by one the students are told to pick him out from the descriptions given to them, and if they do not make an "arrest" within two minutes they are considered to be too slow.

A visit to the famous Black Museum is made, and there the wonderful collection of tools used by burglars, the crucibles and moulds of base coiners, the printing machines of note forgers, the revolvers and poisons of murderers, the forged checks of clever penmen, the oxy-acetylene apparatus of safe-breakers and a hundred-and-one other examples of the implements of resourceful criminals are all carefully described and their uses explained.

Methods of operation in the commission of various classes of crime—hundreds of them—form the subjects of three or four lectures, and then the class is taught how to start investigation of crimes—what to do and what to avoid, and how to marshal the evidence and to prepare cases.

Finally comes the supreme test for the real detective. A murder is staged in a room. Each student in turn takes the part of a chief inspector in charge of the investigation. He enters the room and takes a mental—not a written—note of everything he sees.

Having fixed everything he can in his mind's eye, the detective emerges from the scene three minutes later, when he is expected to be able to reconstruct the crime, to give an accurate description of the room, and to establish from clues he has found the probable identity of the murderer and the motive for the crime.

Pleased With Experiment

Compulsory Motor Car Insurance In Massachusetts Is Justified

Massachusetts seems to be pleased with her experiment in compulsory automobile insurance. It is rather surprising that so radical an experiment should have been made in so conservative a state and perhaps still more so that the driving public seems to be satisfied with it.

It was argued against the plan that it would increase reckless driving, since losses were covered by the obligatory insurance policy. But the insurance companies met this objection by refusing policies to reckless drivers.

It is estimated that the number of drivers has been reduced by 3 per cent. under the operation of this law and it may be assumed that those who have been eliminated are a good riddance as they would be the most undesirable.

It is logical that fatalities should have decreased, if for no other reason than that the reckless were largely removed from the wheel.

If Massachusetts continues to show benefits from the compulsory insurance plan, its adoption is sure to be agitated in other states.—Montreal Star.

Air Mail Service For West

An air mail service between Winnipeg and Calgary may be established this coming summer, judging by persistent reports to that effect. Last summer the flight was made between those two points by Flying Officer T. M. Shields, of the Royal Canadian Air Force, in eight hours, the distance being 900 miles.

Saskatchewan Musical Festival

It is expected that over 2,000 artists from all parts of this province will compete in the Saskatchewan Musical Festival to be held in Moose Jaw.

It's a pity that a man can't hear an occasional eulogy of himself while alive, such as the preacher will some day deliver over his mortal remains.

Woodsmen—Keep Minard's handy.

Royal Bank Annual Meeting

The annual General Meeting of shareholders of The Royal Bank of Canada marked the close of the most successful year in the history of the Bank.

Sir Herbert Holt, President, in his address dealt more particularly with general conditions throughout the country but touched on many developments of great importance more especially from the standpoint of trade and industry.

C. E. Neill, General Manager, reviewed the growth of the Bank to the foremost position it now occupies and gave to the shareholders an interesting insight into the part the bank is playing in all centres in which it is now doing business.

Outlook Favorable.

Sir Herbert referred to the year's developments in industry, trade and finance as generally satisfactory. The foundation for the development which has taken place is sound. Sir Herbert declared that as yet there are no indications of industrial and commercial inflation. Production is not expanding to a point unwarranted by growth and demand and it is a noteworthy fact that the whole expansion has taken place during a period characterized by moderately declining prices. On the whole the financial situation in agriculture is [illegible] more settled than at the beginning of the period. Summing up the business situation Sir Herbert stated that the "outlook was never more favorable for prolonged prosperity in Canada."

Necessity For Curbing Unwise Speculation.

In commenting on the annual statement Mr. Neill referred at length to the importance of call loans, which represent loans against stock exchange collateral, not only of the Royal Bank, but of all banks. He pointed out that this was indicative of three things:

"1. Increase in the number of securities available to investors.

"2. Increase in the market value of securities.

"3. Increase in speculation.

"In a growing country the development of its resources produces new securities. Prosperous times result in the enhancement in value of securities and for these reasons it is clear that the two first mentioned causes of the increase in call loans are at least to some extent justified. As to the third, it is obvious that speculation has reached a dangerous stage. The best-informed financial and brokerage firms are already operating on a [illegible] conservative basis by calling for increased margins by declining to open new accounts and by restricting the liability of their customers to reasonable amounts. In times of excessive speculation the lure of easy profits cannot be curbed, but speculation can be checked and held within reasonable bounds only by the financial interests particularly the banks and bond and brokerage houses."

WITHIN A GENERATION

New Sources Of Wealth For Canada Have Been Tapped

The mineral production of Ontario is approaching one hundred million dollars a year. Last year's total was $91,000,000. When the present century opened, the production was small, and children in Ontario schools were being taught that Ontario was not a mineral-bearing province to any extent. Now the prospect is that in addition to other great mineral wealth, Ontario will soon be the greatest gold-producing district in the world.

When the present century opened, too, little thought was being given to water power; little expectation existed that within a generation a tremendous gain would be made in industry, in commerce, in household economy and advantage by development of water power.

When the present century opened, motoring was but beginning, good roads were non-existent, the prophecy that motor tourists would bring a great wealth into the province would have been ridiculed.

So, within a generation, these new sources of wealth have been tapped for Ontario—and similar gains throughout all Canada—and within a generation the production of the western grain fields has quadrupled.

Yet our people have not increased very greatly in numbers. If taxation in this country, national, provincial and municipal is heavy, there is a more than corresponding wealth to meet it.

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold fastens its grip on the bronchial passage tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily benefiting cases of Asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Hostess (to gloomy youth): "I hope you enjoyed your game with Major Swill. He's awfully clever at cards."

Youth: "I should think he is! He started by telling my fortune and now he's counting it."

Minard's Liniment relieves pain.

Another thing that seems to be a long way ahead is the foolproof railroad crossing.

It is well to remember that it is a mistake to forget a favor.

Little Helps For This Week

"Boast not thyself of tomorrow; for thou knowest not what a day may bring forth."—Proverbs 27:1.

In human hearts what bolder thoughts can rise
Than man's presumption on tomorrow's dawn?
Where is tomorrow? In another world
For numbers this is certain, the reverse
Is sure to none.—Young.

How mankind defers from day to day the best it can do, and the most beautiful things it can enjoy, without thinking that every day may be the last one, and that lost time is lost eternity.—Max Miller.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for her little ones she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers, and making teething easier. Concerning them, Mrs. Saluste Pelletier, St. Dumas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Clever Burmese Woman

The first woman to pass the B.L. examination at the University of Rangoon, Burma, is Daw Me Me Khin, who has been appointed to officiate as Assistant Registrar on the Original Side of the Rangoon High Court. This is the first time that such a post has been filled by a woman in Burma.

It Testifies For Itself. Dr. Thomas' Eclectric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

The automobile bill of the American people is [illegible] than $11,000,000 [illegible] a year.

Daniel was the only man we ever heard of who wasn't spoiled by being lionized.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

HEALTH

It is often difficult to give a meaning to words which we use every day. One of these words is Health. We say that we are healthy, and yet when asked to explain what we mean we [illegible] possible to put our meaning into words. [illegible]

In the first place, when we are healthy we are free from any obvious disease. [illegible] As long as [illegible] thought of as healthy.

[illegible] much people are [illegible] of the world. [illegible] is desirable [illegible] far more than [illegible] happiness. [illegible] the [illegible] pleasure [illegible] to do better work [illegible]

It is surprising the number of people who spend a more or less miserable life, unable to accomplish the things of which they are capable because they have not health. These same people are surprised when on a routine examination they learn that there is something wrong with [illegible] enough to cause [illegible] their [illegible]

Again, there are those who miss the happiness [illegible] health and who are free from any physical blemish. These are the people who are not [illegible] We [illegible] our bodies of rest, fresh air [illegible] to have health.

Health [illegible] that comes to those who are free from physical [illegible] and who follow the [illegible] of hygienic living.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered. Questions [illegible] and treatment will not be answered.

Not a Bad Idea!

Boring Young Man (holding forth to pretty girl): You know, I'm funny like that; always throw myself into anything I undertake.

Pretty Girl (sweetly): How splendid! Why don't you dig a well?

LOCAL and PERSONAL

Born.—To Mr. and Mrs. Alfred Tiedeman, on February 7th, a daughter.

Mrs. P. M. Webb wishes to announce that she is now ready to recommence her music classes.

The Misses Clara Abbot and Marion Argue spent the week end in the city.

Mr. and Mrs. Wilson and Mr. and Mrs. Davis visited at the Spencer home last week.

Rev. Father McLeod is now resident Roman Catholic priest at Tofield.

Byron Kendall, now of Chipman, visited here on Tuesday night.

Two curling rinks from [illegible] visited here last night and had a friendly game with two of the local rinks.

Mr. and Mrs. Spencer motored to the city on Tuesday.

W. Chapman and W. C. Swift made business trips to the city on Tuesday.

Mrs. Barden, who is in an Edmonton hospital, is we understand, progressing favorably.

In the report of the Tofield ladies winnings at Edmonton bonspiel, we omitted to record the success of Mrs. McCan's rink. This rink won 4th prize in the King Edward trophy. The personnel of the rink was: Mrs. McCann, skip; 3rd, Mrs. Chutterham; 2nd, Mrs. Calvert; 1st, Mrs. Spencer.

Don't forget the U.F.A. annual whist drive to be held on Tuesday evening, February 14th. The U.F.A. whist drive is well known as being a very popular event of the winter season in Tofield. There will be, as usual, plenty of tables, and in addition to the drive, there will be a short program and lunch will be served.

The Womens' Missionary Society of the United Church will meet at the home of Mrs. W. A. Webb on Thursday, February 16th, at 3 p.m.

BOXING BOUT

On Tuesday of this week at the Variety, Kid Pruden met Battling Engen in a ten round decision bout. Pruden, who has staged quite a number of bouts at Tofield, and won most of them, was defeated by Engen in the fourth round, by a knock-out decision. Engen is much the heavier of the two, but Pruden's defeat was probably due to the fast pace he set in the first round, which pace he was unable to maintain.

Bert Calvert refereed the fight.

There were also a number of lively preliminaries.

"UNCLE" ANGUS DAVIS DIES

We regret to report the death of Mr. Angus Davis, at an Edmonton hospital last week. Mr. Davis, who was a native of Nova Scotia, had been a resident of Tofield for many years. For some long time he was janitor of the public school, and was very popular with both staff and scholars, so much so, that we never heard him spoken of except as "uncle" Angus.

The funeral was held on Saturday, services being held at the United Church, interment taking place at the Tofield cemetery.

The local U.F.A. are planning a debate to be held on Saturday afternoon, February 18th. The subject to be debated is "That a Municipal hospital should be established in Tofield." The complete list of debaters is not at time of writing available. This is an interesting and a current topic and should prove of help to those desiring to learn something of the advantages and disadvantages of this system.

The Logan Anglican Womens' Auxiliary are having a whist drive on Friday, February 17th. The event which will be held in the Lakeview Community hall at 8:00 p.m., will be made an enjoyable one for those attending. There will be a short program and lunch will be served.

INCUBATOR FOR SALE.—150 egg Old Trusty incubator, $20.00. Apply to M. C. Hammond, Tofield.

COUNCILLORS RE-ELECTED

Nomination day passed quietly in Tofield yesterday, the three retiring councillors, L. C. May, Geo. B. Bruce and John Chapman, being returned by acclamation.

Both vacancies on the school board were filled by acclamation, J. W. Robinson being returned for a second term of two years, and A. P. Harrold being elected for the first time, taking the place of N. S. Smith who did not accept nomination.

The personnel of the town council in addition to the three members named above, is A. J. H. McCauley, mayor, W. C. Swift and W. Bellamy.

The other members of the school board are, John Lee sr., chairman, Mrs. Mary M. Da[illegible] and J. W. Chapman.

TRACTOR SCHOOL TO BE HELD AT TOFIELD

Right in line with the foremost cities, Tofield is to become the scene of a tractor school, M. C. Hammond, John Dere dealer, having arranged for a school to be held at his [illegible] rooms on Thursday, February 16th. This is a splendid opportunity to learn more of the John Deere Tractor and of tractors in general. All those interested are invited to attend.

TOFIELD REPRESENTED AT EDMONTON BONSPIEL

At least two rinks from Tofield will play at the big curling bonspiel to be held at Edmonton this week. Geo. McLaughlin is skipping a rink, taking with him as players, J. Lee, D. M. Morrison and A. Calvert.

We also [illegible] that C. Hobson is also taking a rink, but we are unaware of the personnel.

BIGGEST BONSPIEL OF TOFIELD'S HISTORY, FROM START TO FINISH, GREAT SUCCESS

From the moment the first rock was thrown until the last throw in final event, Tofield's annual bonspiel went forward like clockwork.

There were tense moments, of course, when by a hair's bredth some curler would turn into what looked like defeat into victory.

There were 14 visiting rinks which means 56 visiting curlers. There were also 12 local rinks.

The visiting rinks were as follows:

Dash, Morris, Ramsey, Street, Boon, Edmonton.

Graham, Walters, McAthey, Viking.

McPherson, McBratney, Ryley.

Fmond, Carter, of Holden.

Mohler of Camrose.

Wallace of Wainwright.

The prizes in the various events were as follows:

Grand Challenge, Dark, Edmonton, 1st; Ramsey, Edmonton, 2nd; Boon, Edmonton, 3rd; McLaughlin, Tofield, 4th.

Boon Trophy: Mohler, Camrose, 1st; Chapman, Tofield, 2nd; McClurg, Tofield, 3rd; Beirnes, Tofield, 4th.

Terwilleger Trophy: Beirnes, Tofield, 1st; Mohler, Camrose, 2nd; Ferguson, Tofield, 3rd; McClurg, Tofield, 4th.

Pincott Trophy: Graham, Viking, 1st; Lee, Tofield, 2nd; McPherson, Ryley, 3rd; McLaughlin, Tofield 4th.

W.I. HOLDS ANNUAL BANQUET

The Institute banquet was held on Friday, February 3rd, and was very much enjoyed by those present. A larger turnout would have been appreciated. The program, the president's words of welcome and past secretary's report was indeed very interesting. Mrs. Pincott gave us some very original poetry and now we all know what Saint Peter will say when we go up higher.

A presentation was made to Mrs. Frank Lewis who is leaving Tofield. We are all [illegible] indeed to lose so valued a member.

Songs were indulged in and an auction sale of goodies at the end of the banquet. This was conducted by our very congenial auctioneer, Mrs. H. Ward.

Don't forget our sewing classes beginning February 13th. Leave your names with the secretary, Mrs. Arthur Beirnes, for these classes.

"Pa, what is the stone age?"

"That, my son, was the glorious age when a man used a woman to marry him."

KINGMAN

Geo. Welch and Thor Grahn were business visitors in Edmonton last Tuesday.

Mrs. George Welch left for Grand Rapids, Michigan, last Wednesday to attend the funeral of her mother, Mrs. J. Nelson.

Mr. and Mrs. Ole Rosnadahl and family, Mr. and Mrs. T. Grahn and family were the guests of Mr. and Mrs. T. J. Rogness on Thursday evening.

Mr. and Mrs. S. T. Severson of Ryley were visitors with Mrs. Ed. Thompson on Sunday.

Mr. and Mrs. Joe Munson and family of Camrose were the guests of Mr. and Mrs. C. R. Blyckert on Sunday.

Mr. and Mrs. Sam Nomeland and Fervil visited with Mrs. Ovelson on [illegible]

Mrs. Thor Herte and Mrs. A. Gudmundson were Camrose visitors on Saturday.

Born.—To Mr. and Mrs. Shultz on February 3rd, a daughter.

Mr. and Mrs. E. Erickson visited with Mr. and Mrs. C. Tryhog on Sunday.

We are sorry to report the death of Norman, the son of Mr. and Mrs. Ray Melvik at the age of three years and four months from an attack of croup. We extend our sympathy to the parents in their bereavement.

AMISK CREEK

The Ladies' Aid held their regular meeting at the home of Mrs. A. Haugen on Wednesday of last week. The meeting was very well attended, most of the members and several visitors being present. The next meeting will be held at Mrs. Kjeroeng's.

The Moen, Patterson and Olson families and Mr. A. Erickson and Carl were all guests at the P. Mellne home last Sunday. Mr. D. Lurass was also a guest.

A new family has arrived in this district, Mr. and Mrs. Olsen and daughter. Mr. Olson is pumpman at the Shoots tank.

Miss Emma Brahn was a visitor in Viking the first part of the week, returning on Tuesday evening.

Alice Berg visited with her aunt and uncle in Ryley at the week end.

Mrs. P. O. Flaaten visited relatives and friends around Viking last week, returning home Monday evening.

Miss Sorenson from Ryley spent the week end visiting at the E. O. Berg home.

Ingolf Brecken from Bardo, has been in the neighborhood sawing wood and grinding feed.

E. A. Moen shipped Hogs and cattle to the pool from Ryley last Tuesday.

HOCKEY

On Saturday afternoon last, the Tofield Juniors again met the Edmonton Acmes on the ice. The game as a whole was not so good as some previous ones. This was partly due to the fact that the locals crowded the visitors into their own territory most of the time.

After a few minutes of play, Edmonton opened the scoring by getting one past Bowick. The locals in an effort to equalize, backed the visitors practically to their goal mouth and did everything but score. The Edmonton goalie was sure "on", and stopping them from every direction. The period ended 1—0 for Edmonton. In the second period, Edmonton broke away and scored again, putting them two up. Then Bob Whyte sent one past the visiting goalie from a pass by W. Worton, and in a short time W. Worton sent in another [illegible] tied the score. The [illegible] with [illegible] score a tie. Commencing the third period, Edmonton staged a rally, but Bowick was "all there" and saved some that sure looked like goals. Sid Worton put his team one ahead by scoring from a shot well out. Then to make sure of it, Arthur Beirnes, put in a fourth one. This [illegible] the scoring, Tofield winning the game by four goals to two.

A. B. Clutterham refereed the game for the [illegible], to their entire satisfaction.

KETCHAMOOT

Our district has been enjoying the delightful weather, but a regular epidemic of LaGrippe has been prevailing all over the community, though as yet no serious cases are reported.

Mrs. Oscar Barnes visited her mother, Mrs. Hull, in the hospital at Camrose on Tuesday. [illegible] is encouraging.

Mr and Mrs. Chester Coombes and family were guests of Mr. and Mrs. Marsh Mitchell last Sunday.

Mr. Martin and Miss Mildred Lawson motored to Edmonton on Sunday for the day.

Mr. and Mrs. Henry Sutton, and Mr. and Mrs Joe Sutton spent several days last week in Holden.

A delightful evening was spent at the Peter Lee home on Thursday evening, when they entertained a large crowd of young people to a whist drive in honor of Miss Marjorie, who was leaving the next morning to engage in teaching near Wainwright. Nine tables of whist was played, Gertrude Bearisto and Lawrance Gill, Mrs. Leila Ray and John Thompson were prize winners. Refreshments were served by the hostess and daughters.

LINDBROOK

The mild weather still continues and pleases everyone, shortens the winter, helps out on the feed and both humans and animals enjoy it; whilst making team work difficult, if not impossible as far as loads are concerned on the roads, it makes up for it by being ideal brushing weather by day and social calls at night.

Mr. J. Leahy returned from his coast trip looking very well and much improved in health. He reports a very enjoyable trip and visited many old friends while there.

Mrs. Niellsen and daughter left here last week enroute to the coast to join her husband who is on one of the Pacific Steamship Co. boats. She paid a visit to Mrs. Chas. Kortzman and family in Edmonton whilst there.

Mr. C. J. Kortzman is now in charge of the Lindbrook section C. N.R., vice Mr. H. R. Hobbs, transferred to Heenan.

A dance was held at the home of Mr. and Mrs. Frank Kortzman last week and a thoroughly enjoyable time was had by all present.

On Friday evening, February 17th, a novelty dance will be held at the Lindbrook school. This is the first of its kind to be held in this district, good music is promised and lots of fun, so come one and all and be prepared for a real good time.

Mr. and Mrs. W. Hooper and Miss C. Abbott spent the week end in Edmonton as the guests of Mr. and Mrs. Ernest Hooper of 126 Street Edmonton.

LAKESHORE

Mrs. Fraser who resides with her daughter Mrs. R. Sherlock had the misfortune to fall one day last week and fracture her hip. She was taken to the general hospital in Edmonton where she is reported to be progressing very favorably in spite of her advanced age of 83 years. Mrs. Sherlock returned home on Monday.

Mr. Wm. Seale attended the tractor school in Edmonton several days last week.

S. Lumb has been sawing wood in this district for the past few days.

Mrs. R. Phillips and Mrs. O. Barnes went to Camrose on Wednesday of last week to visit the latter's mother, Mrs. Frank Hull who is a patient in St. Mary's hospital there. Mrs. Hull is making slow but steady progress and is looking forward to the time when she will be able to come home.

A number of young people of this district journeyed to Kingman last Friday evening to attend the dance there.

Mr. Geo. Yeager of the Woodlawn district visited his old friend, Sam Bethel on Monday.

Mr. and Mrs. F. O. Ball and family also were visitors at the Bethel home on Sunday evening.

Canada To The Fore

[illegible] in the last few years is challenging the [illegible] progress is based not only on the great variety [illegible] natural resources, but is founded in the [illegible] the Dominion and in the confidence they [illegible] confidence born largely of the really tre[illegible] made during the years of the Great War. In that [illegible] of Canada showed wonderful energy, displayed [illegible] organizing ability, and hitherto undreamed of powers and strength. Thrown to a large extent upon its own resources, financial and otherwise, the Dominion courageously faced all problems and did so with marked success.

[illegible] weathered the stormy days and difficult conditions of after-the-war and reconstruction years as successfully as did this [illegible] for the first time of their national [illegible] national soul. Their former doubts and [illegible] commonly been termed their [illegible] has been replaced by courage, confidence [illegible].

In former years [illegible], true, Canadians had successfully grappled with [illegible] problems but, in these more recent years, the [illegible] its place in the world arena. Its position today in the [illegible] League of Nations is an outstanding one, its place [illegible] British Nations is strong and assured. The score [illegible] the Pan-American Union, including the United States and the countries of Central and South America, are anxious that the Dominion should join them and give added strength and prestige to the Union, while other nations are encouraging the establishment of direct diplomatic representation with this country.

But even yet it is doubtful if many Canadians fully realize the rapid growth and steadily increasing power of their own country, because, as a rule, the average citizen pays little attention to so-called dry statistics in which the growth of a country is set forth. In a recent speech at Winnipeg, Mr. E. W. Beatty, president of the C.P.R., succinctly and impressively set forth a few facts, which will bear repeating. He noted, for example, the following:

Every working day last year Canadians took from their forests, products valued at [illegible].

From mines they took $240,000 daily.

33,000 New Colonists Added To Canada's Population In 1927 Through C.N.R.

Approximately 53,000 new colonists were directly added to Canadian population in 1927 through the instrumentality of the Department of Colonization and Development, Canadian Pacific Railway. Of these roughly 25,000 moved directly through channels created by the Department into agricultural or domestic service, farm training or farm ownership. Settlers moved from the United States by the Department's organizations totalled 12,000, practically all of which are established on farms.

FOUND A HEALTH BUILDING TONIC

A Nova Scotia Lady Was In An Anaemic Condition

Men and women who do not sleep well and are not refreshed and strengthened by a night's rest, are generally suffering from thin, watery blood. The nerves fail to get the nourishment they demand and headaches and a worn-out feeling is the result. Building up the blood is the one sure step to renewed health and strength, and for this purpose nothing else can equal Dr. Williams' Pink Pills. From first dose to last they enrich and purify the blood, and in this way promote better appetite, better rest at night, and renewed strength.

Mrs. Mary E. Uhlman, Williamstown, N.S., writes: "I have received so much benefit from Dr. Williams' Pink Pills, that I would feel myself ungrateful if I did not let you know.

I was in a very poor state of health and reached the stage where I had to remain in bed. A doctor was called in and he told me I had no organic trouble, but was simply run down from overwork. I had been left with a family to support, which I did by dressmaking. The doctor said my blood had almost turned to water, and advised a rest cure. I did not see how it was possible for me to take a very long rest, so I decided to try Dr. Williams' Pink Pills. Soon I found my strength returning and before very long I was able to go about my duties as usual again. This was a few years ago, and my health remained good until about a year ago, when I broke out with humor of the blood. Again I consulted the doctor [illegible]

Was Great Shopkeeper

Large Business Built Up In England By John Sainsbury

John James Sainsbury, founder of Messrs J. Sainsbury, provision merchants, who has died at his home at Highgate, N., London, Eng., at the age of 83, is described as one of Britain's greatest shopkeepers.

He started as a boy in an oil shop in Drury Lane, and when he married at the age of 24—59 years ago—he opened a cheesemonger's shop in the same street. He lived to see this tiny shop develop into a colossal business, which owns more than 100 shops in London alone, and many more in the provinces.

This business is estimated to be worth nearly £1,500,000 ($7,500,000), and it is still in the Sainsbury family, all the shares being held by Mr. John's six sons and six grandsons.

From the time when Mr. Sainsbury began to make his Drury Lane shop a success he could never be tempted to buy anything other than the best, and this, combined with the facts that he tried always to present his goods in the most attractive way and to have them sold by the most attractive assistants, accounts for his success.

Radio-Telephone Links Winnipeg and London

Conversation Carried On Between Western City and Mother Country

Linking up the gateway of Western Canada with the mother country, a trans-Atlantic radio telephone conversation between Winnipeg and London, England, has been successfully carried out. For 15 minutes an official of the Manitoba Government Telephone System conversed with a member of the London postal telephones. So clear was the reception that the London official complained of the tap-tap of the telegraph ticker in the Winnipeg office.

"For heaven's sake stop that telegraph ticker in your room, it is deafening," he said to William Walton, long distance chief of the Manitoba telephones.

The call as it came to Winnipeg, a distance of about 5,000 miles, passed through New York, Chicago, Minneapolis and Fargo, N.D.

Short of Breath Dizzy, Sinking Spells COULDN'T WALK FAR

Mrs. L. A. Oliver, Granville Ferry, N.S., writes:—"A few years ago I had dizzy, sinking spells so bad I could hardly stand up without taking hold of something to support me, and I could not walk any distance on account of being so short of breath.

ALBERTA ROAD TAKEN OVER BY CAN. PACIFIC RY.

Edmonton, Alta.—[illegible] sale of the Lacombe and Northwestern Railway to the Canadian Pacific Railway was announced by Premier Brownlee. After considerable negotiations President Beatty, of the C.P.R., accepted the offer of the line and agreed to indemnify the province against future liability on outstanding five per cent bonds for $273,760, and in addition to pay the province $1,560,000 in cash, and construction and extension of the road to a point at or near Telfordville, the extension to be completed within three years. The length of the proposed extension is 20 miles.

This extension will provide that no part of the district is more than 10 or 14 miles from the railroad. In making the announcement, the premier stressed the fact that every effort had been made by the government to bring the line to Edmonton. He said:

"In our negotiations, we urged very strongly, upon the C.P.R. that construction of the line be carried right into Edmonton, but it was found impossible to get this done at the present time."

The present terminus of the Lacombe and Northwestern Railway is at Breton, and the proposed extension will bring it to a point near Telfordville. The premier intimated that the deal with the C.P.R. means a saving of $175,000 a year to the province.

The physical valuation of the line had been placed at $2,100,000 by John Callaghan, deputy minister of railways. Premier Brownlee expressed satisfaction at the conclusion of the negotiations with the C.P.R. The Premier also stated that he had still not received the terms of Sir Henry Thornton for the separate purchase of the A. and G. W. Railway.

Stories Are Discredited

Talk Of Semi-Tropical Land In Northern B.C. Is Largely Fiction

Ottawa.—The making of aerial maps is resulting in a greater influx of prospectors to Canada's many mining fields and is a time saver for company organizers, A. M. Narraway, chief aerial survey engineer of the topographical surveys, told the convention of Dominion land surveyors here.

Mr. Narraway declared maps being made through the use of aerial photography were actually the best and most accurate obtainable.

Talk of newly discovered semi-tropical land in Northern British Columbia which was said to be kept warm through the eruption of hot springs was largely fiction, according to a report read to the delegates by K. F. McCusker.

Speaking of a recent survey he conducted in the northern stretches of the Pacific coast province, Mr. McCusker said he had found luxurious meadows and prairie land and large stretches of open country which he termed "summer-land." It could not be classed as semi-tropical, however, the speaker declared. The country abounded in game, goats, sheep, caribou and grizzly bear. Grass grew to such a height that it was clear no heavy snow fell during the winter.

New Governor Installed

James McNeill Takes Over Administration Of Irish Free State

Dublin.—Escorted by a troop of Free State Cavalry, James McNeill, new governor of the Irish Free State, went to Leinster House where the chief justice administered the oath of office.

The cavalry escorted Mr. McNeill and his wife, who rode in a motor car over a route of three miles to the vice-regal lodge.

There was no demonstration en route and the spectators were drenched by a heavy rain.

After the oath had been administered Governor-General McNeill was presented to all the high Free State officials and their wives and then went [illegible]

Other Nations Would Like Canadian Envoy

Would Mean Admittance Of Canada To Pan-American Union

New York.—Although members of the Canadian Government have stated that the Dominion will not take the initiative in applying for membership in the Pan-American Union, a special dispatch to the Herald Tribune from its correspondent at Havana indicates that Canada would be speedily admitted, provided she extended her diplomatic connections to several Latin American countries.

Described as "curious developments running under the surface," the dispatch says: "Unofficially a suggestion has been made to persons who would transmit it to the proper Canadian authorities, that if the Canadian Government would send diplomatic representatives to Chile, Argentina, Brazil, and Mexico, as she has done to Washington, she would be speedily admitted to the union."

Youthful Burglars Captured

Two Gangs Are Rounded Up By Winnipeg Police

Winnipeg.—Two gangs of youthful burglars, members ranging in age from 14 to 19 years, and totalling 11 in number, have been rounded up by police recently. One gang devoted its efforts exclusively to stores and residences in the west end of the city, while the other gang operated over a wide area in Manitoba and Saskatchewan.

The first group of youthful bandits was gathered in by police as the result of an investigation into a series of store robberies. The second coup was made when the youths were surprised by police while in the act of robbing a local drug store.

Pay Tribute To Senator

Present Portrait To Senator Dessaulles To Commemorate Hundredth Birthday

Ottawa.—The reminiscent and the nearness of those stirring events which have given their color to the history of Canada were strikingly emphasized when both Houses of Parliament, having adjourned for the occasion, a portrait of Senator Georges Casimir Dessaulles was presented to him by his fellow parliamentarians, in commemoration of the 100th anniversary of his birth. Hon. Mr. Dessaulles celebrated his centenary, September 29, 1927.

Hon. Hewitt Bostock, Speaker of the Senate, made the presentation in the Senate chamber.

Right Hon. W. L. Mackenzie King, Prime Minister, expressed his pride in having the honor to join with the Senate in congratulating Hon. Mr. Dessaulles on the age he had attained and on the service given with such great distinction to himself, his province and to his country. [illegible]

Land Surveyors In Convention At Ottawa

Report Of Summer's Work Is Given To Government

Ottawa.—After months spent in the uninhabited or sparsely settled sections of Canada the Dominion land surveyors are here to compare notes, exchange experiences and to lay before the Government and the people of Canada the result of their summer's work.

When the convention opened about 100 surveyors and engineers took part, R. W. Cautley, of Edmonton, the president of the association of Dominion Land Surveyors, occupied the chair. His address was the feature of forenoon's meeting.

The tremendous area in Canada which still remains practically unexplored and unknown was emphasized by Mr. Cautley.

"No surveyor has ever set foot on the greater part of Canada," he said, "and less than one-quarter of our wonderful country has ever been adequately mapped out or can be until the surveys are made."

Sees No Possibility Of Peace Department

But Resolution Will Start Debate Says Miss MacPhail

Windsor.—Terming Toronto the "most reactionary city in Ontario," Miss Agnes MacPhail, M.P., speaking at the banquet of the Border Cities Business and Professional Women's Club, delivered a vigorous attack on war, its makers and planners.

Miss MacPhail said she had placed a resolution upon the order paper at Ottawa calling on the government to authorize the formation of a governmental department for the promotion of international peace and goodwill.

"We have a department that is doing all it can to promote the military spirit," Miss MacPhail said. "Why should we not have a department working to definitely promote the spirit of amity and international friendship? I know my resolution [illegible]

DIPHTHERIA ANTI-TOXIN

Article from Canadian Social Hygiene Council

It was Dr. C. J. O. Hastings of Toronto, dean of America's public health officers and a man with a remarkable series of triumphs over disease to his credit, who said that every time there was a death from diphtheria, the coroner should investigate it.

His declaration was endorsed by other medical men in all parts of the continent.

Dr. Hastings' statement was based on the fact that science has already provided the human race with two methods of coping with this scourge—first, the means of practically complete protection against the disease, toxoid, and secondly, the treatment, anti-toxin.

Yet, in spite of this means of fighting diphtheria, its death toll continues and young lives are regularly sacrificed to it.

Before going into this aspect of the question, however, some accurate data regarding diphtheria itself is necessary.

It chiefly attacks children under ten years of age and is much more fatal in young children than older persons, most deaths from it occurring among victims under five years of age.

Records show that it is most common between November and January and that cases decrease till it is at a minimum from June till August.

...would, nevertheless, cause diphtheria poisoning if injected into guinea pigs.

Poisons, such as the ones diphtheria germs give off, are called toxins.

But, science soon made another interesting discovery. It was found that animals which had once recovered from diphtheria poisoning thereafter, were protected from the disease, or "immune" to it.

Medical men were not long in finding the reason for this. The body, affected with diphtheria poisoning, seeks to fight it off by producing a protective substance of its own. This counteracts the toxins produced by the diphtheria germ and is called anti-toxin.

Investigating further, it was found that if animals were first given anti-toxin and then injected with diphtheria germs, the germs did no harm whatever. It was also ascertained that an animal, supposedly suffering from a fatal case of diphtheria, would recover if given anti-toxin promptly.

Science in the light of these facts, at once turned to the question of producing anti-toxin in absolutely pure form and in large quantities. By 1896, the experimenting had been completed and anti-toxin was ready for the doctor's use.

It must be remembered that anti-toxin's chief value is as a treatment and, for that purpose, it is unexcelled.

But it can also be used, under certain conditions as a preventive. If, for instance one child in a household is stricken with diphtheria and the remaining children are not protected...

One Result Of The Immense Tourist Traffic In Canada Is A Revival of Home Industries

One extraordinary result of the immense tourist traffic to Canada is the revival of home industries which in some cases have not been practised to any great extent for many years. Thus along the St. Lawrence River, in Quebec, in Nova Scotia, Prince Edward Island, and New Brunswick, rug-weaving is again flourishing. The visitors to Canada naturally desire to take home with them something of unique design or individual charm which cannot be obtained at home. They desire also something which has an attachment to and is representative of the country they have toured. Rugs especially are much appreciated, and in scores of homes nimble fingers are executing the designs of 50 or 100 years ago while there is great rivalry in the creation of new and artistic patterns representative of the country and atmosphere in which the workers live.

The age of machine production has meant a sacrifice of individuality and for certain purposes the home-made article, rough though it may be, is preferred to the regularity of design and the precision of the machine made counterpart. While home handicraft is likely to flourish from now on in Canada, says the Department of the Interior, through its Natural Resources Intelligence Service, it is unlikely that established factory industries will suffer because the home-fabricated article will be sold to a customer who would not buy a factory product. In many cases tourists carry away with them things which they had no intention of buying but which have caught their fancy and are bought on the spot...

...prized because of their rarity and exquisite workmanship with their embellishments in the way of engravings of animals and fish. The Indian work in basketry and birch bark, in beaded moccasins, gloves and jackets is well-known [illegible] women have even [illegible] rugs too [illegible] In an exhibit of maritime provinces' handicraft at Springfield, Massachusetts, recently, there was shown a rug made by a Micmac Indian woman, 103 years of age.

Of the home handicrafts practised in Canada, the arts of spinning and weaving are the most widespread. Especially is this true of rural Quebec, where, according to W. H. J. Tisdale, manager of the Canadian Co-Operative Wool Growers, not more than 900,000 pounds of a total wool clip of 4,000,000 pounds ever finds its way into commercial channels. The remainder is spun at home or woven into cloth in local community mills. However there are many other outlets than weaving for those who would profit from the trade opportunities brought to their doors through the ever-increasing flow of tourists to Canada. At a recent exhibition in Montreal, under the auspices of the Canadian Handicrafts Guild, hundreds of articles of home workmanship were on exhibit from all parts of Canada, ranging from household furnishings to bric-a-brac. From British Columbia and Ontario there was unglazed pottery in rich colorings and graceful lines. A lamp featuring a totem pole had been sent in from British Columbia, and there was basketry and wood carving from the coast province...

Encouraging Home Crafts

Irresponsible Public Utterances Produce Conditions That Cause Nations To Drift Into War

It seems rather hopeless sometimes to hold faith that the forces of good-will and good sense in this world can make headway against some sorts of madness which seem to flourish in it. We are not very sure, to take the latest instance in the news, that Senator Borah can do very much by his protest against what he calls the "sheer madness" of those American rear admirals who have lately been beating the patriotic tom-toms of the United States in behalf of a big, bigger and biggest navy. But the senator is right in his description of that business, and he is right to do what he can to prevent it. And it is everybody else's business unless they are mad, too; and no matter how hopeless it seems—to support the hand of any public man who is trying to keep his head amid the senseless rumors of war which now agitate our world.

Rear Admiral Plunkett has been telling the National Republican Club in New York City that the United States is nearer to war than ever it was before, and that this war is inevitable because "war is the penalty of commercial and industrial efficiency." So, says the rear admiral, the thing for the United States to do is to build the greatest navy in the world in the shortest possible time. And he is backed up by his senior officer Admiral Hughes, who says the thing to do is to build a billion-dollar navy.

Senator Borah is not too emphatic in his protest. He says that nothing is better calculated to bring about war between two great nations than competitive naval-building policies, coupled with statements like those of the rear admirals, that war is inevitable.

"These statements," says Senator Borah, "put out by naval officers, are notice to all the world, and particularly Great Britain, to get ready for war. They are being so interpreted throughout the world."

Senator Borah is quite right...

Planting Plum Trees

Planting Should Be Done As Early As Possible In the Spring

The best time to plant plum trees is in the spring and the planting should be done as early as possible. The process of planting is described in detail in a bulletin on "Plum Culture," which may be obtained from the Publications Branch of the Department of Agriculture at Ottawa. It is particularly stressed that great care should be taken to prevent the roots of the young trees from becoming dry before planting for if this happens the trees are almost sure to die. As a rule it is necessary to make the hole somewhat larger than will accommodate the roots spread out to their full extent. It should be made about 18 inches deep, after which the subsoil should be loosened a few inches more, but not removed. In digging the hole, the surface soil should be kept separate from the subsoil or that of poorer quality. The roots should be well covered because if they become exposed the tree may die. Broken or bruised roots should be cut off before planting. After the tree is placed upright and the roots spread out the surface soil should be worked in among them, by hand, if necessary, as it is important to have the soil come in close contact with the root fibres. When the roots are well covered and the hole is about half full it should be well tramped after which the hole should be filled level with the surface continuing the tramping while it is being filled. The surface of the soil should be left loose.

Canard and Anchor-Donaldson Lines

WORLD HAPPENINGS BRIEFLY TOLD

A contract for construction of a grain elevator has been let by the New Westminster Harbour Commission. The cost of the construction will be about $200,000.

The establishment of a department for the promotion of peace and international understanding is advocated by Miss Lydia Gibbs Field, Pasadena Postmaster here.

Hon. A. Lassinge, Minister of Railways, introduced in the House of Commons a bill providing for the construction of a line of railway southward from Rimouski and Father-land Valley.

Patrick Murphy aged 14, was added to the list of victims in Winnipeg's what he was found dead in a bed in a boarding house unconscious of dying. Next month, on the 15th will be the 10th anniversary of his death.

Sir Robert Falconer, president of the National Council of Canadian Institute of International Affairs, at the annual meeting held in Ottawa, John H. Dafoe, Winnipeg, was re-elected president.

Professor Johannes Jaeger, member of the Nobel Peace Committee in 1926, died recently at Copenhagen. Professor Jaeger was on the faculties of the University of Copenhagen. He awarded the prize for his work in international peace.

The League of Nations arrived at by the Pan-American conference has been welcomed by the people of the world in view of the U.S. and two Latin-American republics. The treaties involved are three dealing with commercial relations.

Admirers of many nationalities attended the funeral of Victoria Hansen Haase, noted Spanish author, who died at Metz-sur, France, in voluntary exile. A company of Alpine chasseurs with the famous Mondolin rendered military honors.

Krupps Are Kept Busy

Makers Of War Material Find Profit In Peace Time Products

In shifting from the manufacture of cannon and war materials to the making of such peaceful articles as fishnets, teapots, locomotives and motor cars, the Krupp Works, at Essen, have made a paying change.

The annual Krupp report shows a net profit of 12,000,000 marks, about $2,160,000 compared with a deficit for 1926 of 2,000,000 marks.

The Krupp Works, so recently famed throughout the world as purveyors of munitions of war and hoped for the production of weapons in tremendous quantity, have accomplished a readjustment to peaceful productivity with extraordinary rapidity.

Almost the same day and night activity prevails as in days before the World War, but today the work is on filling orders for railway locomotives and parts for motor cars, harvesting machines, knives and other ordinary articles of peace time needs.

Britain Is Following Government Plan

Has Decided To Abandon 16,000 Ton Launch For the Present

The British Government is now committed to London, has decided to go ahead with the 16,000-ton cruiser, the Exeter, 1927. The Admiralty, however, announced that it had been decided to abandon all the 10,000-ton cruisers for the present, and that one of the proposed 8-inch-gun type ships might be started over until 1928-29. Now it has been determined to abandon the latter project altogether.

The net result is that in the two years in question only three 8-inch-gun vessels will be laid down, instead of four in the class, as originally proposed. Together with the 10,000-ton cruisers, the saving of the Admiralty is 5,000,000. It is understood that the program for destroyers and submarines will remain unchanged and that construction of nine destroyers and six submarines will be included in next year's program.

Canada's Winter Carnivals

February Is the Month Of Sport Carnivals in Canada

In Canada, February is the snow-until month the month of sport carnivals. Winter sport activities throughout the Dominion have reached their climax at this period of the season and competitors decide the supremacy in the practically every line of recreation are held during this month skating, snowshoeing, tobogganing, ski-ing, curling, hockey, and other forms of outdoor recreation are indulged in. The fall swing since November or the carnival has been a most fascinating and thrilling spectacle

Attracted Auto Tourists

Nearly 8,000 Travelled Over Cariboo Highway Last Year

Nearly 8,000 automobiles traversed the Cariboo highway during the 1927 season, according to records at the Automobile Club of British Columbia. The highway was open to general tourist traffic for the first time last year.

The Cariboo highway follows the Fraser River into the historic gold country of Central British Columbia and is the hope of this romantic territory is expected to set as a mecca for many more thousands of tourists this year, both from Canada and the United States.

Artificial Graphite

Artificial graphite, an electric furnace product, is made near Niagara Falls, Ontario.

William Shakespeare

William Shakespeare was christened at Stratford-upon-Avon, a market village of England.

For Canadian Schools

The National Diamond Jubilee Committee is promoting the planting of Memorial trees in schools of Canada in commemoration of the sixtieth anniversary of Confederation. It is made of highly burnished copper, and is mounted on a mahogany frame.

New Western Radio Station

10-10 Experiment With Transmission Of Radio Picture

A radio-broadcasting station, controlled from a studio in Winnipeg, will be erected this year just within the boundaries of Saskatchewan, it is announced by D. F. R. Conte Manon Mow. The station, Mr. Conte said, will be erected by a commercial company but aside from the purely commercial features experiments will be made in transmission of radio-pictures. He believes television, by which the listener will be able to see as well as hear radio artists, will follow closely on the perfection of picture reception.

The Saskatchewan site, Mr. Conte explained, is selected to avoid any possible interference encountered by stations adjacent to cities.

Will Be Novel Experiment

Fort Liberal, B.C., Plans To Try Out Operation Of Municipal Coal

A novel experiment in civic enterprise, probably unique of its sort, Fort Liberal, B.C., soon if plans for the operation of a municipal coal mine materialize.

It is believed that a large bed of coal lies under the city and the proposal has been made to diamond drill the property and ascertain the feasibility of the mine project. Should the drilling show that the coal is available at a reasonable depth, then the project would be operated at a profit by the city, it is believed. If the drilling shows the coal is at too great a depth to be worked on a small scale, negotiations will be entered into with a private company.

Immigration To Canada

Substantial Increase In Figures Over Previous Year

Immigration to Canada for the first month of the current fiscal year, ending December 31, 1927, totalled 12,926, an increase over the corresponding period in 1926 of 14,881, or 13 per cent. Of the total of 12,926, 10,139 immigrants of British, United States, French, Belgian, Swiss, Scandinavian, Dutch, or German origin amounted to 82,365.

In the nine months under review 2,722 Canadians returned to live in the Dominion from the United States where they had gone with the declared intention of residing there permanently.

Immigration during the month of December, 1927, totalled 4,566, of which 37 were British; 1,241 from the United States, and 3,288 from other countries.

For Canadian Naval Service

Ships Transferred From Royal Navy Will Be Renamed

The Department of National Defence yesterday announced that on the 1st February, H.M.S. Tenby and Tweeder were transferred from the Royal Navy to the Canadian naval service. Upon transfer, these two ships will be renamed as the Canadian naval ships Saguenay and Skeena respectively.

The Saguenay is a sister ship to the Champlain and Vancouver, as it is considered the ships of the Canadian naval service should bear names of historic significance.

There is at the present time in the Royal Navy, a destroyer named Vancouver, but the admiralty has agreed to change the name of this ship in order that the Canadian service may have the exclusive use of the name of the great naval explorer of the Canadian Pacific coast.

Recipes For This Week

(By Betty Barclay)

LEMON JUNKET BAVARIAN

1 package lemon junket.
1 tablespoon powdered sugar.
½ cup chopped walnuts.
½ teaspoon almond extract.
1 pint milk.
½ pint cream.
Marshallow.
Tart jelly or cherries.

Cut marshmallows in quarters with scissors and place in bottom of glasses. Whip cream, almond extract and sugar together until stiff, add chopped walnuts. Heat milk to scalding point, pour into this junket powder, quickly pour into the cream mixture, stir a moment carefully. Pour at once into the glasses. The milk and marshmallows will rise to the top. Let set until firm. Then add jelly. Top with bits of tart jelly.

Scalloped Ham and Potatoes

Into a buttered baking dish put slices of raw peeled potatoes and a little onion if liked. Add a layer of uncooked sliced ham. Add another layer of potatoes and ham and pour on this cream sauce (1 tablespoon flour, 1 tablespoon butter, to 1 cup milk). Sprinkle bread crumbs on top and bake in a moderate oven until brown, and potatoes are well done. Serve hot, enough ham can be used to give the desired flavor, which has the advantage of making a little ham go a long way. For potatoes can be parboiled at home in a heavy tin dish with a cover and finished over hot coals on a camp fire.

Broke the Spell

The male members of a certain tribe in India cannot contract marriage with a tree. It has been found has lost two wives by death and wishes to marry a third, but naturally fears that she too may die. So before the marriage is fixed up to a bootlegging tree and with it the spell is broken the full marriage ceremony. The tree is then cut down and burned away. Then the knot is cleared for his marriage with the new wife and she is considered free from all evil influences.

Foulque Of High Quality

Canadian foulque enjoys a well-merited reputation in the economic industries, being of high grade and of uniform potash content, analysis of samples from a number of quarries showing a potash content of about 12 per cent.

Increase In Air Insurance

Increase in air insurance seems to keep pace with larger axis of motor cars. You can't fool the pedestrian.

A woman doesn't like to be flattered because she thinks she needs it.

SUNDAY SCHOOL LESSON

FEBRUARY 12

JESUS PUTTETH THE KINGDOM OF GOD

Golden Text "Thy kingdom come. Thy will be done, as in heaven, so on earth." Matthew 6:10.

Lesson Mark 1:14, 15, 4:1-20. Devotional Reading Psalm 145: 7-13.

Explanations and Comments

The theme of the church is the kingdom of God. The purpose of the church is the establishment of the kingdom of God, can only be attained by studying all the various ways in which Jesus taught it. In these studies we learn that it has to do with man's spiritual nature and possibilities. As Bishop Ryle says, "He made it as the reign of God in the hearts of men." "The Kingdom of God is within you," said Jesus.

There is no geography in the Kingdom of God. On an ancient Syrian flagpost the familiar words of Luke 1:33 read, "and in His Kingdom there shall be no frontier". It is for all the world and for every creature. There is no discrimination in the Kingdom of God, it is both present and future. As Abraham Lincoln declared, "It is right while on earth." In the earthly province of the Kingdom its subjects are fighting the good fight; in the heavenly province they have gained their crowns as righteousness.

A parable is usually told for the purpose of illustrating a truth. The Parable of the Sower, Matthew 13:1-23, "The Blade, the Ear, the Full Corn," "The Tares and the Wheat," "The Net," "The Grain of Mustard Seed," "The Leaven," "The Hidden Treasure," "The Pearl of Great Price," "The Laborers in the Vineyard," "Two Sons," "The Wicked Husbandmen," "The Marriage Feast," "The Ten Virgins," "The Talents," "The Pounds," "The Seed Growing Secretly," "The Unmerciful Servant," "The Two Debtors," "The Good Samaritan," "The Rich Fool," "The Rich Man and Lazarus," "The Unjust Judge," "The Pharisee and the Publican," "The Lost Piece of Money," "The Lost Sheep," "The Prodigal Son," "The Unjust Steward," "The Barren Fig Tree," "The Two Builders

SUPPLY OF REWARD WHEAT EXHAUSTED

(Experimental Farms Note)

The demand for seed of Reward wheat, a new and promising variety originated by the Dominion Experimental Farms, has been so keen, that hundreds of applications for seed cannot be filled this year, as the supply of seed is now entirely exhausted.

Those who desire to obtain seed of this variety for sowing in the spring of 1929 should get in touch next winter with their nearest Experimental Farm and obtain information as to sources of supply. There will probably be upwards of 1000 acres of Reward seeded in the spring of 1928. From 250 to 300 farmers will have from 3 to 3 acres each. The rest of the area occupied by this wheat will be located chiefly on Dominion Experimental Farms in the three Prairie Provinces.

A report on the performance of Reward on the above farms in 1928 will be prepared next winter and will probably be available for the consideration of Western wheat growers before the seeding season of 1929. This report should indicate to a considerable extent at least, the districts in which Reward may be regarded as a promising variety. It is always advisable, however, to withhold enthusiasm for any new variety until it has been thoroughly tried out by farmers for two or three years at least.

Dominion Cerealist

WHEAT POOL NEWS BULLETIN

The lease by the Dominion government of the Prince Rupert terminal elevator to the Alberta Wheat Pool has been renewed for a further period of five years. The terms of the lease have not been announced.

* * * * *

The Prince Rupert terminal has a capacity of 1,250,000 bushels divided into 180 tanks. It has a receiving capacity of 18 cars an hour and can load 80,000 bushels an hour. Its 12 grain cleaners can handle 17,000 bushels an hour and its drier 7,000 bushels an hour. In front of the elevator is a 1,000 foot wharf with a 35 foot depth of water at low tide.

A BLACKSMITH'S DREAM

Last evening I was walking with a blacksmith old and grey,
When he told me of a dream sublime, he had on Christmas Day.

While snoozing in his arm chair, this vision came to view;
He saw an angel enter, dressed in garments white as snow.

Said the angel, "I am from heaven, the good Lord sent me down,
To bring you up to Glory and put on your golden crown.

You've been a friend to every one and worked hard every day;
You worked for many thousands and from few received your pay.

Now we want you up in glory for you have labored long and hard,
And the good Lord is preparing your eternal just reward".

Then the angel and the blacksmith started up towards Glory's Gate,
But when passing close to hades, the angel murmured, "Wait!

I've a place I wish to show you, its the hottest place in hell,
Where the ones that never paid you in torment forever dwell".

And behold the blacksmith saw there his old patrons by the score,
With fan in hand he took a chair, he wished for nothing more.

He desired to sit and watch them as they sizzled, singed and burned
And his eyes would rest on debtors every way he turned.

Said the angel.—"Come on blacksmith there are pearly gates to see",
But the blacksmith only muttered,—"This is heaven enough for me".

C. HOBSON, Proprietor

LOCAL and PERSONAL

Born.—To Mr. and Mrs. Charlie Kallal on February 10th, a son.

Mr. and Mrs. Bissett and Mrs. Calvert motored to the city on Friday afternoon.

Mr. and Mrs. C. Lee and Mrs. John Lee motored to the city on Friday returning on Sunday morning.

Mr. and Mrs. Lovel and J. W. McMullen are attending the Oddfellows and Rebecca Grand Lodge meet at Edmonton this week.

Mrs. W. Wood and Miss Ethel McClyment spent the week end in Viking visiting at the Ballone home.

Mrs. Cory of Moose Jaw is visiting friends at Tofield for a few days.

Mr. McCullough, principal of the Tofield school, made a business trip home to Lacombe over the week-end.

Miss Dawson is holding home nursing classes at the Institute rooms. They are being well attended and will no doubt be of great benefit to the women folk of the town and district.

Miss Dorothy Hay is visiting in the city.

Dr. Law and Mr. Beirnes motored to the city on Monday.

Miss Ethel McClyment is being trained for new night operator at the local telephone office.

T. Whitmore will shortly be leaving Tofield and the studio will be closed. Those who desire photographs taken are urged to make an appointment early. Tom's work is sufficiently well known, he having been making good photographs here for many years. The Irish in him is responsible for the pleasant smile with which he greets all comers.

The Bishop of Edmonton has notified the acting Incumbent of Holy Trinity Church, that on the advice of his physician he will be unable to take any duties for at least two months. By reason of this, the confirmation service that was to have been held on February 19th, is postponed to June 3rd, Trinity Sunday.

PLEASE RETURN IT!

Last week during the noon hour some person took a watch and chain from the office of the Tofield Creamery. Neither the watch or the fob is of much value to anyone but their rightful owner, Mr. Alex Ross. The watch, which belongs to Mrs. Ross, is a very old one, and valued for that reason and the fob is Mr. Ross' 1914 star. Will the person who took it return it at once as in addition to it being of little value to them, it is unwise for them to hold it.

NON-MAINTENANCE CASE

A non-maintenance case was heard at the Town Hall on Saturday last, when J. R. Misfelt was prosecuted for non-support of his wife.

He was convicted and allowed out on suspended sentence for two months.

Magistrate Williams of Leduc presided. Edward Brine, B.A., of Edmonton appeared for the plaintiff and Mr. Bruce Smith for the defendant.

AGRICULTURAL EXPERTS VISIT TOFIELD

Agricultural experts employed by the provincial government visited Tofield on Saturday last. They occupied and held their meeting in a C.N.R. passenger car, which had been fitted up for this purpose. There were many samples of grain, seed, weeds, etc., and a certain amount of seed was sold to those desiring it.

Lectures were given on poultry raising, grain growing and live stock raising.

There was a very fair attendance and those present expressed their pleasure at the event.

..Mrs. J. W. Robinson, of Tofield, was very successful with her entries at the Edmonton Poultry exhibition held recently. Out of just over 40 entries, we under stand she received 30 awards. We did have a list of the awards but it has been lost, consequently we are writing from memory. Mrs. Robinson is becoming quite an expert poultry woman, and the Mercury congratulates her upon her recent successes.

U.F.A. WHIST DRIVE INCREASINGLY POPULAR

The U.F.A. whist drive held on Tuesday night of this week, was by far the premier social event of the winter. The committee, guided by the success of previous events planned for more tables and brought the number up to 35. At 8:30 people were still coming in and additional tables and chairs had to be obtained. Before all were seated, there were 40 tables occupied. Play then proceeded until about mid-night, when lunch was served. The large crowd did not catch the [illegible] however, as there was plenty for all [illegible] left over, which was auctioned off by Mr. Ball.

The event will go down in history as a triumph for U.F.A. social activity and the committee in charge of the arrangements are to be congratulated on the event.

The prizes were won by: high gent, Mr. L. C. Hay; low gent, Mr. Guy Walker; high lady, Mrs. Wes Ingram; low lady, Mrs. McGinitie.

MANY FARMERS ATTEND TRACTOR SCHOOL

Numbering well onto or just over the hundred mark, Tofield farmers turned out in force to attend the tractor school held at M. C. Hammond's show rooms on Thursday.

Lecturers from the headquarters of the John Deere Company were present and went over carefully every item of interest to the tractor owner and prospective tractor owner.

Emphasis was not placed so much upon selling tractors as upon fully describing them, explaining their workings and how to get the most power and use from them.

In addition to charts, the lecturer had a complete tractor to refer to in the room, while in the yard there were others under power.

It was evident the large number of farmers present were interested in power farming, both by the attention they gave the speaker and the number of questions asked.

MIXED BONSPIEL NOW IN FULL SWING

The Tofield Curling Club's annual mixed bonspiel is now in full swing and every night all four sheets of ice are being played upon by rinks composed of two ladies and two gentlemen. The results of Monday nights draw were:

Clutterham beat Craig
Simpson beat Bissett.
McClurg beat Law.
Swift beat McCann.
Abbot beat Lee Sr.
Cap Lee beat Beirnes.
Hannan beat Jobb.
Brown beat Evenson.

The results of the Tuesday draw are as follows:

Chapman beat Ball.
McCauley beat Forman.
Clutterham beat Letourneau
Hammond beat Warner.
Lee Jr. beat Abbot.
Hannan beat Brown.

The Tofield Curling Club are thinking of stacking a rink to play Dr. McPherson of Ryley. The Dr. is quite chesty over his recent success in the Tofield bonspiel.

—A.B.C.

"SECRET STUDIO" for SATURDAY

Modernism, as expressed in youth—pliable, spontaneous youth—is the magic spark that sets the cameras to clicking in Fox Films version of "The Secret Studio," directed by Victor Schertzinger and starring Olive Borden.

Bolshevik youth, one might say, alone in their own new civilization, the younger generation has turned many of the time-honored screen and stage traditions topsy-turvey, or ignored them altogether.

"The Secret Studio," which depicts the activities of a modern, small town girl who decides upon a business, rather than a college education, gives Olive Borden one of the best opportunities of her screen career for dramatic and artistic action. The feature shows at the Variety Theatre on Saturday.

HOLY TRINITY CHURCH

Service Sunday, Feb. 19th

11:00 Confirmation class.

4:00 Service of Holy Baptism, if desired.

7:30 Evening service and address. "Convocation."

All are invited.

REV. A. A. ADAMS,.
Priest in charge.

RECALL FROG LAKE MASSACRE IN LECTURE AT VARIETY THEATRE

Quite a nice crowd listened to one of the most interesting [illegible] they had heard in a long time when W. Bleasdell Cameron one of the survivors of the Frog Lake Massacre during the rebellion of 1885 gave an account of his experience during the exciting months from the first outbreak at Duck Lake to the final trial of the murderers at Regina at [illegible] presided over by the late Mr. Justice Richardson.

Mr. Cameron told of leaving school at an early age in old Ontario and being filled with the youthful desire for adventure starting at once for the West, how he got to Winnipeg and finally made his way to the trading post at Frog Lake. Here he entered into partnership with a Mr. Gill. This partnership was dissolved and he took charge of the Hudson Bay Trading post, Mr. Gill remaining at Frog Lake as opposition. There were several buildings arranged along the trail at distances of about 150 yards. There was a Roman Catholic Mission church and house; the Hudson Bay trading post and living quarters; the North West Mounted Police building—a small log affair where in a single room a detachment of six men lived; then some distance away was the office and home of the Indian agent P. P. Quinn. The interpreter, Mr. Pritchard lived nearby. After showing the excitement that soon became very evident following the news of the uprising of Louis Riel and the clash at Duck Lake Mr. Cameron went minutely into the event of April Fool day of 1885 when the Plains Cree band of of Big Bear took advantage of the day to play a number of tricks on the whites of the small Frog Lake settlements; of the departure of the [illegible] the [illegible]vice of the other whites taking with them ammunition from the Hudson Bay Stores and of the interruption of services in the church where all the whites had gathered on the bright morning of April 2nd, by the entry of Indians painted and costumed for what was to follow. The speaker related how one highly decorated Indian came into the church and dropped on one knee with the but of his gun on the floor and glared at the two priests officiating at the altar—both of whom later lost their lives—and in his war-paint and feathers and paint, made a never-to-be-forgotten picture of hatred and thirst for blood.

The events following the church gathering were short and sanguinary; all the whites were told to go over to Mr. Quinn's office. They did so, and a young Indian—it was the young man who really caused the trouble—picked a quarrel with the agent and shot him in the shoulder; another Indian sprang in when he fell and killed him with a gun shot at close range. Other members of the whites gathered together in a small group were soon victims—two married women being allowed to escape to the Indian encampment. They were later freed upon money being paid by Mr. Prichard, the interpreter, who was spared.

Mr. Cameron was fortunate in having a friend among the Indians who when he knew the shooting was about to begin had him over to the Hudson Bay store and got him a cap which he had arranged to get earlier in the morning—and it was from the store window that he saw the fallen Quinn and the shooting by the second Indian. He also was allowed to escape to the Indian encampment and was kept in captivity for two months upon the approach of General Strange's column of soldiers gaining his freedom. He was present at the trial of the Indians who participated in the gruesome tragedy of April 2nd, and his evidence assisted in sending six of them to the gallows.

ANKIS CREEK

Conrad Patterson returned from Calgary last Saturday where he has been attending the technical school since Christmas. He also took a trip to Banff and attended the carnival there last week.

Robert Berg is in the city taking treatment for the benefit of his health.

KINGMAN

Mr. and Mrs. W. Jardie returned from Prince Rupert last Friday, where they have been visiting relatives and friends for a couple of months.

Mr. Dan Bramstead and daughter, and Mrs. Kortman of Edmonton attended the funeral of Norman Melvik on Wednesday.

Mrs. Thor Horte visited in Edmonton over the week end.

Mrs. Kora Engstad and Miss Ida Thompson attended the carnival at Banff. Mr. Engstad was the champion in the ski racing events there.

Miss Hanson of Calgary has been visiting with her sister, Mrs. Joe Berg, for a few weeks.

Mr. and Mrs. Ted Severson and family of Ryley visited with Mrs. Ed. Thompson for a couple of days.

The Valentine party that was held at the Coal Hill School on Saturday evening was enjoyed by everyone.

A dance will be held in the Kingman hall on the 17th. The music will be furnished by Rasmus Walde and Ted Svendsen of Edmonton.

KETCHAMOOT

A cup and saucer social will be held next Friday evening, February 24th, at the Shultz home. Ladies please bring cup and saucer to donate toward supper. Everybody welcomed and a pleasant evening is anticipated.

Mr. and Mrs. Wm. Lee were Edmonton visitors last week. Mr. Lee was curling and Mrs. Lee was visiting relatives.

Russel Shultz delivered horses for Mr. Haukedahl of New Norway the first of the week.

Miss Dora Couture of Edmonton accompanied the Lawson young folk home last Sunday and spent the week visiting at the Lawson and Whillans homes.

Hazel and Stanley Sears were detained home from high school the first of the week owing to colds.

Mr. and Mrs. Barnes and Ralph were guests of Mr. and Mrs. J. H. Ingram on Wednesday evening.

The Misses Lawson and Dora Couture and Martin Lawson spent Tuesday evening at the Whillans home.

Mr. and Mrs. Hansen of Farmington district have rented the farm land from Mr. W. A. Mitchell, they will occupy the small house and are making preparations for moving.

Mr. and Mrs. Chas Whillans and children were guests of Mr. and Mrs. Geo. Cookson on Sunday.

Mrs. A. J. Whillans entertained the M.A.S. at her home on Wednesday afternoon. The meeting was well attended by members and there were four visitors, Mrs. A. Yager, Mrs. Geo. Yager, Mrs. Branton and Mrs. Whitaker After the meeting a social hour was spent with the hostess serving refreshments assisted by Mrs. and Miss Yager. The next meeting will be held with Mrs. John Brown.

Mr. and Mrs. G. R. Owen have traded their property in B.C. on three quarters at Veina, Alberta and are expected back in a few weeks, the boys, Earl and Percy and Albert Sears expect to return this week.

Mrs. Bakkehaug and baby are visiting at the Eggen home in Bardo this week.

Mr. and Mrs. E. A. Moen and family were visitors at the Alex Finlay home last Sunday. Mr. and Mrs. Patterson were also guests at the Finlay home on Sunday.

Mr. and Mrs. Sand and daughter from Ryley were callers at the R. O. Berg home on Sunday.

Miss Magda Annobe has been assisting with the work at the L. Rolstads home, Mrs. Rolstad being unable to attend to her usual duties.

Mr. and Mrs. H. Hillerud and family are now moving into their new home. The carpenters finished there last Saturday.

Bertha Johnson from Viking and Emma Bruhe visited at the Flesten's home the first part of the week.

A basket party will be held in the Solberg school next Friday, February 17th. Everybody welcome.

RED ROSE TEA "is good tea"

Eight Years Of World Service

[illegible] the Great War at the [illegible] of the Peace [illegible] was written in the history of the [illegible] when the League of Nations was formed and the Covenant of the League written. [illegible] a new ideal of international relationships and [illegible]

[illegible] the League of Nations observed its [illegible] anniversary. [illegible] years is but a fleeting second in the life of the [illegible] value in glancing back over that brief period and [illegible] to measure the usefulness of the League and in endeavoring to find [illegible] the question whether it is worth while and whether there is to [illegible] the seeds of permanence.

[illegible] of the press of the world is that, while the League [illegible] that was hoped for it [illegible] extravagant [illegible] supporters neither have the [illegible] prophecies of 1920 been fulfilled.

The League has not yet succeeded in freeing the world from the [illegible] future wars although it has been instrumental in [illegible] disputes any one of which might have developed into [illegible]. On the other hand it has confounded all the dire prophecies [illegible] in a welter of quarrels and recriminations. [illegible] today than at any previous period [illegible]

[illegible] the programme of the League has had two main [illegible] principles which, from the first, it has sought to establish: the extension of international law and the settlement of international disputes by arbitration. It has done much to secure acceptance by all nations [illegible] principles but that is not the sum total of its accomplishments. To [illegible] Lord Cecil:

It has improved international intercourse, it has struck some effective [illegible] grave social evils, it has rescued some hundreds of thousands of [illegible] women and children from captivity or starvation, it has done something to restore the economic situation in Europe, it has [illegible] states [illegible]"

The League has yet to achieve its highest purpose, its greatest task, the [illegible] of a position which ought to destroy war. If it has, as yet, failed [illegible] disarmament is still a dream and war still a dreadful possibility, the reason is not far to seek. The London Daily Herald, Labor, states the position when it says:

"The character of any association is derived from and determined by the character of its members. A thousand Quakers will not make an effective infantry battalion, nor a thousand bookmakers an effective anti-gambling society. The impossibility of gathering grapes from thistles is not altered even by dubbing a thistle field a vineyard. And since the League is a collection of governments its character and its work depend inevitably upon the nature of those governments. Its collective will is formed by their [illegible]"

[illegible]

Empire Marketing Board

Campaign In Old Country To Create Demand For Empire Products

The Empire Marketing Board is carrying on a most useful work in endeavoring to educate the purchasing public of the Old Land in products of the Empire. One of the striking methods used is a series of illustrated advertisements depicting typical scenes in connection with marketing and transportation of various products from distant parts of the Empire.

Two striking advertisements recently issued deal with apples from Canada and are calculated to bring very forcibly to one's attention the excellent qualities of this imported Canadian fruit. No better method could be desired for creating a demand for this product of Canadian orchards and should materially assist in stimulating trade within the Empire.

ARE YOU RUN DOWN?

All That Is Needed Is a Tonic To Build Up the Blood

There are many people who have been semi-invalids so long that they accept their condition as a life burden. They have endured nervousness, broken sleep and a generally run-down feeling so long that they have given up hope of again enjoying good health. In most of these cases a well chosen diet, fresh air and a tonic to build up the blood would do wonders. And as a blood-building tonic no other medicine can compare with Dr. Williams Pink Pills. There is scarcely a spot in Canada where you will not find some formerly ailing person who has found new health through the use of this medicine. The experience of Mrs. Thomas Ahearn, St. [illegible], Que., bears out these statements. She says: "I have the great[est] reason to be thankful for what Dr. Williams Pink Pills have done for me. I was in a very weak and run-down condition. Frequently I would faint and my legs would swell badly. It was almost impossible to do any housework. It seemed as if my blood had turned to water. In this weak and despondent condition I began taking Dr. Williams' Pink Pills. A few boxes proved that they were helping me but I continued taking the pills until I had used a dozen boxes, by which time I found myself a completely restored woman, able to do my work without fatigue, a better appetite and a sense of cheerfulness, where before I had been despondent. For all this, thanks to the health-giving qualities of Dr. Williams' Pink Pills."

If you are feeling run-down, give Dr. Williams' Pink Pills a fair trial [illegible]

Druggist Gave Her Very Good Advice

Miss Ruth Horowitz, Bronx, N.Y., writes: "Having been troubled with indigestion caused by constipation for several months, my druggist advised a purely vegetable laxative pill.

I can safely say that since I am taking them, and only one each night, I feel like myself again and can eat most anything without fear of an attack."

CARTER'S LITTLE LIVER PILLS

All druggists—25c and 75c red pkgs.

Support Canadian Literature

Canadian Books, By Canadian Authors, Printed In Canada

The Carillon Book Club, of Canada, have inaugurated a plan to furnish the reading public of Canada with books by Canadian authors, printed by Canadian workmen on paper made in Canada. They have received an option on the output of a Canadian publishing house, and as soon as each book comes from the press they will be sent postpaid to members of the book club. The annual subscription rate is $10 per year, and this pays for six new books, which will be sent to members as soon as printed and at intervals of two months. This is not a money making proposition, the main object being to provide the people of Canada with good, wholesome books by well-known Canadian writers. Mr. C. C. Knight, Exchange Building, Ottawa, is the president of the club, and by writing to him, full particulars of the plan will be gladly furnished.

Explanation Of Myopia

Prevalent Because Man Has Still Characteristics Of Fish

Some justification for calling a nearsighted motorist a "poor fish," was advanced recently at the convention of the American Academy of Optometry. It was said that near-sightedness, or myopia, is prevalent because man has not yet completely lost some of the characteristics of a fish. His eyes naturally diverge to the right and left instead of looking straight ahead. The inner muscles of the eye, in trying to correct this [illegible]

Builds Greatest War 'Plane

French Machine Can Carry Two Tons Of Bombs 500 Miles

France is developing and is now testing the greatest aerial warship ever built, armed with eight machine guns and capable of carrying two tons of bombs in a radius of 500 miles, rising with that weight to a height of 18,000 feet, out of range of all land guns.

The ship is a mystery plane, built in absolute secrecy, and it was not until the tests were started that French engineers told of its remarkable strength.

Despite its size, it has a fine profile which makes it less of a target in the sky. A double set of wheels permits landing in fields in which ordinary planes could not land. The propellers need not be swung by hand, but start like an automobile motor with simple foot pressure.

There are many novel features, such as a balcony for the crew, sending and receiving wireless, a map room and a special cabin for the bomber with controls permitting him to drop a single bomb or an entire load at once. It can be transformed into a seaplane within an hour.

Drives Out Many Burglars

Dog In Geneva, Switzerland, Has Made Thieving Unprofitable

Much of the credit for the fact that no case of burglary or theft was brought before him in 1927, has been publicly ascribed by Judge Marc Collie, Geneva, Switzerland, to the sagacity of a wolfhound named Wigger, owned by a gendarme named Carlier.

The dog made thieving so unprofitable that the number of malefactors speedily diminished. He traced and caused the arrest of more than twenty burglars and thieves in the Canton of Vaud, and also found many missing persons. After smelling of the bed of a man who had been missing for three days, Wigger traced his footsteps to the edge of a lake, beneath whose waters the body was discovered.

Sending Movies By Radio

Taken In New York Can Be Seen In London One Hour Later

BAYER

ASPIRIN

Perhaps you didn't realize that Aspirin tablets are made to relieve the deep-down rheumatic aches as well as dispel the occasional headache. They do! In cases of neuralgia, neuritis, lumbago; for those pains that penetrate one's very bones, Aspirin tablets offer real relief. Just be sure you are getting the real Aspirin, with Bayer on each tablet and on the box—with proven directions inside. All druggists.

Physicians prescribe Aspirin; it does NOT affect the heart

COMMONS DEBATE CLOSES WITHOUT A VOTE TAKEN

Ottawa. After ten days of debate and without a division, the House of Commons adopted the address in reply to the speech from the Throne. The last day was a day of incidents and threatening storm although the end came quietly.

Hon. C. A. Dunning, Minister of Railways, participated in the debate in the evening.

Scarcely had debate been resumed in the House, when Hon. C. A. Dunning, Minister of Railways, stigmatized a statement made in the House as "absolutely false." There were loud Conservative protests.

Hon. R. B. Bennett, Opposition leader, demanded withdrawal.

"I think it would be better to act as an example to the House," gravely observed Speaker Lemieux; and the expression was withdrawn.

Thomas McMillan, (Liberal, South Huron), defended the financial record of the Government. The Liberal Government, during its period in office, had decreased the national debt by over $100,000,000 and had turned the railway deficits into surpluses. Canada's advancement in the international field during the last ten years had been little less than marvellous.

A. M. Young, (Liberal, Saskatoon), believed the appointment of ministers to Tokio and Paris would prove successful. These representatives would be equally as important as the Canadian minister at Washington.

"I am not particularly enamoured with the Board of Railway Commissioners," commented Dr. Young in referring to the transportation of Alberta coal to Ontario. Despite legislation passed in 1925 for the removal of discriminatory freight rates, the board had dilly-dallied and allowed two [illegible] of grain to be moved without taking the necessary action to remove discrimination. He opposed any suggestion for the adoption of a statutory rate on coal less than the official finding of the railway board.

Canada was enjoying prosperity and there was less unemployment in the Dominion than we had had for some years.

"They are all gone to the United States," interjected Peter McGibbon, (Conservative, Muskoka).

"You are not thinking of going, too?" retorted Dr. Young, while the house showed its amusement.

"We find that when you come to social legislation in the interest of the people of Canada you have to trust to the Liberal Party to get it," said Dr. Young after brief reference to old age pensions. Dr. Young advocated encouraging immigration from the British Isles, but said we should not discourage those immigrants from other countries who could be assimilated.

Atlantic Air Service

Regular Passenger and Mail Service To Be Instituted This Summer

Washington. - Regular trans-Atlantic mail and passenger service by dirigible airships will be instituted within three months with the co-operation and approval of the United States Government. Secretary Hoover said recently in announcing the conclusion of conferences with representatives of British interests who are responsible for the enterprise.

The dirigible R-100, now under construction in England, designed to carry 100 passengers and ten tons of mail, is to inaugurate the new air service, on a tentative schedule that will consume 48 hours on her westward voyages and 36 hours on the eastward return.

The United States Government will loan the R-100 the use of the naval air station mooring mast and equipment at Lakehurst, N.J. Negotiations are now under way with the Post Office Department by which the air liner will be given a special mail contract.

Again President Of National Dairy Council

J. A. Caulder Unanimously Re-Elected By That Organization

Regina. J. A. Caulder, retiring president of the National Dairy Council, was unanimously re-elected by that organization, when it held its first meeting of the year.

Mr. Caulder suggested in his address that it would be best to elect some eastern member to the presidency, as the important matters coming before the council this year such as the revision of the Australian and New Zealand preferential tariff on butter, could be more efficiently handled by some one in close touch with the Ottawa headquarters of the council. He was, however, overruled by the other members.

Matter Under Consideration

Edmonton. The offer of the Canadian National Railways for the Alberta and Great Waterways line has been received by the provincial government and is under consideration by Premier Brownlee and his cabinet.

Memorial To Earl Haig

Premier Baldwin Has Suggested Erection Of Public Monument

London. Premier Baldwin, in a glowing eulogy of the late Field Marshal Earl Haig, in the House of Commons, moved that the King be requested to order the erection of a public monument to the field marshal as an expression of the state's attitude.

Premier Baldwin's motion was carried after Ramsay MacDonald, Labor Leader, who associated himself with Mr. Baldwin's tribute, moved an unsuccessful amendment to the Premier's motion, whereby a committee should be appointed to consider the best form of memorial, in view of the field marshal's concern for the welfare of ex-service men, their widows and dependents.

Urge Harsh Measures

B.C. Council Of Women Recommend Lash For Drug Peddlers

Victoria.— Resolutions along social lines were adopted at the annual meeting of the Provincial Council of Women in session here.

One urged an amendment to the Opium and Drug Act of 1923, so that the offenders against the act might be punished with the lash. Copies of communications from the Hon. A. M. Manson, British Columbia Attorney-General, were read in connection with the discussion. One of these letters to the Hon. Ernest Lapointe, Minister of Justice, recommended the lash for such cases and noted that "the problem is probably more acute in British Columbia and Quebec than in other provinces."

Too Busy For War

U.S. Occupied With Domestic Affairs Says J. A. Spender

London. Citizens of the United States are too busy with their own domestic affairs to dream of war, J. A. Spender, former editor of the Westminster Gazette, declared in a statement concerning his recent trip to the United States. He said he thought that officially there was a certain chill in the relations between Great Britain and the United States because of the results of the recent Geneva naval conference, but that this official chill was not reflected by the people of the United States, who feel goodwill for Great Britain.

Commemorates Amery's Visit

Ottawa. To commemorate the visit of the Rt. Hon. Col. L. C. M. S. Amery, Secretary of State for the Dominions and Colonies, a mountain in Alberta having an elevation of 10,900 feet has been named "Mount Amery" by the geographic board of Canada with the concurrence of the Province of Alberta. The mountain overlooks the junction of the Alexandra River with the North Saskatchewan from a point just south of the Alexandra.

Fire Destroys Historic Inn

Niagara Falls, Ont.- The old Robin Hood Tavern in Stamford Township, the Niagara District's oldest house of entertainment, has been totally destroyed by fire. Two huge brick fire places at either end of the building are now all that remain of the historic old inn, built 102 years ago.

Propose Central Bank

Ottawa. G. G. Coote, U.F.A., MacLeod, has given notice of a resolution advocating that the "government should consider the advisability of establishing a government central bank of rediscount and note issue in Canada."

WINS PRIZE FOR ESSAY

Prof. Archibald MacMechan of Dalhousie University, Halifax, whose fine essay, "[illegible] Canada," was awarded first prize in a Canadian-wide contest conducted by the Women's Canadian Club, of Toronto.

Would Purchase Alaska

Matter Is Discussed By Members Of B.C. Legislature

Victoria. The resolution of H. F. Kergin, Liberal, Atlin, suggesting that negotiations be opened with the United States for the acquisition by Canada of the Alaska Panhandle, was discussed in the Legislature here. The resolution requests the Dominion Government to take up the matter in an effort to arrive at an amicable agreement between the two countries. Debate on the motion was adjourned.

The history of the acquisition of the Alaskan territory by the United States was reviewed, together with the claims of Canada for the territory along the mainland of British Columbia by Mr. Kergin, and by Ian Mackenzie, Liberal, Vancouver.

Mr. Mackenzie said that recently the League of Nations had been responsible for the settling of many boundaries in Europe which differed materially from what they had been, that it was reasonable to suppose the question of the Alaskan Panhandle might be adjusted in the light of recent ideas to equity [illegible] nations.

Canada, he said, could afford in fact, to pay for this stretch of land as much as the United States paid Russia for the whole of Alaska, if this was necessary.

Protest Showing Of Edith Cavell Film

Might Embitter Relations With England Says German Government

Berlin. The German government is making protests against the showing of a motion picture built on the career and execution of the English nurse, Edith Cavell. The foreign office has issued this statement:

"The German ambassador at London and the German minister at Brussels are making all efforts to prevent the 'Nurse Cavell' film being shown to the public, their standpoint being such a film can only revive painful memories and embitter relations between the countries."

It was remarked that the film version of Edith Cavell's execution differs from the German official account. The official account contains nothing about a German officer having shot her to death with his revolver or about a German soldier in the firing squad having refused to obey the order to fire.

To Face Turkish Court

Brussa, Turkey.— Miss Edith Sanderson, of Berkeley, Cal., teacher in the school here which closed recently on complaints by the authorities that it had broken Turkish law by converting students, will be tried in a Turkish court February 13, on a charge of breaking the law forbidding religious propaganda. It is generally expected that Miss Sanderson will be fined and directed to leave the country.

Discontinue Secret Service

Victoria. The secret service system operated by the liquor board has been discontinued, the public accounts committee of the legislature was told by Attorney-General Manson.

WESTERN DAIRY CONVENTION IS A BIG SUCCESS

Regina. Reaching a high mark in attendance, the Western Canada Dairy Convention, proved one of the most successful and profitable gatherings held in the west for some time. [illegible]

MAIN ESTIMATES ARE TABLED IN OTTAWA HOUSE

Ottawa. The Minister of Finance tabled main estimates for 1928-29 totaling $[illegible]. This amount exceeds by $7,[illegible] the total provided for the current fiscal year. Increased provision is made for agriculture, immigration, great war pensions, national defence, public works, national revenue, post office, etc.

Interest on public debt is estimated at $12[illegible], a decrease of $3,[illegible] as compared with the amount required for 1927-28. Redemption from surplus revenues of maturing bonded debt amounting to $[illegible] and refunding at lower interest rates of additional debt has reduced the requirements for interest.

Other increases are:

Legislation, $28,563.

Superannuation, $96,100.

Railways and canals, income $217,897.

Ocean and river service, $[illegible].

Lighthouse and coast service, $128,[illegible].

Mines and geological survey, $[illegible].

Public printing and stationery, $170,000.

Soldier and settlers, $[illegible].

Soldiers' civil re-establishment, $107,[illegible].

Railways and canals, collection of revenue, $[illegible].

Miscellaneous items, $1,516,497.

Civil government salaries and contingencies is estimated at $12,[illegible], an increase of $251,094.

The sum of $7,247,500 is provided for agriculture, an increase of $614,[illegible], as caused by larger requirements for dairying, fruit, seed, feed and fertilizer control, livestock, experimental farms, health of animals, administration of destructive insect and pest act, etc.

Provision for immigration and colonization services totals $3,263,000, an increase of $[illegible], principally to cover larger expenditure in connection with the Empire settlement scheme.

Provision for pensions totals $[illegible], an increase of $[illegible] [illegible]

Earthquake Shock At Coast

[illegible]

KELLOGG HAS A KIND MESSAGE FOR CANADIANS

Ottawa. "With no imperial designs, with no wish for the territory of any other country, with a common history, common hopes and aspirations, we have in the past and we will in the future adjust our difficulties by peaceful means. If we have mutual acquaintance with each other's institutions, respect for each other's rights, tolerance and patience, there is no question which cannot and will not be adjusted between us."

In these words Hon. Frank B. Kellogg, Secretary of State for the United States, expressed to the Canadian people the feeling of Americans towards this and other countries in a banquet here, tendered in his honor by the Prime Minister of Canada, Right Hon. W. L. Mackenzie King.

Proposing the toast to Mr. Kellogg, the Prime Minister expressed the appreciation of Canadians at the honor done this country when Hon. Mr. Phillips was selected as first minister to Canada.

"We felt at the time he came," said Mr. Mackenzie King, "knowing his career at Washington and abroad, that we had every reason to extend to him a warm welcome. Now that he has been among us for some months, we feel we can extend to Americans generally the same welcome, due to the representation which Mr. Phillips has given us of the United States."

Replying to the toast, Mr. Kellogg declared President Coolidge had specially commissioned him [illegible] that far exceeded his anticipations." He was pleased to believe this was expressive of Canada's sentiments towards the United States.

"I think an event of surpassing importance to Canada, to the whole British Empire, and to the United States has occurred during my term of office as Secretary of State," said Mr. Kellogg, "the appointment of the first minister from the Dominion of Canada to the United States, and the appointment of the first United States minister to Canada. I feel this was a notable step between the British Empire and the United States, another link formed in our international relations making for more intimate acquaintance and facilitating the adjustment of the many questions arising between Canada and the United States."

Mr. Kellogg touched upon the gift of Canada to the American people of the memorial in Arlington cemetery, commemorating the sacrifice of the American-born soldiers who served and gave their lives in the Canadian armies.

"There is in each country a strong nationalistic feeling," said Mr. Kellogg, "you on your part of loyalty to your country and to your great Empire, we to our country. We are rivals in all those accomplishments which make great nations in economic, scientific and educational developments; but it is rivalry without bitterness, a rivalry which tends to enhance the development of both countries. You have not grown, and developed less because the United States has grown and developed with you. Rather, our efforts have supplemented each other."

Mr. Kellogg made reference to the long peace between Canada and the United States and declared that with tolerance and patience there was no question which could not and [illegible]

DIPTHERIA ANTI-TOXIN

Article from Canadian Social Hygiene Council

(Continued from last week.)

All these details of the way in which medical science got at the real facts of diphtheria and the astonishing method by means of which an effective method of treating it, was found, are given here for particular reason.

There has been a considerable amount of misinformation concerning the disease and some of it has been broadcast, generally. Articles have even appeared here and there, written glibly and with the appearance of being accurate, in which hot water bottles, blankets and restricted diet are given as an infallible cure for curing the disease, even among bad cases.

Knowing the exact nature of the scourge which the doctor is fighting when he is confronted with a case of diphtheria, these doctrines are more than fantastic and foolish. They are highly dangerous.

A typical one which has reached the Dominion was shown in an outstanding Canadian medical magazine.

"What would happen if someone tried to treat a child critically ill with diphtheria, according to the methods described here?", he was asked.

It would be extremely dangerous and cause death in quite a percentage of cases.

But the great thing to remember in connection with diphtheria is that in recent years medical science has made another enormous stride forward. It is not necessary today for a child even to run the danger of contracting diphtheria.

By injections of "toxoid"—which is a chemically pure substance and incidentally, not a serum—a child can be protected quite harmlessly and made immune to attacks from the disease.

Toxoid can be given to infants without the least irritation resulting and, in fact, should be administered before a child is one year of age to provide the most complete protection.

There are parents, however, who while admitting the effectiveness of toxoid, point out that the total number of cases of diphtheria is not great and, through carelessness neglect this safety precaution.

It is true that the total number of cases is not great but the total percentages of serious cases among those who do fall victims, is very high. Diphtheria is a disease with which one cannot trifle.

It must be admitted that diphtheria epidemics as a rule run into scores of cases like epidemics from other diseases, and that the disease is a particularly calculative one. It seems to strike here and there first one place and then another without any well defined reasons.

But the presence of the diphtheria carrier is a tremendous argument in favor of the necessity of immunizing children with toxoid.

The number of children who have diphtheria germs in the nose and throat is many times as great as the number who actually develop the disease in them. Their presence is quite unknown and so commonly is this condition that it has been estimated that, in large city schools, from one fourth to one third of the children harbor virulent diphtheria germs during the course of a single year. This number lasts, on the average, not more than two weeks.

But these "diphtheria carriers", while the condition lasts may pass on the disease to their playmates and companions with whom they are having any idea of how the disease was spread.

It is this fact which makes the use of toxoid so necessary, even if the child considers himself in the wrestling fields to improve one with its immunes.

It is almost a matter of months and little more since the Canadian public began to realize the importance of the use of toxoid and to realize that universal use of it would completely wipe out the old time terror of the household.

Now, we have the spectacle of whole classes of children being protected and groups of doctors and nurses in large cities and surrounding hundreds of children against the disease.

The efficacy of the measure soon becomes apparent. Five years ago, toxoid was given to thousands of New York school children. By last year, that city's death rate from the disease had been reduced by 43 per cent and 450 young lives are thereby being saved annually as a result.

Half a million New York children are now been protected and, in addition to the saving of lives, the total sum down 24 per cent.

Statistics gathered from 70 American cities are also available and highly interesting. The town places where the diphtheria death rate was lowest—New Haven, Conn., and Youngstown, Ohio, where, in each case, the rate was 0.6 per 100,000 of population—are both cities of small natural bulk

Christie's

Ask any mother what Arrowroot Biscuits she prefers to give her children. The answer will be—CHRISTIE'S ARROWROOT BISCUITS. They're good for "grown-ups", too.

ARROWROOT BISCUITS

New Angle On Annexation

English Author Has Idea That Canada Will Annex United States

Chiefly ... astonishment that Canadians laughed at him when he predicted the time would come when Canada would walk southward and annex the United States, Morley Roberts, English traveller and author, holds fast to his view in his book "On the Old Trail." His thesis is that a hardy north nation will some day grow so strong in the regions south of Hudson Bay that economic pressure will force it to expand southward.

As a variation of an old theme Mr. Robert's prophecy is amusing and refreshing. Heretofore most of the annexationist talk has run in the other direction, where it has done unnecessary harm. What Mr. Roberts says on the subject is about as sensible as what any other prophet of annexation has ever said.

After all the proposal that Canada should annex the United States is about as reasonable as the proposal that the United States should annex Canada, the one has about as much chance of taking place as the other.

If our Canadian friends laughed at the Englishman's suggestion we of the States can afford to smile with them. The realm of international politics has too little humor, as it is, and such a priceless opportunity for merriment ought not to be lost. Annexation is a ware ... which has sometimes been taken too seriously. It is good to have it dragged out and revealed for the ridiculous thing it is.

Aged Woman Had Queer Mania

House Was Packed With Furniture From Auction Sales

Miss Baldwin, a mystery woman of 81 years of age who recently died at Richmond, England, lived alone in the same house for 52 years. Had a mania for buying furniture yet left no space in which to erect a bed and had too bats. All the rooms were found packed with furniture and household goods most of which she obtained at auction sales which she frequently attended.

"Miss Baldwin would change her hat several times a day," said a neighbor. Although she had many bedsteads she never slept in bed because there was no room to erect one. She never appeared short of money, but where it came from was a mystery."

Canadian Wool Production

Production In Canada For 1927 Totalled 18,872,706 Pounds

Production of wool in Canada in 1927 totalled 18,872,706 pounds, an increase of 662,870 pounds over the 1926 production. By provinces the wool clip last year was: Prince Edward Island, 513,852 pounds; Nova Scotia, 1,480,641 pounds; New Brunswick, 873,721 pounds; Quebec, 4,956,418 pounds; Ontario, 5,826,031 pounds; Manitoba, 765,600 pounds; Saskatchewan, 987,456 pounds; Alberta, 3,083,181 pounds; British Columbia, 717,892 pounds; and Indian Reserves, 17,410 pounds.

It took a postal card, mailed by Pauline Frier, 20 years to reach the addressee, Helen Sharp, although the card travelled only 40 miles. Miss Frier mailed the card in Benton, Ill., to Miss Sharp in McLeansboro on February 7, 1908.

Rough Sea Captain: "I'll have you know I'm skipper on this ship!"

Recruit: "Sorry, I haven't a rope with me, old kid, but how about a game of Ring around the rosy?"

HERCULES PERMANENT BUILDING PAPER

Smooth the Bumps on the Sales Road

Regardless of price, if quality is in the merchandise, it is half sold.

Hercules Permanent Building Paper is tested and proven wind proof—absolutely. Hercules not only aids in selling but brings repeats. Hercules also has the quality of toughness which, making it easy to use without fear of tearing or cracking, appeals strongly to the user.

Hercules—in three grades, x, xx, xxx—will smooth your building paper sales road. Samples sent on request.

Predicts Civilization Of North

Stefansson Foresees Thriving Industries In Arctic Circle

An Arctic civilization with commerce and industry thriving in the frozen northlands was pictured by Vilhjalmur Stefansson, explorer, author and lecturer, in an address before Chicago business leaders of the Executive Club.

The march of progress has ever been north-ward, the explorer said. At present, Stefansson said, the expansion of civilization must be on northward into upper Canada and Alaska. Winnipeg, he said, already handles more wheat than Chicago, Duluth and the Twin Cities combined, and western Canada had only started to grow.

Among the resources of the Arctic circle he mentioned oil, as yet undeveloped, but present in abundance, and gold, with vast acres of grazing land. The winter in the Arctic circle is only one month longer than at Winnipeg and all the activities of Winnipeg are possible there.

He pictured the cross-roads of the world in the great northern icelands, with the shortest routes from Chicago, London and New York to the Orient by airplanes over the north pole.

Made King Albert Explain

Belgian King Suspected Of Being Motorcycle Thief

King Albert of Belgium lives at Laeken, the fashionable suburb of "Little Paris," as Brussels is called. He does not always drive in one of the State limousines but frequently uses a motorcycle to go to his office in the morning like many of his subjects. One morning the Brussels police were keeping a sharp lookout, an epidemic of motorcycle thefts had been reported the previous night. King Albert came on chug-chugging to the toll gate that separates Brussels from Laeken. The officials stopped him. "Your license, please." The King had to admit that he did not have any. Upon this grave and suspicious declaration he was asked to come inside the toll house and explain matters. In the course of the questioning the King was asked for his identity papers. He did not have them either but he had a letter addressed to him personally, would that do, he asked. The official told him to show the letter. When he read the address the shells fell off his eyes and he started to shake and tremble all over. Needless to say, the King was allowed to proceed on his way.

Manitoba Department Of Mines

Premier John Bracken Will Be the Minister In Charge

Manitoba is to have a department of mines and natural resources of which Premier John Bracken will be the minister in charge and Prof. R. C. Wallace, of the Manitoba University, will be the commissioner.

The new department will look after grants to mining institutes, assistance in assaying for prospectors, prospectors short courses, mineral exhibits, publications and industrial development, as well as power site exploratory work and natural resources.

Creation of the department was announced by Premier Bracken in the Legislature. That the Premier may be able to devote sufficient time to the new work, he will relinquish the position of minister of telephones and this probably will be taken over by Hon. W. R. Clubb, minister of public works as an additional office.

Editor: I've fired that printer.
Assistant Editor: Why?
Editor: He put "Applesauce" after Senator Hoople's speech instead of "Applause."

To keep books on shelves or in cases in good condition, sprinkle them occasionally with powdered camphor.

WORLD HAPPENINGS BRIEFLY TOLD

It is expected that the two Canadian destroyers, Champlain and Vancouver, will leave England for Canada on March 20.

Finding it impossible to obtain the cash from a safe in a general store at East Selkirk thieves took the safe and the $1000 it contained along with them.

A government bill is to be brought down to amend the Dominion notes act as to provide for the establishment of additional branch offices of the department of finance for the redemption of Dominion notes.

The city of Warsaw, wishing to obtain a new loan from either British or American financiers, has decided to open negotiations for the repayment or conversion of outstanding foreign pre-war loans.

British Columbia's fight to secure equalized freight rates cost the province $160,000, according to a statement by Hon. A. M. Manson, Attorney-General, before the public accounts committee of the Legislature.

Group Captain J. S. Scott, M.C., A.F.C., director Royal Canadian Air Force, is resigning his post to enter civil life. It is said that the former director is to enter a financial company in Ottawa.

A gain of almost $100,000,000 in exports to Canada was one of the most striking showings made by United States Commerce Department statistics on the foreign trade of 1927.

Across Canada Flight

Royal Air Force Pilot Will Attempt Non-Stop Flight From Vancouver To Halifax

After blazing a lone 7,000-mile air trail from England to India, the first ever accomplished solo in a light aeroplane, Denis M. Rooke, late Royal Air Force pilot, is now in Canada seeking further adventure, and will shortly attempt to fly the Dominion, from Vancouver to Halifax, in one hop.

Rooke, who is now visiting Montreal, is leaving for New York to test the endurance powers of a new engine which is being installed in a Wa o Ten light aeroplane. He hopes to fly the plane across the continent to San Francisco on a non-stop flight, afterwards flying to Vancouver for a take off on his non-stop flight across the Dominion.

Students Display Ignorance

Four In Arkansas University Did Not Know Who Lindbergh Was

Four freshmen in the University of Arkansas do not know who Charles A. Lindbergh is.

One of them thinks he was the Prime Minister of Sweden during the fifteenth century; one thinks he was a German general in the World War; one thinks he is the leader of the Bolsheviki in Russia; while the fourth understands Lindbergh was the battle line that the Allies had such difficulty in breaking through in 1918.

Two answers were found among papers handed in at a quiz in a freshman history course at Fayetteville recently.

Wilted flowers can be revived by placing them in water containing one-quarter of a grain of aspirin.

The United States issued one cent pieces every year from 1793 to date except 1815 and 1823.

Intense Pains in the Back

This remedy gave great relief

Recommends it to hundreds of people

Wm. Hallis, Birmingham, England, learned of Gin Pills in Montreal, ten years ago. He suffered intense pains in the back caused by deranged kidneys. Gin Pills were recommended to him. He writes:

"I had great relief from kidney trouble after using Gin Pills. I have recommended them to hundreds of people in England and Scotland ...

"A friend of mine, Wm. Osland, of Birmingham, suffered a long time with rheumatism ...

"Thanking you and Gin Pills for the relief given me and scores of others that I recommended them to."

If you have pains in the back, swollen feet or hands, brick dust deposits, constant headaches, failing appetite, suppressed or too frequent urination or feel dizzy, look to your kidneys. Deranged kidneys lead to sciatica, rheumatism, lumbago and other painful maladies. Get a box of Gin Pills at once. 50c at all druggists. National Drug & Chemical Company of Canada, Limited, Toronto, Canada. 123

SUNDAY SCHOOL LESSON

FEBRUARY 19

TWO MIRACLES OF POWER

Golden Text: "Who then is this, that even the wind and the sea obey Him?"

Lesson: Mark 4.35-5.20.

Devotional Reading: Psalm 104: 1-9.

Explanations and Comments

I. The Storm, 4.35-37.—On the day that Jesus spoke many parables (our last lesson), he said at evening to his disciples, "Let us go over unto the other side," for he would escape the multitudes and rest. They took him with them in the boat, even as he was. What an insight into the humanness of Jesus that little phrase even as he was gives us! The day had severely taxed His physical strength, and He was tired out. He needed rest even as do we. The boat had been his pulpit and when his discourse was ended and the disciples set sail from the shore, he sank down in the stern and fell asleep.

"What strikes us here is that he has learned to relax, to use the language of today. No sooner was His work done than He composed Himself to sleep, and as comfortably as possible. He used the cushion as His pillow. Some people break down because they have never learned to relax. Their work done, they cannot rest. Their minds are still busy. If we are to work to the full we must learn to drop the yoke swiftly and to rest with both mind and body. Jesus is an example in this also." R. C. Gillie.

Suddenly there arose a great windstorm and drove the waves into the boat so that it began to fill. There have always been sudden and violent storms on the Sea of Galilee.

Weighing the Earth

By means of some complicated instruments in Washington the earth can be weighed. The long accepted figure for the weight of the earth has been 6,660,000,000,000,000,000,000 tons. Weighed more recently it is discovered that the earth is lighter than had been supposed. It tips the scales at only 6,653,000,000,000,000,000,000 tons. Does that mean anything to you? At least you can rest your mind on it when you have been worrying about our income or other small matters.

Peace River Country

Premier J. E. Brownlee declared here that in the Peace River country there were at least 12,000,000 acres of the finest wheat-growing soil, easily capable of the production of 100,000,000 bushels of wheat a year which is not much less than the production of Alberta last year. This year the Peace River country produced 9,000,000 bushels of wheat from 300,000 acres under cultivation, the yield acre being unusually heavy.

WAS SO NERVOUS and SHORT OF BREATH COULD HARDLY SLEEP

Mrs. Louise Ragin, Golden Lake, Ont., writes:—"For several years I was greatly troubled with my heart. I was so nervous and short of breath I could hardly sleep at night, and if I did sleep for a while I had bad dreams.

"I managed to keep at my work, somehow, until I began to have dizzy spells which got so bad I had to give up. I used many kinds of medicine, but found no help until I got a box of MILBURN'S HEART and NERVE PILLS. After the first box I found a great change, and after two boxes I was as well as I could be.

"I told my mother, who had choking sensations, about them and they helped her greatly."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Famous Takakkaw Falls

The Takakkaw falls in the remarkable Yoho Valley, Yoho National Park, British Columbia, is more than twice as high as Niagara.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic, constipation, diarrhea, or need to aid sound natural sleep.

Just one warning. It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

CHAPTER XIX

One day in August, when the train came in, the conductor ran into the station and shouted to the operator, "Say Ted, there's a war in Europe! What do you know about that?"

Ted took his pipe from his mouth and spat at the red stove. "Quit your kiddin';" he said briefly.

The conductor handed him the paper. "What do you make of that?" he said, as he pointed to the staring headlines. "Maybe you'll believe me when you read that?"

The operator grudgingly admitted that there seemed to be more in it than he had at first believed. "Well, what's it all about?" he asked the conductor; "whose row is it anyway?"

The conductor tried to explain.

"Tain't any of our business, is it, if someone shoots an arch-duke," said the operator. "Isn't it about all some of these arch-dukes is good for? Are they scarce of them?"

He was dusting off his desk with a large handkerchief as he spoke, and that was a sure sign of mental activity.

"It looks bad, Ted," the conductor said, gravely, "there's lots of excitement in town, fellows joining up, bands playing and all. I know some of the boys that are just itching to go, but I assure you it isn't me. Well, so long, Ted, I guess we should worry. It's a long way from Northern Alberta."

Old Sim, the night watchman, took it more seriously than anyone in Eagle Mines. "Wars" he said to Helmi and Mrs. McMann when he came in for his supper that night "is inevitable. That's a big word, Helmi, and means can't be helped. They come ever so often, and kill a lot of people and maim and hurt a lot, make a lot of debt and trouble. Everyone in the war loses on one ... every one blames someone else. No one knows for sure what it is about, but just while it is on no one cares. To these here fightin' men any war is better than no war. Then it gets done when everyone is dead, or lame, or blind, or tired enough to talk sense, and the world tries to pay the debts, builds up the burnt cities, gets the sick fellows well, buys crutches for the one-legged men and glass eyes for the blind and provides for the widows and orphans! And then there's great councils and meetin's to find out who started the darn thing, and maybe they find out it was some stranger that no one ever knew was there at the time."

"The war I was in," Sam continued, "was started by the sinkin' of a big boat called the 'Maine,' and we was told to keep on saying 'Remember the Maine,' if ever we got chicken-hearted or soft toward the enemy, or tired, or homesick, or down in the mouth. That was to be what they called our slogan and we stuck to it pretty well. It shook me up quite a lot the day I lost my leg—my best one it was, too—but ain't that always the way? I didn't do much remembering of the Maine that day. But dash it all! didn't they find out later that it wasn't the Spaniards at all that sunk the ship? There was great explanation and beg-your-pardons and excuses and after-you-sir, but no legs handed back, at least, not as came as far down as the privates. But that's war, Helmi."

"Do men have to go?" asked Helmi, with a sudden whitening of her face. "men like Jack, I mean—good men who don't want to kill?"

Helmi was getting the tables ready for the morning. Old Sim was always the last occupant of the dining-room.

"They do and they don't," replied the old man, cautiously. "The law don't make them, but you just can't stay when everyone is lookin' at you as if you ought to be there. I wasn't fussy about war—there's too much killin' in it for me. If it could be done by arguing I'd like it fine, but this thing o' contradictin' a man by runnin' a spear into him looks coarse and clumsy. Now that young Jack of yours he wouldn't like killin' any better than I would, but I know how he'd feel. They get great meetin's and crowds and play bands, and by Gosh! when the bands played 'Dixie Land' or 'Marchin' through Georgia,' I never cared whether I got killed or not, and Spaniards was just like plum bugs to me—that was just while the band was playin', though I always came to when it stopped."

"It is all wicked bad to me," said Helmi, as she held the dustpan with one hand and swept with the other; "I wish Jack would come home. I am afraid, Sim."

"War is hell on women," said the old man; "but it don't do no good to worry, Helmi."

"But it is far away, Sim—miles and miles of water—all gray and far! Oh, it's a long way! Why should we send our men to fight? We won't, it's the Old Country's fight—not Canada's."

It was a long speech for Helmi to make, and she had to stop her sweeping to do it.

"Anyway, Jack is safe up there on the Nahanna—he will not hear of it until it's over maybe," said Sam.

Helmi looked at him gratefully. "Will you have tea or coffee tonight in shiny bottle?" she said.

Eagle Mines, composed largely of Americans, was not greatly disturbed by the war. The mine boss, although a Canadian, expressed the general view when he said, "Let the people who started this thing finish it. It's not our funeral. We'll keep our heads down and mine coal—that's our business."

The men heartily concurred in this, and when the price of coal went up, and their wages had a corresponding increase, they were not disposed to quarrel with the cause.

"Good old war," said Peter Hamilton, the time-keeper, as he counted out the men's money at the end of October; "Long may she wave."

The first disturbing glimpse that the residents of Eagle Mines had, was the coming of an English homesteader from up the river. He was but slightly known to the people because he came in only twice a year to buy his supplies, and never lingered for a friendly chat like other people, and therefore was not liked by the few people who had seen him. Their diagnosis of his case was that he was just a little off. A man who lives alone, raises dogs, takes pictures, gets no mail, and talks to no one except when it cannot be avoided, has no right to expect that people will consider him a sane person. The residents of Eagle Mines when referring to him at all called him, "the crazy Englishman."

It was a dull gray day in early November that he came to town and drew up in front of Simpson's store. He sprang out of his buckboard and ran into the store excitedly. "The Empire is at war!" he shouted. "Did you know it? A man passing by my place showed me the paper. Did you know it? Why didn't you send me word?"

Jim Simpson wrinkled his nose. "How did I know you cared?" he asked, replacing a prune which had fallen to the floor.

The other man raised his voice almost to a shout. "Cared? Cared? Don't you know what it means? It's my country—your country—it's threatened—everyone cares."

"Well, I don't," said the storekeeper, positively, "she got into this without askin' me, and she kin git out the same way."

The Englishman stood speechless. Could it be that any man living in the Empire on which the sun never sets could utter such words and live? Something of the benumbed amazement which fell on Rip Van Winkle when he returned to find good King George gone, and no one sorry but himself, fell on him. Could it be that—but no, that was impossible. The Empire would endure as long as the sun held its course.

The Englishman had been a resident of the neighborhood for over fifteen years. Long before the opening of the mines he had come and squatted on a piece of land in another fertile valley about eight miles further up the river, going in on foot with all his possessions, a gun on his back and a dog at his heels. Beside the crooked little stream (called English River, in compliment to him) he built a shelter of boughs and began to cultivate a piece of land for his garden with a wooden hoe of his own making. He had told the people at Bannerman, which was the nearest settlement, that any man should be able to wrest a living from the soil if he had a dog for company, an axe, gun and a few seeds.

(To Be Continued.)

PIMPLES BROKE OUT ON FACE

Lasted Nearly a Year. Healed by Cuticura.

"My skin trouble began with pimples breaking out on my face. They gradually grew worse and spread to my body. They were red and itched very much, and when I scratched them it caused more pain. Scratching caused eruptions which disfigured my face. At night I could not sleep on account of the irritation. The trouble lasted nearly a year.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. The sample helped me so I purchased more and in five months I was healed." (Signed) Willie A. Yaremko, 9830-89th Ave., Edmonton, Alta.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample Each Free by Mail. Address Canadian Depot: "Stanhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

Large Financial Outlay

Over Twenty-Nine Millions Spent On Road Improvement Last Year

George W. Yates, Acting Federal Commissioner of Highways, reports that for the year ending March 31, 1927, the mileage completed under the Canada Highways Act was 7,436, with 872 under improvement.

In addition to the work Federally subsidized the nine provinces have carried on extensive programs of highway construction and improvement, with the result that a total of 5,788 miles of road were improved during the season of 1926, at an outlay of $29,545,000, made up of Federal, Provincial and Municipal expenditures. The total amount spent on the improvement and maintenance of Canadian roads during 1926 was approximately $45,500,000.

There were 24,706 miles of highway approved as being eligible to participate in the $20,000,000 Federal highway subsidy. So far of this amount $18,775,604 has been paid over to the provinces.

This year will complete the Federal subsidy. It is unlikely there will be a further Federal grant.

Fox Farming An Established Industry

37,000 Foxes Inspected and Registered By the Department

Referring to fur farming in the report of the Honorable Mr. Motherwell, Minister of Agriculture, he states that silver fox farming is now one of the established industries of the country and bids fair to go on increasing for many years to come. During the year under review there were inspected by officers of the department and tattooed for registration 37,000 foxes, which was a considerable increase over the previous year. Despite this increase, the Minister points out, prices for live foxes held steadily, while pelts in the open market commanded higher prices on the average than in the previous season. Taken as a whole the year is reported to have been a most successful one for the fox breeders who are finding a lively export market in the United States and in several of the European countries.

The pine marten gets its name from its love of conifer trees.

LESSON No. 15

Question: Why is emulsified cod-liver oil so important as an added ration with milk in the diet of children?

Answer: Because when it is mixed with milk it makes milk a more efficient rickets-preventing food and builder of strong bones. Children like it best in the form of

SCOTT'S EMULSION

11 OUT OF 83

Cases ended in death! So a recent Canadian investigation showed. These were not cases of infectious disease—of consumption—of typhoid! They were cases where a person had sustained some slight injury—a cut, a burn, a wire-prick—and where the wound, being thought not serious enough for careful treatment, had been neglected. Blood-poisoning and death resulted.

When you or your children sustain any injury, ensure against infection by applying Zam-Buk. This balm soothes the pain, stops bleeding, and by destroying all germs prevents blood-poisoning, etc. Hence no time need be lost from work or pleasure by those who use Zam-Buk. All dealers, 50c. box.

Zam-Buk

PLANNING TRIP TO VENUS

Long Journey From Earth Is Objective Of Miami Scientist

Jules Verne, wherever he may be at present writing, is invited to sit up and take notice of Professor Robert Condit, of Miami, scientist and chemist who has conceived a scheme so fantastic that the leagues under the sea business becomes commonplace.

Prof. Condit, too, is choosing the other extreme for his adventure and instead of exploring the floor of the sea he is going up. Just how far and high remains to be seen, but he has set a lofty goal—the planet Venus.

Since nobody has ever succeeded in getting himself completely divorced from the earth, Professor Condit is anxious to be the first to do so. He has devised a machine which resembles in some respects a rocket and on its completion the professor will set out for Venus, which he expects to make in approximately one jump.

One unit of the machine, known as the central explosive chamber, a complex and forbidding looking piece of apparatus, is finished.

Hundreds daily are travelling to the Condit laboratory to see it. The public is given to understand that the chamber is the main spring of the machine and its explosive qualities will serve to raise the professor off the earth perhaps permanently. The question arises on how will the professor return if he succeeds in conquering the millions of miles which separate Venus and the earth. This obviously is worrying everybody but the professor.

"Why cross bridges," asked the professor. "I'm not there yet and I may not want to return if I do make it."

There are a good many persons in Miami who believe Prof. Condit may return rather suddenly. Scientists cite the possibility of friction of the air heating the machine and necessarily the professor to a temperature that would melt both.

They say fallen meteors always resemble a round metal ball, the natural result of melted metal driven through the air.

The professor has equipped the machine with polarized magnetic controls which he thinks will successfully guide the machine after he gets beyond the gravitation zone of the earth. He says he will have full control of the rocket or ship as soon as it soars into a meteor stream.

CREAM RICE PUDDING

4 tablespoons rice
1-3 cup sugar
½ teaspoon salt
2½ cups Borden's St. Charles Milk
1½ cups water.
Nutmeg.

Wash the rice thoroughly, then add with the sugar and salt to the milk diluted with water. Pour into a buttered baking dish and add a sprinkling of nutmeg. Set the dish in a pan of hot water and bake three hours in a slow oven (300 degrees F.) stirring several times the first hour to prevent the rice from settling to the bottom. Serve hot or cold.

Manager of Small Town Theatre: What do you do in this show tonight?"

Actor: "I represent Julius Caesar."

Manager: "Say, you can't pull that stuff on us! If he can't come himself we ain't going to stand for him sending any substitute!"

Alice: I am engaged to both Harry and Bob.

Virginia: Which are you going to marry?

Fred!

Minard's Liniment for asthma.

Little Helps For This Week

"He that is slow to anger is better than the mighty; and he that ruleth his spirit than he that taketh a city." Prov. xvi. 32.

If, then, you wish not to be of an angry temper, do not feed the habit; throw nothing on it which will increase it, at first keep quiet, and count the days on which you have not been angry; for the habit at first begins to be weakened, and then is completely destroyed. When you can say "I have not been vexed today, nor the day before, nor yet on any succeeding day during two or three months, but I took care when some exciting things happened," be assured that you are in a good way.—Epictetus.

To rule oneself is in reality the greatest triumph.—Sir John Lubbock.

Let the world be better, brighter,
For your having trod its way,
Let your light be seen afar,
Ere sinks down life's little day.

Scatter seeds of love and kindness
As you tread the heavenward road,
You will find them all again
In the paradise of God.
—Sister Dora
(Dorothy Wyndlow Pattison).

There is nothing so powerful as example. We put others straight by walking straight ourselves.
—Madame Swetchine.

What do we live for if it is not to make life less difficult to each other.—George Eliot.

Freedom From Asthma.—Asthma is one of the most distressing troubles, sudden in its attacks and prolonged in its agonies. Frequently many things are tried, but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Remedy is the one help which can be depended upon. If you have tried other remedies without success do not fail to get at once a package of this uniformly successful preparation.

English Prisons For Sale

Twenty Are On Market But There Are No Buyers

English prisons, fully equipped, complete with gallows and condemned cells, graveyard, warden's house and grounds, are for sale in groups. Since the war the prison population has shown a great decrease.

Although the Home Office has advertised the jails in such alluring fashion as "the large and substantially built prison, with the adjoining detached villa, formerly the Governor's house," offers have been few.

Twenty prisons are now for sale, but most of them are going begging.

One can get a good prison for anything from $25 to $100,000. The prison at Stornoway, in the Hebrides, was sold, everything included, for $25. The Newcastle Prison, however, brought $135,000 and the Carlisle Prison, $40,000.

The County Down Jail at Downpatrick went for $100. Brecon Prison, in the mountains of Wales, with beautiful scenery and all the aspect of a summer resort, received a bid of $4,000 and there was no sale.

The Horrors Of War

The romantic and the poet may still strive desperately to keep up the old glamor which surrounded the business of fighting. But it is not there, and they know it. There is no "shining armor" left in modern war; only mud and blood and a dull kind of office work.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

Jeeves: So you attended the lecture last evening, who talked?

Reeves: The audience, as usual.

The true sable of Siberia is blackish and has a very valuable fur.

Assisted Passages for British Subjects

If you give us their names, your relatives and friends may obtain the low ocean rate of £2, reduced railroad fares, and FREE transportation for children under 17, providing they are placed in farm or domestic employment.

Ask at once for details of the British Nomination Scheme from any of our offices or agents.

Earl Haig Reported To Have Left Sensational Diary Of War To Be Published 1940

The book which the late Field Marshal Earl Haig, is reported to have left, the London Daily Express says, is a diary of the war years which he deposited with the trustees of the British Museum, under seal with directions that it shall remain unopened until 1940.

The paper understands that the diary contains frank revelations and fearless criticisms of war chiefs, statesmen, politicians and others, and is likely to involve sensational disclosures.

GIVE CONFIDENCE TO YOUNG MOTHERS

By Always Keeping Baby's Own Tablets In the Home

A simple and safe remedy for the common ills of babyhood and childhood should be kept in every home where there is either a baby or a young child. Often it is necessary to give the little ones something to break up a cold, allay fever, correct sour stomach and banish the irritability that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the home as a safeguard against the troubles that seize their little ones so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies.

Baby's Own Tablets are a mild but thorough laxative that act without gripping and they are absolutely guaranteed free from opiates or other harmful drugs. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Great Columbia Icefield

The Columbia icefield in the Canadian Rockies covers 150 square miles and is the source of streams flowing to three oceans.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

The Oklahoma editor who inherited a quarter of a million dollars is only another example of what a field the newspaper offers young men.

Minard's Liniment for sick animals.

California, Kentucky, Massachusetts and New Jersey each have one woman representative in Congress.

A 25-cent piece dated 1870 is worth 30 cents.

Sour Stomach

Just a tasteless dose of Phillips Milk of Magnesia in water. That is an alkali, effective yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

GOOSE RAISING ON THE FARM

(Experimental Farm Note)

Goose raising is a very profitable side line for the farmer. Essentials to success in this line of poultry farming are proper selection of breed and breeding stock, and free range with an abundance of succulent green food.

The breeds of geese recommended for the farmer are Toulouse, Embden or African. Experiments conducted at the Experimental Farm, Ottawa, have proven that the Toulouse is the most desirable breed.

Select one male and two or three good strong females in the autumn and confine the small flock in a suitable house during the winter months. Have all other geese removed from the building if you are making up a new mating.

Feed your geese moderately during the winter months on grain of good quality. About half of the food given during the time snow is on the ground should be green food such as clover or alfalfa hay which has been cut green, well cured and stored so as to preserve the leaves. Geese take very kindly to green food and it provides bulk to the ration and assists in keeping the birds from getting over fat during the winter.

A little extra feeding in early March will stimulate egg production. Laying should commence about March 15th providing the spring is beginning to open up. Gather the eggs regularly and keep them in a moderate temperature of about 50 deg.

When the goose becomes broody give her about ten eggs and put the balance under hens. Moisten the eggs daily after the 14th day. The period of incubation is 31 days. During that time feed and water the broody birds regularly. Do not disturb the geese at hatching time.

Leave the young brood for about two days after hatching. Place a green sod near the nest to induce the birds to start feeding of their own accord. Water should also be provided in a shallow pan. Give the goslings moist bread crumbs for the first few feedings and then start with moist mash. Equal parts corn meal, barley meal, bran and shorts make an excellent mixture.

Feed the gosling about five times daily for the first month, then three times daily. Good succulent pasture should always be available if goose raising is to be made profitable.

"What is that a picture of?" asked a small tot.

"That's the Goddess of Liberty," Big Brother replied: "You can always tell her 'cause she's got an ice cream cone in her hand."

"Why are you running a steam roller over that field?" asked the stranger.

"I'm trying to raise mashed potatoes," explained the farmer.

C. HOBSON, Proprietor

LOCAL and PERSONAL

Mr. and Mrs. Tom Robinson and family left last week for Scott, Sask., where they will reside.

Mrs. J. C. Phillips returned on Saturday afternoon after spending a few days in the city.

Mr. Geo. Cookson underwent an operation in Rochester, recently. Jack Cookson left for that point on Wednesday, to visit him.

Mr. and Mrs. J. Francis spent Friday in the city.

Miss M. Carter spent Friday evening in town, being enroute from Camrose to her home at Holden. Miss Carter is on the staff of the Camrose Canadian.

Mr. Al Innes and Mr. Fred McHeffey attended the Grand Lodge meeting of the Independent Order of Oddfellows.

Clifford Lee, who is teaching away, spent Sunday at home.

Mr. and Mrs. T. Jacobs returned home after spending the winter in Vancouver and Washington.

The Mercury was a little over generous in the report of Mrs. J. W. Robinson's winnings at the Edmonton Poultry Show, as published last week. We announced that we were writing from memory, the slip containing a list of the winnings being lost, and erred badly, but on the right side. Mrs. Robinson received 18 awards out of 22 entries, these being as follows:

White Holland Turkeys—1st Young Tom; 1st, 2nd, 4th and 5th for old hens; 4th for old Tom.

Light Bramahs—2nd, 3rd, 4th, 5th, for cockerels; 4th and 5th for hens; and 4th and 5th for pullets.

Pekin Ducks—2nd and 5th for drakes.

Embden Geese—4th and 5th.

Born.—To Mr. and Mrs. W. Parker, on February 12th, at Portland, Ore., a son.

MIXED BONSPIEL STILL GOING STRONG

Keen interest has been sustained right through the mixed bonspiel of the Tofield Curling Club and draws during the past week have narrowed down to the finals in the Grand Challenge. This will be played off by rinks skipped by M. C. Hammond and "Bud" Hannan, respectively. McCauley or Chapman will get 3rd or 4th in this competition, according to who wins the game they must play.

In the Boon Cup competition, Abbott and Beirnes are in the fours and the winner of a Cap Lee—Clutterham game and the winner of a McClurg—Murray game will be in the fours.

The Consolation event is just away to a good start.

Two rinks are away to the Wainright bonspiel, viz:

Will Chapman, skip; J. L. Abbott 3rd; Chas. Hobson 2nd; John Chapman 1st.

Dr. McClurg, skip; J. B. Warner 3rd; Johnstone Ferguson 2nd; W. Bellamy 1st.

Unofficial Flash—Dr. McClurg won a game the first day and Chapman lost two games the first day.

At the Edmonton Bonspiel the McLaughlin rink, consisting of Geo. McLaughlin, skip; J. Lee, Dr. Morrison and A. E. Calvert, came fourth in the Bank of Montreal competition.

—A.B.C.

MUNICIPAL HOSPITAL QUESTION DEBATED

On Saturday afternoon the local staged a debate in the Variety Theatre on the subject of municipals. The actual question was "That a municipal hospital be established in Tofield. The feature of the debate was the excellent showing the negative made of a bad case and the poor showing the affirmative made of a good one. The judges awarded the decision to the negative. Geo. Abernethy and E. Beale were the negative and W. Werton and R. W. Powell were the affirmative. Mr. Carlisle was chairman.

Joe Kallal returned home this week from Victoria, where he has been spending the winter. Mrs. Kallal and Edward are staying on at Victoria for a time and we are glad to announce that Edward is much improved in health, though far from being robust.

HOCKEY

On Monday a general pick-up team from Tofield journeyed to Holden to play for the Dawson cup, a trophy presented some years ago by Mr. Dawson of Wainwright to be played for by teams on this line from Wainright to Tofield.

A game had been arranged by telephone between the managers of the two teams to be held the previous Saturday, but Holden team discarded their date with us because some of their players wanted to go off and play in a tournament. The promoter at Tofield end, after considerable unsuccessful argument refused to deal further with Holden. A new promoter then appeared and fixed a game with Holden on Monday night. The team that played on Monday was not the line-up that would have played on Saturday and were out classed.

The game itself was not brilliant hockey, the ice was rough and the puck hard to control. Holden scored twice in the first period, twice in the second period and twice in the third period. Tofield scored three goals in the third period. One of Tofield's goals was ruled offside. One of Holden's goals was doubtful but was allowed to stand. The score as counted was 6—2 in favor of Holden.

The Tofield players put up a stubborn battle all the way, and deserve praise for the showing they made. If their goals had come in the first period instead of the last half of the third, there might have been a different story to tell.

It is more than likely that another attempt will be made to lift this cup.

CURLING—THE GAME INSIDE

At the club rooms at the rink,
On seats row on row,
Fellows sit and watch the game
While wraiths of smoke they blow.
And if you really want to learn
The fine points of the play,
Don't shout your rocks, just stay inside
And listen to what they say.
So light your pipe and take a seat
Where it is warm and nice,
Where better games are always curled
Than out upon the ice.
For soon you'll hear, "He's narrow sure.
He's coming far too hard;
No, no, don't sweep, let it go—
He's going to get a guard."
"Say! watch that guy, the twist he makes
In his delivery"—
He'll tie himself into a knot
If he should draw the tee,
He's wide, he's slow, oh, let it hog.
He never got the broom;
There's no excuse to miss that shot
He sure had lots of room.
Now what's he playing that shot for?
What can he be about?
He ought to take a running shot
And take the rock right out.
He'll never get it with that ice—,
Well, look at what he struck,
He got it after all, but then
He had a lot of luck.
But when these men are called to play,
These curlers skilled and wise—
They make the very same mistakes
As those they criticize,
They find it takes but little skill
To dissipate advice
And play a scientific game
When they are off the ice.
So as we pass along life's way,
And as we hear men talk,
We're always skilful when we throw
The other fellows rock.
This disposition is not strange
Through life it's much the same,
We're always wisest when we skip
The other fellows game.

HISTORICAL BASIS TO KEN'S WESTERNS

The value of motion pictures as a historical medium is evident in "The Devil's Saddle," the Ken Maynard western photoplay which is coming to the Variety Theatre on on Saturday.

With ever-increasing regularity the movie producer is beginning to regard the historical phase of the pictures an important one, and Charles R. Rogers, producer of the "Devil's Saddle," has injected this factor into his latest production on a wide scale.

Western pictures particularly, he believes, provide appropriate stories to exploit the early history of the West. Heretofore, unfortunately, Mr. Rogers believes, the West has been portrayed so erroneously that he attributes the lack of familiarity of its formation partly to these types of pictures.

LAKESHORE

Mr. J. H. Hazelwood of Coronation spent last Monday to Wednesday visiting at the T. R. Murray home. Mr Hazelwood is an old friend of the Hawley family.

Miss Pratt who is attending normal school at Camrose spent the week end at the home of her uncle, Mr. Jas. Secord.

The whist drive put on by the W. A. on Friday evening was very well attended. Mrs. Elmer Goegtin was the lucky lady and Verlyn Moss the lucky guest, while Miss Pratt and E. Roberge won the consolations.

Miss Mildred Booth came from Camrose on Friday evening to spend the week end with home folks. She was accompanied by her friend Miss Cleora White, who is also a student at Normal school there.

Bert Booth returned on Saturday evening of last week from Montreal, where he has been visiting for several weeks with friends and relatives

Mr. and Mrs. Frank Shope and Roscoe Waddelow were Sunday visitors at the R. C. Phillips home.

U.F.W.A. NOTES

The regular meeting was held on February 11th, at the home of the president as the municipal hall was not available for that day. There were 15 members present and one visitor became a member. Our programme was rather upset for that date as we had expected to have Mrs. Gunn and Mrs. McNaughton with us for that meeting and owing to sudden illness they were unable to be present. However, with her usual equal-to-the occasion manner, Mrs. Ferguson stepped into the breach and continued the demonstration on making tailored pockets, part of which she had given at a previous meeting. This proved to be just as interesting and instructive as the first demonstration and was very much appreciated by the ladies present who responded with a hearty vote of thanks.

The next meeting will be on March 3rd instead of February 25th as scheduled as the programmes, owing to the fact that Mr. Lunan U.F.A. director for this district addresses a meeting in Tofield on the latter date. The meeting on the 3rd will be in the municipal hall at 2:30 p.m. The roll call will be answered with Food to prepare for children who are hatching There will be two papers 1st, Best Periodicals for the farm, Mrs. Dodds; 2nd Scottish Cookery, Mrs. McAllister.

LINDBROOK

A Valentine party was given by the teacher, Miss C. Abbott to her pupils at the Lindbrook School here on the 14th of February. Parents were invited to be present. Each child received and presented a valentine, games were played causing much merriment, particularly the candy and nut scramble. There was also a scene worthy of mention to wit, that of staid fathers scrambling on their hands and knees for candies, etc., this amused all the spectators.

Lindbrook's first novelty dance given by Jas Hooper in the school here last Friday was a huge success. It was exceptionally well attended, in fact the largest crowd yet. The music was of the latest and supplied by Mr. E. Bailey and Mr. Lonnie of Rose Creek. Paper hats of all colors, shapes, designs, both chic, grotesque and humorous were supplied to all; these were the handiwork of Miss C. Abbott who took charge of the novelties, having had previous experience along these lines, and we may add that there was no dearth of whistles, noisemakers, streamers and balloons and all the things appertaining to a novelty dance. Supper was served at 12:00 mid-night and dancing continued till 2 a.m., when the crowd very reluctantly departed. The only drawback was space, and it looks as if Lindbrook had better follow the lead of neighboring districts and build its community hall

Mrs. Ross Richards, Mr. D. Hooper and Mr L. Hooper motored down from Edmonton for the week end, incidentally taking in the dance.

Mr. Plante of Woodlawn finished building a new chicken house for Mr. Henry Sutton last week.

Mr. G. R. Owen, sons Earl and Percy and Albert Sears returned this week.

BARDO

Last Wednesday Mr. and Mrs. Monro Wideman (nee Miss Barbara Stalter) arrived here from Illinois, where they were married in December. On Thursday evening they were given a reception at the home of his sister, sister, Mrs. Willie Bootger. There were about 140 guests present and an elegant supper was served. The newly weds were the recipients of many useful presents. The bride wore her wedding gown of white satin back crepe The groom the conventional blue suit.

On Sunday the bride's grandparents Mr. and Mrs. John L. Stauffer entertained in her honor. The W. Bootger, Lee Roth and J. King families and Mrs. Bender. Mr. and Mrs. Wideman will be at home on the Stalter farm.

Mahlon Bender who has been living on the Stalter farm has moved to the Frank Lewis farm.

Earl Roth returned last week from Nebraska, ALONE.

Mr and Mrs. John L. Stauffer, who spent a couple of weeks in Edmonton taking treatments have returned home improved in health.

Mrs. J. L. Stauffer entertained a quilting party on Wednesday.

The Thimble Club met with Mrs. Emil Rude on Saturday.

The U.F.W.A.'s Valentine social was a decided success both financially and socially.

Mrs. Rude has been going to Camrose frequently of late to have her hand, which has been troubling her, treated.

Mr. and Mrs. Jensen and Miss Hannah have returned from B.C.

KETCHAMOOT

Miss Dora Contoure returned to her home in Edmonton on Thursday, after visiting over a week with her friends the Misses Lawson.

Mrs. O. Barnes was a passenger to Camrose on Monday. Ketchamoot families were well represented at the U.F.A. whist drive on Tuesday night. Among those present were, members of the Lee, Ingram, McGinitie, Carlisle, Barnes and Sears families.
home from the coast on Friday.

The school children observed Valentine days at the school house on Tuesday, a short program was given by the pupils after which valentines were distributed by their teacher, Miss Lawson. Over 20 pupils are enrolled.

Mrs. John McGinitie celebrated her birthday, Valentine day, by attending the whist drive and carrying home a pair of pelicans (though they will not quack) also we understand she set two hens the same day, she seems to be getting an early start in the poultry business.

Misses Mildred Lawson and Dora Contoure visited with Mrs. C. A. Ingram on Wednesday afternoon.

Mr. and Mrs. W. A. Mitchell entertained a large crowd of young people at their home on Friday night to a whist drive. Ten tables were played, and Mrs. John Lee and John Thompson carried away first prizes. Hazel Sears and John Lee the consolation prizes. Refreshments were served by the hostess assisted by Mrs. Wildman and a pleasant time was reported by all.

Mr. and Mrs. L. Carlisle and daughter Lillian, Mrs. B. Wildman and Mr. Frank Hull motored to Camrose on Sunday to visit Mrs. Hull at the hospital.

The Misses Mildred and Gertrude Ingram and Ralph Barnes visited with the formers sister, Mrs. T. D. Ferguson of Lakeshore on Sunday.

Old time friends of the Haugen family will be glad to hear Mrs. Haugen Sr., and Mr. and Mrs. Geo. Qualley returned home from the coast on Thursday Mr. and Mrs. Haugen reside on Lulu island. Mr. and Mrs. Qualley have been away on a two months trip to different points on the coast. Mrs. Haugen will visit with her children for the summer as Mr. Haugen and son Peter are away on a fishing trip

The annual special ratepayers school meeting was held on Friday afternoon at the school house. About 20 ratepayers were present. Mr. Wm. Lee was appointed chairman, and only one candidate was nominated for trustee. Mr. A. McMullen was elected by acclamation. Mr. A. J. Williams was the retiring trustee.

Ottawa Coal Subsidy

Subsidy To Railways For Transporting Alberta Coal Should Come From Dominion Government

Any subsidy to the railways for transporting Alberta coal to Ontario should come from the Dominion Government and not from Ontario, said Premier G. H. Ferguson in the Ontario legislature, in reply to a question of J. G. Lethbridge, Progressive leader.

Mr Lethbridge asked what the attitude of the government was in view of recent suggestions made in the press. Mr Ferguson pointed out that the railways wanted $9 a ton whereas the actual cost as determined by the railway board was $7. The real cost he thought was nearer $6.75. There was a suggestion, said the premier, that if the Dominion Government would contribute a subsidy of $1 a ton, the province of Ontario and Quebec should join in providing another dollar.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale bloodless girls need plenty of nourishment, plenty of sleep and regular out-of-doors exercise; that a lack of appetite and tired aching limbs ... hinder progress. To save the weak thin-blooded sufferer she must have new rich blood, and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply; they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anaemic girls and women into cheerful happy people.

The value of Dr Williams' Pink Pills in the case of anaemic girls is proved by the case of Miss Lucy Mudder, Margaretville, N.S., who says: "From the age of 12 to 16 I was in an anaemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got tonic after tonic for me, but they did me very little good. Then Dr. Williams Pink Pills were recommended and almost from the first they seemed to be just what was needed ..." [illegible]

Widen Income Tax Scope

Speculation Profits On Grain Or Stocks To Be Subject To Tax

Broadening the principle laid down in the case of Alma Morrison versus the Crown, in which the court held that income derived from speculation on the grain exchange was taxable under the Income Tax Act, the income tax department intends to levy tribute upon profits made from speculation, whether on grain or stocks.

This announcement was made by the department and it was further stated that the tax would apply upon profits made in the calendar year 1927. It is expected that some $50,000,000 additional income will be brought under the tax annually, and since much of it runs to high amounts per individual, the increase in the receipts of the government may well approximate $5,000,000 per annum.

Those who speculate only occasionally will not be subject to the levy, but all who make a business of it, notwithstanding the fact that they may be at work daily in other businesses, will be considered taxable.

Prevent Level Crossing Accidents

New Legislation Introduced In Saskatchewan House With This Object In View

Complete accord by all parties in the Saskatchewan Legislature was expressed on the proposed amendments to the Vehicle Act which have to do with autoists bringing their cars to a complete stop at railway level crossings or where stop signals are erected before attempting to make a crossing.

The amendment was introduced by Hon. N. J. Latta, provincial secretary, as an attempt to eliminate level crossing accidents.

The Saskatchewan gasoline tax bill introduced by Hon. N. J. Latta, calls for a tax of three cents on each gallon of gasoline sold and will come into force May 1.

A River That Burns

Stream Of Water In France Was Ignited By Match

A burning river and a buried forest were the unexpected rewards of excavating for springs in the interest of the water supply of Corenc, France. Instead of a spring they discovered a stream of water which bubbled like champagne.

When a match was thrown into the water it caught fire and burned for several hours.

The source of the gas was found by sinking a shaft 100 feet where giant oaks and pines were discovered decomposed, remains of a forest supposed to have been buried hundreds of years ago by a landslide.

Its Quality Sells It. The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficacy. Ever since it was first introduced it has grown steadily in public favor owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds and various inflammatory pains its record is beyond reproach.

CUTICURA Promotes Loveliness Of Skin And Hair

Daily use of the Soap, assisted by the Ointment when required, keeps the skin fresh and clear and the hair healthy and glossy. They are ideal for the toilet, as is also the smooth, cooling, fragrant Cuticura Talcum.

Cuticura Shaving Stick 25c.

HERCULES PERMANENT BUILDING PAPER

What's between Indoors and Outdoors?

The world is divided into two parts, outdoors and indoors. Between the two lies a problem. The answer has a vital effect on those who are indoors.

If wind and dampness can be kept outdoors, naturally indoors will be comfortable and healthful to the occupants.

You can solve this problem with Hercules Permanent Building Paper. In three grades, x, xx, xxx—Hercules is tested and proven damp proof and wind proof. Test it yourself. A line will bring samples. Write us.

Searching For Continent

Australian Explorer and Aviator Has Gone To Arctic

The urge that for centuries had sent men up and down the earth in search of new countries gave impetus to another such mission when Captain George Wilkins, Australian explorer aviator, and Carl B. Eilson, his sourdough pilot, sailed from Seattle recently for Seward, Alaska, from whence they will begin a search for an Arctic continent.

They will go from Seward to Fairbanks by rail. From Fairbanks they will attempt to fly to Point Barrow.

Stop the Cough. Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Communication by telephone has been established between Scotland and Canada. On that line idle gossip will not often interfere with the transaction of business.

When asked if she was interested in a car with a worm drive she declared she never felt safe with her husband at the wheel.

The Leaning Tower of Pisa is 16½ feet out of perpendicular.

U.S. Legation At Ottawa

Residence For Minister From United States To Be Erected

Hon Frank B. Kellogg, United States Secretary of State, after a visit to Ottawa as a guest of the Canadian Government, announced in an interview that it was expected that the United States would erect a residence for the United States minister and an office building for the legation staff in the city section of Ottawa. Arrangements as to location would, he said, be in the hands of the United States Minister to Canada, the Hon Wm. Phillips.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Recipes For This Week

(By Betty Barclay)

LAMB MENAGERE
(Thrifty Housewife's Lamb Ramekins)

½ cup sweetened condensed milk
2 cups cold lamb, minced
1 teaspoon salt (scant)
⅛ teaspoon white pepper
2 tablespoons chopped green peppers
1 tablespoon chopped onions
2 tablespoons hot water
2 tablespoons bread crumbs
1 tablespoon butter

[illegible]

CUSTARD SOUFFLE

3 tablespoons butter
¼ cup flour
¾ cup sugar
1 cup scalded milk
4 eggs
¼ teaspoon salt

Melt butter, add flour, and gradually hot milk. Bring to boiling point and pour on to yolks of eggs beaten until thick and lemon colored, mixed with sugar and salt. Cool. Fold in whites of eggs beaten stiff. Turn into buttered dish, and bake from 30 to 35 minutes in slow oven. Take from oven and serve at once. Serve with hard sauce, whipped or plain cream.

MILBURN'S HEART AND NERVE PILLS

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Minard's Liniment relieves pain.

DEMAND BAYER ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

SUBSTANTIAL CUT MADE IN INCOME AND SALES TAX

Ottawa.—Before packed galleries and an eager attentive House, Hon. J. A. Robb, Minister of Finance, submitted his fifth budget.

Last year Mr Robb had a ten per cent. reduction in all personal income tax rates to announce. Recently he announced another ten per cent. reduction in income tax rates with exemption of $500 to those supporting dependents over 21 years of age incapable of self-support on account of mental or physical infirmity.

He announced a reduction to eight per cent. in the tax on corporations. The present rate is 8.1 per cent.

He announced a reduction of 25 per cent. in the sales tax, bringing the rate down from four to three per cent.

He estimated his tax reductions would amount to $19,000,000.

So far, Mr Robb's taxation changes created little surprise. But in another respect there is comment. Expectation was general that he would announce a reduction both in the excise duty on cigarettes and in the import duty on liquors. But in neither case had Mr Robb any reduction to announce.

Tariff proposals cover a pretty wide field. Cottons, woolens and textiles come under review. There are changes affecting printing and publishing, fruit and horticulture, fishing, road-making, aviation, mechanics' tools, the salt industry. There is a change in regard to the general application of the British preference. At present Canada requires that imports to enter under British preferential rates shall be 25 per cent. Empire labor and materials. Mr Robb proposes to double that percentage.

Reviewing the country's finances, Mr Robb estimated that for the fiscal year ending March 31 next he would have a surplus of $54,815,000. Deducting $10,000,000 written off advances to soldier settlers, Mr Robb estimated his net debt reduction at $38,000,000.

Budget Summary

Some Details Of the Budget Presented By Minister Of Finance

Ottawa.—Here are the high lights of the budget presented to the House of Commons by Hon. J. A. Robb, Minister of Finance:

Tax Reductions.—Income tax, ten per cent. reduction in personal income tax. Tax rate on corporations cut to eight per cent.

Under the new income tax schedules, $500 exemption will be allowed for mentally or physically incapacitated persons over 21 years of age.

Sales tax.—Twenty-five per cent. reduction, i.e., rate cut from 4 to 3.

All tax reductions are effective Feb. 17, and reduction in income tax applicable to taxes payable on income for last year.

Tariff Reductions.—Cottons, material reductions in large range household cottons. Rates lowered on yarns. British preference widened.

Woolens.—Duty reductions on mitts and all but more expensive lines of underwear, socks, stockings. Yarns for weaving free. Preferential duty reduced on woolen goods imported in gray for dying and finishing.

Linen.—British preference rates finer grades reduced. Re-classification linens of flax and jute products.

Textile machinery.—On large part importations British preference duty reduced from 10 to free, intermediate, 10 to 5.

Reductions in duty on press blankets, flake calcium chloride, for road treating, non-alcoholic preparations for disinfecting, etc., crude petroleum for refining free till July 1, 1931; rates on parts for fishing boat engines reduced; nickel chromium for making electric resistance wire free.

Drawbacks.—Eighty per cent. on certain kinds of magazine paper.

Ninety per cent. on bituminous coal for melting or evaporating salt.

Sixty per cent. on material used in manufacture of various tools when at least 50 per cent. of production cost incurred in Canada.

Fifty per cent. on material used in aeroplane engines. After July 1 no drawback unless 40 per cent. of cost of production incurred in Canada.

Present duty on aircraft engines extended until July 1, 1930.

Soldier Settlers' Lands

Re-Valuation Results In Many Reductions Being Granted

Ottawa.—Seven thousand eight hundred and eighty-six soldier settlers have applied for the re-valuation of their lands under the act passed at the last session of Parliament, it was shown in a return tabled in the House of Commons. Of these applications only 16 have been dealt with. These were in Saskatchewan and a reduction of twenty-two and a half per cent. was granted.

The annual report of the soldier land settlement board also tabled shows that since the inception of the scheme $100,000,000 has been loaned to soldier settlers. The outstanding indebtedness of the settlers is $78,000,000. The sum of $18,000,000 has been repaid plus $4,000,000 interest. One thousand and fifty soldier settlers have discharged their debts. Last year during the collection period ended June, 53.4 of the amount due was collected and the board reports that collections have shown a notable improvement.

ALBERTA WILL REFUSE OFFER FOR RAILWAYS

Edmonton.—That the Province of Alberta should receive the replacement value of the Edmonton Dunvegan and British Columbia and Central Canada Railways was the declaration made by Premier Brownlee during his speech which dealt with the railway offers received by the Alberta Government in the Legislature. The Government's reply to the joint offer of the Canadian National and Canadian Pacific Railways would be "We will not accept." The Government is prepared to await another joint offer from the railway companies or separate offers but in the meantime is prepared to go ahead and operate the lines confident that the value of the Alberta railways can be demonstrated and satisfied that the replacement value eventually can be obtained.

"These Alberta railways are not on the auction block and in future we are not going to peddle them from place to place," said the Premier, "and the time is coming rapidly when our railways will be keenly desired by the great transcontinental lines."

The answer of the Government to the Canadian National's offer for the Alberta and Great Waterways Railway would be that this offer is not satisfactory.

Premier Brownlee sounded a rallying cry to the Boards of Trade, newspapers and all organizations in the province desirous of bringing about a successful solution of Alberta's railway problems to stand together and co-operate toward the desired end. He pointed to what Manitoba and Saskatchewan had done by united effort in achieving their goal in regard to the Hudson's Bay line, what British Columbia had done in regard to the P. and G.E. and what the Maritimes had been able to accomplish in Maritime rights, and asserted Alberta could bring about a satisfactory solution to the railway problem if all stood together.

Suggests New Scheme To Secure Settlers

Sir Henry Thornton Advocates Higher Freight Rates To Obtain Funds

Toronto, Ont.—The raising of $20,000,000 annually by increased freight rates on the part of both the Canadian National Railway and the Canadian Pacific Railway, to be administered solely in the prosecution of a vigorous immigration policy was a scheme which Sir Henry Thornton, chairman of the Canadian National Railways, outlined during a speech at a dinner of St. Andrew's Masonic Lodge here. Sir Henry stated that if freight rates were increased on an average of five per cent. it would yield to both the C.N.R. and the C.P.R. an additional $20,000,000 each year. "If both railways joined hands in raising that fund for the encouragement of immigration," he declared, "we would make infinitely more progress in the future than in the past."

The speaker stated that there were 300,000 experienced farmers who would come to Canada, if they had partly prepared farms waiting them.

"We can bring those 300,000 experienced farmers here and other hundreds of thousands of boys and men from the motherland," he declared. "That represents the kind of thing on which we ought to spend our money."

Co-Operation Urged In Weed Control

Federal and Provincial Departments Should Work Together On Government Lands

Ottawa, Ont.—During the discussion of a vote in the House of Commons of $375,000 for seed, feed and fertilizer control, G. G. Coote, U.F.A., Macleod, informed the Minister of Agriculture that in Western Canada there was quite a problem resulting from the growth of weeds on Government lands. He suggested that the minister might spend a little of the money of the appropriation in eliminating these noxious weeds from government property. The farmers themselves could not go on the Dominion lands in order to do this work.

Hon. R. B. Bennett, Opposition leader, said that Mr Coote had raised a very important point. He urged the Department of Agriculture to endeavor to co-operate with the Provinces in such matters. The minister said that the question of overlapping the administration of such departments with provincial affairs was being eliminated. The minister told of the efforts being made to combat the weed problem. The vote then carried.

Will Represent Canada

Lieut.-Col. Vanier On Advisory Committee Of League

Geneva.—The League of Nations has been officially informed by the Ottawa Government that Lieut.-Col. G. P. Vanier will represent Canada on the permanent advisory committee of the League of Nations for military, naval, and air questions.

As a member of the council, Canada has the right to this representation of a committee which doubtless will play an important role in the forthcoming disarmament negotiations here.

Says Flights Not Hazardous

St. Louis, Mo.—Informed of the intention of Secretary of War Davis, to request him to stop all stunt flying, Colonel Charles A. Lindbergh replied he was perfectly willing to sacrifice his life if he should happen to be killed in the work he is doing. "I don't consider what I am doing hazardous flying in the sense that I have taken unnecessary risks," he said.

Seeking Altitude Record

British Plane Would Have To Ascend Eight Miles

London.—The Air Ministry soon will make an attempt to gain for Britain the air altitude record. A secret plane which was built for the attempt has been removed from Bristol, where the effort originally was to be made, to South Farnborough.

Air Service pilots will be at the controls. It is understood that an exceptionally small Bristol biplane will be used. To beat the present record it will be necessary for the plane to ascend about eight miles.

Woman Pastors Favored

Ottawa.—Approval of the general principle governing the ordination of women into the ministry was given by the Ottawa Presbytery of the United Church of Canada in session here. The Presbytery, however, decided that at the present time it was not expedient to introduce the matter for adoption by the general council.

For the purpose of developing foreign markets for Indian goods, the Indian government is sending a trade commissioner to many ports of the world.

Would Encourage Folk Songs

Mlle. Juliette Gaultier, descendant of a famous coureur du bois, says her Indian blood has made her sacrifice a successful career in grand opera for the mission of making Canada's native folk songs famous. She is a master of many Indian dialects and can sing in the Eskimo tongue.

Brings Canada Big Revenue

Dominion Exporting Annually Rubber Products Valued At Thirty Millions

Montreal.—Today Canada had become the fourth rubber manufacturing country of the world and was now exporting rubber products to the value of $30,000,000 annually, though the raw product came from countries to which the Dominion was exporting the manufactured commodity, declared Hon. James Malcolm, minister of trade and commerce, in an address at the annual banquet of the Canadian Rubber Association here.

"The development of the rubber industry in Canada," the speaker continued, "is probably the best available illustration of the fact that where there is a need in a country for a commodity and therefore an extensive potential market, there the manufacture of that product will develop, though it is necessary to transport the raw materials from the four corners of the globe."

Heir To Asquith Title

London.—Earl of Oxford and Asquith's heir is 11-year-old Julian, Viscount Asquith, son of the former prime minister's eldest son, Raymond Asquith, who was killed in action while serving with the Grenadier Guards in the Great War.

Inquires About Russian Break

Ottawa.—Copies of all correspondence and other documents pertaining to the break of relations between Canada and Soviet Russia are requested in a motion placed on the order paper of the House by A. A. Heaps, Labor, Winnipeg North.

Motor Cars Purchased

Ottawa.—Four hundred and sixty-one motor cars have been purchased by the Federal Government for its various departments since January 1, 1926, according to a return tabled in the House of Commons.

Moose Plentiful in Ontario

It is not an easy thing to shoot a moose but there are plenty of them in the Big Pogamasing district of Ontario which can be reached comfortably over the lines of the Canadian Pacific Railway. Bob Becker, sporting editor of the Chicago Tribune, visited that district during the present winter and was successful in accounting for a magnificent specimen of a bull moose.

"How these big boys are traveling," said the guide to Bob Becker the morning after he had arrived in the district. "Papa moose and all the family are looking for winter quarters in the heavy snow and low temperatures are warning signals that fall has gone and winter is here." At that time Bob Becker and his guide were in a snug log cabin on the shore of Big Pog Lake, Metagama. Suddenly there was a rustle near by and a big bull moose hove in sight. Bob Becker's .30 rifle spoke and down went Mr Moose for one of those long counts which usually follow a knockout by a 180 grain bullet, so there was moose meat in the frying pan and all was set for a celebration that night ... all the quiet in camp that night.

Canadian Farmers In Edinburgh

Visitors From Canada Honored At a Dinner At Which Lord Elgin Was Present

Edinburgh.—Canadian farmers now touring Scotland were honored in a unique fashion at a dinner in Edinburgh at which Canadian National Railway officials were hosts, when a Scottish earl, grandson of a former Governor-General of Canada, sang a famous Scotch ditty to the immense delight of the Canadians. The earl was Lord Elgin, whose illustrious grandsire was stoned by the populace in an historic event in Montreal, and the present earl, recalling the incident caused great amusement by declaring that among the prized treasures at Broomhall were two pieces of granite which had been thrown at the Governor-General.

At the conclusion of the earl's speech and song the Canadians gave him three rousing cheers. The dinner was the occasion for gathering together some of the most brilliant of Scottish agriculturists. W. A. Wilson, agricultural representative for Canada in Britain, was chairman and besides Lord Elgin there were present: Sir Robert Craig, president of the Scottish Board of Agriculture and known as "the friend of Canada"; Dr. Crew, director of animal breeding research department, Edinburgh University; Archibald Macneilage, secretary of the Clydesdale Horse Society; John Stirton, secretary to the Highland Society; C. Weatherall, secretary Scottish Board of Agriculture; Professor Robert Wallace, Professor Ernest Shearer, dean of the Faculty of Agriculture, Edinburgh University; Robert Park, owner of the famous Clyde ... ; John Geddie, Edinburgh historian; Dr. Savage, formerly of Winnipeg.

Massey-Harris Buys U.S. Plant

Racine, Wis.—The J. I. Case Plow Works, one of Racine's pioneer industries, and which since its inception in 1876 has developed into a million-dollar concern, was sold to the Massey-Harris Company Ltd., Toronto, it was announced at the Case Company offices. No announcement of the consideration was given.

URGE PLAN TO CONVERT COAL INTO CRUDE OIL

Ottawa.—The House of Commons called upon the Government to consider the conversion of Canadian lignite and bituminous coal into crude oil. A motion of F. E. Kaiser (Conservative, Ontario) advocating steps with this in view was approved after brief debate.

Dr. Kaiser in presenting the motion urged the Government to have coal from Canada sent to Birmingham, England, and there tested as to its adaptability to the processes being used to convert coal into oil. He also wanted young Canadians to be sent abroad to study the latest developments in this work.

Speaking of scientific effort, Dr. Kaiser suggested that at the gateway of the Prairies—Winnipeg—a monument should be erected to Dr. Saunders for his work in wheat to show the world that there were victories of peace greater than conquest of war.

He believed Canada was on the verge of a solution for the fuel problem by the conversion of lignite and bituminous coal.

A. W. Neill (Independent, Comox-Alberni) said many things could be done in industry but not always economically. He criticized the mandatory character of the resolution as it would involve the government in very extensive expenditures.

Hon. Charles Stewart, Minister of the Interior, declared he had had the privilege of making an investigation and study of the whole subject matter of the resolution while in Europe last summer. In one plant alone over 1,200 chemists were busily engaged at the time of his visit. There were great possibilities in at least three or four experiments now under way in Europe. It was his desire, said Mr Stewart, to learn what actually could be done in the way of experiments and what could be done in a commercial way.

He would be pleased to have an appropriation provided in the estimates which would be used for the purpose of sending students abroad to make a scientific study of the treatment of coal.

"I want to see every avenue of research explored," commented Mr Stewart, "but believe we should exercise some care that we do not have any overlapping."

TO INVESTIGATE NEW SYSTEM OF WHEAT GRADING

Ottawa.—The National Research Council, working in conjunction with the Board of Grain Commissioners, will be asked to investigate the feasibility of using protein content as a basis for grading wheat.

A motion by John Millar (Liberal Progressive, Qu'Appelle), asking for ... in the method of grading grain ... amended by C. P. Bothwell (Liberal, Swift Current) ... referred ... to the agricultural committee of the House. Mr ... offered the amendment asking ... investigation ... be ...

C. E. Bothwell (Liberal, Swift Current) pointed to the many difficulties ... the way of establishing a system of grading based on protein ... recommended in the resolution ... then moved his amendment.

Hon. W. R. Motherwell, Minister of Agriculture, supported the amendment. He pointed out that ... during the last 40 years ... for grain had resulted in ... for a change in the system ... It was undesirable that the number of grades be increased to any great extent and the matter should receive careful consideration from government experts who could be called before the agricultural committee.

John Vallance (Liberal, South Battleford), in seconding the amendment, said he would have preferred consideration of the problem be delayed until a report had been received from the agricultural committee.

E. J. Young (Liberal, Weyburn), supported the amendment.

John Evans (Progressive, Rosetown) doubted if the resolution was practicable or if it would be of benefit to the wheat grower. He was not opposed to the resolution, however, and would be glad to have the whole matter discussed in committee.

Passing Of a Great Statesman

Great Britain Mourns the Death Of Earl Of Oxford

Sutton Courtenay, Eng.—While eminent men and the press of Great Britain praised the Earl of Oxford's life of service and mourned his death, the body of the aged statesman, who died at his home here, was carried to the parish church of Sutton Courtenay.

Praise of the Earl of Oxford and Asquith as a great parliamentarian, a forceful ... debater and an unselfish servant of the nation's welfare is contained in thousands of messages of condolence published and received by his widow. All recall his activities in the early days of the war when as Prime Minister he breathed the British spirit of confident courage.

Many proudly remember his declaration in the face of Germany's seemingly irresistible advance when he said:

"We shall never sheath the sword which we have not lightly drawn until Belgium recovers in full measure all and more than all she has sacrificed, until France is adequately secured against the menace of aggression, until the rights of the smaller nations of Europe are placed upon an unassailable foundation, and until the military domination of Prussia is wholly and finally destroyed."

Victoria.—A. ... (Conservative member for North Okanagan) has filed a resolution in the House to request the Federal Government to allow no more Orientals to enter the Dominion.

Here and There

A[illegible] of [illegible] Canadian agricultural [illegible] lands in the Prairie Provinces which in 1927 were the [illegible] recorded. In all [illegible] acres were disposed of for a total of [illegible] representing an average of $[illegible] per acre. The lowest price obtained was $7 per acre and the highest $79.

Appointment was announced recently of R. F. Angus to be assistant superintendent of the C.P.R. Montreal Terminals. Mr. Angus, who joined the Canadian Pacific Railway as a clerk in [illegible], is the grandson of R. B. Angus, one of the creators of the system, and nephew of Sir Vincent Meredith, chairman of the Bank of Montreal.

Ten-year-old John Wylie Barbour traveled recently alone from his aunt in Los Angeles to his father in Glasgow, a distance of about seven thousand miles, in care of C.P.R. train and [illegible] officials from Chicago on. John thought the climate here was [illegible] different to California and [illegible] overcoat he had left it packed in his trunk, but he changed his mind at Montreal where he struck [illegible] weather. He arrived safe [illegible] and will come back in the [illegible].

A paradise for the [illegible] camper will be ready [illegible] when the government [illegible] camp ground in the [illegible] Mountains Park within half a mile of Banff, on Tunnel Mountain. [illegible] which on its [illegible] accommodated 11,531 persons [illegible] popular among prairie farmers between seeding time and harvest. Charge is only a dollar for a party for three weeks, and running water, garbage removal, dinner [illegible], electric light and even pay telephones are provided for campers.

Around ten thousand snowshoers and their friends [illegible] Montreal on the occasion of the 20th anniversary of the founding of the Canadian Snowshoers' Association to be held in Montreal, February 4-6. The convention [illegible] international in scope [illegible] takes [illegible] the American Snowshoers' Association with over 1,500 members in the states of New Hampshire and Massachusetts, while there are also representatives from the Manitoba Snowshoers' Association and [illegible] from all over the province of Quebec.

Making his [illegible] visit to Canada in [illegible] years, Seymour Hicks, [illegible] British actor, with his wife, the [illegible] English stage favorite, Ellaline Terriss, and their daughter Betty with a company of 2[illegible] arrives at Halifax this month, [illegible] a week there and three [illegible] at Saint John as the opening [illegible] of a four months tour that will embrace the whole Dominion to Victoria and back. Mr. H. [illegible] traveled C.P.R. and will [illegible] May 5.

Here and There

Winnipeg.—The British boy immigration scheme has been adopted by the Manitoba Provincial Government, and about fifty lads [illegible] be brought here this year [illegible] settlement on farms [illegible]. A Preference [illegible] Minister [illegible] migration announced. First [illegible] will be placed at the Manitoba Agriculture College for preliminary training in farm work.

Calgary.—Two commercial airplane transport projects are being developed in Calgary. [illegible] for the use of [illegible] passenger [illegible] traffic between [illegible] and Edmonton, the other carrying [illegible] each one two or three passengers, for Calgary-Edmonton and [illegible] flight purposes.

All the way from [illegible] to Glasgow, Scotland, [illegible] a distance of approximately [illegible] [illegible] James Campbell [illegible] He [illegible] the C.P.R. [illegible] the [illegible] where he embarked on the [illegible] bound for Glasgow. He [illegible] his aunt [illegible] Glasgow.

A[illegible] records in connection with the westbound movement of grain [illegible] Vancouver [illegible] Railway [illegible] were broken during the first two weeks in January according to E. Cotterell, superintendent of transportation, western lines of the company. Deliveries at Vancouver by the Canadian Pacific during the fortnight in question totaled approximately 22,[illegible] bushels of grain.

Calgary.—Farm land values in southern Alberta are tending [illegible] be [illegible] [illegible] for [illegible] at $15 per acre and bringing [illegible] of fers are coming now for from $20 to $25 per acre. The demand for farms both for purchase and rental is decidedly strong.

In recognition of the fine work by officials of the Canadian Pacific Railway and the Canadian National during the last summer [illegible] of the [illegible] Empire Mining and Metallurgical Congress, presentations of gold and enamel cuff links were made recently to fifty employees of both companies at a dinner held in Montreal. E. W. Beatty, president of the C.P.R., and Sir Henry Thornton of the C.N.R. were both present.

Snowshoe week in Quebec got away to a good start when several thousand members of the Raquette Clubs paraded the streets of the old city and later some 1,200 snowshoers in full winter festival costume made an attack on the walls defended by the garrison and [illegible] minated by a brilliant firework display. The chief center of interest there is the International Dog Derby which is to be staged shortly and for this [illegible] from the entire Dominion and the United States are flocking to Quebec, taxing the Chateau Frontenac to its full capacity. Amery Travels 55,000 Miles

Upper left—Mrs. Amery after an inspection of the C.P.R. engine. Upper right—Disproving the belief that mountain air is colder than cities. Lower right—Right Hon. L. C. M. S. Amery driving the engine which carried him across the Dominion.

Fifty-five thousand odd miles in twenty-two days! That will be the record of Lieut.-Colonel the Right Honorable L. C. M. S. Amery, M.P., Secretary of State for the Dominions when he returns to England after his Dominions-wide tour on February 11. During this period Colonel Amery has visited South Africa, Australia, New Zealand and Canada, and has delivered upwards of [illegible] speeches all told.

His speeches have covered a wide range and have been enthusiastically received by monster audiences throughout. He has been particularly happy in his references to the romance of the British Empire and, in his remarks concerning the economic position of the component parts of the British Empire, while in speeches touching on the Empire Marketing Board he has broken new ground with most satisfactory results.

In every speech delivered by Colonel Amery in Canada he stressed the findings of the Imperial Conference in 1926, which made known explicitly to the world, he stated, that every one of the Dominions was an equal Imperial partner in the British Empire.

Colonel Amery landed in Canada from the S.S. "Aorangi" at Victoria on January 6, and will sail from Saint John, N.B., on February 3, on the Canadian Pacific liner, the "Montcalm," for Liverpool. For the journey across Canada, where stops were made at 18 important centres, the Canadian Pacific Railway Company placed a special train at the disposal of the distinguished visitor and staff. On arrival at Banff, Alberta, the capital city of the Canadian Pacific Rockies, Colonel Amery threw all cares of state aside and spent all the day of January 12 enjoying winter sports. The Colonel is an expert skier and took great pleasure in overcoming the difficulties of Tunnel Mountain. Throughout the tour Mrs. Amery, herself a Canadian girl, accompanied her gifted husband. Others to make the trip were Capt. W. Brass, M.P. for the Clitheroe Division of Lancashire and Parliamentary Under-Secretary for Health; G. G. Whiskard, Assistant Secretary at the Dominions office, and G. Huxley, of the Empire Marketing Board.

Flying Comes Here To Stay And Conquest Of The Air Goes On Apace In Canada

Canadian fliers who may be anxious to attempt a transatlantic flight this summer will have much difficulty in securing permission from the federal government, because transoceanic hops are frowned upon in the Dominion on account of the aerial tragedies of 1927.

Legislation will be passed at the present session whereby licenses will have to be secured by pilots desiring to fly across the Atlantic. It will be extremely difficult to secure such a license.

Flying in the Dominion last year was more costly in dollars and in human life than ever before, no fewer than eleven pilots having been killed in flying accidents and yet no records were attempted or set by Canadians.

Flying has come to Canada to stay. It was born of the war when Col. William Avery Bishop, V.C., won every decoration possible for conspicuous gallantry and devotion to duty in shooting down seventy-two enemy planes.

In these days of peace the conquest of the air goes on apace in the Dominion. The young men who reaped the whirlwind in the war returned to Canada to earn their living as civilians. But the spirit of war work survived, and in a small but seasoned organization called the Royal Canadian Air Force the traditions of aerial navigation were carried on.

The young airmen, trained in war days, looked to the civil department of government for employment. They were needed and within two or three years of the close of the war many of them were in the Royal Canadian Air Force, detecting forest fires, locating smugglers on the boundaries, and mapping out by photography the vast area of the hinterlands.

Canada was quick to establish the necessary code of law for navigation of the air, and today the Dominion is safeguarded by a set of strict regulations governing the licensing of all mechanics, pilots, air harbors, international flying signals and the inspection of aircraft.

The most conspicuous work done during the recent crowded years of flying history has been the survey work in which Canada has led the world. Last year more than 400,000 square miles of Canadian territory were photographed and mapped with an accuracy which would have required years and millions of dollars if done in the old way.

Parliament acknowledged Canada's future in the air was assured by providing $3,000,000 last year for air development. Cities are being encouraged to provide future air harbors, technical advisers from Great Britain have visited the Dominion to make recommendations for the future linking of the Empire by airways, and the postoffice department is taking the initial steps toward what will be an Atlantic-to-Pacific air route.

Red Tape In France

A girl living in Epinal, France, has been refused a marriage license because she has never been officially born. She applied for a birth certificate, which is required before a marriage license can be issued, and the officials searched the records, but could find no trace of her birth having been entered. Her parents had apparently neglected to register her birth. She was informed that officially she was not born, and the wedding has had to be postponed.

Passenger: "Porter, is this a through train?"

Porter: "Nawsah, she's just done commenced, sah!"

A hair from a man's head is slightly heavier than a woman's hair.

"Well, can you hear the murmur of our souls?"

"No. You are mistaken. It is my stomach. I have indigestion."—Fliegende Blaetter, Munich.

W. N. U. 1721

Fisheries Of Alberta

Smaller Catch Is Reported For 1927 Over Previous Year

The fisheries of Alberta were not so active last year as in 1926, when a catch of 7½ million pounds netted the fishermen $740,000, an increase over 1925 of $[illegible]. Estimates of the total 1927 catch are placed at about six million pounds, with prices running about the level of 1926. The Alberta fishing activity depends largely on the production of the Manitoba lakes. The chief markets for the fish are New York and Chicago, and the Manitoba fishing companies fill these needs. If the Manitoba catch falls off, greater activity is necessary in Alberta, but if the Manitoba fisheries are active, Alberta is left with a smaller demand to fill.

During the past year a whitefish hatchery was built on Lesser Slave Lake, which, with Lake Athabasca, are the chief sources of supply.

Ship Carries Air Taxi

Passengers On West Indies Cruise May Take Side Trips In Plane

Passengers who sailed from New York on the North German-Lloyd liner Columbus for a cruise to the West Indies may, if they wish, take side trips by plane. When the vessel docked from Bremen, it carried between the funnels a huge silver and black Junkers hydroplane.

The pilot of the plane is Walter Hagen—not the golfer, but a German airman. On the metal sides of the air taxi is lettered its name, Globe Trotter. Hammond declared that fares for the air-route seers will be about $1 a minute.

Winnipeg Newspaper Union Fashion

1702

Paris-Inspired

One is immediately intrigued by its exquisite femininity. This stunning Parisian model No. 1702, fashioned of Creme de Menthe chiffon, derived distinction from its detail in cut. The bodice fits sleekly over the hips, adding a loose flat bolero at back to vary its smartness, and silver metal shoulder straps extend around the deep open neckline at the back. The skirt is made in three tiers with the selvage used for the edge of each tier, and loose hanging circular panels with picoted edges furnish the new [illegible] fullness to flutter to dance tunes. No. 1702 is in sizes 16 years, 36, 38, 40 and 42 inches bust. Size 36 requires 6⅛ yards of 36-inch or 5⅛ yards 40-inch material, and ⅝ yard 1½-inch lace banding. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Co-Operation Between Railways

Two Transcontinental Systems Will Stand Together In Promoting Welfare Of Dominion

Whole-hearted co-operation between the Canadian Pacific Railway and the Canadian National Railways is assured in everything that will make the greatness of Canada, E. W. Beatty, president of the C.P.R., and Sir Henry Thornton, president of the C.N.R., declared at Engineer's Club, Montreal.

The occasion was a presentation dinner to the staffs of both roads who contributed to the success of the second (triennial) Empire Mining and Metallurgical congress, held last year in Canada.

"Something has been said of the co-operation between the two railways during the Mining congress," said Mr. Beatty, "and it has been talked of as though it was something to marvel about. It is not. In anything that is of common interest to the country and the railways you will, I think, be able to find the Canadian National and the Canadian Pacific Railways joining in support of that effort, whatever it may be."

On the question of co-operation, Sir Henry Thornton had the following to say: "Let [illegible] in Canada are too few in numbers to quarrel, and too poor in capital to fight each other. The progress of our country will be best assured by the co-operation of all institutions within our bounds and by the joining of each section of our country in promoting the welfare of the Dominion. We shall stand shoulder to shoulder with the Canadian Pacific Railway in the protection that is necessary to preserve the revenues of our great transportation systems."

Hinders Trade With India

H. R. Poussette, Canadian trade commissioner at Calcutta, writes that one factor that militates against the expansion of Canadian exports to India is the reluctance of Canadian manufacturers to send representatives to visit the markets of India and Ceylon and the Middle East generally. Similar complaints have been made by other trade commissioners.

If Australia could be transplanted into the Atlantic Ocean, it would fill up all the space between the United States and Great Britain.

For Better Understanding

Sir Hugh Denison Deprecates War Talk In Britain and U.S.

Sir Hugh Denison, former commissioner for Australia in the United States, pleading before the English Speaking Union for a better understanding between the United States and Great Britain, cautioned his hearers not to take Mayor Thompson of Chicago seriously.

Recalling the Chicago mayor's threats to burn school books and his other anti-British attitudes, Sir Hugh declared that Mr. Thompson no more represented the U.S. feeling than A. J. Cook, secretary of the Miners' Federation, represented England.

The former commissioner also made reference to Rear Admiral Plunkett's recent speech on the possibility of war between Great Britain and the U.S. and urged the people of both countries to weigh such matters in the proper balance.

He urged steps to bring about closer relations through visits of statesmen, mentioning particularly Senator Borah and industrialists of the two countries.

"They would find much in common," he said, "and by exchanging visits would do a great deal in smoothing out the little misunderstandings which arise occasionally."

Declares Columbus Was Buried In America

Ashes Sent To Mexico In 1542 Says [illegible]

Where is Christopher Columbus buried? That is the question.

Historians have been telling the world that his ashes are buried in Sevilla, Spain. But Senor M. A. Cocco, who attended the Pan-American road convention, takes issue by asserting the remains are buried in America—specially under the great cathedral in Santo Domingo City.

Senor Cocco says that the wife of Diego Columbus, son of the discoverer, petitioned Charles V. to remove the ashes of the discoverer from Valladolid, Spain, to Santo Domingo. Permission was granted for the remains to be moved to Hispania America, according to his story, and in 1542 burial was affected under the altar of the cathedral in Santo Domingo City.

Many a man's financial goose has been cooked in a jack pot.

Ten Thousand Snowshoers Meet

1.—Snowshoers in full costume. 2.—A little diversion—the bounce. 3.—Notre Dame Church of Montreal.

Around ten thousand snowshoers and their friends visited Montreal on the occasion of the 20th anniversary of the founding of the Canadian Snowshoers' Association, which was feted in that city February 3-6. The convention takes on an international character by the fact that the American Snowshoers' Association, with over 1,500 members in the state of New Hampshire and Massachusetts, also attended the convention. In addition there were representatives from the Manitoba Snowshoers' Association and a large attendance from the St. Henri Canadian Club, which was celebrating at the same time its fiftieth anniversary, while unattached snowshoers from all parts of Canada and the United States went to Montreal for the function.

The convention was held under the auspices of the United Snowshoers' Clubs of Montreal and was featured by a carnival, during which the grand snowshoe championship of the world was decided. His Worship Mayor Martin was the patron of the convention, and in its celebration a banquet was given at the City Hall, at which the snowshoers were the guests of the city, on Sunday evening, February 5.

A number of snowshoers travelled distances up to 300 miles on foot to Montreal, but the majority took advantage of the special facilities offered in excursions at reduced rates by the Canadian Pacific Railway.

Canadian Sheep Breeders View The Future With The Utmost Confidence

Benefit Of Inoculation

Effect Of Inoculation Shown On the Yield Of Legume Crops

At several of the Experimental Farms in Canada tests have been made on the effect of inoculation on legume crop yield where legume bacteria were absent from the soil or present in insufficient numbers, and the results are summed up in a pamphlet on "Legume Inoculation" written by the Dominion Agricultural Bacteriologist. In some cases the increases in yield resulting from inoculation were comparatively slight, but in many instances they were strikingly large. At the Kapuskasing Experimental Station two years after seeding the inoculated alfalfa seed produced 3 tons, 1,463 pounds of dry matter against 3 tons 967 pounds produced from untreated seed. Results at the Beaverlodge, Alberta, Station were much more striking. On areas clipped in the year of seeding on that station the aggregate crop of two years from inoculated red clover seed was 4,162 pounds per acre as compared with only 220 pounds from uninoculated seed. For alsike the comparison was 4,308 pounds with 640 pounds and for sweet clover 3,600 pounds with 1,530 pounds per acre. The pamphlet may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

A Valuable Fertilizer

The Relative Value Of Fresh and Rotted Manure

Weight for weight rotted manure is more valuable than fresh manure as it contains percentages of plant food and has these elements in a more available condition. However, according to a new bulletin on "Manures and Fertilizers" written by F. T. Shutt, Dominion Chemist, and L. E. Wright, the losses in rotting frequently outbalance the benefits. Generally speaking, the sooner the farmer gets his manure while still fresh into or onto the soil the better. Still there are times when the rotting of manure is an advantage. It is well suited for light and sandy soils as it tends to make them more compact and retentive of moisture. On clays and heavy loams fresh manure is best as it improves their physical condition by opening them to the air and making them more friable. Fresh manure is also preferable for crops which have a long season of growth. With crops having a short period of growth and where early marketing is a consideration rotted manure with its quickly available plant food is best. It should be remembered that when rotting manure in a large heap the mass should always be kept compact in order to reduce losses to a minimum. The bulletin may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Flower Improves With Age

Carnation Exhibited At London Show Changes Color Instead Of Fading

A new carnation named Daphne which improves as it gets older was one of the exhibits at the Royal Horticultural Society show.

It is a medium-sized bloom, mauve in color, striped with heliotrope.

"As it becomes older," the grower said, "instead of fading, the tone changes to a delicate French grey, even more beautiful and artistic than its original coloring."

Another feature of the show was a little flower, Daphne Indica Rubra, which is said to be the sweetest smelling in the world.

Cause For Worry

Mrs. Jones found Mrs. Smith, the aviator's wife, in tears. "Whatever is the matter?" she asked, anxiously.

"I'm worrying about Jim," said Mrs. Smith. "He's been trying all week to kill our cat, and as a last resource he took her up 2,000 feet in his plane. He said he would drop her over the side."

"Well, what is there to worry about?"

"Lots," exclaimed the frantic woman. "Jim isn't home yet, and the cat is."

Lady (interviewing prospective help): I may tell you that we are vegetarians.

Girl (anxious to be engaged): I've attended that church all me life, mum.

The movie "Annie Laurie" was filmed in England and Scotland.

"My Old Kentucky Home" was composed by Stephen C. Foster.

With 120,000 more sheep in Canada than a year ago, George Gordon, of Oak Lake, Manitoba, president of the Canadian Sheep Breeders' Association, at the annual meeting in Toronto, viewed the future with every confidence for a greater increase in sheep population during the year. He spoke particularly of the conditions in Manitoba, where 40 years of wheat raising had resulted in very weedy land, which required the use of sheep to clean it up. For this reason, 120,000 sheep more than the present number could be successfully employed in Manitoba at this work. A committee had been appointed to interview the board of trade and the land and mortgage companies in Winnipeg with a view to soliciting their support to encourage the loaning of sheep on their farms to help clean the land. He outlined the good results of the four sheep sales in Manitoba. The districts in which they were held at one time supplied the worst grades of sheep to be found in the country. Now conditions were entirely changed and over one thousand sheep were to be seen offered for sale in one place. The highest price paid per pound for a lamb was 80 cents, and a Manitoba bred ram sold for $200. The prize pen of 15 lambs sold for 30½ cents a pound and 200 grade ewes for $15.80 each.

Mr. Gordon urged every sheep breeder to ship his wool to the Canadian Co-operative. It was very encouraging to hear the big sheep men from the ranches of Southern Alberta say that the rancher who had shipped his wool every year to this organization had done much better than the man who shipped one year and sold to the private trade the next. Sheep men should not hesitate to patronize their own organization when they know they do so much to find markets for our wool. He said that the last shipment of 250,000 pounds of wool to England meant a great deal in opening up new markets and advertising Canadian wool. Last season approximately 3,000,000 pounds of wool, worth in the neighborhood of one million dollars, was handled, and the prospects for 1928 prices were good.

Cecil Stebbs, of McCreary, stated that the Dominion Government has removed some of the restrictions for importation of sheep from the United States owing to the prevalence of the foot and mouth disease in England.

Reports submitted by the representatives from the several provinces were all of a gratifying character, particularly that from the Maritimes, where a total of 29,292 lambs sold for a total of $195,164. Pure bred ram lambs sold for $20 to $25; shearing pure bred for $25 to $35, ewes, $20 to $25 and grades from $10 up.

The receipts for the year were $21,270 and expenditure of $15,100. There is a balance of $6,170. The record of registration shows 14,[illegible] sheep of which 3,277 are Shropshires, with 2,745 Oxford Downs as the next in popularity. The total membership is 1,174 of whom 499 are in Ontario, 336 in Quebec, 61 in Manitoba, 53 in Saskatchewan, 194 in Alberta, and 31 in the United States. Among the total importations during the year of 328, there were 135 Shropshires, 60 Suffolks, 10 South Downs, 50 Romney, 2 Cheviots, 13 Black Face, 2 Leicester, 10 Rambouillet, 14 Merion.

The following officers were elected: President, Victor Sylvester, Ste. Hyacinthe, Quebec; vice-president, John Wilson, Innisfail, Alberta; secretary-treasurer, R. W. Wade.

It was decided to hold the next meeting in Quebec.

Palestine produced less than 800 tons of wool in the past year, and all of this is to be used in the making of carpets.

"Now, Max, give the little girl a kiss. Don't be shy. Go on!"

"Leave him alone—he will do it spontaneously later!"—Meggendorfer Blaetter, Munich.

BUCKLEY'S MIXTURE
Acts like a flash—a single sip proves it

WORLD HAPPENINGS BRIEFLY TOLD

The visit of Their Excellencies Viscount and Lady Willingdon to the Pacific coast will take place late in April.

Repairs destined to prop up the famous Leaning Tower of Pisa will be undertaken shortly under the supervision of the Ministry of Education and Fine Arts.

Commander C. T. Beard, R.C.N., will command the Champlain, and Lieut.-Commander R. I. Agnew, R.C.N., the Vancouver, the two new Canadian cruisers.

The population of British Columbia in 1926 was estimated at 568,000, according to the annual report of vital statistics for that year tabled in the Legislature.

Hon. Gerald William Lascelles, brother of the Earl of Harewood and uncle of Viscount Lascelles, husband of Princess Mary, died recently in his 79th year.

Richard Kearton, noted naturalist whose writings and photographs close-ups of bird and animal life are widely known, died at his home in Surrey, England, aged 65.

[illegible]

Protecting B.C. Fruit Crop

Counter-Parasites Are Being Imported Into Orchard Regions

Bug will fight bug this season to protect the Okanagan fruit crop from destruction. Counter-parasites are being imported into the orchard regions in a campaign to decimate the codling moth and earwig.

The counter-parasites, according to E. R. Buckle, provincial entomologist at Vernon, will be obtained from Wenatchee, Wash., the United States government having offered to co-operate fully with the British Columbia authorities. Parasites inimical to the codling moth and earwig have done effective work in the past, although they have to be handled with a great deal more care because of the danger of introducing secondary pests with them.

Unless the codling moth is suppressed, growers fear that it may bring about destruction as extensive as in the state of Washington, where losses due to the activity of this pest were $5,000,000 in 1926. Eight hundred carloads of apples were classified as culls in the Yakima district for same reason.

Pleased With Visit

Kellogg Says Ottawa Visit Was Most Enjoyable He Ever Spent

Secretary of State Frank B. Kellogg on his return to Washington, from his trip to Canada, said he never enjoyed a visit more in his life. Speaking of his reception at Ottawa, the secretary said that while Canadian hospitality was proverbial the manner in which he was received by the governor-general, Viscount Willingdon, the prime minister, Rt. Hon. W. L. Mackenzie King, and the officials and members of parliament, had been beyond his anticipation. The secretary was particularly interested in the Archives building at Ottawa, which he thought was one of the most interesting exhibits in the world.

FACES ACROSS THE SEA

Image Of Woman Transmitted By Television For First Time

New worlds were opened up when faces were flashed across the sea by television in a way which was never foreseen even by Jules Verne in all his fanciful imagination. For the very first time the image of a woman was sent across despite the fact she left her position in front of the transmitter a few seconds to glance in a wall mirror to make certain her hair had not become mussed in the excitement. Dummies and men's faces had been flashed across in previous tests but never a woman. John L. Baird, inventor of the television explained he had difficulty in finding a woman willing to attempt to sit still for twenty minutes or half an hour. The transmission was accomplished from Baird's Television laboratories in London, direct into the receiving station at Hartsdale, New York, which had been rigged up for the occasion.

Baird himself was the first sitter before the transmitter. Afterward, W. C. Cox, of the London Press Association sat for half an hour. Reports came back from the United States that Fox was showing up well.

Then Mrs. Howe, wife of James Howe, of the London Bureau of the Associated Press, took her seat in front of the seventeen glaring incandescent lamps, of 300 candlepower each.

Baird was as excited as a boy when he heard detailed reports of the reception in the United States of the image of Mrs. Howe.

"Indeed I was delighted," Baird said. "It was a splendid demonstration as far as the subjects on this side were concerned. These tests are merely try outs of the unlimited television possibilities of the near future."

"It was the greatest thrill of my life when Mr. Baird told me my image had been seen on the other side of the Atlantic," Mrs. Howe said. "The glare and heat of the electric lights bothered me only a trifle—I was too thrilled at the novelty of it all to think of the temporary discomfort."

Delicious Oyster Stew

Being doubly creamy, St. Charles Milk so enriches an oyster stew that it is irresistible. Try it.

ST CHARLES MILK

Noted Indian Chief Dead

Narrowly Escaped Being Buried Alive 25 Years Ago

Moses Brown, noted Indian chief of the Chehalis Reserve, B.C., is dead and buried and this time, his fellow-tribesmen say, the old man is not likely to rise again.

The chief was almost buried alive 25 years ago. For two days the Indian villagers thought he was dead as a result of an accident. They placed the body in a coffin, performed the usual tribal funeral rites, and set out for the burial ground. When the coffin was being lowered into the grave it accidentally jarred against the bottom and the sudden jolt brought the occupant back to consciousness.

Realizing that he was imprisoned, Moses began to beat furiously on the coffin, which was immediately broken open by the astonished Indians. The man supposedly dead walked home with the mourners, apparently none the worse for his experience.

The dead chief served the provincial and federal governments as a guide for years and as a boy accompanied many prospecting parties into the Cariboo during the gold rush. He was the only full-blooded Indian ever employed as a [illegible] in British Columbia. That was in New Westminster in the early days of the province.

The Fall Of Trotsky

Feels the Cruel Punishment Of the Old Autocratic Government

There are many ironies in the exile of Trotsky to Siberia.

There is the irony that he who next only to Lenin, was the main creator of the Soviet regime, is now crushed and rejected by it.

There is the irony that he follows the way of the helpless Czar whom he sent to his death at Ekaterinburg.

There is the irony that, in facing Siberian exile, he faces the cruel punishment of the old autocratic government which every Russian liberal for a century has vowed to end.

And there is the final irony that the world at large will take from the exile of Trotsky all sorts of valuable lessons of the exact kind which neither he nor the Soviet tyrants will want it to take. — New York Post.

Goodwill Tours To Europe

Members Of Parties Will Take Own Cars and Motor Through Europe

A friendlier feeling between Canadian, American and European motorists which, in turn, will be transmitted to a much wider circle of people on the two continents will, it is hoped, be engendered as a result of two personally conducted "goodwill" tours to Europe this summer organized by the White Star Line under the official auspices of the Montreal Motorists' League, it is stated in an official announcement by the White Star Line.

A novel feature of the tours will be that those going to Europe with these parties will take their own cars and motor through Europe and Great Britain.

Wherever they go receptions will be arranged in the principal cities and it is anticipated that the Touring Club of France, and the Automobile Association of Great Britain, with which the Montreal Motorists' League is affiliated, will tender official receptions to the parties and, in this way play their part in promoting goodwill between Europe and the North American continent.

Already there have been inquiries from Winnipeg, Vancouver, Toronto, several cities in the province of Quebec, Ontario and Manitoba, and with the announcement of these tours in the United States it is expected that there will be a regular string of requests from American motorists.

One of the principal ideas underlying these parties is to persuade Canadian and American motorists, who already have much in common, to travel across the ocean together and, by personal contact with motorists in Great Britain and in Europe, build up a firmer feeling of friendship between the people on the two continents.

The first party, with their own cars, will sail from Montreal on the White Star liner "Megantic," on July 26, and return from Liverpool on the White Star liner "Calgaric," on August 31.

The second group will sail from Montreal on the White Star liner "Albertic" on September 6, and return from Southampton on the same steamer on October 20.

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued.

His house of tamarac was replaced by a little log shanty, with a home-made fireplace built of stones from the river, and into it he moved before winter. In the spring he returned to civilization with his season's catch of furs. After that his victory was assured, and if he had been more sociable and friendly he would have received the admiration of the settlement at Bannerman. As it was he did his trading almost silently, volunteering no explanation of his strange ways, and no man can gain the confidence of his fellow men unless he is willing to explain himself.

The year before the war, the Englishman had built a shingled bungalow with glassed-in verandah and hardwood floors. He had built in cupboards and furnished it in such a manner that many a man living in the settlement was subject to drastic [illegible]

roast chicken, canned figs for dessert, white cloth and everything.

"Did he ask you all to come again when you couldn't stay so long, or anything like that?" asked Jim Simpson, incredulously. Jim had opposed the fishing party.

"He doesn't need to ask us back when he fed us that well. We'll go all right—eh, boys?" replied Bill; "victles like that speak for themselves—we're goin' next Sunday again. Gosh, Jim, you better come—he's tickled to see us, I believe. He's not quite all there—anyone can see that, he's so polite and ladylike—and we might as well punch a meal ticket on him as not."

The parties continued for several weeks, growing in number and never did the hospitality fail. Fried lake trout, home-made bread and butter, eggs, and wild fruit were plentifully supplied and eagerly consumed.

"Gee! that feller is easy," Bill Larsen was often heard to say; "he [illegible]

"Good Lord, man, you're crazy! Them were dandy dogs? What in thunder did you want to shoot them for—I thought you were a real dog man."

"No one will ever abuse my dogs, I wanted to be sure, that's why. I gave the Ransom's a horse, and they promised to care for Cleo as long as she lives. What will you give me for the horses? Be quick now!" He had no time to argue—he was going on the train that day.

"One hundred dollars for the whole thing," said one of the men.

"Very well," said the Englishman, "I'll take it. Be good to them."

He went to the boarding house for dinner, where he was the centre of curious eyes, for the story of his wild intention was known. When he had eaten a hasty meal he stood up suddenly and broke into speech.

"Boys, you are wrong," he began, "in going on mining coal and thinking you do not need to hear the call your country has sent out. The British Empire is threatened, her enemies are at the gates. Belgium, a little country, has been violated. While you sit here, villages are burning, women are screaming—and the Germans are marching triumphantly on. Have you no pride, no manhood? . . . I know the Germans . . . they have been getting ready for years. Lord Roberts told the Empire to get ready—it was coming but they went on like you—'business as usual'!"

He paused here, overcome with emotion. One or two of the men laughed, the others regarded him stolidly. Crazy Englishman! Crazier than ever!

"Well, say, looks here," began Bill Larsen, "what are you gettin' so het [illegible]

Acid Stomach

Excess acid is the common cause of indigestion. ... Phillips' Milk of Magnesia ...

SEVEN GOOD REASONS WHY EVERY FARMER SHOULD BECOME AND REMAIN A LOYAL MEMBER OF THE U.F.A.

1. The organized farmers' movement of Canada has for its supreme object the establishment of Good Citizenship. The movement is based upon the idea of unselfishness in three different fields. First of all these, their locals. Secondly, their Provincial Associations and Thirdly their Canadian Council of Agriculture.

Surely this is the very best reason why every farmer should be a member of the U.F.A. and give it his very best support.

2. The great wheat marketing agency known as the Wheat Pool owes its birth to the U.F.A., as do the other pools.

The wheat pool today is the largest business in Canada and is entirely owned and controlled by the farmers of the prairie provinces.

One of the leaders in the wheat pool movement in the United States, who visited Alberta some little time ago made the statement that it was through lack of an organized body such as the U.F.A. that some of the attempts of American farmers to carry on co-operative marketing enterprises had failed. No co-operative marketing movement could be permanent, said this visitor, which was not based on an active body of farmers who were prepared to do things for themselves. Therefore the future of the wheat pool or any other economic enterprise launched by the farmers is dependent on the permanence of the U.F.A. for success.

3. With the small minority of ten per cent of the farmers as members, the U.F.A. has accomplished much for the advancement of agriculture. How much more might be done with a goodly majority. Mrs. Parlby, Minister without portfolio in the Alberta Legislature reminded us in her speech to the U.F.W.A. Annual Convention in Edmonton in 1927, "That any great country which allows its agricultural interests and rural life to deteriate soon ceases to be great." Canada is essentially an agricultural country and it is up to the farmers to bring their occupation to the highest standard possible. In what better way can this be done than by organizing as a body with every farmer as a member?

4. The U.F.A. as an organized body influences legislation as individuals could never do.

5. No other production business allows the broker or dealer to fix the price of its products. Only the farmer takes what is offered. Organized agriculture would not long submit to this system. Co-operation is the only weapon the farmer has to fight his battles or defend his interests. Here again the individual worker can do nothing.

6. The meetings of the locals give the members excellent training in citizenship. They learn to think clearly and logically on the topics discussed and learn to express their own thoughts in public. Good citizenship cannot be taught with text books.

7. Mental activity is stimulated at the meetings of the locals through the contact of mind with mind which is of benefit to the larger life of the nation in the fact that any stimulation of mental activity brings increased interest in public affairs. A thorough understanding of each must be reached before anything can accomplished for the betterment of conditions either locally or nationally. The members learn by striving to better condition in their own community to realize the needs of the nation and how to meet them. For the nation is simply a great many communities under one government. Learning to manage the business of the local in a capable way is the first step in learning to manage the business of the nation.

If every farmer would join the organized farmers' movement of Canada during 1928 and give it his very best support, in the words of Mrs. Gunn, President of the U.F.W.A., "In a few years we would have a mighty irresistible force breaking down the barriers of selfishness and greed, dispersing the forces of autocracy and ushering in the new era, when humanity shall have made democracy safe for the world," for "Service" is our watchword and 'Equity' our motto.

KINGMAN

Mrs. Ed Tollefson returned Wednesday from Forestburg, where she has been visiting her parents for three weeks.

Oscar Thompson and George Welch were business visitors in Edmonton on Thursday.

Mrs. Dumont of Daysland and Mrs. Hans Simonson of Edmonton were visitors at the Ovelson home over the week end.

Mr and Mrs. Joe Munson and family of Camrose were the guests of Mr and Mrs. C. R. Stycbert on Sunday.

Mrs. C F. Sealund returned last Tuesday from Camrose where she has been a patient at the St. Mary's hospital for a couple of weeks.

Mr. and Mrs. Carl Ramstedt of Edmonton were the guests of Mr and Mrs. E. Erickson over the week-end

Miss Lily Erickson, of Edmonton visited with her parents, Mr. and E. Erickson for a few days.

Mrs. Dumont and Mrs. Hans Simonson were guests of Mr. and Mrs. Roy Molvik on Sunday.

Mr and Mrs. George Qualley of Hughenden visited with Mr. and Mrs. Thor Herte over the week end.

Mr. and Mrs. Herman Pederson and family of Camrose visited with Mr. and Mrs. T. J. Regness on Sunday.

Mr. and Mrs. Gilbert Tollefson were visitors with Mr. and Mrs. C. A. Pederson on Friday.

Mrs. Jack Hardin returned on Monday from Rochester, U.S.A., where she had an operation.

MUNICIPAL ELECTION MONDAY

The annual election for councillors for the Municipal District of Cornhill will be held on Monday. Elections will be held in divisions one and five. In division one, W. Christenson and W Lee will contest the seat and in division five W. Thompson and C. Morden will contest the seat. In division four A. Williams was re-elected by acclamation. The other councillors who have not completed their terms are, division two, C. Holmberg; division three, J. Verge;; division six, Lloyd Wood.

Mr Fred Hicks of Cadogan is visiting friends and relatives in town, including, Mr. and Mrs. H. Hicks and Mr and Mrs. E. Hicks.

"What is that a picture of?" asked a small tot.

"That's the Goddess of Liberty," Big Brother replied: "You can always tell her 'cause she's got an ice cream cone in her hand."

"Why are you running that steamroller over that field?" asked the stranger.

"I'm trying to raise mashed potatoes," explained the farmer.

During the month of [illegible] there will be a Thousand New Ford Cars delivered to Alberta dealers which will put us in a position to take care of any deliveries that is required in early spring. See the New Ford Cars before buying. They will out perform any car in the light car field to-day and many of the larger ones.

HOCKEY

The Tofield Trail Rangers hung up a grand victory on Friday night last when they met a [illegible] from a country district north of Viking. The visiting team were heavier, but not older, than the locals, and before the game commenced made the Tofielder's realize that to win, they would have "to step on it." Step on it they did, and won handsomely to the tune of 8—0. It was no walk-over though, the visiting forwards kept up an attack that never slackened until the final bell rang. In fact so game and persistent was their spirit, that even the Tofield supporters would have liked to have seen them get a goal. Their big stumbling block however, was Jack Whyte, the Tofield goalie, who was stopping them from every [illegible] It was a nice game to watch and was much more even than the score would indicate.

On Saturday the same Tofield team journeyed to Camrose [illegible] they played a boys team there. Here they ran up against tough opposition and lost by a score of something like 10—8. The line-up of the Tofield team is as follows:

Goal, Jack Whyte; defense, Everit Maclean, Norman Glover; forwards, Ross Craig, Arthur Beirnes, Ray Martin; subs, Wes Taylor, Blake Clutterham, Jack Beirnes.

On Saturday the Tofield High School team journeyed to Edmonton and played the Acmes of that city. The score when the final bell rang was 5—3 in Edmonton's favor. Mr. McCullough, manager of the team accompanied them as also did Glenn Wood. There is supposed to be another game at Tofield between these two teams, due notice of which will be given.

FATHER AND SON BANQUET

On Friday evening of last week quite a number of town dads and their sons held their annual get-together banquet. The tables which had, of course, been prepared by some of the mothers, Mrs. Clutterham, Mrs. Beirnes and Mrs. ——.

There was ample for all and full justice was done to the [illegible] provided.

Arthur Francis was toastmaster, and performed this difficult task exceptionally well, while his address of welcome was hearty and [illegible] and much applauded.

Mr. Johnston Ferguson gave an address on the subject of "Our Heritage" which was much appreciated, and this was followed by an instrumental duett by Blake Clutterham and Murray McHeffey. A. B. Evenson responded to Mr. Ferguson in an able manner. Willie Worton then proposed the toast to "Our Dads," which in turn was replied to by Mr. Harrison. Mr. Gordon then favored the gathering with a song which was encored. The toast to "Our Sons" was proposed by W. Worton and replied to by Arthur Beirnes, after which Horace McHeffey sang a song. The task of thanking the ladies was given to Charles Edwards and Charlie did it well. He was followed by Jack Beirnes who rendered a [illegible] solo, which was easily the hit of the evening. He was much applauded. The toast to "The Church" was proposed by Murray McHeffey and responded to by Rev. Gordon.

The gathering was honored by a visit from Dr. Young of Lamont, a well known boys worker of that town. After an introduction by the toastmaster, Dr. Young treated those present with an excellent address which was much enjoyed and greatly applauded. The evening was [illegible] to a close by the Omaha Tribal Prayer. This was the 8th annual father and son banquet and [illegible] uphold the reputation of those previously held.

AMISK CREEK

E. A. Moen is shipping a carload of cattle and hogs from Ryley to the pool, to-day, Tuesday.

Several from this vicinity attended the Lutefisk supper held in Ryley on Saturday the 18th.

Mrs. E. Bakkehaug returned from Bardo where she and the baby have been visiting for a few days.

Mr. and Mrs. Annebo Clara Magden and Agnes were guests at the Mr. and Mrs. P. O. Finston home last Sunday.

Mr. and Mrs. N. Sand and daughter from Ryley, Mr. and Mrs. C. Kjosring were callers at the R. O. Berg home last Sunday evening.

Mr. and Mrs. I. C. Olson entertained several friends and relatives last Sunday. Those present were, Mr. and Mrs. Joe Stafford and Children, [illegible] T. Rovem, Mr. and Mrs. A. Haukedall, and daughter, Mrs. O. Lorbekme and baby, Mrs. P. Eggen from Bardo, and Mr. and Mrs. E. A. Moen and family from Amisk Creek.

Mr. and Mrs. C. Rude and children, Mr. and Mrs. N. Sand and daughter, from Ryley, H. Annebo and Ruby Berg were visiting at P. O. Finston's home on Wednesday evening of last week.

Some kind of a flu has been a-[illegible] in this vicinity. Some have [illegible] confined to their beds for a day or two. Arnold Berg was one of the victims but we are glad to report he is now much better.

Mrs. John Reil was very ill with the flu las week. It was necessary to take her to an Edmonton hospital. The last report was, that she was getting better.

A non-medical healer arrived in town this week and is located at the hotel. Many people from far and near are coming to him daily.

Mrs. R. Longson and Miss Jean Kellner entertained a number of friends at a very enjoyable whist party at the Kellner home on Friday evening. There were six tables playing. First prizes were won by Miss Dorothy Baptist and John Gray. The consolation prizes went to Miss K. Reid and Mr. J. Wills. A lovely lunch was served by the hostess, after which the guests left for home, all [illegible] enjoyed a pleasant evening.

On Thursday evening of last week a pleasant farewell party was held at [illegible] of Mr. and Mrs. Frank Lewis [illegible] a number of young folk surprised Bill Lewis, who with his parents will shortly leave for the States. The evening was spent in games, etc. and bountiful refreshments were served. During the refreshment period, Bill was presented with a snapshot camera as a momento of his stay among the young folk of the town. The party broke up around mid-nigh, all having had a good time, but re-[illegible] Bill's departure.

VENGEANCE THEME of PICTURE

Hard riding, hard fighting and stunts of daring that thrill every nerve are the outstanding features of Buck Jones' splendid picture of the Basque country of the Pacific South-west, which will be shown at the Variety on Saturday.

There is not a dull moment in this story of the cowboy who comes to the settlement of the Basques seeking vengeance for the death of of his brother and finds romance and adventure as well as the sinister thing he seeks. Natalie Joyce is the dainty little Spanish beauty who is the girl in the story, and she gives a perfect performance. But it is Buck, the hard riding, dare-devil cowboy, who furnishes the thrills and laughter.

W.I. NOTES

We are pleased to announce that Miss Davidson will continue the home nursing classes on March 5th. We have all enjoyed her very instructive lessons and hope all the ladies will take advantage of the last week of the lessons. The institute extend a welcome to all ladies who wish to attend. There will be the three classes, at 2:00 p.m., at 4:00 p.m., for the girls and the evening classes, beginning at 8:00 o'clock. Keep the week beginning March 5th, for the home nursing classes.

Mr. S. Bethel was taken to Lamont hospital on Monday for medical treatment and possibly an operation.

KETCHAMOOT

The Wm. Lee family are now enjoying riding in a new Chevrolet [illegible]

The school board called a meeting at the Sears' home on Wednesday for the purpose of electing a secretary and treasurer. The school board now consists of Mrs. G. W. Sears, Mr. A. McMullen, Mr. A. F. Shultz, trustee. Mr. A McMullen is sec.-treas.

Mrs. T D Ferguson and little son are spending a few days with the formers' parents, Mr. and Mrs. J. H. Ingram.

Mrs. A. J Williams is visiting her sister and mother at Stony Plain.

A pleasant evening was spent at the W. A. Mitchell home on Monday, when Mr. and Mrs. W. A. Mitchell entertained 40 guests to a whist drive, ten tables playing. Mrs. Gill and Mr. H. McGinitie, Miss Mildred Ingram and Mr. J McGinitie carried away the prizes. A nice lunch was served by the hostess assisted by Mrs. B. [illegible]

Born.—Twins, a boy and girl was born to Mr. and Mrs. Donald Campbell of Round Hill, on Wednesday. The little boy is weak but the girl is doing nicely. Mr. Campbell is the son of Mr Angus Campbell of West Ketchamoot, and brother to Mrs. H. Lawson and Mrs. S. Stirritt.

Mr. Joseph Brown returned home from an Edmonton hospital some time ago. He underwent an operation on his spine which has improved his health.

Voting for councillor took place at the school house on Saturday, G. W. Sears being the returning officer. Mr. Wm. Lee got the big majority of votes at Ketchamoot, viz: 56, as against five for Christenson.

Another successful social was held at the Shultz home on Friday evening, Mr. Shultz going to a great deal of work to accommodate the crowd and make them comfortable. The forepart of the evening was spent in social conversation, with music on the radio, after the crowd had all assembled a short program was given. Miss Mabel Lawson and Martin favored with several duetts on the organ and violin; reading by Mrs. Carlisle and Mrs. Keitha Oliver; recitation by Alvin Shultz; and several mandoline solos by Arvard Eugen. A turkey contest was then staged and Miss Hannah Jensen and Roy Lee won first prize, Mrs. J. McGinitie and Herman Lawson, consolation. The children then were given anobservation contest, Helen Shultz and Charlie Sears were the most observing. Cup and saucer were then auctioned off by Mr. Shultz. Lunch was then served and home made candy sold. A jolly hour was spent in a peanut race by young and older children, which brought the evening to a close.

LAKE SHORE

Mr. Sam Bethel and family wish to thank the many friends who by their co-operation in giving dances etc., made it possible for Mr. Bethell to enjoy the advantages of a radio. Only one who has been confined to a bed of sickness and pain for some time as Mr. Bethel has been, can realize to its fullest extent the pleasure derived from the broadcasted pro-[illegible]

Mrs. T. E. Seale went to Edmonton on Monday to enter a hospital there for medical treatment. Her many friends are hoping for a speedy re-[illegible]

A farewell dance for Mr. and Mrs. John Logan who have been residents of this district for many years was held in the Community Hall on Friday, evening. A goodly crowd was in attendance and a splendid time was reported. We understand Mr. and Mrs. Logan will be moving immediately to a farm near Camrose.

Mr. J. S. Munroe and daughter, Jessie were the guests of Mr. and Mrs. Elgin Seale over the week-end.

Mr. and Mrs E. Phillips of Deville were guests of friends and relatives over the week end in this district.

Mr. and Mrs. N. Noland returned from a several weeks visit to their daughter, Mrs. Radabaugh, who resides in Washington, U.S.A. They report a splendid time while away but express themselves as very glad to get back to Alberta.

J. B. Warner spent several days in Wainwright last week, participating in the bonspiel there.

WOULD REDUCE THE NUMBER OF PORTS OF ENTRY

Ottawa.—A number of recommendations dealing with the re-organization of the Department of National Revenue are contained in the report of Messrs. Clarkson, Gordon and Dilworth, chartered accountants of Toronto, which was tabled by the Hon. W. D. Euler in the House of Commons recently. This firm acted under the authorization of the order-in-council of August 7, 1926, as auditors to the Royal customs commission.

The report says that from time to time the Minister of National Revenue has put into effect a number of improvements recommended by the investigators, and that these have added to the efficiency of the department.

One of the chief recommendations declared that "to utilize effectively such a body of competent appraisers there should be concentrated in about 100 ports the examination and appraisal of all importations on a commercial scale, which at present pass through some 700 ports. A large number of the present ports should be closed entirely."

It is shown in the report that there are 720 ports, out-ports and stations in Canada and that in 234 of these the expenditures for administration exceeded the revenue in the year 1926.

It is suggested that the passing of importations on a commercial scale should be taken out of the hands of all ports having a staff of less than four persons except where for special and sufficient reasons this could not be practical.

Other recommendations are that a special investigation staff be appointed to deal with suspected evasions of duties and taxes or other frauds ...

C.P.R. Traffic Chief Dead

C. E. E. Ussher Had Been With Railway For 42 Years

Montreal.—C. E. E. Ussher, general passenger traffic manager of the Canadian Pacific Railway, died suddenly at his residence in Westmount. He was 71 years of age.

Mr Ussher was born at Chrysler's farm, Chippewa, Ont., Dec. 28, 1857. He joined the C.P.R. on Nov. 1, 1886 as chief ticket clerk in the passenger department at Montreal.

His rise to executive office was rapid, culminating in his appointment as general passenger traffic manager of the company on Sept. 1, 1922, with jurisdiction over passenger and traffic matters covering rail and steamships on the Atlantic and Pacific and also gave him charge of the entire hotel chain of the company.

Mr. Ussher originally intended to go in for a musical career but owing to force of circumstances entered railroading instead.

He joined the Canadian Pacific Railway when the trans-continental service was inaugurated and was therefore contemporary with the extension of that railway across the continent. He had seen it grow to a world-wide organization, stretching through the Dominion and encircling the globe.

China Hopes For Improvement

People Looking For Better Times During This Year

Canton.—Thankful that the "year of the rabbit" just closed is behind them, the people of China today are hoping for better times under the fiery watch of the mystic dragon now presiding over the current year.

The "year of the rabbit" ended in the midst of crippled domestic trade, curtailed shipments abroad and in general a dreary commercial outlook and Canton and South China ushered in the New Year hopeful but with grave commercial misgivings.

The new lunar year means much to China and her more than four hundred millions of persons. In addition to being practically her only holiday of the year, it is the chief ...

ANSWERS GIVEN TO QUESTIONS ON IMMIGRATION

Ottawa.—A number of questions dealing with immigration were answered in the House of Commons, their range extending from the admission of Asiatics to the cost of transportation from Europe to Canada.

It is shown that from 1921 to 1927 there were 787,404 immigrants arrived in Canada from Great Britain, the continent of Europe and the United States. Of these 361,524 came from the United Kingdom; 249,821 from the continent, and 176,053 from south of the international boundary. The cost to the country for bringing in these immigrants was $7,294,966, of which over 80 per cent. was spent in connection with British immigration.

The figures disclose that the banner year in immigration from the Old Country was that which closed on March 31, 1921, when 71,262 newcomers came to Canada. In the fiscal year, ended March, 1927, the number of foreigners coming into this country from European continental ports was 71,672, a figure that exceeded by 370 the combined totals of British and American immigration during that period.

Since 1923, the year in which the system of assisted passage was adopted, to December 31, 1927, there were 61,267 new settlers brought in, at a cost of $1,534,534.

The answers stated that provision was made under the Canadian Farm Loan Act of 1927 to assist Canadians desirous of settling on the vacant lands of the country.

Federal Aid Cancelled

Contributions To Unemployment Relief In Provinces Was War-Time Measure

Ottawa.—Withdrawal of Federal contributions to the provinces for unemployment relief is announced in a letter from Premier King to Premier Bracken, of Manitoba, dated February 20.

The Prime Minister in part says that the policy of the government as set out at the Dominion-Provincial conference was "that such assistance as had been given from the Federal treasury had justification as a war time measure to meet conditions arising out of the war and the re-establishment of returned men in civil life."

Mr King continues:

"It was stated at the conference that the justification for Federal assistance in the matter of unemployment on this ground no longer exists. In our opinion other circumstances have not arisen which at the present time justify contributions from the Federal treasury to either the provinces or to municipalities as an assistance in dealing with the problem of unemployment."

The letter was in answer to inquiries from the Manitoba government as to what aid could be expected this year.

A BIG CUT IS MADE IN U. S. NAVAL PROGRAM

Washington.—Slashing Secretary Wilbur's recommendation for 71 new warships the house naval committee decided to authorize the construction of 16 ships, one of them an aircraft carrier, and the remainder cruisers of the 10,000-ton class. It turned "thumbs down" on new submarines.

This action, taken after a protracted executive session, was described by Chairman Butler as practically unanimous and in line with the original United States proposal to the unsuccessful Geneva arms conference.

Wilbur had urged the committee to approve a building program of 25 cruisers, five aircraft carriers, nine destroyer leaders and 32 submarines, representing the program as having the backing of President Coolidge.

Butler estimated the committee's program would cost $274,000,000 as compared with $740,000,000 for the administration's plan, both figures excluding the increase in aircraft and personnel for which the additional ships would call.

The committee in refusing to provide for submarines turned a deaf ear not only to the naval secretary but also to an emphatic protest by one of its own members, Representative McClintic, Democrat, Oklahoma.

The committee provided that the 15 cruisers should be started within three years and completed within six and that the aircraft carrier be started within two years.

The committee also adopted a provision that "in the event of an agree- ...

USE OF IMPROVED SEED GRAIN URGED

The use of better quality seed grain by farmers throughout the province this spring is being urged in order to maintain the high standard which Alberta crops have established in the past. Lack of care in the selection of seed, with the consequent lowering in the quality of the crop produced will very soon reduce the demand for Alberta wheat on the markets of the world and correspondingly lower the prices received by the grower.

The remedy for this situation is largely in the hands of the individual farmer. The man who sows weed seeds with his grain has himself to blame for the lowered grading he will receive for his crop at the elevator [illegible] exposed. Seed drill surveys conducted in the province by the Dominion Seed branch indicate that the average seed put in the ground grades "rejected" according to legal standards as to the number of weed seeds present. The thorough use of the fanning mill on all seed grain will help the present and future crops by checking the spread of weeds which use valuable plant food.

If a farmer is not in a position to purchase registered seed, which can be secured from the provincial seed cleaning plant at Edmonton, he can at least use a high quality of commercial seed of one of the varieties of recognized merit. This is especially important in the case of wheat as a wide variation exists among varieties as to their suitability for milling purposes. Seed of mixed varieties or of an inferior milling wheat cannot yield the product demanded by the millers.

HAY LAKES ONCE MORE SEEKS INCORPORATION

At a meeting held in the dining room of Kiel's hotel on Friday of last week, the matter of seeking incorporation [illegible] more threshed out.

The meeting was very well attended, practically every resident ratepayer of the hamlet being present. The pros and cons of the matter in hand were discussed freely from all angles.

When the vote was taken it was unanimously decided that the hamlet should seek incorporation.

The necessary steps to proceed with the matter will be taken immediately.

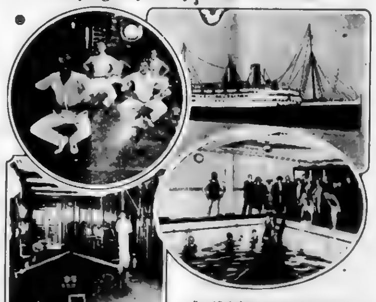
Keeping Physically Fit in Mid-Ocean



Upper left—A physical class in operation. Upper right—The Canadian Pacific steamer "Montroyal". Lower left—Interior of the gym of the "Empress of Australia". Lower right—Bathing in one of the ship's swimming pool.

A gymnasium on board an ocean liner is no longer a novelty. The floating palaces of today which cross the mighty oceans between Canada and the Orient and Canada and Europe have gone one better than the best hotels. There are hotels in this country that can invite their guests to baths in private swimming-pools; but how many of them can offer the busy man or woman the use of a gymnasium?

"How to keep fit at sea?" Board one of the famous "White Empresses" bound for the Orient from Vancouver, or cross from Quebec to Southampton by an "Empress of the Atlantic". These liners have gymnasiums on board and you will have no reason to fear the consequences of a period of enforced leisure. On the Pacific the "Empress of Canada", "Empress of Asia" and "Empress of Russia", have gymnasiums which are in all respects like those of the three Atlantic Empresses. Spacious rooms, with excellent ventilation, and fitted with the latest equipment for almost every phase of athletic exercise. In addition, the Empress of Canada and the Empress of Australia have swimming pools, which are in the first rank of those to be found on board sea-going ships.

The apparatus with which the gymnasiums of the ships of the Canadian Pacific line are fitted is varied and diverting. The "horse" and the "camel" are perhaps the most popular among the machines. When travelling on the "Empress of Australia" and the "Empress of Scotland" to and from Canada, this [illegible] the Prince of Wales rode many imaginary [illegible] the comfortable back of the "horse" and also on the "camel's" hump. These beasts are electrically controlled, and when the current is switched on the "horse", which is properly saddled and has crupper and stirrups, proceeds to emulate the movement of a horse in motion, and gives the rider a real and pleasant sensation of horse-back riding. The speed can be increased from a walk to a trot, from a trot to a canter, and from a canter to a gallop, but the "horse" is always a gentle beast and never throws his rider.

The "camel" machine is as popular as the "horse". The "camel" functions in a similar manner to the horse, but performs the rolling motion peculiar to the "ships of the Sahara". The "camel" usually works overtime when the Round the World and Mediterranean Cruise Empresses are nearing Egypt, the ladies especially being anxious to accustom themselves to riding on the hump of a camel.

There are bicycle machines in the gymnasium of the Empresses. These are fitted with dials which record distances travelled up to 500 metres. Bicycles are placed side by side, which offers the possibilities of racing competitions.

Rowing machines, pulley-machines, which test the strength and develop the muscle, are amongst the apparatus with which the gymnasiums are equipped, and boxing-gloves, medicine-balls, punch-balls, foils, single-sticks, and indian clubs, provide boxers, fencers, and indian-club artists amongst the passengers with every opportunity of indulging in their favorite pastime.

The gymnasiums themselves are spacious rooms, well ventilated, and fitted with electric fans which help to keep the air always fresh. During certain hours the rooms are reserved for the exclusive use of the lady passengers.

A physical instructor is on duty in the gymnasiums during the regular hours. He instructs passengers in the use of the machines, and during the longer voyages and winter cruises made by the Empresses, classes for physical exercises are frequently held.

Canada Indebted To The Mother Country For Vast Sums Spent On Protection

No more formidable business confronts Canada than the preparation and completion of a proper cadastral survey of the Dominion on the lines of the famous Ordnance Survey of the Motherland. The extent of the undertaking can be gauged from the remark passed by President Cautley at the convention of National Surveyors in Toronto the other day, that a vast proportion of Canada remains to be explored and surveyed. Practically only one-quarter of the area of the country has been anything like properly mapped. Even where mapping is supposed to have been done, [illegible] of it is conjectural and depends [illegible] or less on disconnected journeys, [illegible] ders' and trappers' reports, information obtained from natives, and the like. When the time taken to map the comparatively limited area of the British Isles is considered, some idea can be obtained of the magnitude of the job ahead of Canada, even with all the resources at command of modern discovery and invention. Nor should the wonderful resources that, in all probability, lie hidden in these unknown and unexplored regions be forgotten.

President Cautley's statement has suggested another train of thought to the Kingston Whig-Standard and prompts it to ask: How much do Canadians, or some of them, remember of the part that the Motherland had in obtaining this great Canada of ours? Do we lose sight of this in the prosperity of the present? We remember, the Kingston paper says, that some few years ago this question cropped up in the Dominion House, and one member went so far as to say, "I say this claim of our honorable friend opposite that we are greatly indebted to Great Britain is a fallacy which cannot be supported by fact. As a Canadian, I wish to say that in a material sense we are not indebted to Great Britain for anything, and in no sense is Canada indebted to her for more than goodwill and filial affection."

The next speaker, however, was better informed and said: "We have always had the protection of the [illegible] sea power on the earth. [illegible] 1852 and 1862 Great Britain spent $85,000,000 on military expenditure in this country. Go back 100 years and you will find that she spent $170,000,000 in addition, making a total of $255,000,000 in 100 years. Then she spent $35,000,000 in the citadel and public works in the city of Quebec, and $61,000,000 on our canals. Again she spent $84,000,000 on all kinds of works in all parts of this country. And I want you to remember that I am not taking into consideration the war of 1775, or the public works on which enormous sums were spent in 1778, at Montreal, Toronto, Halifax, St. John, Kingston, St. Lewis and many other places, I am not taking into consideration the war of 1812, which lasted, so far as the British taxpayer is concerned, from 1811 to 1815, and I could go on as to what she expended on roads and bridges in this country. The expenditure of the Treasury of Great Britain on our railways and public works would reach over £1,000,000,000. Therefore, when I hear the honorable member say that we do not owe Great Britain anything, I cannot understand how he can make such a statement, so utterly unfounded on facts."

Perhaps the Motherland is entitled to some little praise in "This Great Canada of Ours."

The widow's recovery from her grief sometimes depends upon the promptness of the life insurance company.

It isn't necessary to make a fool of yourself every time you have an opportunity.

The Upper One: "Come up and do it!"—Lustige Blaetter, Berlin.

Turnips For Beef Cattle

More Suitable For Fattening Purposes Than Mangles

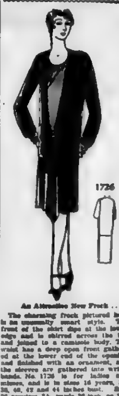
When roots are fed to beef cattle [illegible] should be [illegible] as, according to a new Dominion Experimental Farms bulletin on "Growing and Feeding Field Roots," they are more suitable for fattening purposes than mangels. The latter are better suited for milk production. Results of tests at different experimental stations show that turnips have a high value when fed to beef cattle, especially when no other succulent feed, such as silage, is available. When pulped [illegible] with cut or chaffed straw or poor quality hay they very much improve the palatability and quality of these coarse roughages. The bulletin, which gives a great deal of information on the cultivation of roots, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Menace To War Aviators

Discovery Of Deadly Gas Announced By Danish Inventor

A Danish inventor named Arthur Christensen claims to have made a remarkable discovery, which he contends will have devastating effects on airmen in the next war. He has invented an anti-aircraft gun which he declares will hurl into the air masses of concentrated gas. Airmen who fly into this gas screen will, he says, be paralyzed in their machines.

[illegible] has been tested by experts and they state that the tests have proved satisfactory. The gun is able to throw the gas to a very great height.



An Attractive New Frock . . . .

The charming frock pictured here is an unusually smart style. The front of the skirt dips at the lower edge and is shirred across the top and joined to a camisole body. The waist has a deep open front gathered at the lower end of the opening and finished with an ornament, and the sleeves are gathered into wristbands. No. 1726 is for ladies and misses, and is in sizes 16 years, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 3¼ yards 36-inch, or 2¼ yards 54-inch material, ¾ yard 27-inch contrasting, and 1¼ yards 27-inch lining. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Earl Haig's Visit To Jasper

Officially Opened Golf Course Two Years Ago

The news of Earl Haig's death, which was heard with sorrow throughout the British Empire, recalls to Canadians the visit the famous soldier paid to Canada two years ago. And this brings to mind the fact that it was Earl Haig who, on July 17, 1925, officially opened the Jasper Park golf course. Accompanied by Lady Haig, Brigadier-General J. A. Blair, Brigadier-General A. F. Home, Mr. Walter Pratt, General Manager, Canadian National Railways' Hotels, Mr. Stanley Thompson, the architect who laid out the course, and Col. Maynard Rogers, who was then superintendent of Jasper National Park, the Field Marshal inspected a group of mountain guides and park rangers and the crew manning the dining car of his train and then strolled on to the course and drove off the first ball.

The inspection, which took place on the road leading into Jasper Park Lodge, was unique in that most of the rangers and guides had ridden from 50 to 100 miles to meet the Field Marshal, and they were picturesque in the colorful frontier costumes. They were headed by Major Fred. Brewster, M.C. The great soldier addressed the men, who were all veterans, and told them how he was much touched that they considered it worth while to ride so far to meet him. He was presented with a pair of buffalo-hair chaps, and Lady Haig received a beautiful pair of Indian worked buckskin gauntlets.

Earl Haig, as might be expected, since he was at one time Captain of the Royal and Ancient Golf Club of St. Andrews, proved himself an exceptionally good player. His drives were long and always straight down the fairway and his work on the greens steady, with the result that he and Mr. Thompson, his partner, won, three up, against Brigadier-Generals Blair and Home. At the conclusion of the game, the Field Marshal expressed to Mr. Thompson his surprise at the manner in which the course had been hewed out of the mountainside and put in good shape in such a short time. He was delighted with the beauty of the mountain surroundings and he gave it as his opinion that the Jasper course would rank among the best in the world.

U.S. Embassy At Ottawa

Doubt Work On U.S. Legation Can Start In Less Than a Year

While negotiations practically have been concluded by the United States for the acquisition of a site for the legation offices in Ottawa, state departments officials doubt whether actual work on the building could begin in less than a year.

The site, facing the Canadian government parliament buildings and adjoining the Rideau Club on Wellington street, is considered one of the best in the Canadian capital. While the price to be paid was not divulged, it is known to run into six figures for the approximately 6,000 square feet involved.

Grain exports from the port of Vancouver for the current crop year to the end of January total 33,109,133 bushels. For the same period last year 16,386,496 bushels were exported.

An acre has one hundred and sixty square rods.

Some New Varieties Of Apples

Good Results Obtained From Cross Breeding At Experimental Farm

The Division of Horticulture of the Dominion Experimental Farms Branch has for many years been carrying on breeding work with different kinds of fruit and each season sees some new varieties of special promise produced. So far as apples are concerned it is the object of the Division to originate new varieties, the seasons of use for which will cover the whole year, and which will at the same time possess all the characteristics necessary to ensure popularity. The latest report of the Dominion Horticulturist, distributed by the Publications Branch, Department of Agriculture, Ottawa, gives descriptions of some of the most recently originated varieties. Among the most promising of the new apples is Cortstone, a Stone seedling which bears no marked resemblance to its parent, except in flavor. It is yellow, splashed with orange red, the predominate color being orange red, and is a nice dessert apple of attractive appearance. Its season is probably from December to March. Another new apple is Forwood, a cross between McIntosh and Forest, with a season from December 1 to March. It is a good, late keeping, sweet apple, attractive in appearance and resembles Forest considerably in flavor and shape. Fortosh, another McIntosh and Forest cross is a promising winter dessert apple of good quality and flavor. An interesting new variety which may be useful on the prairies, is Redman, a cross between Prince and McIntosh. It is large for a crab but below medium for an apple. It is, however, a handsome, dark crimson apple, resembling a deep colored McIntosh.

Food Shortage In Russia

Authorities Have To Take Vigorous Measures To Remedy the Situation

The shortage of flour, butter, eggs, soaps and textiles has reached such a serious stage in Russia that the authorities have decided to take vigorous measures to remedy the situation.

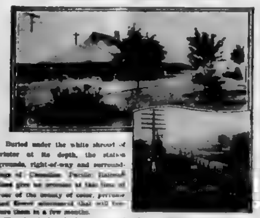
This situation, recalling the days of famine, has been attributed primarily to the grain shortage. The resignation of Alexander Petrovitch Smirnoff, commissar for agriculture, because of failure to manage the grain storage campaign which fell 2,000,000 tons short of the previous year despite increased harvest, was reported recently.

A slight improvement in the grain situation has been attributed partly to the recent visit of Joseph Stalin to Siberia, where he issued new instructions to the officials there in the hope of persuading the peasant farmers to send their grain to the markets.

British Comment On Budget

"When an Englishman reads the Canadian budget which provides for a reduction in taxation of nearly £4,000,000 including a ten per cent. cut in the income tax, he smiles, as one says, on the wrong side of his face," comments The Evening Standard. "Not that he grudges Canadians their good fortune, though he may perhaps envy their Finance Minister, but because he sees here a principle practised in every country but his own. This principle is simply that public expenditure is to be kept within the strictest limits the country's needs allow."

Beautifying of Station Gardens



Buried under the white shroud of winter at its depth, the station grounds, right-of-way and surroundings of Canadian Pacific Railway [illegible] give no promise at this time of year of the beauty of color, perfume and flower arrangement that will feature them in a few months.

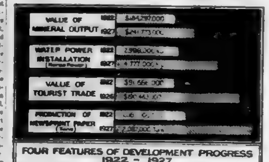
The horticultural department of the railroad, will during the next few weeks, distribute to its agents, section foremen and others for planting, several thousand seeds. At selected points special packets will be sent for growth under glass, thus producing an earlier display. Additions are to be made this spring as usual, to the stock of trees, shrubs and perennial plants which form the permanent basis of C.P.R. gardens.

In the territory north of Lake Superior, where a particularly hardy plant is desirable, the bulk of the display will be made by pansies. By far the greater part of the garden work is done in the spare time of the station agents, from the motive for love of gardening, pride in their surroundings and in competition for the numerous prizes offered for displays. Approximately 1,500 gardens are now maintained.

Many Factors Responsible For High Level Of Prosperity Enjoyed By Canada To-Day

Seldom has Canada's business outlook shown such a volte-face as has occurred in the last few years. Six years ago the Dominion struggled in the depths of depression. Today prosperity is at a high level, and the year 1927 has been authoritatively labelled as "the most expansive year in business enterprise that this country has ever known."

Many factors have had a hand in this about-turn—the improvement of world conditions; the series of good crop years; the re-adjustment of prices; the capacity shown by the Canadian people in the face of adversity.



FOUR FEATURES OF DEVELOPMENT PROGRESS 1922 – 1927

But, back of all these, the Dominion's business recovery has had the inestimable benefit of one special advantage. The Canadian people have been in the fortunate position of possessing a country with great undeveloped resources. They have not, in the same degree as the people of older countries, been compelled to wait and rely upon the revival of old-established industry and trade. They have been able to turn to undeveloped resources and to speed up the return to prosperity by the creation of new industries, new production and new trade.

Much has been said of the extent of Canada's [illegible] but it has probably been their variety, as distinct from their sheer extent, that has stood the country in greatest stead. New development has been versatile and widely diffused, not confined to one or two lines. And Canadian business has enjoyed a great, cumulative stream of fresh strength drawn from many different sources—from growth in forest industry, in water-power development, in mining, and in tourist trade which is largely attributable to the Dominion's scenic and other recreational resources.

While the comparative figures, for 1922 and 1927, of mining output, installed water-power, newsprint production and tourist revenue cover only four fields, they serve at least to suggest what a powerful and versatile impetus Canadian business has derived in the last few years from the extension of natural resources development.

Sport For the Angler

Four Million Fish Eggs To Stock Lakes Of Western Canada

Last year, between June and September, the fish culture branch of the Department of Marine and Fisheries, shipped over Canadian National Railway lines, a total of nearly four million fish fry or eggs. The exact figure was 3,637,000. The greatest number went from Fort Qu'Appelle to Biggar, Sask., where the Lizard and Wilson Lakes were stocked with pickerel, nearly 1,000,000 of them. The month of June was the heaviest and the species most commonly distributed was pickerel. In addition to those which went to Biggar, pickerel was sent from Fort Qu'Appelle to Hyas, to stock the Lady and Elbow Lakes, and from Winnipeg to Kamsack, Ninette, Roblin, Erickson, Glenora, and Anguesville, for Madge, Pelican, Mitchell, Clear, Rock, Fish and Goose Lakes. In June, Kamloops sent Chilliwack for Cultus Lake, 60,000 Kamloops trout, and Prince Rupert sent 100,000 of the same species to Smithers for Lake Kathlyn. Rainbow trout went from Calgary to Edson, for distribution in the waters of Sundance, Hornback, Trout, Wolf and Edson Lakes. Fort Qu'Appelle sent two shipments of salmon trout to North Battleford, a total of more than 200,000 eggs. Brown trout and cut throat trout were shipped to Jasper. Milnes Landing and Colwood, from Calgary and Cowichan Lake. In July the only shipment made was 15,000 rainbow trout from Calgary to Pears for Carrot Creek. August was given over entirely to perch and with one exception (Regina), the eggs were sent from Fort Qu'Appelle. The odd thing was that while some of the Qu'Appelle shipments went to Regina, the one Regina shipment was for Fort Qu'Appelle. Most of the perch were for Saskatchewan lakes. In September, Fort Qu'Appelle sent 1,750 perch fry to Senderson and York Lakes, the only shipment in that month.

Extend Work Of Travelling Clinics

The travelling clinics announced by the Provincial Department of Health, consisting of three nurses, two doctors and a dentist, to visit rural districts in Northern Alberta, have been so successful that it is proposed to extend this work to cover the entire province.

After having given more than 60 years of her life to agriculture a French woman was awarded the Cross of the Legion.

"When I hit a man he remembers it."

Discuss Price Of Apples

Reason For Spread In Price In East Is Given In House Of Commons

Some interesting information as to the spread in the price received by the producer of British Columbia apples and that paid by the consumer in Ottawa, was given in the House of Commons in answer to a question by Grote Stirling (Conservative, Yale).

Mr. Stirling said that the producer in British Columbia received $2.25 for a box of extra fancy Delicious apples, containing about 140 apples. The consumer in Ottawa paid, he said, 7½ cents a piece for these apples which was equivalent to $10.50 per box. He asked for an explanation of the spread.

Hon. W. R. Motherwell, minister of agriculture, gave details with respect to fancy Delicious apples as prices for the extra fancy were not obtainable. The shipping point price of the apples was $2.45, the freight to Ottawa 75 cents, heating charges 10 cents, brokerage 3 cents, making a total of $3.33. The wholesale price to the retailer was usually $3.75 a box and the retail price to the consumer usually $4.50 a box.

Mr. Motherwell pointed out that when apples are "sold by the specimen," the retail price is higher, ranging from two apples for 25 cents to five apples for 25 cents, according to the size. The average was four for 25 cents.

Menace Of the Future

Because an average automobile uses up 100 times as much air as a human being and emits 400 times as much carbon dioxide, it is prophesied that in the future, congested population centres will bar them in the interest of public health and all transportation will be by electric power instead.

SUNDAY SCHOOL LESSON

MARCH 4

JESUS AND THE TWELVE

Golden Text: "Go ye into all the world and preach the gospel to the whole creation." Mark 16:15.

Lesson: Mark 1:16-20; 3:13, 14; 3:13-19; 6:7-13, 30.

Devotional Reading: Romans 12 1-8.

Explanations and Comments

I. The Choice Of the Twelve, 3:13, 14. One day Jesus went up the mountain to pray. He continued there all night in prayer, Luke tells us. Then as companions for Himself and as messengers to the people he chose from among all His followers a little group of twelve men. The number was a tribal and symbolical, a clear reference to the tribes of a new Israel. And that choice of twelve Christ did two things: (1) He made stupendous claims for Himself. Every Jew knew in a moment what the choice of twelve implied. It implied that Jesus was the promised and long expected Messiah. It meant that he was the fulfilment of ancient prophecy. And (2) it provided the apostles themselves with a constant stimulus to devotion and support of faith. It carried their minds back to the promises."—J. D. Jones.

They were ordinary men, these twelve, men from the ordinary ranks of life. Four of them were fishermen, one was a tax-collector. It was the power of the gospel that built up its mission on the lives of ordinary men. G. K. Chesterton says, It took ordinary men and made of them apostles, missionaries, evangelists, martyrs.

"Jesus found twelve ordinary men and discovered extraordinary capacity in them. They had had little opportunity. He became their opportunity. They did not have a great past. He saw that they could have a great future. He judged them at the spot where the Infinite touched them. He lived with them. He talked with them, and then He gave them something to do. He knew that only when listening is turned into action does it become character. He made them heralds of the Kingdom, and they grew in stature even as they announced its coming."—Lynn H. Hough.

CANADIAN SERVICE Cunard and Anchor-Donaldson LINES

Too Many Underground Rooms

200,000 In London County Have Ceilings At Street Level

A recent census in one London borough alone reveals the existence of 7,000 basement rooms, of which 1,500 have ceilings at street level and are death-traps, therefore, if floods come. It is estimated that there are 250,000 basement rooms in the County of London.

Of course, not all are used as sleeping apartments, but the majority are habitations for day use and are let to people who cannot yet find other homes. One can scarcely call this condition of things "shameful." It is an unwholesome legacy of the war, and borough authorities, in sheer mercy, are compelled to turn a blind eye to the law until arrears of building, particularly of workmen's dwellings, have been wiped out. They cannot turn the people into the street.

Why is Red Rose Tea so fresh and flavory? The answer is that it is a blend of the choicest, juiciest leaves, picked when only ten days old—and sold by your grocer in clean, bright aluminum. No tea can be expected to retain its richness and strength unless packed in this modern metal container—the only package worthy of Red Rose quality.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XIX.—Continued

The Englishman stretched out his arms dramatically. His voice quivered like a violin string. "The British Empire is my country," he said; "I was born beneath the British flag and so were my people for generations back. I love it. The British Empire is in trouble and has called. I do not reason, I go. It's like your mother calling—would you wait to question if your mother called? If you knew your mother was attacked by a bully would you hang back to see first if she had been to blame in any way—would you? My mother couldn't be wrong—not to me. That's what I mean."

Helmi was coming in from the kitchen with the dessert on her big tray. She paused, arrested by the strange voice speaking with such terrible directness.

Bill Larsen had not stopped eating [illegible]

and he's a good man, ready to fight for women and children."

The men were gathered in a knot around the injured man, who lay white and still, his head resting on Helmi's knee.

"Bring me water!" she cried, "and stand back."

Bill Larsen sauntered out jauntily, biting a disk from his plug of chewing tobacco. "No man can slap my face and feel as good as ever right after," he said. "Damn him and his British Empire."

Mrs. McMann was diplomatic. Bill Larsen was a boarder, regular and sure, paid in advance. Besides, he came from the States, and from Nebraska. "Bill, maybe, is too long-way," she said, "but sticks and stones may break your bones, but calling names won't hurt you." The Englishman struck the first blow, so he will have to take what's comin'."

QUEEN GREETS
MRS. WARNER AS
SON'S NEIGHBOR

When the party of Canadian farmers touring Britain on their overseas marketing travels were entertained at Buckingham palace, a gleaming little story of the reception appeared in the London Sunday Pictorial. Queen Mary had an especially warm spot in her heart for the visitors from Alberta in which province lies the Prince of Wales' ranch. Here is the item:

"Have you seen my son there?" was the question regarding the Prince of Wales which the Queen put yesterday to Mrs. Warner wife of Mr. D.W Warner who is a farmer in Alberta, "Mrs. Warner was at Buckingham palace when the King and Queen received the Canadian farmers who are touring Great Britain.

"Mrs. Warner was enthusiastic over her reception by the queen. 'Her majesty, she said, shook my hand and gave me a charming greeting

"'I was very much touched and impressed by her motherly sympathy about the Prince of Wales.

"'I told her I had seen the prince and that we felt very much honored on that account. She seemed quite pleased and was very kind to us.

"The king extended a hearty greeting to the farmers, who went to the palace in bright red coaches and touring ordinary clothes. The party remained for nearly an hour and had tea."

MOTHER AND DAUGHTER BANQUET GREAT SUCCESS

On Tuesday night of the week, the Mother and Daughter banquet of the C.G.I.T was held in the United Church basement rooms.

The tables filled and decorated by willing hands, presented an attractive and appetizing appearance, and it was not long before full justice was done to the good things set upon them.

Ruth McLaughlin was toastmistress and ably carried out this difficult task.

Miss Rosie Burnett proposed the toast to "Our Mothers," in an able and pleasing manner, and this was responded to by Mrs. Ralph Davies. The toast to "The Church" was splendidly proposed by Mary Hill, and responded to by Rev. Gordon. Ruth Purdie took care of the toast to the C.G.I.T., explaining its aims and objects in a very intelligent way. She was followed by Miss Nix, secretary of the Girls Work Board for Alberta. Miss Nix gave a very inspiring address and one that will be long remembered by both mothers and daughters.

During the evening there was group singing and at the close Mrs. McCauley moved a vote of thanks to Miss Nix for her visit and address. This was carried unanimously.

CHRISTENSEN AND NORDEN ELECTED

At the Cornhill Municipal District elections held on Saturday last, Wm. Christensen was elected over Wm. Lee, who, however, ran him a close second. Mr. Christensen was elected councillor for division 1.

In division 5, Mr. W. C. Norden defeated his opponent, Wm. Thompson.

The following is the official count.

Division 1

Wm. Christensen	70
Wm. Lee	61
Majority for Christensen	17

Division 4

A. J. Williams (unopposed.)	
Division 5

Maintain The Quality Of Alberta's Crop

BETTER SEED

BETTER YIELDS—BETTER GRADES—BETTER PRICES

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province, is urging the use this spring by farmers throughout the province of

HIGH QUALITY CLEAN, TREATED SEED GRAIN

in order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by

1. Using registered seed wherever available.
2. Using at least high quality commercial seed.
3. Having seed tested for germination and purity.
4. Treating seed for smut.
5. Thoroughly cleaning all grain intended for seed.
6. Seeding only varieties of recognized quality and variation suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

LOCAL and PERSONAL

Mrs. Agnew and son, who have been wintering in the east, returned home on Tuesday night's train.

Mrs. Lori of Edmonton, visited friends and relatives at Tofield for a few days this week. While here she negotiated the sale of her house in town, to Mr. Thodeson.

Mr. Wallis, the shoemaker, was a week-end visitor to Edmonton.

Mrs. Constantine spent the week-end visiting friends in Camrose.

Mrs. Calvert and Mrs. Blewett visited the last week in Edmonton.

Miss Minnie Weed spent Sunday with Miss Argue in Edmonton.

Miss Barbara Carlisle of Walkerville spent Saturday at Tofield, returning to Wainwright on Sunday morning.

Mrs. Firth, Mrs. Geo. Cookson and Mrs. Gordon are attending the Presbyterian convention being held at Wainwright this week.

Mr. and Mrs. Spooner spent Sunday in Edmonton.

Frank Wood, now of Viking, spent Sunday at the home of his parents.

Visitors to the city last week included Messrs. Geo. McLaughlin, W. Ballamy, W. Hunt and Dr. Lee.

At the annual meeting of the egg and poultry pool, on February 27th, Walter Bellamy was appointed head shipper.

Mrs. T. Herndon, who has been visiting in Calgary and Edmonton, returned on Wednesday.

Mr. S. Bethel is reported as improving since he was taken to the hospital at Lamont a week ago.

The C.W.L. will hold a silver tea and sale of home cooking in the basement of St. Francis' Church on March 17th, (St. Patrick's Day) from 2.30 to 6.00 p.m.

Attention is drawn to the sale advertisement of Mr. R. D. Miller, which is appearing on page four. Mr. Miller is holding a sale of all his farm stock and machinery as well as his household goods. The sale takes place on March 14th and F. C. Ball is the auctioneer.

On the 13th, near Ryley, J. D. Hanson will carry a sale consisting of a full line of machinery from an exceptionally well equipped farm. Also a nice line of horses and cattle and household goods.

At time of going to press it is not yet known who will furnish the oyster supper for the curlers, the president's gang or the vice-president's gang. Some very good and interesting games are being played and zest is added to them as an oyster supper with the other fellow paying for it is something to look forward to.

Mr. and Mrs. Eaton entertained a number of relatives to dinner on Sunday. The gathering was in the nature of a birthday party. Several members of the family having birthdays within a few days of that date. Those present were Mr. and Mrs. Rea Phillips and family, Mr. and Mrs. Emery Phillips and family, Mrs. Van Buskirk and daughter, Grace, Mr. J. C. Phillips and Mr. and Mrs. Owen Eaton.

The Misses Myrtle Bethel and Nettie Neal spent Saturday and Sunday in Edmonton.

Mr. and Mrs. R. C. Phillips visited Mr. and Mrs. Oscar Barnes of Kethcamoot district on Sunday.

The many friends of Mrs. T. E. Rook will be interested to know she is getting on so well as can be expected after her recent operation.

U.F.W.A. NOTES

The regular meeting was held on Saturday March 3rd. Only eight members were present.

The absent members missed a real treat in failing to hear the excellent paper given by Mrs. Hulme and Mrs. Dobbs on Scottish cookery and Periodicals for the Farm, respectively. Both papers were very instructive and showed careful study and preparation on the part of the ladies presenting them.

The next meeting will be held on Saturday March 10th. The roll call will be answered with "Ways of Helping Lines and Cloth. Mrs. Ball will give a demonstration of making artificial flowers. The municipal building is booked and 2.30 p.m. is the time. All farm women welcome.

WARNER EPIC SHOWS
HOW THE AUTO CAME

"The First Auto," the exciting, human drama, presented by Warner Bros., featuring Barbara Oldfield and Patsy Ruth Miller and directed by Millard Webb, opens at the Warner Theatre on the 3rd order and the birth of the present era.

What happened in Maple City in the consternation of what was happening to thousands of small towns all over the world and not so long ago but that many of us remember. Thousands of good horse lovers fought the advent of the horseless carriage. Legends saw the first ones introduced by their rivals, thousands saw their nose woe over to the new contraption and even enrolled in the fight.

The buggy ride gave way to the auto ride. Horse-racing, the sport of kings, gave way to auto racing, and these thousands at last bitterly changed their ways to conform to the new conditions which the automobile brought, or went down in defeat, defiant clinging to "the good old things."

"The First Auto" comes to the Variety Theatre next Saturday.

AMISK CREEK

A nice surprise was held last Sunday for Mr. and Mrs. E. Bakhelong at the O. Phelan home. In the afternoon a large crowd gathered, several families from Hardo were present and some from Ryley, Miss B. Benson from Viking and Mrs. P. Haugen and daughter and Mr. Edmor Johnson from Tofield were also present. Mr. and Mrs. Bakhelong received as a token a case of money and many good wishes for their future happiness. A beautiful supper was served and the time was spent in visiting till it was time to start for home. Mr. and Mrs. Bakhelong leave for Grande Prairie this week where they expect to make their home.

Mr. and Mrs. Anderson and family arrived from the States last week. They have rented a farm from Mrs. I. H. Olson and have already moved on there. We also take the opportunity to wish them welcome to our neighborhood and hope they will feel at home here.

E. A. Moon shipped a car of cattle and hogs from Ryley to the pool today, Thursday.

Arnold Berg took his Dad's old tractor to Tofield last Friday and we notice he had a new one coming home.

Mr. Standford was around claiming seed wheat in this vicinity. He moved from Kaskal's to Erickson's

The Misses Lillo and Ruby Berg has been sick with the flu, but are now getting better.

TOWN COUNCIL

A regular meeting of the town was the last of satisfactory.

Council was held on Monday evening, the following named councillors present. Councillors Bruce, Swift, Chapman, Bellamy, Hay and Rogers.

Councillor Bruce was appointed deputy mayor for the next meeting three months.

The following standing committees were appointed to act during the present municipal year, the first named to be chairman of his respective committee:

Finance, Councillors Swift and clay.
Health, Relief and Cemetery, Councillors Hay and Rogers.
Fire, Water and Light, Councillors Rogers and Bruce.
Public Works, Councillors Chapman and Swift.

(continued on page 4)

CHEVROLET CHASSIS DEMONSTRATION ON TUESDAY NEXT

A chassis demonstration of the Chevrolet car is advertised to take place at the Variety Theatre on Tuesday next, March 13th. An expert from the Chevrolet factory will be present and will have with him all the necessary equipment to make a complete and interesting demonstration.

Moving pictures will also be utilized, special films, taken at the Chevrolet factory, will be shown, and as interesting as well as instructive proceeding is assured.

Swift & Emery, local dealers for this car, are giving five Eversharp pencils, to be drawn for by those registered at the demonstration.

LETHBRIDGE

Mr. Dilleau and her two children, of Viking were the guests of Mr. and Mrs. J. Lesky, for a few days.

Mrs. M. Swain is on a visit to friends in Edmonton.

Mr and Mrs. W. Fontaine and baby boy of Rossland, are visiting Mrs. Fontaine's parents, Mr. and Mrs. J. Lepine of this district.

Mr. Leon Lepine left last week on a visit to Camrose.

Mr. Walter Kortzman arrived here this week to work with his father, Mr. C. J. Kortzman on the railroad here.

The roads being bare in spots and icy in others, practically no hauling, that is of loads, is being done both, so we think it would thaw good and clear the roads.

Mr. L. Hooper was down on a week end visit to his parents, from Edmonton.

Mr. Arthur Williams formerly painter here, now of Bruce, visited Mr. and Mrs. J. Lesky last week.

KETHCAMOOT

Mrs Wm. Lee and Mrs. B. Wildman were pa-ssengers to Camrose on Monday.

The H Lawson and S Stirrit families attended the funeral of the infant son (twin) of Mr. and Mrs. Donald Campbell at Round Hill on Tuesday.

Mr. A P. Shultz made a business trip to Edmonton the middle of the week.

Mrs. G. R. Owen returned home from Viking on Monday. They are making preparations to ship their furniture and implements to Vilna, and will drive the horses over land.

Messrs Wilfred Lee and Lorne motored to Edmonton on Wednesday They were accompanied home by their sister, Viola, who has finished the course at the Alberta College

Mr. and Mrs. B. C. Phillips were Sunday guests of Mr. and Mrs. Oscar Barnes.

Mr. and Mrs. Hanson have moved to the W. A. Mitchell farm and are living in the small house.

Mrs Harrison and children are visiting her mother at Lamont.

The ladies of the M.A.S. are planned over the presentation of a buffalo pillow from the Night-Flyers. C.J. C.A. in return for a donation to the Soldiers' Fund at Christmas time

Mr and Mrs. Leslie McGinitie entertained a crowd of friends and neighbors to a card party on Wednesday evening, seven tables playing. Whist prizes went to Mrs. John Brown and Lauren Gill. Miss Mable Lawson and Maurice McGuinn. A nice lunch was served by the hostess, after which the guests departed for home, thanking the host and hostess for an enjoyable evening.

S. I. NOTES

The Institute will hold their monthly meeting on Tuesday, March 13th. Everyone come and spend a social afternoon. Each member is expected to give a hint for our programme so that we may have many pleasant meetings during the year.

The institute is planning a card party, the date of which will be announced later.

Merchants desiring printing done can be well served at the Mercury Office. We have good equipment and have had the necessary training to give your work the care which it should have. Our prices too, are as low as city prices, while on the whole the quality of the stock used, especially for stationery, is better. We offer you a complete printing service, should there be anything we are unable to do, we can save you money and time by handling your order.

Cleaning up the West

Above—The C.P.R. train of 40 cars carrying the record shipment of washing machines and pumps ever to be made in Canada. Below—Some of the 1,000 people in Fergus, a little Ontario town of 2,500 people is making a large contribution in the cleaning up of the West. Recently the whole community turned out to see the despatch of a special train of 35 cars, double-headed with engines power here for the West with the largest consignment of washing machines and pumps ever to be made in Canada. There were editors, boy carriers and bankers, but the bulk of the crowd there represented individual shipments were pumps and washing machines which had already been sold by Beatty Brothers in farm and rural communities. Fifteen hundred merchants in Western Canada participated in the shipment which was handled as a special train by the Canadian Pacific through to Vancouver. Cars were dropped at Winnipeg, Calgary, Saskatoon, Regina and Edmonton, distributing being fairly general.

The large number of pumps going forward suggests that the Western farmer has decided to carry on home water if his householder will do no more washing.

Where Is The Money To Come From?

[illegible] Legislature [illegible] the people of Canada are having [illegible] public finance and public administration [illegible] and the annual financial statements [illegible] with the demands which are [illegible] are [illegible] spelling [illegible] of revenues to meet expenditures, and [illegible]

[illegible] of Government and the Legislatures members of the [illegible] some of [illegible] commercial institutions, organizations, social reform and betterment societies [illegible] In the [illegible] deputations to [illegible] they were [illegible] representations [illegible] existing taxation and [illegible] with [illegible] were larger [illegible] institutions all of which call for larger expenditures and the creation of new administrative services.

[illegible] which all Governments are thus confronted, and [illegible] feared [illegible] enough [illegible] these deputations seem to labor under the [illegible] that Governments have some magic means of finding it by means of taxation.

[illegible] there is a persistent and growing demand [illegible] amounts be spent in the construction of good, all-[illegible] roads must be maintained [illegible] every [illegible] annual charge for upkeep [illegible] there is the further complaint that automobile [illegible] too high and should be reduced, while municipalities are ever demanding [illegible] while the Provincial Government shall build and take over the maintenance of roads, the auto licence fees should be divided with the [illegible] in other words, the Government should spend more [illegible]

[illegible] The people of Canada demand the establishment [illegible] Old Age Pensions. The Federal Government agrees and [illegible] per cent of such pensions provided the Provincial [illegible] fifty per cent. British Columbia, Saskatchewan [illegible] Manitoba [illegible] All parties in the Legislatures are [illegible] In Manitoba the Government proposes the imposition of an additional tax in order to raise the money wherewith to pay [illegible]

In Saskatchewan [illegible] recent months the Government has been asked to provide for a free consultative clinic, for a school for the blind and the deaf, for an institution for the care of juvenile delinquents, larger facilities for the training of teachers, extension of the educational system, another [illegible] a large extension of the road building program [illegible] of roads, etc., etc. The Government [illegible] to a number of these requests and to [illegible] funds proposes a tax on gasoline. This meets [illegible] a demand is made that the auto licence fee [illegible] which would be to largely offset the [illegible] from the gasoline tax and leaving the [illegible] these very things the people [illegible]

[illegible] a general attitude on the part of people, and the [illegible] services of one kind and another, the Provincial Treasurer of Saskatchewan took occasion in his budget speech to point [illegible] "there ain't no such animal" as a "free" service. Any service it not [illegible] paid for by the state and if the state pays [illegible] the state's bills must be secured from [illegible] taxes.

[illegible] our Canadian institutions and organizations [illegible] training for such responsible posts [illegible]

Alberta Oil Development

Royalite No. 4 Continues To Be the Largest Producer In Canada

[illegible]

The [illegible] happens [illegible]

Agricultural Implement Production

Production in the agricultural implement and machinery industry in Canada was valued at $33,369,214 in 1926 being 34 per cent. ahead of the previous year. Of the 69 firms reporting 45 were located in Ontario, 13 in Quebec, 4 each in Manitoba and Alberta, and 1 plant each in Prince Edward Island, Saskatchewan and British Columbia.

Marie: "Have you had any success in your work with cannibals?"

Missionary: "Yes, we've taught them to eat with knives and forks."

Music Teacher: Who can tell me the national air of Italy?"

Bright Boy: "Garlic."

Too Much ACID

Many people two hours after eating suffer [illegible] as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Western Canada Aviation

Three New Planes Are Under Construction In Winnipeg

Application for a charter has been made by the Canadian Aircraft Company of Winnipeg incorporated at $50,000. This company which has already three of its new Mallard type planes under construction in its Lombard street shops, expects to find a growing market for airplanes in Western Canada. The machines are 3-passenger single-bay biplanes with Rolls Royce engines, costing $3,300.

Commercial aviation is making progress at Winnipeg. The Western Canada Airways has placed an order for six more Fokker aeroplanes and when delivery is made will have a fleet of twelve planes.

Should Inquire In Advance

Canadians Going To U.S. Would Do Well To Investigate Working Conditions

An Eastern paper recently had an interview with a gentleman who had spent several months in California. The statement was made by him that there was a great deal of unemployment in that much-advertised state.

A short time ago there was also a parade of unemployed in the city of New York. The paraders carried banners worded, "We Want Food, Not Figures," "Give Us Food and Shelter," "We Want Food, Not Words."

The reports from the labor bureau show that these paraders were not out merely for the sake of taking exercise or having a good time. The official returns show that there are 215 men for every 100 positions that are vacant. From every part of the state and country the report is very much the same.

Despite the enormous wealth of United States, economists claim that there is as much unemployment there as there is in Britain.

These figures, we believe, should be placed fairly before the people of Canada, especially for the benefit of those who may be thinking of crossing the line without having made ample inquiry in advance.

Orsen, a town in Sweden, is free from taxes, due to the fact that the preceding generations planted trees which yield fruit enough to take care of taxes.

Internally and Externally It Is Good. The crowning property of Dr. Thomas' Eclectric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Church fires are becoming rather common. Is there too much friction in our churches?

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Treat Colds 2 Ways With One Treatment

RUBBED on throat and chest, Vicks does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

VICKS VAPORUB

Byrd Has Practically Completed His Plans

Expects To Leave For South Pole In September

Commander Richard E. Byrd has practically completed his plans for his attempt to fly over the South Pole. He said he expects his party will leave New York on September 10 and that they will not return for at least eight months and possibly a year and a half.

The party will consist of 53 men, Commander Byrd said, and among these will be 12 scientific specialists, who will be assigned to collecting data, and three Eskimos. The ship will carry three aeroplanes.

"We expect to start the $4,000-mile trip on the wooden ice ship Samson which is now en route to this country from Norway," Commander Byrd said.

The object of the expedition is scientific and there should be plenty of work for the dozen specialists who hope to take part with us.

"There will be a year and half's supply of food on board to provision for any untoward incident that might make it necessary for the personnel to spend the Antarctic night before returning."

In 1927 a total of 19,517,216 pairs of boots, shoes and other footwear were made in Canada in the 178 factories in the Dominion.

RICH, RED BLOOD A REAL NERVE TONIC

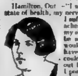
The Source Of All Nervousness Is Weak, Watery Blood

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Deane, R.R. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a general run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Only one child out of every three in London obtains any education other than that given in the elementary schools.



Does Ill Health Detract from Your Good Looks?

Hamilton, Ont.—"I was in a rundown state of health, my nerves were bad and I suffered from backaches and pains in my side, which would be so severe that I would get weak and have to lie down. I could not eat without being distressed. I took the advice of a relative I started to take Dr. Pierce's Favorite Prescription and it relieved me of all my distress, and I do not suffer in any way from any of the above conditions. I have a good appetite and my nerves are in splendid condition. I am strong and healthy in every way."—Mrs. George Turansky, 371 Ferguson Ave. North.

Sold by dealers. Fluid and tablets. Send 10c for trial pkg. tablets to Dr. Pierce's Laboratory, Bridgeburg, Ont.

THE ART OF MAKING TEA

What To Do and What Not To Do To Get the Best Results

Mr. Spalding Black, on the staff of the Salada Tea Company, recently prepared an interesting leaflet entitled "The Art Of Correct Tea Making." Approximately 26,000,000 cups of tea are consumed every day in Canada, and yet it is doubtful if one-tenth of this number is prepared with the necessary care to bring out the full flavor of the tea leaf so that this stimulating and refreshing drink may be thoroughly enjoyed. The following is from "The Art Of Correct Tea Making."

"Tea is one of the kindliest blessings of Nature. In its comforting indulgence one can lose the worries of the day and forget the fatigue of effort.

"The full joy of a cup of this gracious beverage can only be reached when fine quality tea is used and ceremonial care exercised in its preparation to draw from each tiny leaf the essence of flavor and refreshment with which it has been endowed by Nature.

"In the countries of the East, where the drinking of tea has been enjoyed for a thousand years or more, the subject of preparing the leaf for consumption has become a fine art and a ceremony, but the full, delicious refreshment and healthful stimulation may be extracted from the fragrant tea leaves if the following rules are followed exactly.

"Rule No. 1: The best quality of tea must be used. The tea also must be fresh to yield the full goodness.

"Rule No. 2: The quality of the water used will affect the flavor of the beverage in the cup. Draw fresh cold water and bring it to a hard 'bubbly' boil. Never use water that has been boiled before. Sometimes chlorine put in water to purify it will completely change the flavor of the tea. The water is to blame, however, and not the tea.

"Rule No. 3: It is proper that only a crockery or china teapot be used, never one of metal or any other substance, if the pure and delicious flavor of the tea is to be drawn forth. Tea likewise should never be enclosed in a metal tea-ball.

"Rule No. 4:—The teapot must be scalded out with boiling water, and while it is warm place in it one level teaspoonful of tea for each cup required.

"Rule No. 5:—Now pour the boiling water on the leaves. Allow to steep in a warm place for five minutes. Stir just sufficiently to diffuse the full strength of the tea. Then pour the liquid off the leaves into another heated vessel, unless served immediately. If poured off in this way, the tea will not take on a bitter taste which even the finest tea will do unless prevented from over-steeping. Tea made according to these rules will be fragrant, delicious and completely satisfying."

Recipes For This Week

(By Betty Barclay)

WINTER SALADS

Cherry Salad

Chill thoroughly equal parts of stoned oxheart cherries, cut marshmallows and pecans. Mix with whipped cream.

Candle Salad

Place slice of pineapple on a lettuce leaf. Cut a small banana in half crosswise. Set upright on pineapple. Pour salad dressing sparingly on banana to represent wax, and bring red cherry on top for the flame.

Stuffed Pear Salad

Fill a canned half-pear with well-seasoned cottage or cream cheese. Place pear cut side down on lettuce leaves. Stick a whole clove in the stem and sprinkle with paprika to give the appearance of a ripening pear. Serve with whipped cream or other dressing.

GALANTINE

1 pound round steak.
1 pound raw ham.
2 eggs.
1½ cups bread crumbs.
½ teaspoon nutmeg.
½ teaspoon pepper.
1 teaspoon salt.
Juice 1 lemon.
Grated rind of 1 lemon.

Put the meat through a food-chopper; add eggs, well beaten, and remaining ingredients; pack into a well-greased breadpan, cover with buttered paper, and steam four hours. Serve cold, thinly sliced.

Pilots Are Well Paid

Directing Ships Brings Average Earnings Of Over £1,000

There is a story of a woman on board a ship who, on hearing that the pilot was about to be dropped, remarked, "I suppose once he's set the ship off in the right direction, there's no more steering to be done"!

She gave the pilot credit for even more than he can do. But his job is an important one, and during the last year a considerable proportion of the 31 Port of London pilots had gross average earnings of over £1,000.

Minard's Liniment kills warts.

Denmark was one of the first of the European countries to start factory inspection by women.

Mount Amery

Mountain In Alberta Named To Commemorate Visit Of Secretary of State For the Dominions

To commemorate the visit of Col. the Right Hon. L. C. M. S. Amery, Secretary of State for the Dominions, a mountain in Alberta, having an elevation of 10,900 feet, has been named Mount Amery by the Geographic Board of Canada, with the concurrence of the Province of Alberta. The mountain overlooks the junction of the Alexander River with the North Saskatchewan, from a point just south of Alexander.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Youre till the pupils in my eyes play on the drums in my ears!

On fishing trips take Minard's.

When screwing eyes into the end of brooms, mops, and so on, to hang them, dip the screw into glue before inserting them permanently and they will never come out.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for Fletcher's CASTORIA

THE MERCURY, TOFIELD, ALBERTA

DUNNING REPLIES TO CRITICISMS OF THE BUDGET

Ottawa.—Hon. Charles Dunning, minister of railways, replied in the House to conservative criticisms that in announcing reductions in the net debt, the minister of finance had not taken into consideration Canadian national bond guarantees.

Mr. Dunning's speech was made in continued debate on the budget. From the Conservative side, Col. Cantley, of Pictou, objected to the budget because he said, it failed to safeguard Canadian industry, and H. C. Hocken of Toronto West Centre urged child immigration, criticizing in this regard the action of the immigration department in regard to Barnardo boys.

Mr. Dunning, in the course of his speech, said critics sought to make it appear that the accounting system had been changed. The fact was that the general form now followed in the estimates originated with the Conservative government in 1921. The government's guaranteed loans of $61,000,000, not one dollar of which was taken into account in the net public debt.

"Was the present method a correct and sound business procedure?" Mr. Dunning submitted that it was and that it was followed by the provincial governments of Canada, in carrying on similar undertakings.

"What is the objective of these attacks?" asked Mr. Dunning. "Their object is to deprive the minister of finance and the government of the credit of having reduced the net debt by $[illegible]." But the fact remained that the taxpayers of Canada were now paying interest on $106,000,000 less and the Canadian National was paying interest on its obligations to the public.

[illegible] which had come from the Conservative side of the House had been "The old plea for higher and higher protection," Mr. Dunning continued. "The one remedy the Conservatives have for any disease, real or imagined of the body politic, is higher protection." Since this was the case why had the Conservatives not put the word protection in their amendment. That amendment was being used in Western Canada to support the contention that the Conservative opposition had at least abandoned the principle of protection.

Speeches of the opposition members, Mr. Dunning thought, were good advertising for the United States. They emphasized the prosperity of that republic at the expense of Canada. There would not be so many Canadians going across to the United States if the Conservatives did not depict it as such an attractive place. As a matter of fact, there had been a growth of unemployment in the United States and a decrease of it in Canada.

Mr. Dunning gave figures in support of this statement. No observer, he said, would argue that the American farmer was in a better position than the Canadian.

Oldest Motor Car For Sale

French Model Of 1891 Still In Working Order

Paris.—The oldest motor car in the world, built nearly forty years ago and still in working order after having covered close on 200,000 miles, is up for sale by auction. It is a one-horse power Panhard with a chain drive and iron tires. It made its first run in 1891, and the engine was taken down and completely overhauled in 1912. That is the only occasion on which it has been in the garage for repairs. The owner of the car is Abbe Gavois, the worthy village priest of Belloy Saint Leonard, in the Somme department, who bought it in 1895 for the sum of $244 and has used it ever since. Several times he has exhibited it in Paris at the Motor Salon, driving it down the Champs Elysees amid the stream of traffic of modern luxury cars.

Abbe Gavois wants to build a new church in his village in the old war area dedicated to St. Christopher, the patron saint of motorists, and he has confided the "old bus" to the Automobile Club of Picardy for sale to the highest bidder, the product of the sale to be used towards the building of the new church.

Aviators Reported Safe

Winnipeg.—Flying Officer A. Lewis, Winnipeg, and Flight Commander Terry, attached to the Hudson's Straits survey expedition, are safe, according to a message received here. The aviators had been missing since February 17.

Predicts B.C. Will Use Coal Resources

Cranbrook Member Believes Oil and Gasoline Will Be Manufactured In Province

Victoria, B.C.—British Columbia will some day manufacture all its oil and gasoline from its vast coal resources, in the opinion of N. A. Wallinger, Cranbrook member of the Legislature and a veteran mining man.

"We should follow up the use of pulverized coal as a fuel and the use of coal for gasoline and fuel oil," said Mr. Wallinger. "Experiments already made indicate that the idea is not a dream but a practical opportunity to utilize natural resources at present hardly realized. British Columbia, self-contained in the matter of oil and gasoline, would become one of the richest industrial zones in the world."

Mr. Wallinger deplores the fact that few great mines have been discovered in British Columbia during the past 20 years. "The prospector is not encouraged as he used to be. Most of the prospectors I run across these days are 60 years old, or older."

Trade Barometer Rising

Trade and Manufacturing Reported On a High Level

Ottawa.—Canadian business got off to a good start for the current year. Out of the nine indicators of conditions for the first month of the year which are reported by the Dominion Bureau of Statistics eight showed Canadian trade and manufacturing were on a higher level than they were at the opening of 1927.

In the table which follows the state of the index for the corresponding month last year is taken as 100 and the latest index for the present year is given as a percentage on that basis. The results are:

Employment, 106.
Pig iron, 128.
Steel, 142.
Bank debits, 120.
Bank clearings, 128.
Car-loadings, 108.
Imports, 101.
Exports, 96.

The employment figure is that reported to the bureau for the first of February. Car-loadings are for the mid-week of February. All the other figures reflect conditions during January.

Think Banking System Could Be Improved

Parliamentary Committee Is Preparing To Start Work

Ottawa.—A decision to call the Deputy Minister of Finance as the first witness was reached at the meeting of the parliamentary committee on banking and commerce.

The committee has before it a resolution moved by J. S. Woodsworth, Labor, Winnipeg North Centre, "that the time has come for the consideration of the improvement of our banking system and that the banking and commerce committee be instructed to study possible improvements and report thereon."

On motion of L. J. Ladner, Conservative, Vancouver South, the committee decided to request the House to give it authority to have the proceedings reported and printed.

It was suggested that one or two witnesses from the United States who were familiar with the operation of the Federal Reserve Bank would be sufficient from that country. The recommendation of witnesses was then left to the sub-committee.

Death Of R. E. A. Leech

Regina, Sask.—R. E. A. Leech, 66, chairman of the Saskatchewan liquor commission from 1920 until the inception of government liquor control in 1925, collapsed and died suddenly at his home here. Heart failure is believed to have been the cause of death. Besides his widow, daughter and son, Mr. Leech is survived by three brothers, Hillyard Leech, K.C., Winnipeg; Ald. E. T. Leech, Winnipeg; Dr. G. W. Leech, Raymond, Alta., and a sister, Mrs. F. J. Oaten, Los Angeles.

Health Insurance Plan

Victoria.—Establishment of a provincial health insurance plan, designed particularly to extend maternity aid to settlers in districts distant from municipal centres, was given approval by the agriculture committee and the House will be advised to support appointment of a special committee to inquire into the problem.

Former Slave Dies At Advanced Age

Aylmer, Ont.—Lloyd Graves, former slave, died recently at Mt. Elgin at the age of 104. He was born in Kentucky, February 22, 1824.

UNITED FARMERS STRESS VALUE OF THE H. B. ROAD

Saskatoon.—Initial steps leading toward the creation of a co-operative wholesale society in this province were taken by delegates attending the annual convention of the United Farmers of Canada, Saskatchewan section.

Following a debate, a resolution was adopted calling for the urgent need of separation of the present trading department from the parent body. The board of directors also was authorized to appoint three representatives of the convention as members of a provisional board which will be entrusted with the task of formulating the details of the proposed plan of organization.

As a fitting commemoration of the Diamond Jubilee of Confederation, the organized farmers of Saskatchewan advocated the establishment of a free consultative clinic in the province, the report revealed.

The main object of the clinic would be to bring in the best medical skill within the reach of all, and provide complete laboratory investigation of a case and X-ray service.

In commenting on this subject the report says:

"We believe that a free consultative clinic would encourage people to have medical examination in the incipient stage of illness and would be of inestimable value in preventing disease.

"On the question of transportation, the directors voice gratification in the reduction of rates on grain and flour during the past year. The rate on grain, on what is commonly known as the Armstrong route, has been lowered 10 cents a bushel, giving the farmer a reasonable all rail rate to the Atlantic ports."

The lowering of this rate, the report states, will also prove a decided check on lake transportation charges.

Equalization of the rates North and South, governed by the Crows Nest agreement had also meant a saving of $2,000,000 a year to the farmers of Northern Alberta and Saskatchewan.

The report concludes: "We are now seeing rushed to completion the long hoped for Hudson's Bay Railway. Organized efforts of the Saskatchewan farmers has been largely responsible for the initiative of the federal government in undertaking the completion of this route.

"It is impossible to estimate the value to Western agriculture to be derived from the opening of our own seaport, thereby placing us 1,1[illegible] miles nearer our consuming market; but if we are to enjoy the full benefits of this outlet organized watchfulness must be our motto where the Hudson's Bay Railway is concerned."

Oriental Question Serious

Victoria.—An invitation to all parties and to all members to unite in drawing up a resolution that would bring the seriousness of the Oriental question in British Columbia home to the rest of the Dominion without at the same time embarrassing either the federal or provincial governments in their relations with Oriental powers was extended by Attorney-General A. M. Manson in the Legislature.

Reforms For India

Sir John Simon, head of the British statutory commission on Indian Reforms which has been under fire in the Indian Legislature.

Walked Narrow Ledge Across Niagara Gorge

Woman Takes Dangerous Path To Enter U.S. Illegally

Niagara Falls, N.Y.—How she flirted with death to enter this country illegally from Canada was told by Anna Putriunis, a pretty dressmaker of Montreal. She is a native of Lithuania.

She claimed she was lowered by a rope over the gorge bank on the Canadian side to the lower abutments of the Michigan Central Railway Bridge and then, accompanied by an alien runner, made her way across the gorge on the narrow steel ledge forming part of the under section of the bridge, more than 200 feet above the swirling whirlpool rapids.

The girl and her escort landed safely on the American shore and she was taken to the home of Frank Degustino here to await four other women who were brought across the river in a rowboat the following night.

All five of the women were held as witnesses against the five men charged with smuggling aliens.

Ban On Submarines

British Government Reaffirms Position On This Question

London.—Right Hon. W. C. Bridgeman, First Lord of the Admiralty, when asked in the House of Commons if he had considered the desirability of abolishing the submarine if all other countries do the same, replied that the attitude of the British Government remained the same as enunciated by Lord Lee of Fareham at the Washington conference in 1921. At that time Lord Lee urged abolition of submarines.

This attitude, the First Lord added, was reaffirmed by himself at a plenary session of the recent naval conference at Geneva.

Another Medal For Lindbergh

New York.—Another medal was awarded to Colonel Charles A. Lindbergh. Trustees of the Woodrow Wilson Foundation voted unanimously to give the flier the Woodrow Wilson award, which will consist of the Woodrow Wilson medal and $25,000, in recognition of his trans-Atlantic and Central American flights.

Gasoline Prices Drop

Reduction Of Three to Five Cents a Gallon In Manitoba

Winnipeg, Man.—Gasoline prices in Winnipeg and most parts of Manitoba have dropped from three to five cents. Tank wagon prices are now quoted at 21 cents for low test gasoline and 24 cents for high test. The service station prices have dropped to 25 cents for the low test and 31 for the high, inclusive of the government tax.

The new prices were initiated by the British American Oil Company, the Prairie Oil Company and the Imperial Oil Company. The average reduction throughout the province amounts to three cents, while at some places a drop of five cents has been reported. Members of the trade give the opinion that the price drop will have an early repercussion in Southern Saskatchewan.

Appoint Royal Commission

Will Investigate Finding Of Ballots On Street In Ottawa

Toronto.—An investigation to clear up the finding of 19 ballots on the street in Ottawa will be made by a royal commission composed of Mr. Justice Magee and Mr. Justice Hodgins of the appellate court division, Premier Ferguson announced in the legislature. The premier's decision put an end to a deadlock which developed in the privileges and elections committee when that body asked Liberal leader Sinclair to produce the ballots then in his possession and he refused until the ballot boxes were examined. The ballots are presumed to be identical with those used in the last Ottawa South election.

U. S. STRONG FOR THE ABOLITION OF ALL WARS

Washington, D.C.—An invitation to Great Britain, France, Italy, Germany and Japan to join the United States in forming a league to outlaw war outside the League of Nations was contained in the note handed by Secretary of State Kellogg to the French ambassador, Paul Claudel, for transmission to the French Government.

The United States firmly puts aside French suggestions that the proposed agreement recognizes the right to make war under certain conditions.

"If such a declaration were accompanied by definitions of the word aggressor and by exceptions and qualifications stipulating when nations would be justified in going to war, its effect would be very greatly weakened and its positive value as a guaranty of peace virtually destroyed," says the United States note.

The note indicates that the United States is not unwilling to conclude a separate agreement with France on the subject, but wants Great Britain and other great powers to participate. "If the members of the League of Nations cannot, without violating the terms of the covenant of the league, agree among themselves and with the government of the United States to renounce war as an instrument of their national policy it seems idle to discuss either bilateral or multilateral treaties unreservedly renouncing war. I am reluctant to believe, however, that the provisions of the covenant of the League of Nations really stands in the way of cooperation of members of the league and the United States in a common effort to abolish war."

The note, which is brief, concludes: "The government of the United States desires to see the institution of war abolished and stands ready to conclude with the French, British, Italian, German and Japanese governments a single multilateral treaty, open to subsequent adherence by any and all other governments, binding parties thereto not to resort to war with one another. The precise language to be employed in such a treaty is a matter of indifference to the United States so long as it clearly and unmistakably sets forth the determination of the parties to abolish war among themselves. I therefore renew the suggestion contained in my note of January 11, 1928, that the government of France join with the government of the United States in transmitting to British, Italian, German and Japanese governments for their consideration and comment the text of M. Briand's original proposal, together with copies of subsequent correspondence between France and the United States, as a basis for preliminary discussions looking to conclusion of an appropriate multilateral treaty proscribing recourse to war."

AMERY SEES A GREAT FUTURE FOR DOMINION

London.—"I have returned home with a truer perception of what the Empire means, namely a girdle of free independent nations linked around the globe," declared Lieut.-Col. L. C. M. S. Amery, secretary of state for Dominion affairs, speaking of his recent Empire tour, at a dinner given in his honor here by the Canada Club. E. R. Peacock, eminent London financier, who was born in Glengarry county, Ontario, and lived for some time in Toronto, presided.

Speaking of Canada, Lieut.-Col. Amery stated that he knew not what Premier Stanley Baldwin's visit there had meant to him, and he was glad to hear that a party of 60 parliamentarians was to visit the Dominion this summer.

"In Canada today," continued the secretary for Dominion affairs, "there is not that perhaps over-confident enthusiasm which marked the pre-war years. Experience has given its lesson and there is now a deep-seated assurance not only of immediate but of future greatness." Canada was emerging from being a ribbon of territory adjoining the United States to a country having depth as well as breadth. The problem before her statesmen was whether they should sell her strength to another country or conserve it for development by her own people.

In the coming generation he believed Canada's development would be greater than that of the United States, and would provide a greater inducement for immigrants either from across the ocean or across the border. Canada needed the immigration of professional and business men as well as men of muscle.

"Do not let our manufacturers be content with the preference Canada has now given them," he said, "but let them go and see Canada and learn how much more advantage they could reap from that preference. Let us all learn to get away from development in water-tight compartments. Then it would be easy for governments to adopt their policies accordingly."

Find Weapon Used By Killer

Blood-Stained Axe Is Discovered Near Scene Of Winnipeg Murder

Winnipeg.—One of the most sensational discoveries of the St. Vital murder case has been made in the finding of a small axe smeared with blood and hair which police are certain was the weapon used by the killer in battering the head of Mrs. Lottie Adams, the murdered woman.

The axe, a new one with the price, 87 cents, plainly legible, was discovered in the snow 65 feet from where the body had been concealed in the deep ditch on North Drive, Fort Garry. The exhaustive search of the area which police have made ever since the day the body was found was rewarded when one of the searchers caught the glint of steel in the snow.

Police consider it one of the most valuable links in the chain of evidence they already have in their possession.

Would Visit Paris Again

No Chance To See It Last Time Says Lindbergh

Paris.—Col. Charles A. Lindbergh would like to visit Paris again this summer.

Instead of swooping down, however, from the air at Le Bourget in full view of thousands and with the acclaim of the multitude ringing in his ears, he desires to slip through Cherbourg or Havre without attracting undue attention, he recently wrote a close personal friend. He would enjoy a full week in Paris incognito, he said, for he had no opportunity to see Paris at all in 1927.

Silver Foxes Stolen

Arnprior, Ont.—The fox farm of John A. Lytle situated on the third line of Fitzroy Township, Carleton County, was raided by thieves, and 13 silver foxes valued at about $7,000 were stolen. The robbery took place during the night but was not discovered until morning. It is believed to be the largest theft in the history of the fox raising industry in the province.

Cost Of Tariff Board

Ottawa.—The cost of the advisory board on tariff and taxation was given in a return tabled in the House today. In salaries and allowances to members $48,310 was expended between April, 1926, and January 31, 1928. The staff of 14 received in salaries during the same period $20,196.

CANNY MARGARET

This is Margaret Marshall, six and a half years old, photographed on the steps of the Canadian National train which carried her from Drumheller, Alberta, to the seaboard. All by herself, little Margaret is making a trip to see her auntie at Greenock, Scotland. Before she left home her mother said to her, "Now don't get off the train, Margaret!" and Margaret, being a canny little Scot, obeyed her, and not only that, but she consistently mistrusted all strangers except the train crew, which was so good to her on her long journey.

THE TOFIELD MERCURY

TOFIELD, - - ALBERTA

Annual Honey Production In Western Provinces Shown To Be Rapidly Increasing

That Canada is a wonderful country for beekeeping is now an undisputed fact, due chiefly to her wide range of flora and high average of favorable weather for the secretion and ingathering of nectar. Moreover, the greater part of the honey produced in Canada is of high quality, both in flavor and body and, being white in color, is most suitable for table use.

Until quite recently, beekeeping was practically confined to the older provinces in Eastern Canada, especially Ontario and Quebec, and in British Columbia, the surplus produced by them was absorbed by the Prairie Provinces. During the past five years, however, not only has beekeeping increased in the East but it has made a rapid advance in the Middle West, and because of this growth Canadian honey is now being exported to European markets where it is most favorably regarded. The total crop for Canada for 1925 was estimated at well over 19,000,000 pounds. Of this, Ontario produced 10,000,000 pounds; Quebec and Manitoba each over 4,000,000 pounds, British Columbia 638,219 pounds, and Saskatchewan, Alberta, and New Brunswick, each over 100,000 pounds. No record of actual production is available from Nova Scotia and Prince Edward Island, but from the total crop estimate given above it will be seen that the production from these provinces is relatively small. The amount of honey produced throughout the Dominion, of course, varies from year to year, according to weather conditions. For instance, 1925 was a favorable year in this respect for Eastern Canada, but not so good for the West; while 1926 was just the reverse, that is, good for the West and not so favorable for the East, as the following crop figures for 1926 will show: New Brunswick 100,000 pounds, Ontario, 5,000,000 pounds; Manitoba, 3,572,512 pounds, Saskatchewan, 170,287 pounds; Alberta, 215,000 pounds, British Columbia, 886,257 pounds. The Quebec figures for 1926 are not yet available. In comparing 1926 figures with those of 1925, it will be seen that, with the exception of Manitoba, the honey crops of the western provinces were much larger in the former year. Reports of the 1927 crop so far received show that in western Canada the past season was even more favorable than 1926, Manitoba reports a crop of 7,386,575 pounds, British Columbia, 956,719 pounds, and Saskatchewan, 800,974 pounds. Crop reports from the other provinces for 1927 are not yet available.

While honey production is steadily increasing throughout the Dominion, there are large areas yet unexploited in so far as beekeeping is concerned; this is especially true of western provinces. The changing farming conditions in the more settled parts of the Prairie Provinces, the opening up of new territory, and the introduction of irrigation into semi-arid areas, are having an effect on beekeeping possibilities. For instance, the introduction of sweet clover into Manitoba and Saskatchewan is largely responsible for the increase in beekeeping in these two provinces. In the Peace River district where beekeeping is a comparatively new industry, an experimental apiary at Beaverlodge, Alberta, gave a wonderful crop during the summer of 1926. A colony on scales registered a gain of 30 pounds per 24 hours on more than one occasion and at the end of the season this colony gave 281.5 pounds of surplus honey, and in addition gave one colony increase. Other pioneer apiaries reported equally good results. In the irrigated areas, where alfalfa and sweet clover are grown extensively, good crops of honey are assured. In British Columbia, the fertile valleys offer splendid opportunities for beekeeping, especially in the central part of the province. In Ontario and Quebec the older parts of the provinces are fairly well stocked with bees but the newer parts of the provinces offer what is practically an undeveloped field.

Testing Saskatchewan Clay

Clay from 22 different deposits in the western part of the province are under test in the Department of Ceramics, University of Saskatchewan, to determine their suitability for the manufacture of whiteware. This classification includes such products as household ware, electric porcelain and floor and wall tile.

The Girl—"I should think you'd feel happy as a king when you're in the air."

Aviator—"Happier. I'm an ace."

Farm Land Values Increase

Owing To Good Crops In Alberta Prices Advance Ten Pc. Cent.

Farm land values in Alberta have advanced in the past year by reason of the excellent crops produced. Since June 1927 it is estimated land values in the better districts have increased on an average by ten per cent., while in districts where crops have been exceptionally good and the number of new settlers large, the increase has amounted to 20 per cent. This is particularly true of the Peace River district where the value of good farms, reasonably close to transportation, has increased more than any part of the province.

For each farm in the province the average production during 1927 was $4,283 according to the Provincial Minister of Agriculture. Against this he gives average production for some of the States of the Union for 1925. Montana, $2,514; South Dakota, $2,336; Iowa, $2,262; Minnesota, $1,977, Kansas, $1,280. Average production per farm in Alberta in 1925 was $3,154.

Machine To Combat Smut

Saskatchewan Registered Seed Growers Have Installed New Device

Installation of machinery that is unique in any seed plant on the American continent has been effected by the Registered Seed Growers' plant at Regina, with a Kepper Karbonate Koverall machine coming into operation. The machine is primarily designed to combat smut. The seed is powdered with copper carbonate and 100 bushels can be treated in an hour. The machine has been purchased by the Seed Growers to permit them to supply the farmers with pedigreed seed treated to combat any danger of smut when sown.

Winnipeg Newspaper Union Fashion

A Chic New Frock

Unusually smart is the long waisted slip-on dress shown here, having an open neck and diagonal pin tucks, long dart-fitted sleeves, a separate belt and two cascade trimming pieces stitched to the left side of the waist and skirt. No 1715 is for ladies and misses and is in sizes 16 years, 36, 38, 40 and 42 inches bust. Size 38 requires 3½ yards 36-inch, or 2⅛ yards 54-inch material. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Screenings Classified

Reclaimed Elevator Screenings the Most Important Grade

Screenings is a by-product of the grain industry and is now available commercially to Canadian stockmen. It consists of the broken and shrunken grains, weed seeds, including wild buckwheat and wild oats, chaff, etc., removed from the grain delivered to the terminal elevators and constitutes about 1½ to 2½ per cent. of the total grain received. This by-product is recleaned and classified into recleaned elevator screenings, oat scalpings, and refuse screenings, a classification which although still unofficial is recognized by the Grain Inspection Department and complied with by most of the elevators. A new Dominion Department of Agriculture pamphlet on "Screenings As a Feed For Live Stock," gives the composition of the grades. By far the most important grade is the one named recleaned elevator screenings. It contains about 50 to 70 per cent. of wild buckwheat, 20 to 40 per cent of broken or shrunken wheat, some wild oats, and not over 3 per cent. of small weed seeds. When finely ground it has been proved by experiment to be a very valuable feed for growing and fattening pigs and for fattening steers. The second grade, oat scalpings, contains about 75 per cent. of wild oats, 15 per cent. of domestic oats, a small percentage of barley and an occasional wheat kernel. It has a feeding value distinctly inferior to that of recleaned elevator screenings. The third grade, refuse screenings, consists of small weed seeds, chaff and the dust and dirt accumulating from recleaning. It has been found to be of little or no feeding value in the rations of swine. Besides these three grades, a fourth grade, called elevator screenings, is used. It includes any screenings not falling into the first three classifications, provided the required minimum percentage of wild buckwheat and wild oats are put into this class. The pamphlet which gives an account of the Experimental Farm's experiments to ascertain the feeding value of the different grades of screenings may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Farm Lands At Premium

Few Farms Are Available For Renters In Brandon District

Farm lands are almost impossible to rent around Brandon, according to real estate men, who state that lists of persons anxious to rent farm lands are held by many agents in the city, but there are no farm lands available. Where there is a chance of farms being for rent nearby farmers have availed themselves of the opportunity of acquiring more land. There is a most optimistic outlook here.

British Columbia Lead-Producer

Approximately 94 per cent. of Canada's output of lead and 92 per cent of the zinc comes from British Columbia; the remaining 6 per cent of the lead originating in Ontario, the Yukon, and Quebec, and about 8 per cent. of the zinc in Quebec.

Burke — "What! You've burned only one ton of coal so far this winter?"

Mason—"Yes, the other five tons wouldn't burn."

There is something wrong with the woman who talks only when she has something to say.

ADVERTISING CANADA

Splendid Publicity Given Dominion Through Poultry Congress Last Year

Professor Harry R. Lewis, Secretary for Agriculture for the state of Rhode Island, and President of the United States National Poultry Council, was one of the most enthusiastic delegates to the World's Poultry Congress last July. He is now giving evidence of his impressions after participating in the Congress trans-Canada tour.

Since his return to the United States, he has addressed poultry associations, banquets and clubs, among the latter being the Frenchtown Community Club, the Rhode Island State Grange, the Lions' Club, Rhode Island, the Southern New England Textile Club, and the Varnum Continentals, the chartered military command of Rhode Island.

He has given these people of his state details of his trip through Canada, illustrated by maps, photographs, and motion pictures.

Mr. Oscar Brown, of Scunthorpe Lincs., England, also participated in the trip, and he writes that he has had the pleasure of broadcasting his impressions of Canada. Mr. Percy A Francis, of the British Ministry of Agriculture has been busy lecturing since his return to England, his subject being "Canada"

Italy is also actively advertising Canada. One of her chief delegates to the World's Poultry Congress, Prof A. Ghigi, of the University of Bologna, is writing a book entitled from "Niagara to Mexico". This will contain many views of Canada, and will cover the country from coast to coast.

Canada is being advertised as a result of the World's Poultry Congress. The advertising is of the best kind. It is first hand information given by people who returned to their homes saturated with Canadian sunshine, hospitality, and achievement. Further it is being given by instructors to students, to agriculturists and others and by the representatives of the press who accompanied the Congress train. Among the latter is the editor and owner of the "Feathered World," Mr. Sydney Lower, whose paper carried a running article through nine issues giving details of the trans-Canada tour.

The "Report of the Congress Proceedings," a splendid volume of 356 pages is now ready fo rdistribution. It contains over 160 technical papers presented at the Congress, together with a verbatim report of the general meetings. Full particulars regarding this volume may be obtained from the World's Poultry Congress Secretary, Ottawa.

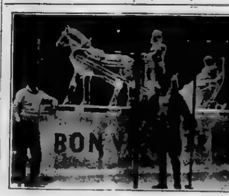
Makes Violin By Touch

Starting the work with a pen-knife and a file, Mr. Ernest Hall, a blind music-seller of Manchester, England, has made a violin in seven months, although he knows nothing whatever about the instrument. Mr Hall has done all the work by finger touch. As plans are no use to him he got a violin as a model.

Car Salesman—"Wouldn't you be interested in a car with a worm drive?"

Madam—"No, I wouldn't trust my husband at the steering wheel—we're going to have a chauffeur!"

Herring flour is used quite extensively in Norway.



Ice Sculpture in Quebec

Just towards Carnival time in Quebec examples of ice statuary begin to appear in the streets. This statuary ranges from very modest ice arches to most ambitious conceptions such as a railway locomotive, a dog team and sled or a cariolle (habitant sleigh) complete with horse an "bon homme et bonne femme." These statues are not freakish bits or carnival decoration but embody very real artistic values and are usually set up before the Chateau Frontenac

The genius who makes these delightful things is a little French-Canadian man. A habitant with bright eyes, a ready laugh and a high heart. His name is Michel Carbonneau and he will tell one that he is "Un sculpteur de bois, marbre," and various other mediums; also a carpenter, but "Une specialite monument de glace, Ma'moiselle s'ilvous-plait."

Photograph shows a statue that has but recently been completed and inscribed with the words, "Bon vieux temps," meaning "Good old times."

To Ensure Satisfactory Yields Careful Selection of Seed Wheat Is of the Utmost Importance

If seed wheat contains abnormal or discolored kernels a first class crop cannot be grown to maturity even under ideal climatic conditions. Weather conditions, such as prevailed in the prairie provinces of Canada during the harvest time of 1927, tended to bring out these abnormalities and discolorations in grain to a more marked extent than usual.

Shrivelled, shrunken and pimpled or blistered wheat should be avoided. Shrivelled or shrunken kernels may be the result of badly rusted wheat or may be indicative of the presence of a fungus within the seed, while frozen wheat has a pimpled or blistered seed coat. A mummified kernel which is white to gray in color is typical of the presence of a very serious and destructive fungus disease.

Discolorations such as green, pink and black are also very common. Green kernels denote lack of maturity, while the cause of the distinct pinkish discoloration so often found is not definitely known. Blackened kernels are typical of the presence of a number of different wheat parasites. If the tip of the germ end is inky black in color bacteria are very frequently the cause. If blackening is evident at different places on the seed coat fungi, which cause root diseases of cereals, are often present.

During the last two years experiments have been conducted to study the importance of such abnormalities and discolorations as are mentioned above and results signify that it is a very serious practice to sow wheat of this kind. In all cases germination is reduced and the plants which survive are very often weak and sickly in appearance by sowing such wheat the farmer in many cases may introduce disease producing fungi into his land.

Wise and careful selection of seed wheat is of the utmost importance. Ordinary seed cleaning methods such as are used by the average farmer will suffice to remove badly shrunken and very light kernels, but many remain, and if these comprise even a small proportion of the seed lot it should be avoided. Doubtful samples of seed grain may be sent to any of the Dominion Experimental Farms or to this laboratory for examination.

PLANNING TRIPS TO EUROPE

Personally Conducted Tour Has An Interesting Itinerary

With winter on its last legs (why not be optimistic?) and summer vacations in the offing, Canadians are beginning to plan trips to Europe and the railways and steamship companies are making their preparations. Arrangements have been completed between the Canadian National Railways and the White Star line for the third annual personally conducted tour of Europe, which will commence on July 7, when the Laurentic sails from Montreal. A great many western Canadians, including school teachers, who are always good summer travellers, are already paying some attention to their bank accounts, and are making inquiries about the itinerary. It is an interesting one. After eight days on the ocean, the motor coach trip throughout England and Scotland will commence. The English Lakes, Carlisle, and some of the other historic spots close by will be visited on the first day; a trip through the Burns country will wind up at Glasgow, and there will be a day's sightseeing in Edinburgh after a journey through the Trossachs. From Edinburgh, the tourists will go to Newcastle, Durham, York and Leamington, thence to London by way of the Shakespeare country and Oxford. Four days in London will give the visitors ample opportunity to see the Tower of London, the Houses of Parliament and the other ancient landmarks of history. Windsor and Hampton will rouse up more memories, and Stokes Poges will bring to mind the curfew tolling the knell of parting day, the village Hampdens, mute inglorious Miltons and the usual reflections appertaining thereto. Bruges and Brussels will be followed by a week in Switzerland Lucerne, Meringen, Interlaken, Montreux, Geneva, with boat trips—and the six days in Paris will likely be all too few. The tourists will sail from Havre on the Megantic, arriving in Montreal on August 18, 42 days after they left it. One of the most inviting aspects of the tour, according to railway officials, is that it will not be rushed and that the travellers will have time to allow the multitude of new impressions to soak into their memories for future refreshment.

Canada's Trade With U.S.

Canadians Spend Over $70 Per Head In One Year Across the Line

Official figures recently issued dealing with the trade of Canada for the year 1927, show that more than $70 per head of the population of Canada was spent in the United States.

The total trade of the Dominion for 1927 amounted to $2,325,890,934, an increase of $336,618,775 over 1926. Exports had a total value of $1,228,782,004, and imports $1,067,117,930.

Canada bought goods from the United States in 1927 to the value of $707,270,444, or $406,854,511 more than the total purchases by Canada in the whole of the British Empire.

The United States was Canada's best customer in 1927, as an individual country, with $474,388,123 spent on Canadian goods. All the countries in the British Empire spent $500,019,846 in the year under review. Great Britain heading the list with a total of $409,551,767.

The chief item in the exports from Canada to the United States was wood and paper with a value of $237,466,149. Agricultural, vegetable and animal products valued at $147,369,601 came next, of which live cattle valued at $19,834,917 was the principal item, grain and grain products second with a value of $13,669,402, horses third valued at $12,971,819 and meats fourth worth $12,187,870.

Metals, under which heading a variety of articles are listed, was the principal item in the imports to Canada from the United States, the value being $270,107,886.

Canada spent $36,523,197 more in the United States in 1927 than in 1926, while that country's purchases from the Dominion increased by $9,252,625 over the previous year.

Development Of Civil Aviation

Plans for the development of civil aviation in Canada are developing at a rate fully up to expectations. There are already twelve newly established clubs and a dozen more in the formation stage. It is expected that by summer fully fifteen flying clubs will be in active operation, with membership varying from 30 to 150.

The modern sheik is very often the living image of an unpaid tailor bill.

Roots As Feed For Horses

Turnips Or Carrots Are Good For Horses During the Winter

Roots are a valuable feed for horses under many conditions. For instance, they are good for horses doing moderate farm work during the winter. Two or three turnips or a few carrots thrown into the manger when the horse comes in at night will be greatly relished. Turnips or carrots are more acceptable to horses than mangels, and they should be given whole. According to a new bulletin of the Dominion Department of Agriculture on "Growing and Feeding Field Roots," the merits of roots as a feed for horses may be summed up as follows: They increase palatability, increase the digestibility of coarse fodders, benefit the teeth and gums, form a splendid tonic, and cheapen the ration.

Reindeer Farming In Arctic

Airplanes Now Being Used To Advantage To Herd Vast Numbers

Airplanes are now being used to herd vast numbers of reindeer in the big Arctic stock farms, according to Ralph Lomen, pioneer of the reindeer industry of Alaska. "It's a new idea and it's not being practiced regularly, but herding by airplanes seems feasible," said Mr Lomen. "Our head herdsman went out recently and in two hours accomplished as much as would otherwise have required a week with six men. There is room for 12,000,000 reindeer in the northern tundra of Canada and such a herd would be worth $30,000,000. It could be done in 50 years if Canada started now in a modest way."

"Waiter there is a caterpillar on this plate"

"No. That is the sausage you ordered."—Buen Humor Madrid.

How The Sun Life Made Thirty-Eight Millions Profit In The Year 1927

Demonstrates New Camera

Spark Instead Of Shutter Gives More Exposures Per Second

Moving pictures taken at the rate of 20,000 exposures a second showing a bullet apparently barely moving as it shattered a glass bulb were shown to a meeting of the Optical Society of America.

Professor Alexander Klemin, of New York University, who gave the [illegible] ity, said the camera used was similar to an ordinary one except that a spark vibrating with high frequency took the place of a shutter.

Pictures of a whirling aeroplane propeller, taken at the rate of only 2,100 a second, showed the blades turning at a rate not much faster than a slowly revolving door.

The pictures of the bullet shattering the glass bulb taken at the high frequency exposures showed the shattered glass fragments falling through air so slowly as to be hardly perceptible.

Countless tests and experiments, covering a period of over thirty years, prove that aluminum is the only completely satisfactory material in which to pack tea. Red Rose tea is put up only in aluminum, and a "money-back" guarantee goes with every package. 2-W

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XIX. Continued

It was strange for Arthur Warner after all his lonely years, to be sitting here talking so intimately to a woman who was a comparative stranger, and receiving from her confidences which she had given to no one else. He thought of his own lonely home so precious to him, so eagerly acquired, so patiently worked for—how a woman like this would have brightened it and graced it with her presence. She was so calm, so brave, so gentle.

When their eyes met Helmi smiled encouragingly at him, though sadly too, as if the tears were not very far away. Were they tears because he was going?

"Helmi," he said, "we are both facing the elemental things of life and it draws us together. We are facing the hardest things that men and women ever have to face. Your part will be to give life, maybe at the expense of your own. Mine is—God forgive me—to take life. Are you afraid?"

Helmi shook her head. "No," she said, simply, "I believe in God. I believe He loves me. I love Him. Every day I say my good words. I learned them in His house. They are, 'Cherish health, Seek truth, Know God, Serve others.' Then I say, 'Please God, bring home my Jack.' It is good to pray, Mr. English, when one is afraid."

The first ragged whistle of the train came bounding down the valley. "Tell me your name Helmi," he said. [illegible]

[illegible] hundred dollars which was due on his wages. She had not needed it until now, and had felt it best to leave it where it was. She had hoped her Jack would be home to her before this, and then he could go himself. Helmi had earned seventy-five dollars from Mrs. McMann, too, and she had often imagined the proud look which would come to Jack when she would show him the fifteen five-dollar bills in the pocket of her black valise. Helmi knew what she was going to buy with it too. Had she not marked things in the catalogue? But the days had worn wearily on and there had been no word. It was often hard to keep from crying, but it must be all right—God would not let her dear Jack be lost.

The Blue Book was a comfort, too. It was so full of happiness. The Blue Book was sure everything would come out right. She wondered if the people who wrote the Blue Book ever had their men go away so far and stay so long. She had found the Blue Book was right in what it said about gardens. It said a garden links one with God. Helmi had been happiest in her little garden, every sod of which she had turned herself. In the summer evenings she had worked there until it was so dark she could not see, and never did sad thoughts come to her then.

Helmi took it as a sure sign that God was pleased with her when her plants grew so beautifully and the hail-storm which broke windows in some of the houses did not touch her garden at all. Helmi was proud of [illegible]

[illegible]

[illegible] slipped down the mountain, without a sound, and had low every stalk and every bloom in her garden, and having done its work went back the way it came. The morning sky was blue and bright, the sun was warm, and playful little breezes turned the dead flowers over, just to be sure that none were missed. When Helmi came out and saw the work of the night she wrung her hands but only for a minute. That day she raked the dead stalks into a pile, and she burned them when they were dry and dug the garden for her next year's planting.

Helmi had not yet brought herself to ask for the two hundred dollars Jack had left. She wished the timekeeper would give it to her without asking for it, but the days wore on and she knew she must go soon. She would not let Mrs. McMann or anyone think she was grieving or distressed. Jack had told her that the [illegible]

CHAPTER XX

[illegible]

A Lady and a Diplomat

Difference Between Them Is Defined By U.S. Minister

Hon. William Phillips follows the methods of the public men of his country who provide at least one funny story to a speech. In paying tribute to Canadian women's organizations at the Women's Canadian Club reception in Toronto, in honor of Mrs. Phillips and himself at Casa Loma, the U.S. Minister declared he could never say "No" to them. That reminded him of the story in which he quoted the difference between a lady and a diplomat.

"A diplomat says 'yes' when he means perhaps; but when he says 'perhaps,' means no; and when he says 'no' he is no diplomat. On the other hand a woman says 'no' when she means perhaps, says 'perhaps' when she means yes, and when she says 'yes' is no lady."

COOL AND FRAGRANT

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

OUT AND ABOUT

The daily fare that the daily papers are serving up to their readers for the past month has certainly been of an entertaining nature—that is if you like the unusual.

For example, there is this sky rocket chap. Says he's going to get to Venus by the rocket route—not charted. It is only about 28,000,000 miles, more or less, and he is going to get there in a few hours, say hello to the natives (if there are any), and come back again, bringing with him a passenger from that planet. Our guess is that he will never even start.

Then we have the case of a 12 year old boy, to whom coal has a special attraction. So much so, that pieces of coal will rise out of the coal pail and fly in his direction. Other usually dormant articles too, show signs of being possessed when the lad is around, a teddy bear, literally jumping off the dresser on to the bed. The boy is under close observation by English scientists, among them being Sir Oliver Lodge and Conan Doyle. This has the appearance of being a really remarkable case, and the result will be watched with interest.

Then there is the "fuelless engine", which is supposed to take its power from the movement of the earth upon its axis. To give it importance, Col. Limbergh's name is associated with it, though present information only states that he went and looked at it. It is the subject of much discussion among electrical and mechanical men, though we have seen no statement from the real electrical genius, Edison. Perhaps it was infra dig to attempt to fool him. Anyway, the man who invented it says it works. All right, then give it a job to do. The Britishers last year brought over an automobile and beat the speed record; they also, last year brought over a new and very powerful steam locomotive which created much admiration among American steam engineers. It was said the men who built this locomotive were all sworn to secrecy. Anyway it was recognised as the last word in locomotive engineering on both sides of the Atlantic.

This year the automobile speed record was again broken by a British car, attaining an average speed of a trifle less than 207 miles per hour. A fuelless engine would be simply grand. It could be put to a billion uses, so hurry up and let the world have it.

Then there is "this spiritualism stuff." Spiritualism, while reports continually appear regarding it, always seems to be more or less incomplete. The latest is that Conan Doyle, of spiritualistic and literary fame, says that the famous Houdini, has sent the code word, pre-arranged between him and his wife before his death. Unfortunately, everything is not as complete as it could be, which once more leaves the layman—and the spiritualistic medium in a hole.

But whatever marvels the world is now producing, for once it has not outshone Tofield. For here we have a healer, who without drugs or equipment claims to heal the sick and the afflicted. People for many days have been flocking to him and from early morning till late at night, he gives treatments. The event is so outstanding and remarkable even for a city, that one hesitates to either endorse or condemn it. We have heard intelligent people say that he has helped them considerably, and then again, others have little faith in him. He is stated to be the seventh son of a seventh son, thus having special powers. Be that as it may, many are going to him and taking "treatments."

It has been said by reliable people whom we know that the "doctor" can cure a corn by simply rubbing the affected part through the boot. The corn ceases to hurt and in a few days withers and dies. Rheumatic troubles are helped too. While one lady assured us that her eyes has been much benefited and she now could do without glasses. Personally, we wouldn't discard the glasses.

There has been a lot of heated discussion over the so called Sterilization Bill. This bill which was passed in the legislature this week, provides for the sterilization of the feeble minded upon their leaving the mental hospitals of the province.

The bill is sponsored by the Hon. Geo. Hoadley, minister of health. The danger point as we see it is, the possible consequences to the government, should at any time an operation either prove fatal or seriously incapacitate a patient. It must be borne in mind that it is proposed that the operation be performed when it is decided the patients may be discharged and at that time they are normal. The minister's statement that the government would not be responsible for damages is not quite convincing. Unless of course, the government is justice and justice the government.

SUNFLOWERS as a SILAGE CROP

(Experimental Farms Note)

The question of a suitable silage crop is important in districts where considerable livestock is kept, particularly dairy cattle. During the winter and spring months some kind of succulent feed is essential and this is usually provided in the form of silage.

Three kinds of forage crops that may be used for silage have been tested at the Scott Experimental Station—corn, oats and sunflowers. Corn has not proven a dependable crop at this station being frequently damaged by late spring and early fall frosts. Other limiting factors in the successful production of this crop are the short growing seasons and the comparitively cool weather—especially the nights.

Oats produce a silage of good quality, but in a dry season when silage is most needed oats lack the ability to produce a high equivalent tonnage.

While it is generally acknowledged that sunflowers make a heavier demand on soil moisture than does corn and that it is not quite so palatable a succulent feed as the later crop, sunflowers have withstood the drought better than corn at this station and have always produced a fair crop even in the driest years. There growth may be slow in the severest part of a drought period but they have the ability to revive with the August rains. Furthermore, sunflowers are able to withstand six to eight degrees of frost without serious damage to the crop.

The season of 1926 furnished a the last few days of January to the good example of the comparitive ability of sunflowers to produce a crop under adverse climatic conditions. Yields of over 14 tons per acre green weight were produced while the highest yield from oats was 4.77 tons per acre and corn was a complete failure. The average green weight yield per acre for a period of five years is 12.18 tons for sunflowers (mammoth Russian), 7.48 tons for oats, (banner), and 3.22 tons for corn (north-western Dent). On a dry matter basis the oats and sunflowers give approximately equal yields.

The fact that sunflowers withstand frost better than corn and produce a larger green weight tonnage than either oats or corn makes it the most dependable silage crop of the three under north-western Saskatchewan conditions.

After a spell of fine weather that would be hard to excell in any part of the world and which lasted from in thousands of small towns all over beginning of March, it has now turned colder. However, with the month of February safely tucked away behind us, there are few who now fear the cold weather. At the best it can only last a short while and with the days geting longer and the sun geting stronger—why, it will soon be spring again.

Announcing The Arrival of Complete Spring Ranges In Coats

Three types of garment dominate the spring coat field—

NOVELTY TWEEDS, either on tailored or wrappy models, moderately priced, $12.50 to $18.50

KASHAS in natural or light tan shades, with either fur collars or satin trimmed in brown or black. Priced from .... $16.50 to $21.00

POIRET TWILLS, TRICOTINES or FRENCH CORDS. Navy or the new shades of tan with collars of fur dyed to match, or plain tailored type. Prices range from— $16.50 to $34.95

Specially featuring a large range at $19.50
All garments are fully lined with Rayon fabrics and combine authentic style with unusually low prices

Millinery

This season marks the decline of the passing of the mode for felts, and the advent of the more alluring, more colorful models, fashioned of visca and embroidered satin

A large selection is available at $3.95
Other models as high as $7.00

Knitted Sport Suits

This type of garment has attained such a degree of popularity that no wardrobe is considered complete without one or more of them.

The latest creations of the Ballantyne mills have just been received, each garment carrying a guarantee of being washable.

Modern methods have produced a firm elastic fabric, free from the tendency to "sag" which was evidenced in earlier knitted materials.

These garments lend themselves to such variation of design and coloring that description in detail is impossible.

A price range from .... $11.95 to $25.00

VESTEES and COLLAR and CUFF SETS
To complement spring garments
$1.25 to $2.95

And later bought some sheep;
And now, McCullough out of school
It a modern Bo-Peep.

GEORGE E. GLOVER PASSES AWAY IN IRELAND

Quite a number of Tofielders will remember, George E. Glover, who, during last October and November, when the telephone lines were changed from the front streets to the back streets, was working under contract for the government at this work. He left for Ireland early in January and word was received by cable on Saturday that he had passed away. A letter has been received this week saying that he and his sister, who accompanied him over, were quite well. The cause of his sudden demise is at present unknown to his relatives here. Mr. W. O. Glover, of Tofield is a brother of the departed man, and his many friends will sympathise with him in his sad loss.

HOCKEY

On Saturday afternoon last, the Tofield high school team met up with a team from the city, the 10th troop boy scouts. Our boys on the whole, were a little heavier and older, but just the same it was far from being a walk-a-way for them.

At the opening of the game, the locals slipped in two goals in rapid succession and it looked as if the visitors were going to be swamped. However, the easy going allowed the Tofielders to get careless and the first thing that happened was an Edmonton sharp-shooter slipping by a one man defence and scoring. Edmonton duplicated and the period ended 2—2.

In the second period, the visitors played hard and well. They were particularly good in pouncing on a loose puck and making good use of their opportunity. Their goalie, too, was playing a brilliant game and this period resulted in no score being made. The third period, Tofield broke the tie with a goal and followed it up with another, and Edmonton also scored one. This was a joke. The puck was shot from centre ice, and just slowly slid towards the goal along the ice. Bowick was waiting for it, but it slid under his stick into the net. He was using a new goal stick for the first time and holding it as he did his old one, left a gap between the ice and the toe of the stick just large enough for the puck to slip through. Tofield soon after scored another, which ended the period.

The fourth and last period was hotly contested but Tofield put one by the visiting goalie while the Edmonton lads went scoreless.

The final score was 5—3 in favor of [illegible].

The visiting boys put up a real battle and their goalie was as smart as they make'em. The local goalie made many a sensational save too, but did not have as much work to do as the other net minder.

Tofield goals were pretty well divided, W. Worton getting two, S. Worton getting two and R. Whyte one. We do not know who scored the Edmonton goals.

Line-up.—Tofield, goal, Bowick; defence, Martin, Glover; forwards, Whyte; W. Worton; S. Worton. Subs, R. Martin, Ball, Swinton.

Edmonton—

The team was brought down by Mr. Foley of Edmonton.

At time of writing, it is not known whether the team will play at Edmonton on Saturday or whether the Edmonton Arrows will play the return game due to the Tofield team.

TENNIS CLUB PREPARING FOR BIG SEASON

Tofield tennis club intends to make a big "come back" this year. Already it is assured of a big membership. The usual annual meeting will be held shortly. While the club feels that it already possesses grounds and courts that but few towns of the same size as Tofield can boast of, it intends to still expand rapidly by making several additional improvements.

Two of the most important of these proposed improvements are: the laying on of water under pressure to the courts, and the purchasing of a water loaded roller.

It is also intended that a special committee be appointed to draft a new set of rules, particularly with a view to adjusting times and rights of members to play, thus avoiding any friction or misunderstanding.

NEW MILLINERY ESTABLISHMENT

A new millinery store will be opened by Miss Matie Bowick in Lucille's Beauty Parlor. A large number of chic and up-to-date hats are on view and more in the course of making. Miss Bowick has received expert tuition and is a fully qualified milliner and solicits your patronage. Prices [illegible]

UNITED CHURCH W.M.S. HOLDS CONVENTION AT WAINWRIGHT

Miss Jack, a United Church Missionary from China was the principal speaker at the Wainwright W.M.S. presbyterial which was held in the United church at Wainwright on Monday and Tuesday of last week.

During the two-day sessions much business was conducted, and on Monday evening a banquet was served in the building to the delegates and local members.

The election of officers for the ensuing year saw the following taking office:—

Pres., Mrs. McPherson, Holden.

1st Vice-president, Mrs. G. Pybus, Wainwright.

2nd Vice-president, Mrs. Reeds, Irma.

Treasurer, Mrs. Geo. Cookson, Tofield.

Recording and corresponding secretary, Mrs. Thorsley, Tofield.

Secretary of Christian Stewardship and Finance, Mrs. Firth, Tofield.

Strangers' secretary, Mrs. Stouffer, Kinsella.

Assistant Helper's Secretary, Mrs. Knowles, Wainwright.

Mission Band Secretary, Mrs. Elford, Irma.

Supply Secretary, Mrs. Hay, Ryley.

Missionary and Literature Secretary, Mrs. Thorsley, Ryley.

Press Secretary, Mrs. Steel, Wainwright.

C.G.I.T. Secretary, Mrs. Wright, Irma.

LARGE CROWD AT CHEVROLET DEMONSTRATION

There was a splendid turnout to the Chevrolet demonstration at the Variety theatre about 250 people being [illegible].

Mr. McDonald, factory engineer, using a fine display of cut-a-way motor, axel housing and other parts, gave a very interesting demonstration of the qualities built into the Chevrolet car, and Mr. Dennis, representative for this district spoke briefly on the policies of General Motors Corporation.

Four reels were then shown on the screen, showing the 1245 acre proving ground where cars are put to every test that a car will be put to in actual service, so that before a model is offered for sale, it has been tried in every detail.

There was a drawing by all those registered at the demonstration for ten Eversharp pencils, given by Swift & Emery, and some community singing with Mr. O'Hare at the piano made a very interesting evening.

LAKE SHORE

Melville Wood returned home on Sat. last from the States where he has been for the past two or three months

Mr. and Mrs Oscar Barnes and Mr and Mrs. Donald Creasy were Sunday visitors at the T. D. Ferguson home.

Mr. and Mrs. R. Phillips motored to Mundare on Sunday.

Mrs. Bethel visited Mr Bethel who is a patient in Lamont hospital on Sunday. Mr. Bethel had undergone an operation on his foot on Saturday, having a toe which has been troubling him for some time amputated. He is reported as doing very well under the circumstances.

Elgin Seale spent the week-end in Edmonton.

E. Ingram spent the week-end in [illegible]

E. Ingram motored to Lamont on Sunday.

Lutheran church services were held at the home of Mr. Fred Tiedeman on Sunday.

Miss Alma Tiedeman is spending a few days in town with her brother and sister, Mr. and Mrs. Chris Tiedeman.

U.F.W.A. NOTES

The regular meeting was held on Saturday, March 10th. There were 13 members present.

The roll call was answered with "Ways of judging linen and cloth."

Mrs. Ball was not present to give the demonstration of making artificial flowers which was on the program for that day, so the meeting was short.

The next meeting will be on March 24th at 2:30 p.m. in the municipal hall.

The roll call will be answered with Irish stories.

Mrs McNeil will give a millinery demonstration. Do not fail to be present as the program is going to be interesting and instructive. Visitors always welcome.

CURLING

Curling still goes on at the rink, though we are forced to admit that our highly paid and special correspondent is so busy urging his side on to victory that he has neglected his important duties as scribe.

However, one of the groups is going to get a free oyster supper, while the fun and beneficial exercise is all thrown in for good measure.

UNIQUE BIRTHDAY PARTY

On March 4th, at the home of Mr. and Mrs. H. Eaton at which 22 guests were present. There were seven birthdays in the family in March and the party was a celebration of them all. The head of the family, Mr. Phillips, aged 81, was present and occupied a post of honor. Mr. Phillips can look out upon the world and see eight children living, 32 grand children and nine great grand children.

Mrs. H. Eaton served a splendid birthday dinner, and after many a chat about old times, further refreshment, in the form of ice cream, etc., was served in the afternoon.

MAN CUTS THROAT

To-day (Thursday) Robert Myers, a well known resident of this district cut his throat near the Crown Lumber Co.'s office.

From the details to hand, we understand that the unfortunate man was in conversation with Mr. Craig, of the Crown Lumber Co. regarding a purchase there. The telephone in the office ringing, Mr. Craig stepped into the office to answer it, and upon turning round saw Mr. Myers lying down in a pool of blood. Help was immediately called and Dr. Law dressed the wound.

Mr Myers was taken to Edmonton in the afternoon and his condition is critical.

No reason is advanced for the rash and unfortunate act.

KINGMAN

Mr. T. J. Rogness was a business visitor in Edmonton last week.

Mrs. Jonson and daughter, Hanna, of Bardo, were business visitors here on Tuesday.

Mr. and Mrs. T. J. Rogness and family, and Mr. and Mrs. Hans Paulson were the guests of Mr. and Mrs. Nels Johnson on Sunday.

Mr and Mrs. C. Tyrhag, and Mr. and Mrs. A. Gudmundson were the guests of Mr. and Mrs. E. Erickson on Sunday.

Harry Sparby and Simon Simonson were Edmonton visitors over the week end.

A dance will be held in the Kingman hall on Friday, March 16th. Good music will be furnished.

Mr. E. Erickson and children motored to Camrose on Saturday.

[illegible]

The ladies' aid held their monthly Wednesday of last week. The meeting was very well attended. The next meeting will be at Mrs. I. C. Olson's on March 21st.

Mr. and Mrs. Bakkebang left for Grand Prairie on Wednesday evening of last week. Mrs. P. O. Flasten accompanied them to Edmonton.

The members of the ladies' aid and the whole congregation had a meeting last Friday evening, which was held at the home of Mr. A. Erickson. The meeting was for the welfare of the church.

Mrs. N. Pederson and daughter from Larimore, North Dakota were callers at the E. A. Moen and A. Patterson homes last Friday. Mr. and Mrs. J. Jacobson from Bardo accompanied them.

BARDO

About 90 guests met at the V. L. Roth home on Saturday evening to welcome Malvin and Ruben Roth and their brides, who returned last week from Nebraska. The brides were pronounced very dainty and sweet in their white wedding gowns. They were the recipients of many beautiful presents.

On Sunday Mrs. N. E. Roth entertained several couples of the newly married young people.

Mr. and Mrs. J. L. Stauffer are in Edmonton this week.

Mrs. Alice Finseth entertained the ladies' aid and thimble club last Wednesday. The next meeting will be held with Mrs. Jacobson on March 21st.

Mrs. Roevm and Mrs. Hills will entertain the cemetery society at the Roevm home on Tuesday, March 27th. This is the yearly meeting. Every member and everyone interested in our cemetery, are earnestly requested to be present.

Mr. and Mrs. Pete Eggen were guests in the Jacobson home on Sunday.

Mrs. Peterson and her daughter, Clara, from Larimore, North Dakota, visited in the Jacobson home last week.

Those who returned from the States last week were: the Sam Stauffer family; the Misses Lydia Stauffer and Anna Burkholder and Joe Reil. Elmer Bender also returned from Eastern Canada, where he has been for some time visiting relatives.

CRADLE SNATCHERS FOR SATURDAY

"Cradle Snatchers," the stage farce that had Broadway audiences shouting with laugter during a two year's run, has been transferred to the screen by Fox films, and local audiences are promised a mirth feast, when this picture has a showing at the Variety theatre on Saturday night [illegible]

HAY FOR SALE.—Western Rye and Brome grass, mixed; $12.00 per ton. Apply to Wm. Lee, Tofield, 'phone 1911. 8p

Seeking New Trade

[illegible]

Big Cold Storage Plant

A cold storage plant to cost $2,000,000 is to be erected at New Westminster, British Columbia to care for fruit, dairy, meat and fishery products of British Columbia and the prairie provinces intended for export.

Native Animals Increase In Parks

The operation of the national parks of Canada as game sanctuaries has demonstrated that the sanctuary idea is the most successful method of bringing back native animals once thought in danger of extinction.

Indigestion

What most people call indigestion ... The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now why this method is supreme.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Excursion To Sweden

Many Are Planning To Revisit Native Lands On the Baltic Sea

Rev. Oscar Gunnerfelt, of Winnipeg, is organizing a special midsummer excursion to Sweden, Norway, Denmark and Finland, which is to leave Winnipeg about May 14, by Canadian National Railways, and will sail from New York May 31 on the S.S. Drottingholm. Already quite a number of applications have been received for reservations and it is expected that a large party from Western Canada and Minnesota and North Dakota will take advantage of this opportunity of revisiting their native lands on the Baltic sea.

Silk Stockings

Growth Of Wheat Pool

Now Has a Membership Of 140,000 Farmers

The most recently compiled returns show that the Canadian Wheat Pool has a membership of 140,000 farmers with a wheat acreage under contract of 15,500,000 in the provinces of Manitoba, Saskatchewan and Alberta. The Pool operates 942 country grain elevators with a total capacity of ... bushels and ten terminal elevators with a total capacity of ... bushels. During the last crop year the Pool shipped 124,000,000 bushels of grain to 24 countries through 60 ports of the world, 50 per cent of which went to the British Isles.

Canada Has Bought Twenty Light 'Planes

Will Be Loaned To Clubs Which Comply With Conditions

Canada has augmented the fleet of light aeroplanes for loan to civil flying clubs throughout the country by an additional 20 moth planes, the products of a British concern. The moths have already been delivered.

On order to the Government, the planes will be distributed to clubs which comply with the conditions laid down by the Department of National Defence.

The Minister of National Defence announced he had signed a formal agreement with the directors of the Saskatoon Aero Club for the loan of two light planes to the club and the granting of the other forms of assistance, laid down in the standard conditions under which the formation of such clubs will be approved.

Corns are painful growths. Holloway's Corn Remover will remove them.

Canadian Nationality

To the unanimous national protest against the objectionable practice of census statisticians in refusing to recognize such a thing as a "Canadian" nationality, the government must pay heed. It is absurd to style a child whose grandfather was an Englishman married to a Scots woman; whose father was born in Canada and married a Swedish woman, as English. The lad is a Canadian second only in standing to the North American Indian.—Western Producer.

Alice: "What did he do after he called you a crazy halfwit and a sour-faced monkey?"

Doris: "Well, then he became insulting."

It is much easier to be critical than to be correct.

Machine Preserves Secrecy Over Radio

New Method Has Been Tested and Found Satisfactory

Secrecy in voice transmission by radio was successfully demonstrated by the use of a combination of high and low frequency transformers to distort human speech and jumble it to make it unintelligible to the human ear.

The feat was accomplished in a demonstration before a group of engineers, scientists and business men at the City Club, by Sergius P. Grace, general commercial engineer of the Bell Telephone laboratories.

An electric translating "brain," which picked up the intentionally intermingled high and low frequencies, rearranged them in their proper places, modulated them and sent them through loud speakers in proper relation, did the trick, and convinced the audience that secret voice transmission by this method is a scientific fact.

Practical application of the device, it was pointed out, would protect the transatlantic long distance radio telephone service from the ears of all except those for whom it is intended. At present the messages are transmitted on a wave length so low that few stations have apparatus which can be tuned to pick it up, but the new device will assure secrecy under all conditions.

NEW STRENGTH FOR ALL WEAK GIRLS

Comes From the Rich, Red Blood Made By Dr. Williams' Pink Pills

There must be no guesswork in the treatment of pale, anaemic girls and children. If your daughter is languid, has a pale, sallow complexion, is short of breath after slight exertion or on going up stairs, if she has palpitation of the heart, a poor appetite, or a tendency to faint, she has anaemia, the medical name for poverty of the blood. Any delay in treatment may leave her weak and sickly for the rest of her life. When the blood is thin and watery give Dr. Williams' Pink Pills, coupled with nourishing food and gentle out-of-door exercise. The new, life-giving blood which comes from a fair use of Dr. Williams' Pink Pills, increases the appetite, stimulates the nerves and brings a glow of health to pale cheeks. Mrs. Robert Jackson, R.R. No. 1, Shelburne, Ont., praises this medicine for restoring her daughter's health. She says:—"When my daughter was nine years old she was so weak and thin that we feared we would lose her. She was very nervous, and going to school seemed too much for her. Often she would have to stay at home for days at a time. At times she would have a very high fever, and the doctor's treatment did not help her. I tried several remedies, but with no good results. One day a friend advised me to give her Dr. Williams' Pink Pills, and I did so. It was not very long after she began taking the pills that I could see a change for the better. She kept on taking the pills for several months, and through them grew into a strong healthy girl. Since then, if a tonic has been needed at any time, it has always been Dr. Williams' Pink Pills."

The pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Grain Moving Westward

Exports of grain through the port of Vancouver, B.C., during January totalled 11,183,163 bushels and for the 1927 crop shipping season to the end of the same month 30,459,011, both constituting new periodic records.

Fortify Yourself Against Colds!

Toronto, Ont.—"I would have a spell of sore throat a couple of times every year, especially in the winter, and it would be a couple of months each time before I would fully recover and get my voice back. I doctored and took medicine with little relief until I began taking Dr. Pierce's Golden Medical Discovery and it has so completely relieved me of this trouble that I scarcely ever have a sore throat or suffer in any way from my former trouble. It has been worth its weight in gold to me."—Mrs. A. McDonald, 25 McMurrich St.

All dealers. Fluid or tablets.

Northern Saskatchewan Development

Provincial Government Is Planning To Aid Mineral Prospectors

The new department of industries of the Saskatchewan Government is planning to aid mineral prospectors in the northern sections of the province. In conjunction with the Dominion Government, aerial surveys will be continued, and it is hoped that the whole north-eastern mineral area will have been surveyed and reduced to geographical maps by the end of next year. The department is getting itself in the position whereby it can be of every assistance to the prospector and investor. At the present time there is very little accurate information of Saskatchewan northern mineral areas. Recognizing that great development can be looked for both in these areas and the western mining areas of Northern Manitoba, the provincial department is speeding up aerial mapping of the territory as well as the plans for its own provincial activities in the coming season. The minister states it is the intention of his department to place its facilities at the disposal of the prospector and the investor. "The miner will be given every possible assistance," said Mr. Spence, "at no cost to himself to develop his proposition. We will assist him through our experts at the university and do everything possible to place him in the position of developing any proposition which appears to have evidence of successful working out. To the capitalist the department will be prepared to offer to assist in developing water powers and coal fields and to co-operate in every way."

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Rushing Work On Flin Flon Railway

Road Will Be Completed To Mine By Spring

With 1,250 men on the job, work on the building of the Flin Flon railway into Manitoba's rich new mineral area is being pressed day and night.

Seven bridges have been driven, the steam shovel is working at Mile 6 and gravel pits are being opened at Miles 10 and 15. Grading has been completed to Mile 42. Camps have been built, clearing is completed and grading is going on West of Mile 50. The drag-line is at Mile 50. Ninety teams and four Linn tractors are hauling supplies.

Twenty-seven hundred tons of supplies have been delivered to camps West of Mile 50. The telephone line has reached Mile 31.

Because much of the country is muskeg, the contractors are making the winter work for them and are laying the tracks on the ground. Before the break-up, they will have reached the mine and all supplies will have been deposited ready for the ballasting of the track when spring arrives.

Curious New Lifeboat

Invention Of Ship's Carpenter Said To Be Unsinkable

A ship's carpenter, after 60 years at his trade, has invented a new lifeboat of a very curious kind.

It is practically two broad, shallow boats fixed bottom to bottom, so that as one half is capsized the other half is righted. It is said, however, to be practically impossible to capsize it, still more to sink it. In the double bottom are valves which will let the water out but will not let it in whichever way up the boat is; and there are tanks for fresh water and food which can be reached whichever side of the boat may be uppermost.

World's Oldest Christian Church

The oldest Christian church in the world, built during the third century, stands within the shadow of Mount Ararat, at Etchmiadzin, in Soviet Armenia. Gregory the Illuminator, whom the Armenians believe converted them to Christianity, is supposed to have been its founder, and it is for that reason known as St. Gregory's Cathedral.

Silica Sand In Manitoba

Deposits of silica sand, possibly suitable for glass manufacture, are found on the shores of Black Island, Lake Winnipeg, as well as at Beausejour, Manitoba.

In a moment of weakness the Hamilton Herald advocates "Amn't I?" as a substitute for "Am I not?" That paper ought to have its head x-Amn't.

Birds Make Wonderful Flight

Lapwings Complete Non-Stop Flight Across Atlantic In December

An astounding non-stop performance by hundreds of lapwings that flew the 2,000 odd miles from England to Newfoundland in December gales has just become known. The flight is easily the most ... of any recorded in bird life. The lapwing is known in the north of England and ... as the "peewit," and its eggs are sold in London as "plovers' eggs." It is not the first time that a lapwing has crossed the Atlantic, but never before have hundreds crossed together. Stragglers get across by unknown means, but a flock would have to make a non-stop flight. To realize the immensity of their performance it must be understood that only hunger would drive them from this country. Therefore they must have begun their flight in a semi-starved condition. For part of the way they would be assisted by having the gale behind them, but it was impossible for them to have such a gale all the way. In the last stages of their marathon flight they must have fought against heavy odds.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

Wins Many Prizes

Widely Known Horseman From Brampton Will Reside In Saskatchewan

W. J. McCallum, the widely known horseman of Brampton, Ontario, and Regina, Saskatchewan, has completed arrangements whereby he will permanently reside in Regina and have his stables there as a distributing point. Mr. McCallum entered over 100 horses at the Royal Show, Toronto, last fall, filling three stables with his own importations. No exhibitor ever won so many championships and prizes as he won at that show.

The Oil Of the People.—Many oils have come and gone, but Dr. Thomas' Eclectric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Tar Sand Deposits

The Marland Oil Company have been investigating the possibilities of the tar sand deposits on the Athabasca River in Northern Alberta, and contemplate establishing a plant for the extraction of oil based on a process that has been developed at Denver, Colorado.

Troubled With Painful Eruptions Cuticura Healed

"I was troubled with itchy, sore eruptions on my head for over a year. They were very ... in company as I wanted to be scratching all the time, and if I did scratch them a watery fluid came from them. They were very painful, and my hair came out in patches.

"I tried many remedies during that time but without success. I read an advertisement for Cuticura Soap and Ointment so purchased some. The irritation stopped after one week's treatment, and after using three cakes of Cuticura Soap and three boxes of Cuticura Ointment I was completely healed." (Signed) Miss B. Rendall, 309 Kensington St., St. James, Man., Sept. 7, 1927.

Cuticura Soap, Ointment and Talcum are all you need for all toilet uses. Soap to cleanse, Ointment to soothe, Talcum to powder.

Sample Each Free by Mail. ... Cuticura Shaving Stick 25c.

GIVES NO CREDIT TO GOVERNMENT FOR C.N. SUCCESS

Ottawa.—Hon. Hugh Guthrie, House leader of the Conservative opposition last session, charged the finance minister and the minister of railways with endeavoring to appropriate to themselves credit due to Sir Henry Thornton. They were endeavoring to bask in the reflected glory of the president of the Canadian National, Mr. Guthrie declared. He thought Sir Henry and the board of management of the Canadian National should be congratulated upon the "splendid showing" they had made during the past year. Net earnings of the Canadian National had increased by $123,000,000, in four years. "$125,000,000 which formerly had to be withdrawn from the treasury of the Dominion. "The government," Mr. Guthrie pursued, "was not entitled to a particle of credit. Sir Henry Thornton and the board were entitled to the full credit for the result obtained."

Also speaking on the budget, W. T. Lucas (U.F.A., Camrose), described results of the 1926 census in western Canada as startling. The prairie provinces had lost the whole of their natural increase in population as well as 28 per cent. of the new immigration since 1921. This despite ten million dollars spent annually on immigration by federal and provincial authorities and the railways.

F. S. Cahill (Liberal, Pontiac) described the speech of Mr. Guthrie as one of the finest eulogies of the Liberal party that had been delivered. He declared that the system of bookkeeping whereby Canadian National obligations to the public upon which interest is being paid are not added to the net debt was instituted by the ... He believed that it was a ... and consequently it had been adopted by the Liberal Government.

Mr. Cahill believed that if a referendum was taken in Canada on the fiscal policy, that 70 per cent. of the people would favor reduced tariffs or free trade. Legislation he declared must not be designed so as to favor any special class.

Weekly Newspaper Men Meet

Hon. Chas. Dunning Speaks At Banquet In Connection With Directors' Meeting At Ottawa

Ottawa.—The annual meeting of the directors of the Canadian Weekly Newspapers Association was held in the Chateau Laurier, with a full representation of the provinces. Business of urgent importance was under consideration. A banquet was tendered by S. N. Wynn, Yorkton, Sask., president, at which Hon. C. A. Dunning and Hon. McPhee were invited guests. The address given by the minister of railways was greeted with enthusiasm and the member for Yorkton spoke also of the great power of the press in the moulding of public opinion. Those present from Saskatchewan included D. C. Dunbar, of The Estevan Mercury, and S. J. Dornan, of The Alameda Despatch, the latter giving an address at the business sessions stressed the necessity of greater co-operation and tendered a hearty invitation to the association to meet in Regina, the convention city, in June.

Woman Liberal Elected In Britain

Mrs. Walter Runciman Successful Candidate On St. Ives

Penzance, Eng.—The first woman Liberal in the present British Parliament and the first husband and wife combination in the House of Commons have resulted from the recent by-election in St. Ives.

Mrs. Walter Runciman, wife of the Liberal member for Swansea West, not only became the first woman Liberal in the present House, but succeeded in capturing the St. Ives constituency from the Conservatives.

The district formerly was a Liberal stronghold but returned a Conservative at the last general election in 1924.

Mr. Runciman, who is a prominent figure in the Liberal party, actively supported his wife's candidacy.

Pioneer Missionary Dead

Winnipeg.—Rev. Dr. John McLean, historian and pioneer missionary of Western Canada, died here following an attack of influenza. Dr. MacLean, who was in his 77th year, since coming to Canada more than 50 years ago had been prominently connected with the activities of the Methodist Church in the Dominion.

Saskatchewan House Prorogues

Thirty Bills Were Put Through In Final Session

Regina.—With traditional dignity and solemnity His Honor Lieutenant-Governor Newlands prorogued the third session of the sixth Saskatchewan Legislative Assembly. Since January 26, thirty three sittings were held during the session, including 11 night sittings, four morning sittings and a Saturday sitting.

The closing ceremony came after a long busy day during which more than 30 bills were put through the closing stages and passed. One of the last items of business transacted by the House was the passing of supplementary estimates totalling $1,115,519 to cover expenditures already incurred. These were put through with little interruption, except a question now and again as to how the money was spent. An item of $11,500 was required for the Power Commission's work. The main items included $35,306 for the Treasury including a grant of $10,000 to the Canadian National Institute for the Blind, and $23,190 for Freight Rates Inquiry, $500,000 for the Farm Loans Board, $193,000 for the Educational Department, $52,330 for the public health department.

Votes totalling $24,300 were included in additional estimates to bring the indemnities for members of the Legislature up to $2,000 a year from $1,600; to provide $2,000 for leaders of the Opposition and to give the Premier an increase of salary from $6,000 to $7,200 a year. These increases were discussed a day or two ago when it was pointed out that Saskatchewan members were the lowest paid in any legislature west of the Maritime Provinces, and Howard McConnell, the member for Saskatoon, declared Premier Gardiner, while the hardest worked man in the province, was poorly paid when there was no reason for the province to be too niggardly.

Infant Princess Dies

Six Months' Old Daughter Of Emperor Of Japan Succumbs

Tokio, Japan.—The six months old daughter of Emperor Hirohito of Japan, is dead. "Complications following pneumonia," was assigned as the cause of the death of the Imperial baby, who had been critically ill for several days.

The child was originally attacked by influenza, from which the emperor himself also suffered, together with thousands of Japanese people. It was announced that the emperor was convalescent.

At the bedside of little Princess Hisa were the Empress and other members of the royal family. There will be no official mourning as the child was under seven years of age, and no public mourning. Interment will be under Shinto rites at Asakawa, near Tokio, where the late Emperor Taisho is buried.

New Discovery At Flin Flon

Another Ore Body Located Said To Be Important

Toronto.—Reports from Flin Flon Mines are that a new ore body has been located south of the main ore body. It is stated that the new find is one of considerable importance.

Development work is being pushed forward energetically. On the 400-foot level a crosscut 240 feet in width has been drifted on for a length of approximately 300 feet. The average value obtained has been 2 per cent. copper and some zinc, but some sections are of much higher grade, one of 20 feet width running between 5 and 6 per cent. copper.

The work of preparing a new townsite is well under way, and sites have been selected for the concentrator and smelter. The present camp buildings will be removed to make room for the new plant.

Sterilize Feeble Minded

Edmonton.—Following one of the stormiest passages that any measure before the Alberta House has been accorded in recent years, the Sexual Sterilization Bill was given third reading and will be put into effect as soon as it has been assented to by the lieutenant-governor. By this action of the legislature, Alberta becomes the first province in the Dominion of Canada to undertake sterilization of the feeble-minded.

Gift For Medical Research

Stockholm.—At the request of the monarch himself, Sweden's birthday gift to King Gustav V. will be devoted to work for suppression of cancer. A national subscription for the fund in honor of the king's 70th birthday, June 16, has been started, and the king has accepted in advance, on the premise that the money be used for medical research.

Boy Inherits Millions

Young Son Of New York Millionaire Receives Legacy

New York.—A five-year-old boy today had joined the ranks of American millionaires. John Mortimer Coward, 3rd, of Glenridge, N.J., is to receive at least two-thirds of the more than $4,000,000 estate of his father, J. Mortimer Coward, late head of the Coward Shoe Stores, who died in Havana recently.

Part of the fortune which the five-year-old boy inherits is $1,000,000 from an insurance company policy his father took out last July. Mr. Coward was 28 years old.

SITUATION IN THE NEAR EAST LOOKS OMINOUS

London.—The stern note which Great Britain presented to Egypt, stating in effect that the British will not grant full independence to that country at present has been coupled with the "holy war" in Arabia to create a situation which may affect British relations throughout the Near East to the borders of India.

Despatches from Egypt assert that the political situation there is fraught with confusion, uncertainty, and excitement. Egypt is without a cabinet, but the Nationalist leader, Nahas Pasha, after an hour's audience with King Fuad, declared that constitutional governments would be formed as long as the constitution exists.

The British note, which apparently dropped like a bombshell in Cairo political circles after the breakdown of negotiations for an Anglo-Egyptian Alliance, makes it clear to the Nile country that Great Britain will not tolerate any legislation that is likely to hinder British power in protecting foreign life and property in Egypt. The note reveals that the British Government has for some time feared that such legislation would be adopted by the Egyptian parliament. But so long as there was prospect of a treaty of alliance, Britain refrained from expressing these fears.

Well informed British observers believe that the home government now has said her final word and that the burden of the next move in the imbroglio rests in Egypt. Shorn of diplomatic verbiage, the position is about as follows:

Egypt declines to sign any treaty of alliance which does not accord absolute independence to her. She rejects the right of Great Britain to maintain troops in Egypt or to have any control over the Egyptian police.

Britain, on the other hand, firmly intends to keep her troops there, believing the soldiers are necessary for protection of the Suez Canal. She also insists on maintaining a measure of control over the Egyptian police and observers explain that this is to prevent any situation arising which might result in some other power taking a hand in Egyptian affairs.

Whether Egypt signs such a treaty or not, Great Britain will stick to these demands, in the opinion of British observers.

Fight Destructive Insects

Ottawa.—The fight against the destructive insects which prey upon Canadian crops was described by Arthur Gibson, Dominion entomologist, to the convention of the Canadian Horticultural Council here. The use of the aeroplane for dusting in an endeavor to rid the crops and soil of certain insects was experimented in last year and proved quite promising.

During Aviators Return To Safety

Flying Officer A. Lewis (1), and Flight Sergeant N. S. Terry (2), crew of the Fokker plane Saskatchewan, who were missing since February 17 until March 1st. Their plane being wrecked, they managed to travel overland sixty miles to Port Burwell, after suffering incredible hardships.

Government Bill Criticized

One Day's Rest In Seven Bill Does Not Please Manitoba Laborites

Winnipeg.—Though it was given second reading the Bracken Government's bill for one day's rest in seven for certain employees was severely criticized by the Labor and Conservative leaders in the legislature.

Under the bill, declared John Queen, Labor leader, the bill only applied to employees already getting one day's rest in seven. Mr. Queen described the bill as "a bluff," the work of an unsympathetic administration.

"The bill," said Mr. Queen, "applied to piano and organ factories, though there were none in the province. Why not, on the same principle, apply it to shipbuilding, the building of dreadnaughts and submarines? Let us have a real act, when we are at it."

Pictures Cannot Be Shown

Photos Of Lieut.-Col. Amery's Tour Will Not Be Exhibited

London.—In connection with the recent Empire tour of Lieut.-Col. L. C. M. S. Amery, secretary of state for Dominions Affairs, photographs of various places and interesting incidents were taken by Captain William Brass, M.P., former private parliamentary secretary to the Minister of Health and the Chancellor of the Exchequer, who accompanied Col. Amery on the tour. It was proposed to exhibit the pictures within the precincts of the House of Commons. Now, however, permission for the exhibition has been refused by the Lord Chamberlain, the Earl of Cromer, with whom the decision on the matter rests.

Escape Death When Airplane Crashes

Eight Passengers On London To Paris Flight Were Uninjured

London.—Eight passengers of an aeroplane flying from Paris to London had a remarkable escape when the machine crashed in a field near the Lympne airdrome in Kent. Baroness Van Till Cusch Kavanagh, of the Hague, was cut in the face by glass, but the other passengers were uninjured.

Trouble was experienced when the plane reached the French coast, and its speed was reduced. Near the airdrome the left wing suddenly dipped, and the plane spiralled rapidly toward the earth. It crashed and bounced several times after the wing struck the ground. The passengers were jolted all over the place and the baggage tumbled about.

Unconcerned, the pilot, Roger Maury, climbed out of the cockpit, opened the passengers' door, and all scrambled to safety, fearing the machine might catch fire as both engines were wrecked.

Later Pilot Maury explained that a valve spring in one of the engines had apparently broken.

Banking System Discussed

Government Inspector Says Nothing Wrong With Present System

Ottawa.—C. E. S. Tompkins, government inspector general of banks, appeared before the House of Commons committee on banking and commerce and submitted to questions by the members. The banking system, as it existed, met the needs of the country, he told the committee. Of course from time to time changes were necessary but he could not see anything radically wrong with the system.

The views of the Canadian Council of Agriculture with respect to banks and banking were presented by A. E. Darby, director of economic research for the council.

REPORT TELLS OF SEARCH MADE FOR AVIATORS

Ottawa.—Beacons burning on mountain tops and rockets were used to spread the news of the evening tragedy all over the North land, and officers of the Royal Canadian Air Force did all that was humanly possible to locate Flying Officer Lewis, Flight Sergeant Terry and the Eskimo "Bobby" when they were missing, according to the latest radio reports to reach Ottawa from the Hudson's Straits air base at Port Burwell, Ungava.

In a lengthy report of steps taken to find the trio, Squadron-Leader T. A. Lawrence, of Ottawa, who has charge of the R.C.A.F. detachments in the north, detailed areas covered by aeroplane and dog team. "Every section of Ungava and Ungava Bay within an area of 200 miles were searched. Dog teams with Eskimos were sent out to establish caches of fuel and supplies, and to warn Hudson's Bay posts and Eskimo villages that the airmen were missing.

"Beacons were kept going from a high point behind the Port Burwell base at night. Flares and distress signals were fired off until this had to be suspended through shortage of fuel and flares."

Squadron Leader Lawrence tells of the part played by Flight-Lieutenants Brian Carr-Harris, Ottawa, and A. A. Leitch, Winnipeg, in the search, and adds: "... great credit is due to members of the Royal Canadian Mounted Police, Mr. C. Ford, manager of the Hudson's Bay Company's post at Port Burwell, Capt. W. Bennett and crew of the C.G.M.M. steamship Canadian Raider and the natives of the whole district for their untiring assistance in search of missing personnel. Personnel have now entirely recovered from their harrowing experience."

In official circles here it is believed the plane which the three men were forced to abandon will be washed up on the shores of Labrador or Newfoundland in due course, or the wreckage picked up at sea. The ice on which it was deserted was being borne southward by the Labrador current and it would thus probably remain visible on the surface of the ocean for several months at least.

Want Holiday November 11

Ottawa.—"In view of the request of the Canadian Legion, is it the intention of the Government to declare November 11 (Armistice Day), a National Holiday?" asked H. J. Barber, Conservative, Fraser Valley, in the House of Commons. He was informed that the matter is still under consideration.

EQUAL SUFFRAGE IS PROMISED FOR BRITISH WOMEN

London.—Stanley Baldwin, the first British prime minister to appear before an equal suffrage meeting promised a vast assembly of women representing 140 organizations that "in a few weeks" Parliament would grant them complete equality with men in voting privileges.

This declaration was received with frenzied cheering by the women, who had met to celebrate the success of their bitter fight extending over nearly 100 years.

"I have selected the home secretary to be the Joshua, who shall lead you into the promised land," said Premier Baldwin, indicating that Sir William Joynson-Hicks would have charge of the franchise bill.

Agreeing with Disraeli, who was one of the early statesmen to favor full rights of citizenship for women, the Prime Minister asserted that there were no grounds in logic, justice or expediency to withhold the franchise from one sex more than the other.

Mr. Baldwin announced that the franchise bill will be introduced in the House of Commons on Monday. It will pass its second reading before Easter and will be completed at the earliest possible date.

Mine Chief Admits Laxity

Hollinger Disaster Due To Order Not Being Enforced

Timmins, Ont.—Charles Williams, Hollinger's general superintendent, admitted to the Royal Commission inquiring into the Hollinger disaster that there was a "very bad slip up" from himself down to the transportation men, when his orders about disposal of powder house rubbish had been disregarded.

Instead of putting the rubbish in the waste pass or else mixed with rocks in the stopes, it had been put in the stopes without any rocks, and as a result had started the fire which snuffed out the lives of 39 miners.

Williams could not say who was responsible. Williams said he knew of no one who could give further information when it was suggested the commission adjourn so that it might conduct an inquiry there.

Reward For Eskimo

Suggestion Made In Parliament That Recognition Be Given "Bobby"

Ottawa.—"I would like to ask the Government if it is willing to give consideration to the matter of awarding in some form or other the Eskimo "Bobby" whose knowledge and skill were largely responsible for saving the lives of Flight Lieut. Lewis and Sergeant Terry off the Labrador Coast?" asked John Millar, Liberal-Progressive, Qu'Appelle, in the House.

Hon. J. L. Ralston, minister of national defence, replied that the full report of the activities of all individuals in the rescue of the two airmen had not been received by the department. As soon as the full report was received the whole matter of reward would be given consideration.

Championship Wolf Hunt

Toronto.—A championship wolf hunt, with $10,000 in prize money, as a means of eliminating the animals which yearly take a heavy toll of livestock in the north country, was advocated by T. Legault, Liberal, in the Ontario Legislature. The prize money he suggested, might be divided into some 25 prizes ranging from $3,000 down.

Few Canadians Go To U.S.

Toronto.—Indications that the number of Canadians leaving Ontario for the United States considerably decreased in 1927 compared with the previous year are given in the report of the registrar-general, which has been presented to the legislature. A drop of 15,000 in the number is shown.

French Legation At Ottawa

Paris.—The finance committee of the Chamber of Deputies has approved an appropriation for the establishment of the French Legation at Ottawa. In approving the appropriation the committee declared the establishment of diplomatic relations with Canada valuable for both trade and sentimental reasons.

The domestic market absorbs annually $837,000,000 worth of Canadian agricultural products as against $800,000,000 worth exported. The value of the per capita consumption of farm products in Canada amounts to $87.50.

Australian Rugby Team Here

Nothing but praise for the sportsmanship of Old Country people was expressed by the Waratahs, New South Wales, Australia Rugby Team, when they arrived in Canada recently on the Canadian Pacific Steamship Melita. During their nine months' tour of Great Britain and France, where they played 32 games with record crowds in attendance, sometimes exceeding fifty thousand, they much appreciated the sportsmanlike behavior of spectators.

E. Gordon Shaw, manager of the team, said: "The British crowds were about the most fair-minded and unprejudiced I have ever seen. If a referee ever gave a decision that was perhaps a shade on the doubtful side in our favor, there were never any demonstrations of discontent. I have nothing but unstinted admiration for the whole-hearted sportsmanship of our treatment on the other side."

WHAT IS BETTER SEED—THE SEED ACT DEFINES FIVE GRADES OF SEED

The Dominion Seeds Act, 1923, which controls the sale of seed, requires same to be sold under one of the following grades: registered, extra No. 1, No. 1, No. 2, and No. 3. Seed grading below No. 3 is designated 'rejected' and sale of such is prohibited. All grades shall consist of seed which shall (1) within comparative latitudes for different grades be well matured, plump, sound, sweet, and well cleaned and graded to remove small, shrunken, immature or broken kernels and inert matter; (2) be at least equal in general appearance to standard grade samples that may be fixed from season to season, and (3) comply with minimum standards of purity and germination set [illegible].

Registered seed, which is the highest grade, is of pure variety, free from all weed seeds or other kinds of grain and of high germination. Such seed is sure to give better results under field conditions, higher yields may reasonably be expected and more uniform maturity, resulting in greater profits for the producer. Extra No. one and No. one respectively, come next. These grades of seed can safely be recommended. The lower grades permit the presence of more weed seeds, other crop seeds and lower [illegible].

Good seed is cheap at any price and poor seed is dear at any price. Good seed never stops paying you; you never stop paying for poor seed. Weed seeds introduced into the soil through poor seed impoverish the soil, reduce crop yields, increase harvesting and marketing costs and require much hard work and expense to eradicate.

The best for the west is none too good.

Use better seed.

TO OPEN C.N.R. DEPOT AT EDMONTON ON MARCH 17th

Arrangements have been completed for the official opening of the new C.N.R. depot at Edmonton on Saturday, March 17th, it is announced by W. A. Brown, General Superintendent of the C.N.R., Alberta Division. S. J. Hungerford, vice-president in charge of operations, W. A. Kingsland, manager of western lines, and other officials of the company are expected to be present at the time of the opening.

HOME NO. 3 OIL WELL VISITED BY FIRE

Fire of unknown origin completely destroyed the derrick on the site of the Home No. 3 oil well in Turner Valley, last Wednesday morning. At the last report from the drillers the well, which was started only recently, had reached a depth of 152 feet.

Commander Byrd Sketches Plans For His Proposed Dash To The South Pole This Fall

Reclining in an easy chair at the Governor's mansion at Richmond, Virginia, Commander Richard Evelyn Byrd pictured the time when he would be camped on a stationary iceberg, 2,300 miles from the nearest human dwelling, on his projected exploration trip to Antarctic regions.

Commander Byrd said his expedition would sail south in September, 1928. He expects to return by June, 1930, though there was a possibility, he said, that he might be delayed a year.

New Zealand is to be the first stop of the adventurer and his men. Then comes the voyage for the Ross ice barrier, 2,300 miles to the south.

The main base of the expedition will be at the Bay of Whales, where Amundsen had his headquarters, according to present plans.

"This is 2,300 miles from the nearest human dwelling—the farthest people have ever lived from civilization," Commander Byrd said, "and there we shall establish a small village.

"After making camp, we shall establish several sub bases about 100 miles apart on the way to the South Pole. These will be necessary, for in the event of a forced landing we shall be able to hike to a food supply.

"The final flight to the Pole will be the most hazardous. In addition to the radio, we shall use a kite to keep in touch with the last base. As the South Pole is on the last plateau, 10,000 feet high, landing will be difficult. The air at the height of two miles has lost so much denseness that it requires a great deal of power to take a plane off the ground and we shall land with at least 1,200 gallons of gasoline and 1,000 pounds of emergency equipment. Our landing speed must be fast."

For the flight to the Pole a big monoplane with three engines and a wing spread of 78 feet, probably will be used, the Virginia aviator said. In addition, the expedition will carry two single engine monoplanes of the type used by Chamberlain on his trans-Atlantic flight. Radio will be used to keep in constant touch with civilization and an "ice ship," with a bowed hull and two projecting timbers to push aside floes is being constructed. Fifty-four men, including a dozen experts, will make the trip. Floyd Bennett, who accompanied Byrd to the North Pole, will be second in command.

Maps of the polar regions will be made of everything encountered and the scientific data brought back to civilization. The frozen area to be explored is larger than the United States and Mexico combined.

"Science is the loser so long as there is a large, unexplored area in the world," Byrd said. "This trip is primarily for scientific purposes and I regard whatever hazards encountered as justified by the increase in man's knowledge which the expedition will make possible."

When White Pine Was King

The early history of the lumbering industry in Canada is practically the history of the lumbering of white pine. In the early days of lumbering, the white pine was considered the main, if not the only, tree of value in the forests. It was the premier lumber tree, and for years held first place as lumber-producer both as to quantity cut and the value of the product.

Million Bushel Elevator At Coast

A contract has been awarded for the construction of a million bushel grain elevator for the Fraser River Elevator Company on the Fraser River near New Westminster, B.C. The elevator will be located on the south side of the river on a spur of the Canadian National Railways. The contract price is $430,000.

"Are you going to spend the winter here?"

"No. I ought to have gone three months ago, but I have been afraid of seeing the bill."—Journal Amusant, Paris.

W. N. U. 1734

To Improve Quality Of Canadian Barley

Conference In Ottawa Attended By Representatives From Prairies

Preliminary steps for improving the quality and broadening the market for Canadian barley were taken at a conference held here in Ottawa under the direction of Dr. J. H. Grisdale, deputy minister of agriculture. All the prairie provinces were represented.

A committee has been appointed to investigate the question of securing the varieties and strains best suited to the different localities where barley can be profitably grown.

The committee includes L. S. Newman, Dominion cerealist and Professor T. J. Harrison, of the Manitoba Agricultural College, Winnipeg.

A seed committee also was appointed with Major H. G. L. Strange, of Fenn, Alta., as a member, while a barley markets extension committee was formed, composed of L. H. Newman and Professor Grant, of Winnipeg.

Several of the delegates stressed the importance of barley growing where wheat and oats could not be successfully produced, and recommendations made for adopting new barley grades. A committee was appointed to see what could be done to secure amendments to the Canada Grain Act which would provide grades for malting barley.

Not His Business

He was a hot-headed lad, and when he joined the army it was not long before he found himself in serious trouble. Accordingly, he was hauled up next morning before the C.O.

The usual preliminaries were gone through, when to the amazement of everyone the recruit commenced a lengthy speech in his own defense.

"Silence!" roared the adjutant.

"Shut up yerself!" retorted the recruit. "It's the old boy in the chair I'm a-talkin' to, not you!"

A Chic Frock

The smartly simple frock pictured here is suitable for many occasions. There is a circular inset at each side of the skirt, a V-shaped neck finished with applied bands and long dart-fitted sleeves. No. 1719 is for ladies and misses, and is in sizes 16 years, 36, 38, 40 and 42 inches bust. Size 36 requires 4 yards 36-inch, or 2½ yards 54-inch material. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

LARGER EQUIPMENT REDUCES FARM LABOR

Farmers Should Keep This In Mind When Replacing Implements

The economical use of farm labor is essential to profitable farming. Labor is often needlessly wasted because farmers have not calculated the hours of manual labor that they could save by using, on farms having a sufficient acreage, implements drawn by three or four horses instead of two, says an Experimental Farms Note.

In many cases the time of a man could be saved by using, for example, a two or three-furrow plough, multiple section harrows, or a double cultivator. For the cutting and hauling of hay or grain, much labor could be economized through the use of larger implements, as these implements are ordinarily used during several days each year.

On a 200 acre farm where a 5-year rotation is followed and of which 15 acres are seeded to corn or other hoed crops, 85 acres to grain and 60 acres to hay, an average of 200 to 250 hours of man labor equal to 20 to 25 ten hour days can be saved yearly solely through the use of more powerful implements.

The labor which is saved could be used for other lines of work which are often neglected because of the lack of time, or the tilled area might be extended and thus increase the farmer's income. In most cases it would not be necessary to increase the number of horses on the farm for such a change.

It is readily understood that the farmer who already owns a complete set of agricultural equipment is not ready to sell it as a whole in order to buy larger implements, but as he gradually replaces his equipment, he would be wise to consider the advisability of buying, even at an increased cost, three or four-horse rather than two-horse machines.

A Dual Source Of Wealth

Coal Mines and Clay Deposits In Southern Saskatchewan

A new coal mine has been opened up recently in the Estevan district, Southern Saskatchewan. The coal seam is several feet deep and carries an overburden of valuable commercial clay. The mine is being operated by a force of practical miners, and the coal retails at $3 per ton to local farmers who haul it from the pit. Clays from twenty-two different deposits in Southern Saskatchewan are now being tested at the laboratories of the provincial university to determine their suitability for the manufacture of whiteware. This classification includes such products as household ware, electrical porcelains and floor and wall tile.

Gold production from the mines of Northern Ontario in 1927 totalled $33,400,247, an increase of $2,400,141 over 1926. The Province of Ontario is now the principal gold-producing centre in Canada, with British Columbia next in importance. A small quantity is produced in Nova Scotia.

It's twice as easy to deceive one's mother as it is any other person.

You can't stretch your word far without breaking it.

Care Of Breeding Turkeys

Important To Commence Feeding For Egg Production At the Right Time

To get turkeys laying at the proper season requires experience. It is important to know just when to begin feeding for egg production. According to a Dominion Department of Agriculture bulletin on the "Care and Management of Turkeys," forcing for laying should be begun as soon as the weather becomes really springlike and laying should commence about the middle of April in Eastern Canada and somewhat sooner in the West, especially in British Columbia. Eggs laid too early have to be held too long before setting.

When the spring feeding starts the breeding turkeys should be given grain twice daily, morning and evening, and at noon a feed of wet mash composed of equal parts of bran, shorts, ground oats and cornmeal with sour skim-milk to moisten. Only the quantity that the birds will clean up readily should be given at each feeding. The noon mash should be started about a week later than the extra feed of grain. It is assumed that the turkeys have received only one feed of grain daily during the winter. Grit and oyster shell should, of course, always be provided.

Egg Hatching

Interesting Hatching Results Obtained At Agassiz Experimental Farm

At the Experimental Farm at Agassiz, B.C., where so many world's records were made with high producing hens in 1926, some interesting hatching results were obtained in the spring of that year. They are detailed in the latest report of the superintendent, available at the Publications Branch of the Department of Agriculture at Ottawa, and, of course, apply mainly to conditions in British Columbia. Hatching commenced towards the end of February and was continued to the end of April. The percentage of fertility during March was 81.2 and in April 81.6. Of the total eggs set during March 41.6 per cent. hatched as compared with 41.4 per cent. in April. Of the fertile eggs March recorded a 45.6 per cent. hatch compared with a 50.5 per cent. hatch in April. Hen eggs were 83 per cent. fertile against a fertility of 73 per cent. in pullet eggs. The number of chicks alive when wing-banded was 28.6 per cent. from hen eggs and 33.1 per cent. from pullet eggs.

Will Drill For Oil

The Hudson's Bay-Maryland interests, which had several exploration parties working in various parts of Alberta and Alberta's northern hinterland last year, will drill for oil in the Viking field from which Edmonton's natural gas supply is drawn. Plans call for drilling to a depth of 4,000 feet. The North Western Utilities, a subsidiary of the International Utilities Corporation, will drill two more gas wells in the Viking area.

Highest Peak In Canadian Rockies

The highest peak in the Canadian Rockies is Mount Robson, in British Columbia, on the line of the Canadian National Railways. This mountain has an elevation of 12,972 feet [illegible].

ROYAL GIFT TO CANADA

The Bible which the Prince of Wales presented to Canada's national war memorial is seen reposing on the altar of sacrifice in the Victory Tower. Although the presentation was made upon the occasion of the prince's last visit to the Dominion, it was only recently that the gift was learned about, the memorial chamber in which it reposes being thrown upon for inspection only on special occasions.

Fame Of The Dominion As An Ideal Vacation Land Has Been Spread Far And Wide

Much has been said in recent years relative to the variety and extent of Canada's recreational resources. The annual national income derived from such resources, although hard to estimate accurately, is one which compares favorably with the annual values of the products of her forests, of her mines, fisheries or any other industry. In addition to keeping abreast with other progressive [illegible] in the field of commercial activities, Canada has established a world-wide reputation as being a charming holiday land where practically all forms of recreation are available at moderate cost to the visitor. There are few records in the annals of Canadian development more interesting or more remarkable than those of the manner in which the economic importance of the Dominion's recreational features has grown in recent years.

Not the least among the many changes in the conditions of modern life are those resulting from the development of the automobile as a means of transportation. An amazing increase in the volume of holiday movement has been witnessed during the last few years and the automobile has played a large part in this regard; it is no longer considered a luxury of the rich but is rapidly becoming a necessity for the man in moderate circumstances.

Some idea of the extraordinary growth of the holiday traffic may be gained from a comparison of the records of touring automobiles entering Canada over a period of years. Between 1919 and 1926 the number of cars receiving permits to enter the Dominion for a period of 30 days rose from 59,000 to 550,000 and those entering for twenty-four hours increased from 177,000 to over 1,500,000. The number entering for a period of from one to six months also shows a substantial increase. Aside from the remarkable increase of motor tourists, railway and steamship lines each year add enormous numbers to the thousands who holiday in Canada. Including an even wider field than the automobile these organizations have spread the Dominion's fame as an ideal vacation land far and wide.

The vast numbers who annually visit Canada by automobile can find an opportunity to spend part or all of their vacation in territory extending beyond the usual avenues for travel. In keeping with the desire of many who wish to visit newer fields and in order to provide facilities for easy and convenient travel, motor highways have been constructed which now enable the tourist to reach beautiful lakeland country, in some instances rarely explored. There are now over 150,000 miles of improved roads in Canada. In addition to this vast mileage, which is kept in good condition throughout the touring season and in some districts available to the motorist during the whole year, there are many thousands of miles of other roads suitable for general motor traffic leading to practically all places of interest in the populated areas of the Dominion. These motor roads contribute largely toward the development of her recreational resources.

Few countries in the world possess such magnificent and diversified natural scenery or such inviting summer and winter vacation areas as Canada. Fortunately for the inhabitants of the large cities of America nature has bounteously provided immense playgrounds in her wide expanses of mountain, lakeland, forest, and river National and Provincial parks covering an area in the neighborhood of 25,000 square miles and ranging from the Atlantic seaboard to the Pacific coast, are all easily accessible either by rail or motor road or both and provide the tourist with exceptional opportunities for varied recreation. The huntsman, fisherman, camper or canoeist will find in Canada's hinterland great stretches of primeval forest, rolling plain, and mountain range, the natural haunt of moose, deer, caribou, bear, bighorn sheep, mountain goat and other native game animals, beautiful lakes and countless swift-flowing rivers affording an opportunity for some of the very best fishing to be found anywhere in the world.

From a historical viewpoint Canada occupies a unique position among the countries of the world. Some of the most romantic and interesting episodes in the history of North America afford an extensive field for study to those interested in the early history of the continent. There still remain, in many districts throughout Canada, visible evidences of early conflict in ruins which have been preserved; and there may be found original forts, blockhouses, powder magazines, guard houses and listening posts as well as other evidences of early important events which have direct bearing on the political, economic and industrial progress of the country.

Taking into account the scope and variety of the attractions found from coast to coast and from the International boundary to beyond the Arctic circle there is every reason for the view that the natural assets which have been indicated above will prove to be one of the major forces of Canadian development in the future.

Suffer From "Sea Hunger"

But Danish Settlers Soon Become Used To Prairies

"Danish settlers in the prairie provinces suffer terribly from sea-sickness—not of course from heaving on the sea but from being absent from it," said Aksel Sandemose novelist of Copenhagen just back in Montreal from a seven months' tour of the Danish settlements in the Canadian [illegible].

In discussing his findings in the offices of the Department of Colonization and Development, Canadian Pacific Railway—where, apparently he had dropped in for literature, maps, photos and things from the department's resources—Mr. Sandemose went on to explain: "This sea hunger or should I say 'thirst'—no that won't do either — but, at any rate this new and strange absence from the sea is experienced by practically all of the 30,000 Danish settlers in the West, for you must remember that it is almost impossible to live anywhere in Denmark without being in sight or sound of the sea, either the coast or bay or inlet.

"But" Mr. Sandemose hastened to add, "this sea-sickness gradually wears off, after a year or so, and once the settlers have dug themselves in and got used to the new horizon they do well, even in wheat growing, which is new to them, and very few of them return to the homeland."

Old Pawnshop In Paris

Is City Owned and Now Loans On Automobiles

The Paris "Monte de Piete," or city pawnshop, is 150 years old, but there will be no birthday party.

It is, officially, the Credit Municipal and unofficially "My Aunt," merely a change in gender from the American appelation.

Private pawnshops are forbidden in France and the public loan institutions are supervised by the authorities to insure honest and efficient administration.

Pension claims are accepted as collateral for loans at only 1 per cent. a year, but other loans are at 8 per cent. At Toulouse and other cities loans are made without interest.

The only innovation of recent years has been the acceptance of automobiles "in hock."

Helping the Farmer In B.C.

Press despatches state that federal farm loan benefits are to be extended to British Columbia by legislation introduced in the provincial assembly on the recommendation of the agricultural committee. Loans will be obtainable on mortgage up to fifty per cent of appraised value of land and twenty per cent on buildings.

Served Eighty Two Years

After serving 82 years with the same firm, John Hughes has just resigned as general works manager of George Salter & Co., manufacturers of weighing machines, at West Bromwich, England. He started with the firm at nine as an errand boy and served continuously until ill-health caused his resignation.

The summer descendants of a single fly will number 2,080,000.

Population Of Saskatchewan

Given As 820,738 As At June 1st, 1926

The population of Saskatchewan as at June 1, 1926, was 820,738, an increase in the five-year period from the quinquennial census of 1921 of 63,228, according to the report issued by the Dominion Bureau of Statistics today. In this total, males exceeded females by 72,134. The rural population of the province was more than double the urban, the figures being 578,206 and 242,532 respectively. The urban population were distributed among seven cities, 80 towns and 380 villages.

Nearly 6[illegible] per cent. of the population was born within the province itself, while of the 820,738 [illegible] in Saskatchewan, 621,519 [illegible] of British origin. Native born [illegible] comprised 525,372, those [illegible] the British Isles 94,041, and [illegible] other British possessions [illegible]

Of the foreign born, [illegible] numbering 198,[illegible] or nearly [illegible] cent., Russia was the largest [illegible] butor with 27,227; Austrians second with 11,[illegible]94 and Ukrainians third with 10,9[illegible]. The [illegible] 8,241 [illegible] 7,[illegible] Germans [illegible] Norwegians 7,[illegible] Swedes [illegible] 2,066 Danes. There were 1,[illegible] [illegible] of whom Chinese furnished [illegible] and Japanese 97.

Illiteracy was greater among the foreign-born, there being [illegible] of the total over ten years old without letters. Canadian-born [illegible] 2.93, and British born .21.

The Sun Life

More Firmly Established On a Sound Financial Basis Than Ever Before

One of the most encouraging signs of the times for Canada is the substantial progress that continues to be made by our great banking and insurance institutions. The Sun Life Assurance Company of Canada has done record business during the past year and its position is today [illegible] firmly established upon a sound financial basis than ever before in its history. When Canadians reflect on the strength and stability of their banks and their insurance companies the desire that these shall always remain Canadian is uppermost. It is indeed in the highest interests of the nation that they should never pass under foreign control. Canada needs capital, but not to be devoted to swallowing up our national identity. —Montreal Star.

Winnipeg Newspaper Union Fashion

1722

An Attractive New Frock

This dainty frock for the junior miss will be found quite simple for the home modiste to fashion. There are two gathered ruffles attached to a straight foundation, and the square neck and short kimono sleeves may be bound with matching or contrasting material. No. 1722 is in sizes 6, 8, 10, 12 and 14 years. Size 10 requires 2 [illegible] yards 36-inch, or 1[illegible] yards 54-inch material. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

LESSON No. 19

Question: Why is emulsified cod-liver oil so wonderful a food-tonic for young girls and women?

Answer: Because it abounds in nourishing factors that are particularly beneficial to people prone to anemia and other conditions due to malnutrition.

Keep your system vitamin-nourished—take

SCOTT'S EMULSION

Invention Of Canadian

Control Device For Airplanes Declared To Be "Fool Proof"

A variable pitch propeller, which is to an aeroplane what a gear shift is to the automobile, will be introduced to commercial aviation in the U.S. this year if the plans of W. R. Turnbull, Canadian inventor, are successful. Mr. Turnbull, who lives in Rothesay, N.B., but who is staying at East Orange, N.J., talked to New York papers.

The device has been tested thoroughly by the Royal Canadian Air Force, he said.

Mr. Turnbull is negotiating with New York manufacturers for the national rights to his invention which is covered by patents and patent applications.

His method of varying the pitch of a propeller is to control the necessary gears by a small electric motor and a hand switch which makes the device fool proof."

Turnbull, who has been working on his propeller twelve years, said the pitch could be changed from positive angles to negative angles so that the motor actually would back up, a feature of great value on airships. Mr. Turnbull says his propeller will add 70 to 100 per cent. to the climb of an aeroplane, thereby making it possible for commercial planes to carry less fuel and more pay loads, with greater safety and save 20 to 25 per cent. in fuel in long flights.

Diamond Cuts Were Costly

Replacing Three Plate Glass Windows Cost $1,800

Three of the largest plate glass windows in England are to be replaced along the Oxford Street frontage of Messrs. Peter Robinson, Ltd.

The windows, with two others of smaller size, have been slashed with a diamond, and in some places the ¼in. thick glass was cut completely through.

"It has become necessary to replace the windows," says an official of the Employers' Liability Insurance Corporation.

"Owing to the police regulations the week-end is the only time the work can be done."

Three of the windows to be filled are the largest in England, each having a dimension of about 24 feet by 10 feet, and have had to be specially manufactured at a rough cost of £[illegible] a pane.

Round World Race By Six Newspapers

European Press Celebrating Centenary Of Jules Verne's Birth

A globe encircling race between representatives of six European newspapers, which will follow the route of Phineas Fogg in Jules Verne's "Around the World in Eighty Days," will be a striking feature of the 100th anniversary of the birth of the imaginative French author, who was born in Nantes, February 8, 1828.

The participants who started March 6, were to choose their own means of transportation, but they must follow the route Paris to Brindisi, Suez, Bombay, Calcutta, Hong Kong, Yokohama, San Francisco, New York, Liverpool, London to Paris.

Colic. Mix Minard's well with Molasses and use as a drench. Gives quick results.

MINARD'S "KING OF PAIN" LINIMENT

Pres. Coolidge May Visit Canada

Possibility That United States President May Be In Ottawa This Summer

The statement contained in a United States magazine that President Coolidge may visit Ottawa this summer as a return courtesy for the visit of the Governor-General to Washington last fall, has aroused considerable speculation in Ottawa, says the Journal, in a news page story. It states that the president may lay the corner stone of the United States Legation in Ottawa. It adds: "There has been no announcement from Washington concerning the president's plans, but it is believed in Ottawa that if he visits the Canadian capital, he will come during the summer."

Only one president of the United States has visited Canada during his term of office—Warren G. Harding. It will be recalled, stopped at Vancouver shortly before his death."

Aviators Helped Motorists

Unusual Story Vouched For By Two St. Paul Men

If your automobile stalls, hail a aeroplane to pull you out. That's what two Wisconsin men did. The story is vouched for by Gene Shank and Paul Tourtellotte, of St. Paul.

Dr. S. H. Holsom and S. J. Pillman, of Plum City, Wis., were crossing the ice on Lake Pepin, near Stockholm, Wis., when their automobile broke through at a shallow place.

A short time later a plane, carrying the two airmen, passed overhead. The aviators were attracted by the two men waving their arms and the plane descended to the ice.

The airmen obligingly hooked up a chain from the plane's tail skid to the automobile and pulled the machine out. They hopped off again and related their story when they arrived at St. Paul.

Recipes For This Week

(By Betty Barclay)

WINTER CHOCOPUD

2 cups milk
4 tablespoons cornstarch
½ cup sugar.
1½ squares chocolate
½ teaspoon vanilla
¼ teaspoon salt.

Mix dry ingredients, make into thin smooth paste with a little milk. Add to heated milk in top of double boiler. Add melted chocolate. Stir to prevent lumps. Cook 20 minutes. Add vanilla and pour into molds rinsed in cold water. Chill, serve with cream or whipped cream.

PUFF-BALLS

1 egg white.
4 oranges.
½ cup powdered sugar.

Peel small oranges, removing white membrane with outer skin. Beat egg white, slightly, using wire whisk, add sugar, gradually, and continue beating until meringue is stiff and will hold its shape. Thrust a long slender wire skewer through the centre of each orange, frost them completely with the meringue and suspend them, by the skewers, across a narrow pan, and bake in [illegible] minutes in a slow oven, being careful not to let them brown. Twist skewers gently to remove them. These oranges make a pretty dessert or supper dish.

Testing Paper With Radio

Latest Use Was Accidentally Discovered By Radio Fan

One of the latest uses for radio is the testing of manufactured paper, it was disclosed at the annual paper and pulp convention held in New York.

A radio apparatus on paper machines, W. D. Somerville of Bangor, Me., explained, is used in his mills to test both weight and amount of moisture in the paper.

The instrument was evolved from an accidental discovery made by a radio fan who, in using paper to throw his set out of tune, learned that the thickness of paper and the amount of moisture had varying effects on his dial.

Art Is Dying Out

Cork cutting by hand is an art which is fast dying out, and only one hand cork-cutter, it is claimed, now plys his trade in London. He has been cork-cutting for just over sixty years. When a press reporter visited him he picked up a chopper the size of a meat axe and with it peeled a piece of cork as fine as an apple rind. "It is as easy as cutting butter," he said. He showed the reporter a picture which he had made, in cork, of Arundel Castle, Sussex.

Not more than seventy-five years ago a New England city passed an ordinance making it unlawful to use a bathtub without a doctor's prescription.

SUNDAY SCHOOL LESSON

MARCH 18

JESUS TEACHES SINCERITY

Golden Text: "Keep thy heart with all diligence; For out of it are the issues of life." Proverbs 4.23.

Lesson: Mark 7.1-23.

Devotional Reading: Psalm 24.1-6.

Explanations and Comments

I. The Tradition Of the Elders Violated By the Disciples, verses 1-5. —Certain Pharisees and Scribes had come from Jerusalem for the express purpose no doubt, of obtaining evidence which they could use against Jesus. They noted that the disciples ate food without first washing their hands, and one day they gathered about Jesus and asked him how it was that his disciples failed to follow the tradition of the elders, for they ate with hands defiled, ceremonially unclean because unwashed.

For the benefit of his Gentile readers, who were not familiar with Jewish customs, Mark here in verses three and four gives parenthetically an explanation. Before eating the Jews washed their hands diligently (or, up to the elbow, Revised Version). This was not because the hands were actually unclean, but because they were ceremonially unclean. When they came from the market place, where they would come in contact with people whom they regarded as ceremonially unclean, they bathed before eating. They kept also all the regulations as to the washing of cups and pots and brazen vessels.

The Jews held the tradition of the elders. Dr. Charles R. Erdman recalls the story of an imprisoned rabbi who was allowed the most meager amount of bread and water for his daily ration and who used the water for bathing his hands instead of drinking it, saying that he had rather die than transgress the institutions of his ancestors.

"Fanaticism is easily awakened in the defence of Tradition. In the Church of Rome the ecclesiastical regulations, e.g., the Fasts and Feasts, or the celibacy of the clergy and the monastic vows, are enforced with a greater severity than the original requirements of the Gospel. The Roman Church, accepting the principle of Tradition, has made the precepts of men into doctrines to such a degree that the New Testament is rightly regarded as a danger to the laity. A passage like the one before us is subversive of Roman teaching."—R. F. Horton.

Rushing Work on H.B. Road

Good Progress Has Been Made During the Winter Months

Work has been prosecuted all winter on the railway now under construction from the Hudson Bay Railway to the Flin Flon mining area in Northern Manitoba, and railways have been laid for a distance of thirty-five miles. It is stated that the survey of this line will be continued to Cold Lake, a distance of twenty-five miles beyond the Flin Flon Mine, with the intention of extending the road to that point. The line to Flin Flon is to be completed for operation by December 31. Work on the Hudson Bay Railway from Limestone Rapids to Fort Churchill has also been carried on during the winter, and good progress has been made in clearing the right of way and getting things in shape for an early start by the graders. Work on the harbor at Churchill has also been going on all winter so that there will be permanent docking accommodation for ships by the time the railway has been completed.

Standard Of Safety High

Comparison Between First Railroads and Modern Airplanes Is Interesting

Considering the short history of aviation, the standard of safety today is very high. Two reports from England, one this year, the other eighty-five years ago, offer an interesting comparison of the safety of railroads at the beginning of their development as compared with the airplane. According to a recent announcement Imperial Airways, Ltd., carried 53,000 passengers over 2,000,000 miles in 1927 without injury to a single passenger.

On June 14, 1842, the London Times stated: "The number of passengers carried on the eight railway lines numbered 10,000, the distance 3,342,336 miles yearly. In this time only fifty-six passengers were injured, of whom twenty-two were killed."

Man Was General

Pat Murphy was taking his first flight in an airplane. The pilot was taking him over New York City. When they were about three thousand feet the plane suddenly went into a nose dive. "Ha, ha!" laughed the pilot, shouting to Pat. "Fifty per cent. of the people down there thought we were falling." "Sure," admitted Pat, "and fifty per cent. of the people up here thought so, too."

The province of Alberta now has a main highway system extending over 2,500 miles and a secondary road system of 11,000 miles, a large percentage of which is standard grade roads.

ALBERTA WOMAN WINS SCHOLARSHIP

Member Of University Of Alberta Teaching Staff Is Active Botanist

Miss E. Silver Dowding, B.A., M.Sc., a lecturer in botany, University of Alberta, Edmonton, is the winner of the $1,200 scholarship offered by the Dominion Federation of University Women.

Annually the federation arranges to present a scholarship to the woman applicant whose accomplishment and abilities indicate that she would make the best possible use of the scholarship that enables her to continue her post-graduate studies for a year.

Miss Dowding received her high school education at Calgary, later going to Edmonton, where she attended university. She has been a member of the teaching staff of the University of Alberta for four years, and is regarded by many as one of the most active of the younger Canadian botanists. She has published a substantial number of articles on botanical subjects and in the last six years has carried on observation work in Alberta and B.C.

From the National Research Council Miss Dowding was given a grant this year to aid in the study of pine trees and vegetation in sandhill areas. The Royal Society, London, supplemented the grant. Her discoveries along this line are being put into form for publication.

To carry on her botanical studies at University College, London, is Miss Dowding's desire, and to prepare her thesis for a Ph.D. degree.

The demand for good advice is not equal to the supply.

The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too, it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable you can give it as often as there's a sign of colic, constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

PAINTED FIRES

COPYRIGHT, CANADA, 1925

CHAPTER XX.—(Continued)

The [illegible] that came over Helmi made her sway uncertainly, but she caught the back of a chair and managed to say: "Oh! it is all right, Jack left me lots of money. I really do not need it. I just thought I had better take it with me." She was holding her lips very tightly so they would not tremble. She even smiled, winking very quickly to keep the tears back. "I expect to meet Jack in the city," she resumed. "He has forgotten to mention to me that he sent for the money, but it is quite all right. I have plenty. Goodbye, Mr. Hamilton. It looks like snow, does it not?"

Helmi turned away quickly. The timekeeper called her back. "Say, Helmi," he began awkwardly, "don't think I am buttin' in or the like of that, but I just wanted to put you wise. That old bird of a magistrate at Bannerman has been shootin' off his mouth. It seems he claims he knows a lot about you. He says—Oh, well, I don't need to repeat what he says; he is drunk most of the time and nobody should mind a word he says; but he declares you and Jack are not legally married at all, and he insinuates that Jack sort o' tipped him off. Oh, I don't know the ins and outs of it, but I just wanted to warn you to hang onto your certificate, and then in case of a frame-up you have the deadwood on them all. You have the certificate, have you not?"

Helmi nodded, her heart was beating in her throat so painfully she was afraid he would see it.

"Well, then, you're all to the good. But I just thought I would wisen you up on what was goin' round. We're all for you, Helmi, you know that."

Helmi thanked him without knowing what she was saying, and got out of the office some way. The little street of houses seemed to be all eyes; all red-lidded eyes, staring and pointing at her; voices whispering, closing in on her as if they would—and mocking. The mountains were gladly grind her to powder, and the river—the river was the worst of all as it ran slithering by so green and deep and cold. A man had drowned himself at one of the other mines last week because his wife had taken his money and run away, and now Helmi knew that wasn't the reason at all—it was because the river had taunted him so, and mocked him, and dared him, and driven him to it.

Helmi reached her own house, and, going in, shut and locked the door. She must think! A basin of water stood on the box. She buried her hot face in it to try to stop the tears that were burning in her eyes. The heart-beat in her throat seemed to choke her.

"Oh, Aunt Lili! Aunt Lili!"

But it could not be. Her Jack Doran was a good man. God was good. She sought the Blue Book anxiously:

"Oh! to be a girl and see
Beauty in flower and bird and tree;
To pass through, strong and pure and good,
The gate which leads to womanhood."

She read it all with a heart that grew [illegible]

[illegible] knowing what was in her heart, and the hopelessness of the quest, endeavored to keep her, but she knew she was hating her for holding her back from her only chance. At last, with her heart sore for the dog's trouble as well as her own, she tied a thick piece of bacon to her collar, knowing she would break the string with her paws when she wanted to, then opened the door and let her go. She ran straight to the station, whimpering excitedly. From there she ran yelping down the track with her nose to the ties.

Helmi watched the poor animal until a bend of the road hid her from sight. Then she turned back into the darkened room sobbing. "Poor dog! poor dog! just like me, forsaken. Men who go away should shoot all of us who love them!"

Helmi hired a horse and buggy the next day and drove down the valley to Bannerman. She would know all there was to be known. She would find out what the magistrate meant.

It was a glorious day of blue sky, with a high wind that came booming through the pass in the mountain, roughening the deep pools of the river as it rasped over them. Helmi loved its cool breath on her hot face. She could not be cast down on such a day. Her Jack had not fooled her—no matter what any one thought. Helmi told herself again and again that her great fear was that something had happened to him—her dear Jack so white-skinned, clean and gentle.

Anyway she would be brave. Next day was train day, too, and he might come. Twice a week the train came down to Eagle Mines from the main line. Helmi had so often watched it coming in, her heart in her mouth, that she had grown to dread train days, for during the last few months at the first ragged whistle that came wearily piercing the valley a violent nausea had seized her. As she now drew near her destination it came again. She thought of the Wymuths and their awful philosophy. Was all this part of her punishment? Was it all wrong? Had she done wrong? But still everyone who was in the world had come the same way. Surely God wanted people, and yet, why did he punish women so? She sat still a while, letting the horse feed along the side of the trail.

The magistrate was at home. No, he did not remember her, Helmi Milander, a Finn girl, whom he had married to Jack Doran last March? No, he did not remember. He and his friend, Major Clowsell, looked at each other. The magistrate winked knowingly. "I think you are mistaken, girl," he said sternly.

Helmi handed him her certificate. "You gave me this paper," she said.

The magistrate addressed his friend. "There's only one way to settle this, I'll look up the record. If I married her to this young man the record will show. A certificate tells nothing. Anyone can buy a certificate and fill it in."

He went to a dusty cupboard whose open door revealed only a row of bottles, brown, with gold labels gleaming evilly through the gloom of the room. With difficulty he found his record book and spread it before him on the littered table.

"You said March of this year?"

"March the twenty-first," said Helmi, breathing quickly.

The pages were turned slowly.

"I married no one on March the twenty-first," he said, looking around at her over his glasses.

"Look at other dates, then," said Helmi, trembling; "I may be wrong."

The two military men regarded her closely. "You are wrong more ways than one," said the magistrate slowly. "Look see for yourself—there is no entry of any marriage."

A sudden fury came over Helmi. "You were drunk that day," she cried. "You were red-eyed and staggering! You forgot to write it down. You sent me out. You spoke to my Jack here while I sat outside. You mind I said 'Come outside to marry us.' You were cross and swore."

Major Clowsell interposed. "Hush, girl," he said, "you must remember Col. Blackwood is a magistrate. Your condition makes you hysterical. We're sorry for you but you must not speak like this."

Col. Blackwood said not a word. He went again to the cupboard and after fumbling among the papers there brought back a newspaper slightly yellowed. "I'll show you something, you [illegible]," he said, slowly, taking his pipe from his mouth and laying it carefully on the windowsill.

50c a box at your druggist's

No high-grade tea can be expected to retain its full flavor and strength unless packed in moisture-proof, metal-lined containers. Successful tea planters ship their tea in aluminum—the same rust, dust and damp-proof material which keeps Red Rose Tea always so fresh, strong and flavory.

Flin Flon Development

Expectation That Mine Will Be a Steady Producer By Fall Of 1930

Steady production of copper, zinc and gold at the Flin Flon mine may be expected by the fall of 1930, if all plans work out as expected, according to R. E. Phelan, vice-president in charge of operations of Flin Flon Mines, Ltd. By that date he estimates that $10,000,000 will have been spent on the mining plant and smelter alone.

The capacity of the mill and concentrator will be 3,000 tons daily and the smelter will be large enough to handle the product of this plant, Mr. Phelan said. This will mean steady employment for 1,000 or 1,200 men. The town which will spring up round the mill will have about 4,000 inhabitants he estimated.

While the final decision regarding the location of the town site has not been made, Mr. Phelan was able to say definitely that it would be in Manitoba. The mine itself straddles the Saskatchewan-Manitoba boundary.

By the end of the winter of 1928, Mr. Phelan said, it was expected the railroad would be put in such shape that cement and structural steel could be run by rail right to the mine, while by the end of the summer of 1929, he predicted that a permanent roadbed would be laid down and all year round railway transportation possible to and from Flin Flon and The Pas. In that year, he said, the heavy plant and machinery would be shipped in, and the final construction and installation of the plant and smelter would be made.

Another Medical Triumph

Toronto Doctor's New Treatment For Pyorrhea May Effect Cure

Announcement is made that, after a long period of study and experiment, a Toronto doctor, working in the research department of the Western hospital, has developed a new treatment for pyorrhea, with a fair prospect of having discovered a cure for that disease. The successful physician is Dr. L. E. Harrison. If the hopes aroused by his discovery prove well founded, his achievement will be hardly less important than the insulin treatment for diabetes, developed by Dr. Banting.

Pyorrhea is a very common disease. It is said to affect fully 90 per cent. of all adults at some time in their lives, and that 50 per cent. of all teeth that fall out are lost through its morbid action. Not only is it a distressing affliction in itself, but it is the cause of many other disorders. [illegible] pus discharged from the diseased gums is absorbed into the blood stream and is an active cause of rheumatism in different forms, neuritis, ulcer of the stomach, and gall-bladder disease. Therefore a cure for pyorrhea may operate also as a cure for a long train of physical afflictions.

The men who bestow such boons upon suffering humanity are among the greatest benefactors of the race.

A Blessing In Disguise

Accident To Canadian Aviators May Focus Attention on Requirements [illegible]

The accident which befell the Canadian aviators, Lewis and Terry, of the [illegible] Straits [illegible] [illegible] blessing in disguise if it served to focus public attention on the need [illegible] of the Canadian Government in the Arctic, and the efforts being made to open a new outlet to Europe. [illegible] Captain J. E. Bernier, veteran Government Arctic navigator.

The experiences of the airmen illustrated the necessity of a radio direction finder on the Button Islands and the reliability of the Eskimo for guidance, Captain Bernier said.

Two American towns are named after Rudyard Kipling.

Minard's Liniment—Invaluable in the stable.

Russia's "Man Of Steel"

Man Who Captured Leadership Has Become All-Powerful

Joseph Stalin, the Russian "Man of Steel," who is holding that troubled empire in his hands today was born in the year 1879, and his real name is said to be Dzhugashvili or Dzhugashvili. Probably he changed it because he preferred one easier to pronounce.

He comes from fighting stock, says an article in the London Daily Mail by Dr. Edward Lubof, an eminent chronicler of Russian affairs who has known Stalin since his boyhood days.

Today he is all-powerful, not only because the Army and the Cheka are at his command, but because at the first sign of anti-Stalinism he puts into motion the party machine which declares every opponent of Stalin an enemy of the party and of the Soviet State. As for his personal safety of late he has imported a whole regiment composed chiefly of Caucasian brigands. And it may be added that the Georgian brigands will fight to the death for the safety of a descendant of one of their comrades who has managed to conquer Russia.

U.S. Investment Abroad

World's Debt To the United States Reaches Huge Total

The world's debt to United States investors, approximately $25,000,000,000, is more than $5,000,000 greater than was owed to Great Britain when British foreign investments were at their peak, Dr. Max Winkler said in a report prepared for the Foreign Policy Association.

Exclusive of the so-called political obligations held by the United States Government, American investment in foreign securities in the first of the year aggregated about $14,500,000,000. American holdings in Europe, approximately $4,327,000,000, exceeded those in any part of the world. Canadian holdings by Americans are about $3,922,000,000, South American $240,500,000, Central American, $2,934,000,000; Far Eastern, $276,500,000, and miscellaneous, $63,400,000.

MARCH WEATHER DANGEROUS TO BABY

Our Canadian March weather—one day bright, but sloppy, the next blustery and cold—is extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against these colds and to keep the baby well till the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. The Tablets are a mild but thorough laxative which never fail to regulate the stomach and bowels and thus they relieve colds and simple fevers and keep the baby fit. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Gold Discovery In B.C.

During development operations on the Valhalla Kleanza mineral claim near Usk, Central British Columbia, high grade quartz showing much free gold has been disclosed in two parallel tunnels about 30 feet apart. The veins are from two to four feet wide.

A fore-and-aft rigged vessel, originally of two masts, but later with as many as seven, is called a schooner.

On fishing trips take Minard's.

A man's temper improves the more he doesn't use it.

Little Helps For This Week

"But ye, brethren, be not weary in well-doing."—2 Thess. iii. 13.

Life is not living
Just for today,
Life is not dreaming
All the short way.
'Tis living for others,
To lighten their load,
'Tis helping your brothers,
And trusting in God.
—Hoadley.

Life is made up not of great sacrifices or duties, but of little things, in which smiles, and kindnesses, and small obligations given habitually win and preserve the heart and secure comfort.—Sir Humphrey Davy.

Auto Licenses In Alberta

During the past year 72,384 auto licenses were issued in Alberta, of which 9,861 were issued in Calgary and 9,517 in Edmonton. There figures will likely be surpassed this year.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

Manitoba Copper Ore

The Mandy mine in Northern Manitoba, from which large quantities of 20 per cent. copper ore were shipped to the Denver smelter during the war years is being reopened.

HERCULES PERMANENT BUILDING PAPER

Beauty in a home may be only skin deep.

A beautiful home is not always comfortable nor costly suitable.

Hercules does for a home what beauty cannot. Tested and proven wind proof and damp proof, Hercules makes a house warm and dry at all times—the home that buyers seek.

Hercules comes in three grades—A, BB, and—for various needs. How Hercules fulfils our claims is easily understood after an examination. May we send a few samples?

Appleford Paper Products, HAMILTON, CANADA

Here and There

(30)

Invited to see Montreal by the hotels and the tourist and convention bureau of the city, 75 members of the Massachusetts Hotel Men's Association spent a week-end recently there and were given a royal reception. As their president, Emil Coulon, said, "We came to sell New England to Montreal, but you have sold Montreal and Quebec province to us."

During the usually quiet immigration months of December and January the Canadian Colonization Association colonized 78 families who took up land to the extent of 22,734 acres. In 1927 the Canadian Pacific Railway, through its land department and its subsidiary (the C. C. A.) placed 2,606 families on Canadian farms, this including 626 families averaging 5 persons to the credit of the Association and 1,529 families on C. P. R. lands.

The movement of British youth to Canada promises to be considerably heavier than usual, due to new arrangements made with the British Government. Ontario is taking 600 boys, Manitoba 50 and the Maritime Provinces and Saskatchewan an indeterminate number, while some hundreds are to be moved by private organizations. In all it is estimated some 2,000 boys will probably be brought out under the new scheme this summer.

Another body of sportsmen are finding Montreal and Eastern Canada good places in winter as well as summer. The Appalachian Mountain Club, of Boston, picked the best period of the winter season to spend a week in the Laurentians mainly devoted to ski-ing, but with sleighing, dog-mushing and tobogganing thrown in. It was the first time they had ever visited this district in winter and they are going to repeat it.

At the Bradford Wesleyan Conference a good story was going round about a well known member of Parliament. The member was coming out from the House with a famous peer, when he remarked: "I've got an 'orrible 'ead-ache. What would you prescribe?" The peer at once replied, "Oh, take two aspirates!"

"Woman's tears."

Mercury Ads Pay!

OUT AND ABOUT

The picture shown at the Variety Theatre on Saturday night last, while no doubt exaggerated in order to provide drama and humor, told [illegible] very well enough known to all of 50 years of age. The horse is [illegible] of the most beautiful animals in [illegible] [illegible] driven it from the road [illegible] protected by the early enth[illegible] [illegible] of motoring.

—o—

Still the response of humanity [illegible] to horseflesh is not entirely dead [illegible] even with thousands of cars lined up at a county fair, horse races are still a real attraction.

—o—

To-day an automobile race is [illegible] of mechanical [illegible] and dangerous chances bravely [illegible] [illegible] A horse race, [illegible] [illegible] of sinew, nerve, muscle, heart and loyalty to the man who is driving.

—o—

[illegible] was seen [illegible] time ago. A fellow, no doubt [illegible] [illegible]

A fair example of the hold that the automobile industry has on the people of this and other countries, [illegible] on Tuesday at the [illegible] of a popular car. The attendance was equal to that of a [illegible] good show, and the interest taken in the lecture and pictures was keen.

[illegible] years economists have been [illegible] about the saturation point with regard to the public and automobiles [illegible] fewer cars were made [illegible] year than the year before that, but as far as this western country is [illegible] would appear that there [illegible] open field for the automobile [illegible] yet.

—o—

[illegible] the Mercury [illegible] advertised spring millinery [illegible] than one firm. There [illegible] it hits hard [illegible]

[illegible] and there is another. The [illegible] is giving away a [illegible] booklets on gardening [illegible] attractively printed and [illegible] written. They also have [illegible] of being free.

—o—

[illegible] must [illegible] for many [illegible] and more being [illegible] and tractor [illegible]

C. HOBSON, Proprietor

LOCAL and PERSONAL

W. Stairs, who has been visiting friends and relatives in Nova Scotia for some time, arrived home last Thursday evening.

Mr. and Mrs. Miller leaves Thursday for Edmonton, where they stay awhile. They expect to make a trip to Ontario this summer. Their sale was a very successful one.

Mrs. Whyte visited the city this week to see her son Robert, who is in the hospital there.

J. Carver made a business trip to Edmonton on Tuesday.

Mrs. McCauley and daughter, Helen, visited Edmonton this week.

Dr. Law gave the boys from 12 to 20 a talk on sexology, a a meeting of the Trail Rangers this week.

Mr. A. P. Harrold visited the city this week.

Mrs. McLoughlin and daughter, Ruth, visited Edmonton this week.

Constable McCan is in Edmonton for a few days on business.

Mr. and Mrs. Wm. Splisted returned from the United States after a three month's visit there.

Mr. and Mrs. Art Young returned from a visit to the United States on this week.

The moving picture "Coney Island" was put on by the ladies' curling club on Tuesday night and was a financial success.

Mr. and Mrs. H. McKernan visited at the Abbot home over the week-end.

Raol Griffin is a guest at the home of Mr. and Mrs. Geo. Bissett.

Mr. Dolighan was a visitor at the Spencer home this week.

A handkerchief shower is being held in honor of Miss Eva Clutterham this (Wednesday) evening.

Mr. and Mrs. D. W. Warner returned from Europe this week. They of the party of Canadian farmers who toured Europe and among many other functions, attended a reception at Buckingham palace. They visited at the J. B. Warner and Dodd's home and then continued on to the city.

The hat trimming social put on by the ladies' aid of the United church was a complete success. The male members of the congregation proved their skill with needle and thread, while their artistic taste was all that could be desired. There was a good attendance and the event was a complete success in every way.

From all appearances, the local branch of the C.N.R. are going to have a fine cinder tennis court. Cinders have been laid and some of the office staff were seen pulling a packing roller around. It will be quite an acquisition to the station grounds.

Tractors, tractors, everywhere and not a horse in sight, might be a popular phrase right now. There has never been so many tractors in Tofield, or for that matter, Alberta, as there are this spring. Instead of being the unusual method of farming, it has, or is rapidly becoming the usual method of farming.

Robert Whyte was taken to the Royal Alexandra hospital on Wednesday night last. On Tuesday night after supper he complained of feeling ill and was ill all night. Dr. Law attended him on Wednesday and towards afternoon he felt better. The attack re-occured, however, and Dr. Law immediately took him to the city where he was operated upon. He is doing nicely.

In recording the hockey match between Tofield and Edmonton last week, we omitted to mention the splendid party that was held in the curling club room, after the game. Over fifty were present and a splendid time was had by all. Miss Eva Clutterham was at the piano, Mr. Evenson, saxophone, provided music which was much enjoyed.

SUCCESSFUL TEA AND SALE OF HOME COOKING

A very successful tea and sale of home cooking was held at the Catholic church on Saturday last, under the auspices of the C.W.L. There was a very good attendance and the event was both a social and financial success. The ladies of the C.W.L. wishes to thank the public for the generous support.

U.F.W.A. TEA AND SALE OF HOME COOKING, MARCH 31st

The U.F.W.A. are holding a tea and sale of home cooking at the Institute rooms on on March 31st commencing at 3:00 p.m. Affairs of this kind put on by the ladies of the U.F.W.A. have been very well attended in the past, and are very popular. Consequently it will occasion no surprise if the coming event on the 31st is reported to be a record breaker.

W.I. NOTES

The W.I. held their monthly meeting on March 13th. Quite a few ladies were present, but we are always looking for new members. It was decided at this meeting to do all in our power to fix up the school grounds and try to make them attractive. This is one thing the institute are all anxious to see go through and with the help of everyone we can do this. Watch our paper for an outline of the Institute work in the past. Someone has said "What is the Institute doing." We will endeavor to answer this in one of the issues of our paper.

"CHEATING CHEATERS" AN UNDERWORLD FILM WITH RICH SETTINGS

One of the most beautiful and impressive homes in Southern California provides the background for most of the exterior scenes in "Cheating Cheaters," the Universal Jewel, which will be the feature at the Variety theatre on Saturday. The story is set in New York's underworld and the fashionable suburbs of the great metropolis of the east.

The home used was that of W. R. Jewett, noted automobile manufacturer who owns one of the wonder spots in Pasadena. The beautiful mansion with its colorful and picturesque surroundings is quite typical of that section of the state. The home was rented for the filming of this picture, the money received being donated to charity organizations by the Jewetts.

H. TEWARD HOLDING SALE ON MARCH 27th

Mr. Toward, who is located on the farm generally known as the Henderson farm, is holding a sale of livestock and effects on March 27th.

Mr. Toward has only been on this place one year, and all of the implements, etc., are in first class shape. The livestock, too, is an exceptionally fine lot, and all is being offered without reserve. J. D. Hannan is crying the sale.

Other sales in the near future are a sale in the Ryley district, cried by F. O. Ball, and a horse sale at Chipman, cried by the same auctioneer. J. D. Hannan will cry a Ryley sale on the 30th.

KILLING THE RABBITS

(By Elsie Bartels, Barrhead)
(The Barrhead News)

Note.—The following story is taken from the current issue of the Barrhead News, in which journal it was awarded a prize of one dollar for the best story sent in during February. It is worth repeating.—Editor, T.M.

A few winters ago the rabbits were so thick that they ate the green-feed stacks until they fell over. Daddy would go out and kill them by moonlight with a twenty-two rifle. One night he shot fifty. He built a tight slab fence around the stacks about three feet high so the rabbits could not jump over. He would leave a gate open at one end and then when the pen would get full he would go and shut the gate. Then Gracie and I would go down and help him kill them with sticks.

This particular night when daddy got us our sticks mine was a little crooked. Daddy went around the stack and called to us that the rabbits were coming. I got very much excited and just then a rabbit ran right at my very feet. I hit at it and my little grey kitty was sitting about three feet away. I missed the rabbit and hit my kitty on the back of the head. It made her turn heels over head. She went back to the house and she never came back to watch us kill rabbits anymore.

Then the rabbits got so they would jump over the fence and daddy did not have very good luck killing them, so he thought he would build a trap. He built a smaller, but a much higher pen. Then he took a nail keg and drove some nails in slanting so the rabbits could go in but when they started to come out the nails would stick them and keep them from coming out.

One night he brought the nail keg into the house to fix it. Mamma went and when she came back in she said the pen was full of rabbits and for daddy to hurry up. He got it finished and started to run towards the pen. He slipped on the ice and fell down. He ran his head into the nail keg. He couldn't pull it out because the nails were stuck behind his ears and in his neck. Mamma had to lead him back to the house and pull the nails out before he could pull his head out of the keg. He was sure angry but I will not say all he said. We were all laughing but not very loud. Daddy never went back to kill rabbits anymore that night.

BARDO

The March meeting of the Bardo U.F.W.A. was held at the P. B. Anderson home on Friday. Most of the members and some visitors were present. Considerable business was attended to, and arrangements made for future meetings. A very nice lunch was served by Mesdames Rude and Stien. The society will meet in April with Mrs. Hills. Lunch committee, Mrs. Kindley and Mrs. Jevning.

The programme will be as follows: Roll call, answered by anecdotes from the lives of famous women. A paper by Mrs. Alice Finseth, "The Sunny Side of a Farm Woman's Life." Song, U.F.W.A.

Word has been received that on March 9th, Mrs. John Yoder and sons of Inglewood, Calif., and Mrs. N. E. Brenneman and son, of Tofield, Alta., enjoyed a monoplane ride over the city of Los Angeles.

The Owen Hershberger family returned last week from Oregon, where they spent the winter months.

Mr. Milo Stutzman who has been in Oregon for some time in the work of the Mennonite Church, returned last week.

[illegible] Hamer, of Duchess, Alta., conducted special meetings in Bardo church last week, beginning on Wednesday morning and closing Sunday night.

We are told we learn wisdom from experience, so we imagine the next time Robert Mattson hears a team [illegible] rapidly in the dark, he will [illegible] to see if his team is still safely at the "hitching post," before running two or three miles in pursuit.

On Wednesday evening a company of young people went to the [illegible] home to greet the newly-weds. A very pleasant evening is reported. [illegible] served a dainty lunch.

Remember the cemetery meeting at [illegible] home on March 24th.

Mrs. Anna Kindley entertained the [illegible] on Thursday afternoon [illegible]

KINGMAN

Mrs. Chris Horte, of Grande Prairie, is spending a few days with Mr. and Mrs. Iver Horte.

Oscar Thompson and son spent a few days in Edmonton last week.

[illegible] Olson, who attended the funeral of his father, who died recently in [illegible] returned home on Friday.

A. Aap of New Norway, who is the new manager of the U.G.G., arrived in Kingman on Thursday. His family will join him later in the summer.

Mr. Paulson, of Raymond, Alberta, was a visitor in Kingman, on Friday.

Mr. and Mrs. T. J. Bagnum and family and Mr. and Mrs. [illegible] were the guests of Mr. and Mrs. [illegible] on Sunday.

Mr. and Mrs. E. Erickson and family and Mrs. Melvin visited with Mr. and Mrs. C. Tryhus on Sunday.

A dance will be held in the Kingman hall on Friday, March 23rd. Good music will be furnished.

Messrs. Bros were business visitors in Edmonton on Friday.

Miss Ida Thompson is spending a few days in Edmonton with Mr. and Mrs. Ted Severson.

On April 5th, Buttler and Darby will present a big, unique and clever program of magic and comedy. Sensational mysteries. Ventriloquism. Mind reading. Keep this date open. The Variety Theatre.

KETCHAMOOT

Gophers, bluebirds and meadowlarks were reported to have been seen on Monday. It surely was an exceptionally fine day for March and very little snow is left except some in the bush.

Mr. and Mrs. Miller had a very successful sale on Wednesday. A large crowd was present and everything realized a good price. They have rented their farm to Mr. Geo. Francis, though we are sorry to hear he is a bachelor, but welcome him just the same.

Mr. and Mrs. Sam Stirrit and family motored to Camrose on Monday.

Messrs. Edward and Frank Ratigan came down from Edmonton on Tuesday and visited a few days with their sister Mrs. J. H. Ingram and family.

Mr. and Mrs. Henry Sutton and Mr. and Mrs. Joe Sutton have been motoring down to Camrose almost daily the last two weeks, taking chiropractic treatments.

Mr. G. R. Owens shipped his carload of household furniture and implements on Wednesday; the boys driving the horses and wagons overland on Thursday, to Vilna, where they have purchased three quarters of land. We wish them every success in their new home.

Mr. and Mrs. John McGinitie and Mr. and Mrs. Miller were guests of Mr. and Mrs. L. Carlisle on Sunday evening.

Messrs. Tommy Welch and Towel Brooks of Edmonton are visiting relatives in our district. They also held preaching services in Kingman on Sunday night.

The McGinitie families attended a whist drive at the home of Mr. and Mrs. Howard Stine of Lindbrook on Friday night and all reported a enjoyable evening.

Mr. J. H. Ingram is improving his farm with a new barn.

Mr. Joe Sutton Jr., is making his final round of [illegible] a chance to get up [illegible] supply of wood.

Mrs. Monty, recently from Ontario, is visiting her aunt, Miss F. Fawcett, at the Shultz home.

Mr. and Mrs. G. R. Owen and Mr. and Mrs. Donald Cranney left Sunday evening for Vilna. Mr. and Mrs. Cranney are taking a short holiday until April.

Mr. and Mrs. Miller visited their friends, Mr. and Mrs. C. A. Ingram on Monday evening.

Mr. and Mrs. Wesley Ingram, Misses Pearl Welch and Mildred Ingram were Sunday guests of Mr. and Mrs. O. Barnes.

LINDBROOK

The fine weather we've been enjoying lately has pleased everyone and although it is early, we hope it lasts.

On Friday evening March 16th, a whist drive was given by Mr. and Mrs. Howard Stine at their home here. Seven tables of whist were in play. Mr. Forman won the gentleman's 1st prize and Mrs. B. Wildman the first ladies', the boobys were captured by Mrs. Appleby and Mr. Earl Wilson. In the interval supper was served and judging from comments it was a dandy.

Quite a few people from here journeyed up to see that famous English actor, Sir John Martin Harvey and say that it was well worth the trip.

Miss Viola Lindgren gave a birthday party in honor of her father, Mr. Otto Lindgren at their home here on Saturday evening, March 17th. Say! what's this mean Otto, you being born on St. Patrick's day, the stork evidently thought you were too heavy and dropped you in Sweden, or maybe he had been celebrating Ould Oireland as well and got muddled. Quite a good time was enjoyed by all the guests, and seeing that the party didn't break up until nearly daylight it must have been extra good.

Messrs. Glenn and Pointer shipped cattle from here this week.

Mr. R. Paskin's of Edmonton visited his brother, Mr. W. Paskins and family of Lindbrook N., this week.

Mrs. J. Leahy spent the week-end with friends in Edmonton and wonder of wonders, it neither rained, snowed or blowed.

Canadians Are Busy

During the years that have elapsed since the war unemployment conditions in Great Britain have been the subject of much discussion ... the United States ... Great Britain ... depression ... and labor unrest ... commerce.

... Canada ... weathered the severe storms ... increased employment ... re-established ... balanced its budget ... improve from year to year.

Canada ... and struggle in the years immediately following the war, though nothing like what Great Britain experienced. Nevertheless for a number of years business in Canada was depressed and there was considerable unemployment. At the same time business conditions in the United States were ... employment plentiful ... production ... the whole world was paying ... the war. As a result thousands of Canadians emigrated to the States, and throughout this Dominion some sharp comparisons were drawn between conditions here and to the south, always to the disadvantage of Canada.

Within the last year or two a marked change has taken place, and today there is more unemployment in the United States both in the aggregate and in proportion to population than there is in either Canada or Great Britain. In fact the situation in the United States is becoming so serious as to call for most serious consideration by Congress and the various State Governments.

The Department of Labor at Washington estimates there are ... million people out of work at present, and the Industrial Commissioner of New York reports ... of work in that State alone. Conditions of employment in New York State are officially stated to be the worst since 1921 while Senator Copeland declares there are more people out of work in New York ... than at any time since 1914.

Contrasting the United States with Great Britain, it is stated ... New York State alone has half as many unemployed as the United Kingdom despite the fact that the latter has four times the population. Or taking the whole United States with two and one-half times the population of the United Kingdom, it is seen there is four times the number of unemployed in the States that there are in Great Britain.

While unemployment has been increasing in the United States in recent years until it has now reached a point where the National City Bank of New York reports 500,000 out of work in the State alone ... while Senator Copeland declares there are more people out of work in New York City than at any time since 1914.

...

A Busy Season Ahead

Work For Thousands Of Men On Railway Building In Western Canada

Work for thousands of men in Western Canada and payrolls running into millions of dollars are indicated in the western building and expansion programme of the Canadian Pacific Railway for the 1928 season, according to D. C. Coleman, vice-president of Western Lines. Tenders are already out for some of the work, including new stations and sheds, shops, coaling plants and new rail construction.

SAME SYMPTOMS IN MANY CASES

An Anaemic Condition Easily Recognized — Calls For a Blood Builder

In most cases of anaemia the symptoms are almost the same. The sufferer grows pale and is easily tired after the least exertion. The appetite is fickle and the patient loses in weight. Sometimes there are headaches, and often inability to sleep well. As the blood becomes thinner the symptoms become more pronounced and often there are fainting spells. All this shows that the blood is thin and watery, and at the very first symptom of this condition the patient should take Dr. Williams' Pink Pills, the most reliable blood-builder and nerve tonic known. The sole mission of this medicine is to enrich the blood, and when that is done all the distressing symptoms disappear. Among those who have reason to praise this medicine is Mrs. M. E. Patterson, Shanklin, N.B., who says: "About four years ago I became very much run down. I could not eat, sleep nor rest, and I grew so nervous that the smallest things would annoy me. Eventually I grew so weak that I did not have strength to move about without help. I was just a miserable wreck and became very much discouraged as I had tried many medicines which failed to help me. In this wretched state a friend urged me to try Dr. Williams' Pink Pills. I did so and before long found they were helping me. Gradually I continued taking the pills until I fully regained my health and strength and I have since continued in the best of health. Later my daughter became anaemic and six boxes of the pills restored her to health, strength and color. Naturally I consider Dr. Williams' Pink Pills a blessing to weak, run-down people."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Pool As Stabilizing Agency

Does Not Attempt To Unduly Boost Prices, Says President McPhail

That the farmers' co-operative wheat pool has developed rapidly in the four years of its operation is the decided opinion of A. J. McPhail, president of the pool. Mr. McPhail, who addressed the Canadian Club at Toronto on the pool, said in an interview that last year 200 million bushels of wheat went into the pool. The farmer, he said, gets a price higher for his grain than ever before. "In 1923 the farmer got one dollar a bushel for his wheat; in 1924, the first year of the pool, he was paid $1.66."

Addressing the Canadian Club, Mr. McPhail declared that the aim of the western Canada wheat pool is not to boost unduly the price of grain but to bring it to a level in conformity with that of other essential products.

"I know there is a feeling in some quarters," Mr. McPhail said, "particularly on the other side of the water, that the farmers of Western Canada and the wheat farmers of the world have in mind the creating of organizations for the purpose of getting a monopoly of the exportable surplus of wheat and using that monopoly to unduly raise the price level of wheat. The main objective of the pool, from the financial standpoint, is that we may if possible establish the price of wheat at a level that will compare favorably with the price level of other commodities. I know you will agree that it is a fair objective and if we are able to reach that or even approach it, we will have taken the greatest step ever taken to stabilize the industry of agriculture."

The pools were doing a business of approximately $1,000,000 a day turnover for each working day of the year, he said.

Offer Made For Alberta Railway

New Joint C.P.R. and C.N.R. Offer For E.D. and B.C. Railway

A new joint Canadian Pacific-Canadian National offer for the Alberta-owned E.D. and B.C. railway, which, according to Premier Brownlee, represents an improvement of approximately $1,700,000 over the railways former bid was announced in the Alberta legislature.

Accepts Presidency

Admiral Earl Jellicoe, in command of the British grand fleet during two years of the Great War, has accepted an invitation to be president of the British Legion. He will succeed the late Earl Haig.

If you desire to give advice at every opportunity, become a doctor or a lawyer and sell it.

Demand

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

BIG INCREASE IN CANADIAN TRADE FOR FEBRUARY

Ottawa. The grand total of Canadian trade for the month of February was $176,319,351, an increase of $21,000,557 over the corresponding month last year, and an increase of $12,865,601 over the month of January this year. The figures are:

January, 1928, $163,454,601.
February, 1928, $176,319,351.
February, 1927, $154,800,094.

Canada's imports last month totalled $83,982,307, an increase of $11,220,742, and exports (including foreign exports) $90,206,854, an increase of $10,051,814 over February a year ago. Excess of exports over imports for the month, exclusive of foreign exports amounted to $2,632,-799.

Agricultural and vegetable products accounted for one-third of Canada's exports, reaching the figure of $32,101,415.

Canada's Break With Russia

Reasons Given In House for Termination of Trade Agreement

Ottawa. Canada broke off official trade relations with the Soviet Government in May, 1927, because of a conviction in the minds of the Canadian Government that the Soviets frain from hostile action against the had not fulfilled their promise to re-institutions of the British Empire. This is disclosed in the documents tabled in the Commons dealing with the quarrel between Great Britain and Russia which resulted in the British Government and Canada breaking off relations with the Soviet.

The documents bring out the fact that the British Government drew attention to the fact that the terms of the Russian agreement of 1922 in relation to the United Kingdom would not necessarily terminate the operation of the agreement as between Russia and Canada. But it ...

California Disaster

Death Toll Placed at 264 in Territory Laid Waste by Flood

Santa Paula, Cal. Rehabilitation work is under way in San Francisquito Canyon and the Santa Clara Valley, which were laid waste by the breaking of St. Francis dam with a known death toll of 264.

While searching parties continued to bring in additional bodies recovered from the silt and slime left in the wake of the flood, telephone and telegraph repair gangs, steam shovels, wrecking and bridge crews took the field in the first steps to restore the stricken area to its former beauty and industry.

Meanwhile a committee was organizing here to formulate a general rehabilitation programme. Speakers charged that the city of Los Angeles, which built the dam as part of its water system, was responsible for the disaster.

The toll in life and property, estimated from official figures and the surveys of careful observers, stand as follows:

264 lives lost.
St. Francis dam demolished.
Los Angeles municipal power house below dam demolished.
500 homes destroyed or greatly damaged.
20 miles of citrus orchard land buried under many feet of mud and silt.
10 important bridges destroyed.
State and county highways washed out at numerous points.
Telegraph and telephone lines disrupted over an area connecting half a dozen towns and a dozen smaller communities.
1,500 persons virtually homeless and many of these, temporarily at least, destitute.
Livestock killed and drowned, unestimated total.

The aggregate property loss cannot be determined at present.

Officials declared that it would require weeks to fix the figures which might be found anywhere between $7,000,000 and $30,000,000.

MAIN BUDGET MOTION ADOPTED BY 24 MAJORITY

Ottawa.—By a majority of 24, the House adopted the main budget motion. The vote was: For, 116, Against, 92, majority for, 24.

The majority consisted of Liberals, Liberal-Progressive and the independents sitting on the government side. From the left of the speaker, L. H. Jelliff (U.F.A., Lethbridge) was the only member to vote for the budget. Conservatives, other members of the U.F.A.-Progressive group and Labor members voted against the budget. There were loud cheers from both sides of the House as the result was announced. Speaker Lemieux left the chair and the House resolved into committee of ways and means to consider the budget resolutions one by one. But proceedings in committee were brief. There was a reporting of technical progress and the House proceeded to other business.

The House met in expectant mood. The intervention of Henri Bourassa with its sudden termination of the vote on the main budget motion had left members wondering what the day would bring forth.

Immediately the main motion was submitted Mr. Bourassa rose to speak. But he had said only a few words when Hon. R. B. Bennett, Conservative leader, was on his feet with the objection that Mr. Bourassa has already spoken and was not entitled to speak again. There was some discussion pro and con and the speaker ruled against Mr. Bennett. The speaker held that members with the exception of Mr. Cahan had not spoken on the main motion, and were therefore entitled to speak.

Mr. Bennett appealed the ruling, which was sustained by a majority of 41. Liberals, with the exception of six French-speaking members from Quebec, voted for the ruling as did Liberal-Progressives, Progressives, U.F.A. and Labor members. With them also voted C. H. Cahan, ...

Chosen Conservative Leader

Dr. J. T. M. Anderson selected as Leader of Conservative Party in Saskatchewan

Saskatoon. Dr. J. T. M. Anderson, member of the Saskatchewan Legislature for Saskatoon City, was selected by three hundred delegates at the Conservative convention here as the provincial leader of the party.

When the moment came for receiving nominations, the following names were submitted to the delegates: M. A. MacPherson, K.C., M.L.A., Regina; Dr. J. T. M. Anderson, M.L.A., Saskatoon; Howard McConnell, M.L.A., Saskatoon; J. A. Haagerman, Unity and J. F. Bryant, ... Prince Albert.

Under the procedure decided upon a special committee consisting of George Bennett, Wolseley, R. E. Alexander, Gull Lake, and W. Lamsay Hladworth immediately met the nominees to ascertain whether or not they would accept nomination. The report brought back by this committee stated that it was the unanimous decision of the candidates that Dr. Anderson should be selected and consequently the others withdrew their names from nomination.

Officials Will Be Examined

To Give Evidence at Future Sittings of Immigration Committee.

Ottawa. Officials in charge of immigration and colonization for the Canadian Railways will be summoned before the parliamentary committee investigating the department of immigration.

W. J. Egan, Deputy Minister of Immigration, was again on the stand. He said the department had checked to determine if all farm laborers brought in under the railway agreement actually went on the farm and had discovered that such was not the case in some instances.

Mr. Egan said he thought railways which brought in the bulk of immigrants were fulfilling the spirit of their agreement.

Every effort had been made by the department to induce British farm laborers to come to Canada and despite the lower fare in effect to Australia there were more people coming to Canada from Britain than went to all other outlying parts of the Empire.

Answering a question by George Spotton, Mr. Egan declared there had been newspaper propaganda against Great Britain during 1922 and 1923, arising partly from non-payment of interest on Grand Trunk securities. This affected immigration but the propaganda had later been counteracted.

Usually immigrants were not stripped for examination, he said, and Dr. McGibbon objected that if this was so the medical examination was a farce. It would not be known if a man had tuberculosis or heart trouble without stripping him.

Tourists Injured In Fire

Sleeping Car on Train From Luxor Completely Destroyed

Cairo, Egypt. Passengers of a crowded de luxe train from Luxor narrowly escaped death when fire broke out in a first class coach and spread to an adjoining sleeping car.

In their flight some of the passengers, mostly tourists, received cut hands, bruised shins, sprained ankles and bruises as they escaped through windows. ...

CONSERVATIVES ADOPT PLATFORM AT SASKATOON

Saskatoon. — The principal points in the platform adopted by the Saskatchewan Conservative party briefly are:

1. Immediate return of the natural resources of the province and compensation for lands and resources alienated.
2. Aggressive immigration policy based on the selective principle.
3. Thorough revision of the educational system of the province.
4. Encouragement of diversified agriculture and creation of wider markets for home products.
5. Improvement of conditions of labor generally.
6. Policy of economy and retrenchment.
7. Balanced industrial development.
8. Amalgamation and coordination of all public welfare services.
9. Establishment of independent investigating commission on public health and creation of free consultative clinics.
10. Development of power resources of the province as publicly owned and operated utilities.
11. Development of provincial coal deposits.
12. Approval and encouragement of co-operative enterprises.
13. Strict provincial law enforcement.
14. Furtherance of scientific research.
15. Conservation of fur-bearing animals and development of fur industry.
17. Promotion of a campaign of temperance education through public school text books.
18. Political equality of the sexes.
19. Reorganization of provincial farm loans board.
20. Public tender for public contracts.
21. Preference for Canadian and British-made goods.
22. Co-operation of political groups and individuals opposed to the present administration.
23. Reduction of civil service.
24. Free speech in radio broadcasting.
25. Reduction in auto license tax.
26. Preference to returned soldiers in civil service positions.
27. Eradication of bovine tuberculosis.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Government of Alberta, Edmonton, March 17th, 1928

Many Trees Planted in South

It is estimated that new settlers in the Vaudhall district of southern Alberta planted some 12,000 trees around their farm homes in 1927. Trees planted under similar conditions by earlier settlers in 1920 and 1921 have made splendid growth and done a great deal to encourage further efforts to beautify prairie farms in the way.

"Sheepin" Selected as Name for New

Lethbridge Hotel

Hotel Marquis has been selected as the name of the new community hotel under construction at Lethbridge. It is felt that the choice of this name commemorates the wheat, the introduction of which has done so much for agriculture in Western Canada.

Looking Starts on Southern Farm

Flocks

Lambing season is reported to be well under way on farm flocks in the southern part of the province and the crop of lambs in most cases is very satisfactory. Sheep men are taking every precaution to avoid the comparatively heavy losses which occurred as a result of the cold wet weather during the spring of 1927.

Farmers Advised to Insure Seed Oats Early

Farmers throughout the province are being advised to place their orders for the seed oats they will require for the 1928 crop, states Provincial Field Crops Commissioner W. J. Stapleton. While the need and situation this spring should not cause wide spread alarm, there is undoubtedly a considerable shortage of good seed oats in some sections of the province and a more serious scarcity at seeding time can be avoided if farmers will make provision to fill their requirements as early as possible.

The germinating quality of oats has been lowered to some extent in a number of districts where the crop has been exposed to the weather over winter and farmers in these localities are urged to have germination tests made on the grain they intend to use for seed. Large quantities of oats of a quality suitable for seed have been shipped in of this province during the past few months and done a great deal to encourage further efforts to beautify prairie farms in the way.

Sweet Clover a Good Friend But a Bad Master And Must Be Kept Under Control

Like fire, sweet clover is a good friend but a bad master. After a hectic career of about 15 years it has risen from a place of universal condemnation as a dangerous weed, to one of the most valuable crops in the country with many men, on sandy land particularly, ranking a few tons out of its reach from all the dollars and more a bushel it was planted widely all over Manitoba and into and much headway in the West. Then a few years after the war the dakota of sweet clover began to clear up and it sank in popular esteem until today the mention of it is loaded with most and farmers cannot get more than two dollars a bushel for it.

On into any of the five Dominion Government Seed Laboratories, scattered across the Dominion, and you will find that sweet clover pollutes most samples of other clover and alfalfa. Seedsmen will tell you that source of good red clover, alsike, and alfalfa seed in many districts have been ruined by this weed, because it is a weed very difficult to clean from crops, which comes up with the other clover, grow to seed at the same time, and because of the similarity of seed in about the same size and weight so that of the three it is very difficult and sometimes impossible to separate it. Moreover, although once widely boomed as a hay crop, it is now generally admitted that red clover or alfalfa is a much better plant for this use.

But again, this fire, sweet clover has a very real place in Western agriculture, if it is handled properly. At the Government experimental farms there is no trouble with sweet clover, because it is kept under control. Here it is used principally for green manuring, though the hay used makes very good feed for cattle, and the straw is not unpalatable. Sweet clover is one of the best plants for the production of nectar, and is responsible for many tons of honey each year. Broadcast sown with timothy and sometimes unprofitable to separate it. Moreover, although once widely boomed as a hay crop, it is now generally admitted that red clover or alfalfa is a much better plant for this use.

Who Won the War?

Sir Harry Lauder Gave Best Answer To Question

The old question of who won the war was revived by the Brantford Expositor in its editorial columns. In the conversation, we can recall a story told by Sir Harry Lauder at a reception given in his honor on a tour of Canada some years ago, according to his story, when asked as to his opinion, he replied as follows.

"You wrapped my opinions, and here it is I want to tell you that English and the Irish, the Welsh and the French, the Belgians and the Yugoslavs, the Australians and the New Zealanders and the South Africans, helped the Scots womanly to win the war."

Probably the famous Scottish humorist was not far wrong in his estimation of the situation, and the arrangement of the various nations can be changed to suit the nationality of the individual.

Alkaline Industry Profitable

Many Varities Are Discovered On Island Of Majorca

Almonds have a prominent place on the table, but few people realize the great trouble taken in their cultivation. They are the most important crop of the Island of Majorca, where many varieties are cultivated, and the industry is so prosperous that no additive trees die they are replaced by almonds.

When the almonds are almost ripe they are knocked off the branches by long bamboo poles and then picked up by women and children. The nuts are separated from the husks after drying, and the shells are then broken by means of machinery and the kernels collected.

Banking in B.C. Improves

Cattle Is Better Than Per Many Years Says Old Operator

The cattle business of British Columbia is beginning to hit its old stride again, and its initiation for the ranches is better than for many years, according to C. G. Cowan, operator of some of the largest ranches in the Cariboo, including those owned by the Marquis of Exeter, Lord Egerton of Tatton, and the Cariboo Trading Company.

Ever since the boom years of the war British Columbia's cattle business has languished. The government's enormous productive capacity beside that of the world's output of copper, its enormous increase in production will be possible through the development of the newer fields that are just now coming to the front, such as the Nancy Tremont in Quebec, the Frood mine area near Sudbury, in Ontario, and the several copper properties in Manitoba.

The speaker foresaw no diminution in the per capita consumption of copper, but rather the probability of a gradual increase in the use of this metal."

H.B. Railway Possibilities

Canal Line Of Shorter Bay Greater Than That Of Canadian Canal Line

Few people realize the immensity of the territory which will be opened up for development with the completion of the Hudson's Bay Railway. The shore line of the Bay itself far exceeds in greater than that of the Canadian Atlantic coast line.

With a canal line of these proportions the configuration of the ground naturally scrambled by these periods of conquering, the surveyor and the prospector, should be large enough to yield a good business for a new railway line, apart from through shipment of wheat and perhaps livestock for export trade. Fur, fish, minerals, pulpwood and agricultural produce—all or any of these may be found in undivided quantity to make the new line pay its way in a very short time without the handicap of traffic for which the line is being primarily built—primarily, at least, from the viewpoint of the Western Canadian farmer.

The proximation of the Hudson's Bay Railway are greater than perhaps even the most discerning can yet see.—Manitoba Farmer

Trying To Collect Back Taxes

Federal Government Claims Arrears From Western Wheat Pools

The question of payment by the Federal Income Tax Department of Ottawa and the Wheat Pools' Head Office, is to be settled by the courts. The pools claim that the wheat pools are exempt from income tax, while the Federal Government claims that they are not exempt.

The point at issue is whether or not the two or three cents per bushel which the pools deduct from the purchase price of wheat, is profit or not. Should it be decided that the pools are liable for income tax, the amount involved will be considerable.

The Federal Department claims that they are taxable, and is demanding that the pools pay up for all collections made since their inception. Many millions of dollars have been collected by the pools in this manner, and the latter have never shown these sums as taxable income.

There are 4,400 country grain elevators in Western Canada, non-fifth of which are owned or controlled by the Canadian Wheat Pool, the largest farmers' co-operative organization in the world.

Shipping Cattle To China

Market For Dairy Stock From B.C. Is Still Good

British Columbia is shipping more dairy cattle to China and, despite political uncertainty there, the market for good stock continues in a healthy condition, according to Dr. A. Knight, provincial livestock commissioner.

A shipment of 23 pure-bred and grade Jersey and Guernsey bulls and cows recently went out to Hong Kong for the Chinese trade. The Cold Storage Company there and further shipments will be sent during the spring.

Canada's Copper Industry

Dominion Rapidly Climbing To Third Place In Production

That within the next 10 years Canada will become the world's third largest producer of copper, being surpassed in this field only by the U.S. and Chile, was the prediction made by Sydney J. Cook, chief of the mining, metallurgical and chemical branch, Dominion Bureau of Statistics, Ottawa, during an address on Canada's future in copper, given at the annual general meeting of the Canadian Institute of Mining and Metallurgy in Quebec.

Mr. Cooke said that although Canada now produces only about five per cent of the world's output of copper, its enormous increase in production will be possible through the development of the newer fields that are just now coming to the front, such as the Nancy Tremont in Quebec, the Frood mine area near Sudbury, in Ontario, and the several copper properties in Manitoba.

The speaker foresaw no diminution in the per capita consumption of copper, but rather the probability of a gradual increase in the use of this metal."

Buy At Home—You Sell There

Patronize 3 our Local Merchant and Build 1 p Your Own Community

Patronize your local merchant. Any trade goes toward the betterment of the home town and powers that beautifies your town. His taxes help to keep power down. His contributions to local charities paves that his interests to where yours do.

His advertising in the local paper enable yo editor to build another home, donate still further to local needs and support better material for our reading hours.

Your local merchant buys your produce. He sells it to your friends. If you sell at home and buy elsewhere, home will soon become an undesirable place to live.

The gold in the distant cities may attract, but long ago it was learned that "all is not gold that glitters."

Modern banking originated in Italy.

Naval Agreement Between Britain and U. S. Would Be Big Step Towards World Peace

Holds World's Record

Has Council By University Of B.C. Is Outstanding Her Reputation

There is a ben in British Columbia which seems to be the prototype of that 6-inches foot that "hid the golden eggs." "Maisie" is the name of the famous White Leghorn, owned by the University of British Columbia, which, because of her egg-laying proclivities, has had greatness thrust upon her. This remarkable hen has already a world's record to her credit, having laid 351 eggs in one year, and she has more than sustained her reputation in the new year. According to the Brantford Expositor, Maisie's production brought to the university last year cash proceeds of $2,275 handled in this was $300 each for two cockerels, another cockerel sold for $200, and seventeen hatching eggs brought $425 to the coffers of the university. It can hardly be wondered that the Western institution has refused all offers to part with "Maisie," although high cash offers have been made. Apart from the value of this hen as a revenue producer it is an advertisement for the university that cannot be measured in dollars and cents. It has probably done more to make the University of British Columbia known throughout the American Continent than any other single factor since the institution was founded.

Believes New Wheat Is Rust Resistant

Discovery By Dr. Seager Wheeler Satisfies Pre Milling Purposes

A new variety of wheat which he thinks will be substantially rust resistant and at the same time be suitable for milling purposes has been discovered by Dr. Seager Wheeler of Rosthern, Sask. Dr. Wheeler made the announcement while speaking on the danger of rust in Western Canada, at the annual banquet of the Rosthern Board of Trade. Dr. Wheeler announced that the new wheat is a cross bred from Kota. He has been growing wheat for the past 40 years and for the last 20 years has endeavored to obtain a rust resistant variety. He states that this Kota cross bread will be most likely what was desired by the Western farmer. Experiments are being made with this wheat at Ottawa, Saskatoon and in Manitoba and Dakota.

We Come For Worry

In one of the infant classes of a certain high school the teacher had noticed that a great friendship existed between John and little Joan, two of her pupils.

John was a bright youngster, but he wasn't disposed to work overmuch, and his teacher had said that unless he exerted himself he would not be moved up at the end of the year.

"You must try harder," she told him, "or you won't pass. And if you have to stay here another term you'll lose little Joan. How'd you like that?"

"Oh," replied John blandly, "I expect there'll be other little Joans."

"I have always maintained," declared Charles, "that no two people on earth think alike."

"You'll change your mind," said his fiancee, "when you look over our wedding presents."

The sun is 93,000,000 miles from [illegible].

A good thing may be cheap, but a cheap thing is seldom good.

Minard's Liniment kills warts.

Aluminum possesses qualities of lightness, cleanliness and protection against rust and dust which make it incomparable as a container for fine tea. You will never find that flat, stale taste in Red Rose Tea, because it is put up exclusively in dust-proof aluminum packages.

Losing Zest For War

Germany Now Prizes Peace Says Noted Biographer

Germany, whatever her alliance may be, will do all in her power to remain neutral in any war that may assail mankind in the far or [illegible].

Emil Ludwig, noted biographer, so expressed himself at Orchestra Hall, New York.

It will henceforth prize peace, he said, for these three reasons:

First, because the royal prerogative to decree war does not exist any more.

Second, because Germany has the greatest percentage of workmen today who are die-hard pacifists.

"Third, because they realize they will be better off by remaining neutral."

Former Field Marshal von Hindenburg, declared Ludwig, will be re-elected president of the new republic as long as he lives.

"There are no symptoms of a return to the monarchy," he said. "On the contrary; since we are governed by the old conservative families, the republic is safer than before. When the citizen sees the kaiser's old field marshal swearing allegiance to the new constitution, he says 'It must be all right.'"

The Feeding Of Babies

From time immemorial it has been recognized that babies thrive best when breast-fed, and it is the ambition of every mother to nurse her baby. But since it frequently happens that this is not practicable for one reason or another, the young mother looks about most anxiously for that food which will best take the place of the natural food which is not obtainable. It is essential that the food used should be absolutely pure, that it should contain all the necessary elements of nourishment for the child, and finally that it should be easily digestible. For three generations Borden's Eagle Brand Condensed Milk has been the stand-by of mothers who have been unable to nurse their babies. It is a leading infants' food, more Eagle Brand being used than the combined total of all others. It measures up to the requirements of the infants perfectly, and nearly all babies thrive on it from the first feeding.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Issuing Series Of Historic Postcards

British State Papers Will Be Photographed For This Purpose

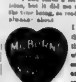
To popularize history, the Public Record Office, in London, is about to issue a series of postcards made from photographs of some of the state papers contained in governmental archives. The subjects include: The original draft of the log of Nelson's flagship on the two days after the battle of Trafalgar, a signature of Shakespeare, Sir Philip Sidney's last letter; the indenture to Magna Charta, a page of the treaty violated by Germany in invading Belgium, a picture of the two volumes of Domesday Book.

Ruins of a city, believed to be a thousands years older than Rome have been discovered near Ferrara, Italy.

Short of Breath
Dizzy, Sinking Spells
COULDN'T WALK FAR

Mrs. L. A. Oliver, Granville Ferry, N.S., writes:—"A few years ago I had dizzy, sinking spells so bad I could hardly stand up without taking hold of something to support me, and I could not walk any distance on account of being so short of breath.

"I had taken a lot of doctor's medicine, but it did me no good, only for the time being, so reading in the B.B.B. almanac about [illegible]



I decided to try them and found them to be just what they are recommended to be, and I feel that I owe my life to them."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Aviator Crashed Into Sea

British Flier Killed While Aiming At Speed Record

Flight Lieutenant S. M. Kinkead, noted British speed pilot, flying at terrific speed, dived into the sea at Southampton, England, leaving no trace, while attempting to break the world speed record.

Lieut. Kinkead, who was a member of the victorious [illegible] cup team of last year, was piloting the same type of machine with which Flight Lieutenant S. N. Webster won the Schneider trophy with an average of 281 miles an hour.

Lieut. Kinkead had made his first trial flight in a Royal Air Force "wonder plane," and then had [illegible] second flight after which he declared he was convinced he would make [illegible].

The machine that he used was a super-marine Napier S-5. During the Schneider cup races, Lieut. Kinkead made a speed of 291 miles an hour, the highest rate attained over one lap in the race, but was forced to withdraw after completing the third lap.

The record which the British airman sought to shatter was that established shortly after the Schneider cup races by Major Mario De Bernardi, Italian speed ace, who flew at 296.94 miles an hour.

ARE PALE PEOPLE WELL?

Some pale people are well, but not many. Pallor generally means thin blood. When, in addition, you are short of breath, and your heart palpitates after slight exercise and you perhaps show symptoms of indigestion and nervousness, there is no doubt about it. You are in an anaemic condition.

Dr. Williams' Pink Pills are the logical remedy for anaemia, for they begin at once to build up the thin blood, strengthen the nerves, increase the appetite and aid digestion. But do not wait too long. Thin blood is a stealthy and dangerous foe.

If you will send your name and address to The Dr. Williams Medicine Co., Brockville, Ont., they will send you two little booklets, "Building Up the Blood" and "What to Eat and How to Eat," both of which will be found very useful in the home.

Recipes For This Week

(By Betty Barclay)

QUICK SWEETS

1 cup flour
2 teaspoons baking powder
½ teaspoon salt
3 tablespoons shortening.
½ cup milk.
1 cup puffed raisins.
4 tablespoons sugar.
2 teaspoons butter.
1 teaspoon cinnamon.

Sift together flour, salt and baking powder. Cut in shortening and add sufficient milk to make a soft dough. Roll ⅛-inch thick. Cut in 6-inch squares. Place a small handful of raisins in the centre of each, with one teaspoon sugar and ¼ teaspoon butter. Wet edges of dough with cold water and fold over the raisins, pressing edges tightly together. Brush with milk and roll in remaining sugar and cinnamon which have been mixed together. Place ¼ teaspoon butter on top of each sweet and bake in moderate oven (350 degrees F.), 15 minutes. Serve hot with lemon sauce made as [illegible]:

1 cup sugar
¼ cup butter
2 tablespoons flour.
1 tablespoon lemon extract
1 cup boiling water

Cream butter with sugar and flour. Add boiling water and boil one minute. Remove from fire, add lemon extract, and serve hot.

VEGETABLE PLATTER

Four or five cooked, well-buttered and seasoned vegetables arranged attractively on a plate around some creamed vegetable, as potato, onion, or cauliflower, form a satisfying and nutritious dinner. Add 1 to 2 tablespoons of butter to a cup of hot cooked vegetable.

Sun Caused Fire

The heat of the sun caused a fire in one of the windows of a jewellery shop in Sydney, Australia. The window was stocked with toilet requisites, in which material of a highly inflammable nature is used, and the heat caused the brushes and other articles to become ignited. The plate-glass window was broken, and the contents of the window completely destroyed.

There is a small island off the coast of Ireland, which is inhabited by only fourteen families.

A fool can do more damage in a minute than a wise man can undo [illegible].

What worries most Canadians is not so much status as static.

SUNDAY SCHOOL LESSON

MARCH 25

JESUS PROCLAIMS THE KINGDOM OF GOD

Golden Text: "And Jesus went about all the cities and the villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of disease and all manner of sickness." Matthew 9.35.

Devotional Reading: Malachi 3. 1-6.

Review By Means Of Allusions

I do not expect the Union to be dissolved, I do not expect the house to fall, but I do expect it will cease to be divided.—Lincoln.

I am confident that should every foreigner be forced to withdraw, the grain of mustard seed will grow. Churches that live will have such vitality that the good news will be spread.—A Chinese Missionary.

One touch upon His garment's fringe
Still heals the hurt of bitter years;
Before him yet the demons cringe,
He gives the wine of joy for tears.
—Margaret Sangster.

This characterization comes perilously near to being akin to the sin of the scribes of old when they attributed that which was good to the action of the spirit of evil. A more careful analysis of the social aspirations now becoming vocal in all lands would indicate that a strong man has entered the house and that he is destined to bind the forces of evil which have been working injury to the weak.—Charles Reynolds Brown.

"Whatever the fever, his touch can heal it.

The healing of His seamless dress
Is by our beds of pain;
We touch Him in life's throng and press,
And we are whole again.
—Whittier.

If you find that one door is blocked, try another; and if no ordinary way is open, tear up the roof, make a new departure. Love is inventive, and enthusiasm is persistent.—Samuel Chadwick.

The new wine of liberty is fermenting in the ancient bottles of custom and tradition.—A Russian writer.

Be not afraid. There is no harm
Can come to those who trust
The God who rules both wind and wave,
Whose laws are kind and just.
—Pearl Holloway.

Our own sorry soul is made up of the accumulated attitudes, preferences, antipathies, loves, fears, hatreds, forgivenesses, which we take up and exercise towards our fellows. In view of all that, let us take deeply into our thoughts and practise the message of these words, "How can Satan cast out Satan." John A. Hutton.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out, and there are ample grounds for saying that it is an excellent article.

Experiments [illegible] demonstrated that is possible to grow certain hardy fruits on the prairies. If there is anything in a name, the Snow and Northern Spy apples should be frost-proof.

People who have no sense of humor act mighty funny at times.

The Right Soap For Baby's Skin

In the care of baby's tender skin Cuticura Soap is the mother's favorite. Not only is it unrivaled in purity and refreshing fragrance but its gentle emollient properties are usually sufficient to allay minor irritations and promote skin [illegible].

[illegible] Cuticura Shaving Stick 25c.

New Weather Bureau

Station At St. Hubert Aerodrome Has Modern Equipment

The Meteorological Service of Canada has just established a new weather bureau at St. Hubert Aerodrome, near Montreal, under the direction of the Naval Service in connection with the trans-Atlantic air service which is expected to be put into operation in the coming summer. The station is fully equipped with the modern meteorological apparatus and is under the direction of Leo R. Charron, of the Royal Canadian Air Force.

DISTRESSING HEADACHES

Bathe the forehead with Minard's. Also inhale. Brings soothing relief.

MINARD'S "KING OF PAIN" LINIMENT

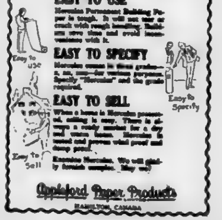
Will Receive Five Millions

Canada's Share This Year From Germany Under Dawes Plan

Total reparations payments by Germany this year will be in the neighborhood of $600,000,000. Of this amount Canada will receive approximately $5,000,000.

Canada receives roughly a shade under one per cent. of the total amount paid by Germany under the Dawes reparation plan. From the total of $600,000,000 there are certain deductions made which reduce the total amount available for distribution.

The electric unit known as the volt takes its name from Alexander Volta, who made the first voltaic battery.



HERCULES
PERMANENT BUILDING PAPER

EASY TO USE
Hercules Permanent Building Paper is tough. It will not tear or crack with rough handling. Builders save time and avoid inconvenience with it.

EASY TO SPECIFY
Hercules comes in three grades [illegible]. Specify "Hercules" and the grade required.

EASY TO SELL
When a house is Hercules protected, selling is easy. There is always a ready market for a dry and warm house. Hercules is tested and proven wind proof and damp proof.

Examine Hercules. We will gladly furnish samples. Buy now.

Recommend Co-Operative Marketing Of Live Stock

Saskatchewan Overseas Live Stock Marketing Commission Makes Report

Co-operative marketing is the first of eight measures recommended by the Saskatchewan Overseas Live Stock Marketing Commission to the Legislature of Saskatchewan. The Commission was appointed early in 1927 by the Saskatchewan Agricultural Research Foundation and directed to make an investigation relative to the marketing of Canadian Live Stock in Great Britain and to study co-operative bacon factories in England, Ireland and Denmark. The Commission was made up of five men who investigated conditions in the countries named and also in Poland, Germany and Holland.

The creation in Canada of a department or bureau of agricultural economics to study data on marketing and other problems is also recommended by the commission.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, [illegible]

CHAPTER XX.—Continued

"Do you think I would marry you to a decent boy—a boy of good family—who was foolish enough to think of marrying a foreigner of whom he knew nothing, and of whom the police know considerable? Look!"

Helmi leaned over and scanned the paper. Her own picture stared at her. For a moment she forgot everything but the pleasant memories it brought to mind of Miss Abbie's house and its kindly shelter. The picture was taken in front of the house; she had worn her white middy and pleated skirt. She remembered now that Mrs. Wymuth had asked for a photo—it was one of the rules of the Home.

"Helmi Milander, young Finnish girl who escaped from the Girls' Friendly Home. Arrested here a year ago in the worst Chinese den in the city." Helmi reeled, and would have fallen had not Major Gowsett sprang to her assistance and placed her in a chair.

"Do you deny this?" asked the Magistrate, when he thought she was sufficiently recovered to speak.

"No," said Helmi faintly; "that's my picture, but it's all a lie."

"Of course, they all say that."

"Well, at least you can understand that I was not anxious to marry you to young Doran or any decent man. You have a record, you see, and every magistrate in Canada has a copy of this."

"Did Jack see this?" Helmi asked after a pause.

"Yes, I showed it to him while you sat outside," said the magistrate, "but he told me to go on. Like every other young fellow he wanted his own way. But now I advise you not to try to make trouble. You have no claim on him—remember that—and he's gone away, I hear, for good. You'd better go straight back to this Home that you ran away from. No doubt they will help you through again. I understand many of the girls come back two and three times. In fact," he said turning to his friend, "that is one great objection to these Rescue Homes—they make things far too easy for girls of this class."

Helmi was staring past them vacantly. The pallor of her face was deepening.

"Now, look here," said the magistrate, sharply, "no tricks, no faints. You're an old hand at this, although you are not old in years, and you can't make me believe you are an innocent young thing, who has been deeply wronged. You're well able to look after yourself."

Helmi rose uncertainly. She reached out her hand for the certificate she had given him.

"This is no good," he said, "you may as well leave it here."

"Give it to me," cried Helmi, with some of her old fury, snatching it from his hand.

"Take it then, you tiger," he said angrily. "It's no good to you. Take it and get out of here! I am not running a Girls' Friendly Home here."

Helmi opened her purse to replace the paper, and as she did so a card dropped out. She stooped and picked it up. It was a white card bordered with maple leaves, and in the centre were printed these words "Welcome to Canada!"

The sight of the card brought Helmi back to the night she had got it. It was her place-card the night the girls gave her the party. They were good to her and would be sorry for all this trouble which had come to her. This man who had caused her so much harm would suffer for it. Canada was all right. God was all right. This man was a devil. In a moment all her faintness was gone, succeeded by burning rage.

The two men watched her uneasily. There was something terrible in her anger. She walked over to the table and stood in front of Col. Blackwood. "You are a bad man," she said, "A devil—an old dirty, drunken devil. I hate you, and I will kill you. If my man does not come back to me I will kill you." Her voice was low, but it [illegible] the room. "It will be your fault, and I will come back here and kill you."

[illegible]

"Tough luck, Helmi," said the matron. "But we all know it wasn't your fault. He fooled you, that's all."

Mrs. McMann found her tongue—never a hard task for her. "Well, one thing sure, Helmi, you can't say I didn't warn you. I knew it means no good to a girl when one of those city dudes starts to go with her. They mean no good to any girl I tell you, a girl has to watch her step all the time. I can't keep you here. I'd keep you on if I could, but there's so much talk of this, that and the other, and I've always tried to run a decent house, but with so many comers and goers, and now that Mr. McMann has gone I've got to be more careful. I guess you'd better go into the city. There's so many people there no one asks questions."

Mrs. McMann went on talking.

Helmi stood up and faced the sunset and her eyes were looking far away. She did not hear what Mrs. McMann was saying. She was thinking of that sunset long ago the night before she crossed the Canadian border—how it glowed and gleamed and beckoned. She had been so sure it was a welcoming fire to [illegible] comfort her. She had come in full of hope and confidence—so sure she was of making her way, and finding friends. But these fires, these friendly fires, where were they now?

Her friend whom she loved had betrayed her into hostile hands. And now her Jack! Was Aunt Lil right after all? Was Jack a painted fire, too [illegible], and God, her God, who had seemed so close and dear and loving to her, was he just a painted fire, like the other, cold, and dead, and mocking, when she came to him crying and shivering, bitterly alone, and afraid.

The last glow of color faded in the sky and the night wind came whistling, cold and piercing, down the mountain pass.

Helmi was aroused by the collie dog licking her hand.

CHAPTER XXI.

Dead gardens, littered with stocks from which the life had fled and the bright blooms had departed, with all the sadness of the silent places where throbbing life had been, hunchbacked over the newly earthed graves where the potatoes and turnips now lie buried; dead fields cleared out, swept clean and tidied away like the house of trouble where the neighbors gather and do this sad service for the one who is gone; leaden stubble whose golden hue was faded now to match the lowering sky; leafless trees that draw together moaning and complaining like toothless old women whose children have all forgotten them, no birds at all except the little graybirds who sing no song and whose coats are the color of dust; the rose-haws gone, driven out by the scouring winds of December that foam with rage at any spot of brightness; weary winds that rage all day and moan at night as if they had repented of their evil ways, but whose sorrow is only for the works of destruction which they were not able to accomplish. The harvest past, the summer gone, stark melancholy over all. So came that cold, gray, desolate time which we refer to as the "Turn of the Year."

There was only one hope for the sad old world, so gray and unlovely and lifeless—hope that the decent snow would come with its soft winding sheet to cover the unsightliness of the dead face. Surely there would be snow for Christmas. "A green Christmas makes a full churchyard," the old people said grimly, but no one could truthfully call this a green one; it was only gray and leaden.

(To Be Continued.)

Keep Minard's in the Medicine Chest.

Over 2,500 acres of the area covered by Stockholm, Sweden, consist of parks and gardens.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation, or diarrhea. Or those many times when you just don't know what is the matter. [illegible]

Children Cry for

Robinson Crusoe's Error

Survey Shows Juan Fernandez Island Is Veritable Paradise

Robinson Crusoe and his man Friday should have remained on their island. A recent survey of Juan Fernandez Island, on which Alexander Selkirk, the original Robinson Crusoe, spent four years, proves it to be a veritable paradise.

The report says it is one of the most fruitful spots in South America with every imaginable sort of plant growing there. A Frenchman, shipwrecked on the island some 40 years ago, has refused to leave because of the ease with which he has been able to live.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach, regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, post paid, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

On a Meat Diet

Stefansson Endeavors To Demonstrate That All Meat Diet Does Not Cause Scurvy

Vilhjalmur Stefansson, Arctic explorer, has thrived for two weeks on an all-meat diet, his physician announced in New York. The explorer is under observation at Bellevue Hospital, where he is endeavoring to demonstrate that an all-meat diet does not cause scurvy.

Dr. Clarence W. Lieb explained that the explorer's general condition has remained excellent since he began the experiment, which will be continued another fortnight.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Would Not Give Up

One-Armed English Musician Plays Piano With Left Hand

When Mr. Douglas Fox, the musician, lost his right arm in the Great War, his friends thought he would never be able to play the piano again.

The gallant man determined that he would play and has developed so amazing a technique, that when he recently gave a recital in England, [illegible] in Brasenose College, England.

He: "Your cousin refused to recognize me last night. Thinks I'm not his equal, I suppose."

She: "Ridiculous! Of course you are. Why he is nothing but a conceited idiot!"

[illegible] fishing trips take Minard's.

LOSES FAITH IN COMMUNISM

Dutch Engineer Is Disillusioned After Visit To Russia

The Conservative press of Holland is rejoicing in the repudiation of Communism by the Dutch engineer Baars, known at the time of his expulsion from the Dutch East Indies last September as "the firebrand of Java," where he had been the head of the subversive Soviet movement.

After his expulsion he went to Russia in order to learn at first hand the political and social principles he had been advocating. This visit, judged from the point of view of a long article he has written for the Nieuwe Rotterdamsche Courant of Rotterdam, has resulted in his entire loss of faith in communism.

He says he considers it his duty on his return to Holland to advise the population of the Dutch East Indies, whom he himself had directed along the path of Communism, to retrace their steps.

He found that the Soviet Government was able to do little for education and the care of the sick, despite all the fine slogans. As in capitalistic countries all available money is first of all spent on the army, and further on the enormous bureaucratic apparatus.

"The incomes of farmers are very small. Nine-tenths of them have incomes of 25 rubles per month. Only one-tenth earn more than that.

"Even the casual visitor must notice that the great masses of the large cities are miserably poor. The shabby clothing, the old, repaired furniture, the accumulations of dirt cannot possibly be kept concealed. Their status in regard to comfort, even of health, is much lower than it was in 1913. Anybody can see that.

"In 1927 there were 2,000,000 unemployed in Russia out of a total industrial population of nearly 12,000,000."

Cause Of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Homestead Filings For January

Homestead filings in the four Western Provinces in January showed a total of 4[illegible] as compared with 518 for the same month of 1927. Manitoba recorded [illegible] as compared with 36 for January, 1927, Saskatchewan 194 as against 146, Alberta, 201, against 118, and British Columbia 11 against 6.

Winnipeg Live Stock Shipments

During January 1290 car loads of live stock were handled at the Union stock yards, St. Boniface (Greater Winnipeg). The shipments comprised 30,642 head of cattle, 17,777 hogs, 17,448 sheep and 1,420 horses.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. [illegible] Phillips' Milk of Magnesia [illegible]

Acts Like a Flash In Relieving Colds

That's why so many people buy "Buckley's" to end Coughs, Bronchitis and all Throat, Chest and Lung troubles. It's instant, pleasant, guaranteed. You'll note its unique powers in the very first dose—and there are 40 doses in a 75-cent bottle. Ask your druggist for "Buckley's".

Little Helps For This Week

"Blessed be the Lord, who daily loadeth us with benefits, even the God of our salvation."—Psalm lxviii. 19.

When all Thy mercies, O my God,
My rising soul surveys,
Transported with the view, I'm lost
In wonder, love, and praise.

Ten thousand thousand precious gifts
My daily thanks employ,
Nor is the least a cheerful heart,
That tastes those gifts with joy.
—Joseph Addison.

If gratitude is due from man to man, how much more from man to his Maker? The Supreme Being does not only confer upon us those bounties which proceed more immediately from His hand, but even those benefits which are conveyed to us by others. Every blessing we enjoy, by what means soever it may be derived upon us, is the gift of Him who is the great Author of good and Father of mercies.—Ibid.

Rubber From Flowers

Asters are three per cent. rubber and there is enough tire material in dandelions and golden rods to provide an emergency supply should the occasion arise. This according to announcement from the laboratories of America's inventive wizard, Thomas Edison.

A Scotsman and an Aberdonian were on top of an omnibus. The Scotsman suggested that they should speak to a girl they knew sitting in front of them. "No, wait till she has paid her fare," said the Aberdonian.

BROODING AND FEEDING OF BABY CHICKS

BROODING. The first consideration in brooding in a suitable building for the purpose. Prior to building a chicken house at the west Station a small shed roof colony house was erected inside and the air spaces between the outside and rafters were packed with prairie wool. The floor was also packed and the outside of the building was banked above the floor joist with soil. A similar building could be used on the average farm. For the brooding of chicks any coal burning it is necessary to have a stove in which the wind will not penetrate in order to maintain an even temperature. The temperature near the floor and about three inches from the stove should be 95 degrees Fahrenheit during the first week. After this time if the stove is well regulated the chicks may serve as a guide by the way in which they move about. If they are well gathered the temperature is satisfactory but if they begin to draw away from the stove it is evident that the temperature is too low.

THEATRE NEWS

Cheating Cheaters

He cheated—she cheated—they all cheated in "Cheating Cheaters." None are so trusting as a crook. It takes a thief to catch a thief. They were playing for high stakes and it was a thrilling game—but the game of love they played was the most thrilling of all. Don't cheat yourself of an evenings entertainment—see "Cheating Cheaters" on Saturday night at the Variety Theatre.,
SATURDAY NIGHT, MARCH 24th, at 8:30 p.m.

Kent Stock Company will be here on Monday, Mar. 26th, a good show. Dance with a good five piece orchestra will follow.

The feature "Is Zat So" will show here on Saturday, March 31st

DON'T WAIT UNTIL SPRING

and MEET the Night Fliers'

C. HOBSON, Proprietor

LOCAL and PERSONAL

Among visitors to Edmonton from Tofield on Friday last, were, Mrs. John, Miss Audrey John, Mrs. McClurg, Mrs. J. W. Chapman, Mrs. Emory and Miss Mattie Bowick.

Miss Lovett Rose visited the city last week.

Mr. and Mrs. Bilman returned on Friday, after spending the winter in Victoria.

W. C. Swift and W. J. Chapman made a business trip to Winnipeg this week.

Mr. Lowel Gray is spending his holidays in Vancouver.

Stan Johnson, who has been teller at the Bank of Montreal for a few months has been transferred.

Miss Ardis Wood of Innisfail visited at the parental home at Tofield, and left for Viking on Tuesday.

C. Hobson motored to the city on Saturday.

Jack Blake, the genial clerk at the Reliance store, is again an inmate of an Edmonton hospital. Jack was taken up this week suffering from appendicitis. It will be remembered that Jack spent some time in hospital last year, as the result of a broken leg, received in an automobile accident.

Mrs. T. Herndon visited the city over the week end.

Edward Brice, who has been regularly visiting Tofield for a number of years, paid his regular fortnightly visit on Tuesday of this week.

The senior C.G.I.T. girls held a social on Tuesday night at which they invited their boy friends.

The Women's Auxiliary of Holy Trinity church, will hold their regular monthly meeting at the home of Mrs. Hobson on Wednesday, April 4th.

Born.—To Mr. and Mrs. Hans Geubault, on March 22nd, a son.

Mr. and Mrs. Spencer motored to the city on Sunday.

Born.—To Mr. and Mrs. Otto Johnson, on March 23rd, twin girls.

A number of friends and neighbors joined Mr. and Mrs. Wm. Thompson and family in listening to the "Night Fliers" on Wednesday evening of last week.

Services will be held in Holy Trinity Church on Easter Day, April 8th, and all communicants are reminded of the Easter communion, and to endeavor to be at one or both services. 11:00 a.m. and 7:30p.m. Special music will be rendered at the evening service. Look for notice in next week's paper. Members from Lindbrook and Logan are specially invited. Rev. A. A. Adams, Priest in charge.

NOTICE

The editor received, in ample time for publication in this issue, the annual financial statement of the Cornhill Municipal District.

Out of respect to the memory of a faithful and untiring secretary, the publication of the report is postponed for one week.

TOFIELD CURLERS WIND UP SEASON WITH DINNER AFFAIR

At a well attended meeting in the curling room of the Curling club on Friday, March 23rd, the following officers were elected for the season 1928—29.

Hon. President, Mr. Claude Gallenger; President, Mr. A. B. Chesterman; 1st vice president, Dr. Law; 2nd vice-president, H. T. Ward; secretary-treasurer, J. W. Chapman. Executive: J. G. Jobb, Chas. Hobson, John Chapman, Chris Rasmussen and Geo. Agnew

The financial report, by the secretary was a very satisfactory one and in the club's first season in the new rink, it managed to brush about even.

Following the meeting an oyster supper was served with Chas. Hobson as chef and Gordon Jobb, A. B. Evanson and Dr. Law serving. Incidentally Dr. Law's aids paid for this, but they claimed the best counters were on the president's side.

This was followed by a social hour and some of the boys carried the odd games while sitting at the table. Bert Calvert gave one of his specials and Jas. Carver led the singing. H. T. Ward gave some of his impressions on the McLaughlin trip to the Edmonton hospital. This was well received. The meeting broke up about eleven p.m., making a fitting close to the curling season of 1927—8.

LOWER SOSS CREEK

Leonard P. Woodhams, eyesight specialist will visit Tofield on April 2nd. He will, as usual, be at the Royal Alexandra Hotel. Please call early.

The spring morning fever has struck our locality pretty hard.

Mr. J. Steele has removed from the Dunberger farm to his own farm at Rose Creek.

Mrs. Hobson is moving on to the Dunberger farm.

Mr. J. Nimetz is moving to the farm recently occupied by D. Simmons.

Mr. Simmons is removing farm the neighborhood.

Mr. J. Logan has removed to the Camrose district.

Mr. W. B. McFall is preparing to move to his farm north-east of Edmonton.

It is reported that C. Schacker has bought the J. Logan quarter. Also that Mr. Gallenger has bought and sold the McFall farm.

Mr. Kobrehn has taken a trip to the Peace River country with a view to taking up land.

Mr. Jens Arkley and family are moving to Tofield to work for Mr. Piper this summer.

Mr. Geo. Wood was giving a demonstration last week with the Carver fiber wheat cleaner. It sure does the work.

The first mare to be reported working on the land this spring, is Mr. S. Bowers, who was ploughing last week.

Joe Murray has returned from the tractor school at Edmonton.

Elmer Goorlein attended the big farm sale at Clover Bar last week.

Mr. J. Nimetz is reported back from his trip to his old country home soon, bringing a life companion with him.

Mr. Alex Lemke has rented Mr. G. Reimer's half section and is moving in shortly.

Mr. Bid Lamb is making the rounds of the neighborhood with his wood sawing machine.

Mr. Ray Herndon has returned from the lumber camp to his farm.

Mr. W. Venkoubirk was a visitor in the neighborhood last week, renewing old acquaintances.

FOX ACTORS THRILLED WHEN STAR STAGES REAL FIGHT

It is not often that an entire motion picture studio "gets all amazed up" over a little matter of fisticuffs, but the fact remains that George O'Brien played to a packed house when he fought Jack Herrick, Jimmy Dime, and other legitimate representatives of the cauliflower alley in the battle sequences of the James Gleason-Richard Tabor comedy, "Is Zat So?"

Alfred Green directed the scenes with a cast assembled in long ring portcullis. Bystanders, and these packed the big stages at the West Coast Studio, are a unit in declaring there were no love taps. George hit—and talked to be hit. Patrons claim the bouts were far superior to many they had witnessed in Madison Square Garden and at Hollywood Stadium.

Local audiences are promised some real thrills when this picture is shown at the Variety Theatre next week.

UNUSUAL SHOW COMING

On Thursday, April 5th, at the Variety Theatre, the Enterprise Amusement Co. present Buttler & Derby's big magic and comedy company.

These who desire to have an evening's entertainment of a truly distinctive type, should see this show. There are many mysteries. Plenty of comedy. Good music. Clever Ventriloquism and summy mind reading.

There will be a dance after the show.

SAXOPHONE FOR SALE.—Buffet model, Alto., silver finish, with case. First class condition. $65.00 cash. Apply to Harold McMullen, Tofield.

MR. JOHN WEATHERILL PASSES AWAY

The town and district were shocked on Wednesday morning when it became known that Mr. John Weatherill, had died suddenly at his home.

Mr. Weatherill has been for fifteen years, the secretary-treasurer of the Cornhill Municipal District, and in that capacity, came in contact with hundreds of landowners for miles around. He was universally liked and respected, and while of a quiet nature he was always willing to do all in his power for local activities. This is exemplified by his connection with the chautauqua, in having been treasurer secretary of the Tofield chautauqua for several years.

His income is a distant loss to the town and district, the residents of which deeply sympathize with the bereaved ones.

The funeral will be held on Saturday at 2:00 p.m. Service will be held at the Anglican church, Rev. A. A. Adams officiating. Interment will take place in Tofield cemetery.

KINGMAN

Mr. Ed Thompson is visiting in Edmonton with Mr. and Mrs. S. T. Severson for a few days.

John Erickson motored to Camrose on Saturday to have some dental work done.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The Menace Of Wheat Rust

During the last twenty years a certain parasitic fungus, known to the prophets from Moses to Burbank, has stolen half a billion dollars' worth of wheat from the farmers of Western Canada."

With these introductory words, W. A. Irwin writes in a recent issue of MacLean's Magazine of the tireless efforts being put forth in the Dominion Rust Laboratory at Winnipeg, and by the research departments of the three universities of the Prairie Provinces, to develop a rust resistant type of wheat. Mr. Irwin proceeds to say:

"Twenty years ago Manitoba's hard bread wheat was at once the standard and the envy of the world. Last year, more than half of Manitoba's wheat crop was useless for bread-making. Why? The answer is 'rust.'

Last year, Alberta produced four-fifths as much wheat on six and a quarter million acres as Saskatchewan produced on thirteen million acres. Why? The answer is rust.

[illegible]

Newspaper Men To Gather At Edmonton

Canadian Weekly Newspaper Association To Be Held In Northern City In July

At the annual meeting of the board of directors, Canadian Weekly Newspapers Association, just concluded, the city of Edmonton was selected for the annual convention of the association to be held in July, with side trips to Banff and Jasper. The position of manager of the association with head office at Toronto, Ontario, is as yet vacant, but hopes are held that a suitable man will be secured shortly. The list of candidates submitted was not satisfactory. A delegation of eastern and western members is anxious to secure the consent of S. J. Dornan, manager of the Saskatchewan division and publisher of The Alameda Despatch, to accept this position. Mr. Dornan has so far refused to leave the west.

AVOID THE PAINS OF RHEUMATISM

This Trouble Comes Through Weak, Watery Blood

Many people suffer rheumatic pains that could be avoided by building up the blood. Rheumatism comes with thin, watery blood, and can only be driven out of the system by enriching and purifying the blood. To make rich, red blood no medicine equals Dr. Williams' Pink Pills. These pills actually make new blood, driving out all poisonous secretions, and creating a condition of robust health. [illegible]

... with me, and they kept me in the best of condition. My experience should give encouragement to other rheumatic sufferers."

You can get these pills through any dealer in medicine, or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Population Of Saskatchewan

Rural Population More Than Double the Urban

The population of Saskatchewan, as at June 1, 1926, was 820,738, an increase in the five-year period from the quinquennial census of 1921, of 63,228, according to the Dominion Bureau of Statistics at Ottawa. In this total males exceeded females by 72,184. The rural population was more than double the urban, at 578,206 compared with 242,532. In the latter seven cities, 80 towns and 260 villages are included. Regina's population is set at 37,329; Saskatoon's at 31,234 and Moose Jaw's at 19,039.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Method Most Successful

The operation of the National Parks of Canada as game sanctuaries has demonstrated that the sanctuary idea is the most successful method of bringing back native animals once thought in danger of extinction.

SCOTT'S EMULSION

Ancient Wood Carver Passes

Credited With Being the Originator Of Famous Cigar Store Indian

Louis Jobin, the old Quebec artist, is dead at the age of 88. He was a figure known to thousands of tourists who visited him in his little studio near the shrine of St. Anne de Beaupre and bought samples of his work. Jobin's craft was an ancient one that went back to the Indians. He was credited with being the originator of the famous cigar store Indian.

Born at St. Raymond, Portneuf county, Quebec, he was known as one of the world's greatest carvers. Perhaps his most distinctive work, and certainly his best known one, is his huge statue of the Blessed Virgin which towers above Cape Trinity at the entrance to the Saguenay River and is known as Our Lady of the Saguenay. It stands 25 feet high.

Canadians May Sail For Antarctic

Reported That Two Canadian Citizens May Join Commander Byrd's Expedition

When Commander Richard E. Byrd sets sail for the Antarctic next fall, with his expedition culminating in an epoch-making flight across the South Pole, there is a possibility that he will be accompanied by two Canadians.

There is a possibility of Dr. L. D. Livingstone, F.R.G.S., of Ottawa, who is connected with the Northwest Territories branch of the interior department, and Inspector A. H. Joy, of the Royal Canadian Mounted Police, going with Commander Byrd, though definite arrangements have not been completed.

Both Dr. Livingstone and Inspector Joy have had vast experience in the Arctic regions.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

God and the C.N.R.

Repentant Sinner Reimburses Railroad For Stolen Rides

Just what heaven has to do with railroads has never been properly defined. The attempt to link the two was made recently, however, and by none other than a one-time hobo who repented and whose trips in the "side-door Pullman" caused him much heart-searching. He did it, in a manner of speaking, by putting God at the head of the Canadian National Railways. When Sir Henry Thornton heard it, he issued no denial, but merely remarked: "Of course. That accounts for the quality of our service to the people of Canada."

Joseph Madill, Canadian National district passenger agent at Edmonton, may have realized this but he got the shock of his life, nevertheless, when he received this letter [illegible]

"[illegible] years ago I was hired at the Edmonton office to go to Drumheller to work on a B. & B. gang. I road to Drumheller and failed to get out to work. I also road once from Big Valley to Munson on a freight train.

"I have become a Christian and [illegible] I hope you will forgive me for such an act and receive this money in the same manner God has forgiven me, and I owe it to God and the Canadian National Railway.

"I enclose please find $7.50, seven dollars and fifty cents, which I hope will cover the bill, but if not, let me know and I will send the rest."

An earthquake wave has been known to travel across the Pacific Ocean at the rate of six miles a minute.

Bird Migration Is Remarkable

Difficult to Understand What Gives Them Impulse to Start

United States Biological Survey has proofs that two black-headed gulls have made the trip from Germany across the ocean, while two kittiwakes, let loose in England, were found in Newfoundland. Also a young Arctic tern, [illegible] in Labrador, reached France, but was dead when picked up. Then there are birds that spend the summer in Canada, but in the winter they are known to be in Argentina and Chile.

The thing most difficult to understand is how birds know enough to cross the ocean. It may seem like the question of a child, but it is puzzling enough for the adult mind to think over—how do birds know they will come to land after flying the thousands of miles over the ocean? What is it that gives them the impulse to start in the first place, and how are they able to reckon so well that they actually do reach the shore on the other side?

They have no navigating instruments, they make no study of weather charts; they can take along no chicken sandwiches and hot coffee, and certainly they can carry no life rafts; likewise they are without a radio outfit. Yet they make the trip. It's remarkable, even when allowance is made for the fact that young birds may have older companions on their first trip.

Recipes For This Week

(By Betty Barclay)

MINT COCKTAIL

2 oranges.
6 slices pineapple.
12 mint cherries.

Peel oranges and remove membrane from pulp; cut pulp into dice. Cut pineapple into ½-inch pieces. Put into cocktail glasses, add juice from pineapple and sprinkle with finely-minced cherries.

BAKED RAREBIT

½ to ¾ lb. mild soft cheese.
2½ cups bread crumbs.
1 2-3 teaspoons salt.
1-3 teaspoon paprika.
2 eggs.
1½ cups milk.

Cut cheese in small pieces. In buttered baking dish sprinkle layer of bread crumbs, cover with one-third the cheese and seasoning. Repeat twice. Beat eggs slightly, add to milk, and pour over mixture. Set in a pan of hot water. Bake in moderate oven 35 minutes. Serve at once.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The world's automobile speed record established by an Englishman has been broken by a fellow-countyman. The "patient plodders," it seems can hurry when the need arises.

A New Slip

Did you know that a fifteen-cent envelope of Diamond Dyes will duplicate any delicate tint that may be the vogue in dainty underwear? Keep your oldest lingerie, stockings too, in the shade of the hour. It's easy if you only use a true dye. Don't streak your nice things with synthetic tints.

Dye or tint anything, dresses, or drapes. You can work wonders with a few, inexpensive Diamond Dyes (true dyes). New colors right over the old. Any kind of material.

FREE: Call at your druggist's and get a free Diamond Dye Cyclopedia. Valuable suggestions, simple directions. Piece-goods color samples. Or, big illustrated book Color Craft free from DIAMOND DYES, Dept. N3, Windsor, Ontario.

Diamond Dyes
Just Dip to TINT, or Boil to DYE

May Lose Prestige

Canadian Grain Arriving In Liverpool Said To Be Low Grade

John Millar (Liberal-Progressive, Qu'Appelle), asked the Government if any complaints had been received from Britain regarding the condition in which Canadian grain was arriving in that country.

Hon. James Malcolm, minister of trade and commerce, said that a letter had bee received from the Liverpool Corn Exchange saying that the grade had been noticeably lower in the past two years. Whether or not this was from bad seasons or from lowered inspection standards they could not tell, but that unless the standards were maintained the prestige of Canadian grain in that market would be damaged.

A Corrector Of Pulmonary Troubles. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but [illegible] experience and [illegible] all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Fire In Tower Of London

There was a lively few minutes in the Tower of London recently due to fire breaking out in one of the towers of that historic structure.

The flames were quickly extinguished.

A man likes to refer to himself as an idiot at times, but it makes him mad if anybody else agrees with him.

FOR NEURALGIA

BAYER

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child—of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, *there's nothing quite like Aspirin*. Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

CONFERENCE ON RESOURCES WILL BE HELD SOON

Ottawa.—A conference between representatives of the Dominion and provincial governments concerned will be summoned to meet at the close of the present parliamentary session to attempt to reach an agreement with regard to the return of the natural resources to the western provinces. This is disclosed in correspondence on the matter which was tabled in the House of Commons.

The correspondence was [illegible] Premier King, Premier J. E. Brownlee, of Alberta, and Premier John Bracken, of Manitoba. In it Premier Bracken refers to the Federal Government's "prompt and generous manner of instituting the Duncan report concerning the Maritime Provinces," and suggests regarding the western natural resources that "the time is singularly opportune for the settlement of this question by arbitration."

Replying, Premier King said, "in arranging for arbitration we can see some objection to sending the question to the privy council, and, it would therefore be well that we should reach an agreement both with respect to the terms of reference for the arbitration and the tribunal to which the matter is referred." Later he suggested that a conference should be held immediately following the close of the present parliamentary session.

The correspondence with Premier Brownlee is confined to an exchange of telegrams. Premier Brownlee declares that his government is prepared "actively to renew negotiations leading to a complete settlement of the questions as soon as the present session is over." In the meantime, the Alberta Government was considering reference to the privy council, but was not in position to commit itself to the position of appellant.

Union With Newfoundland

Any Proposal Would Be Welcomed By People Of Canada

Ottawa. Any representations for union between Canada and Newfoundland would receive the consideration of the Canadian Senate. This was elicited recently from the debate which was precipitated by the resolution of Senator C. E. Tanner, which declared that "in the opinion of this House, Canada should favorably consider any proposal that may be made by Newfoundland for union with the Dominion of Canada."

Speaking to his resolution, Senator Tanner declared that the Senate could not make anything in the form of a definite proposal. That must necessarily come from the authority of the country, either the government of Canada or that of Newfoundland. But the Senate was justified in putting upon record its views in regard to public opinion in Canada. Any proposal from Newfoundland for union with Canada would be welcomed and the people of this country would be ready to sit down and talk the matter over in a friendly spirit. The Senator pointed to the community of interest between Newfoundland and the maritime provinces and to the increasing trade between the two countries. He praised Newfoundland's war effort and its loyalty to a common crown.

Senator Tanner felt that it was desirable that the units of the empire should be consolidated "further than they are if the people of Newfoundland should desire." The senator said he would like to entertain a vision when not only Newfoundland but also the British West Indies, all units of the empire on this side of the Atlantic would be consolidated into one great dominion.

Unity Of Empire

Canberra, Australia. Questioned in the House of Representatives regarding the recent statement of Premier J. B. M. Hertzog, of the Union of South Africa, to the event Great Britain is involved in a war, Premier Stanley E. Bruce declared that when the King was at war all parts of the Empire were involved, although each parliament could decide the extent of any active participation.

Unemployment Less In Britain

London.—It was announced recently that, on March 12, there were 1,071,700 unemployed persons registered with the government, 22,000 below the number registered a week previous and 47,000 below the number registered March 12, 1927.

Advocates System Of Organized Marketing

Conditions Of Poultry Business Unsatisfactory Says Cowichan Man

Victoria, B.C.—Hen No. 6 which broke all egg production records a year ago, advertised British Columbia poultry to the world and brought thousands of dollars in orders to the University of British Columbia pens, but she has merely helped to complicate the market situation.

That is [illegible] of Captain A. E. Mathews, of the Cowichan Creamery Association, one of the largest co-operative dairy and poultry concerns in Western Canada.

"The condition of the poultry business is unsatisfactory," reported Captain Matthews. "Not only has the number of birds increased very rapidly, but egg production per bird is also increasing. Hen No. 6 may be the eighth wonder of the world, but unless the boosting of excessive production is supplemented by some intelligent system of organized marketing, the 300-egg hen may be a curse to the industry rather than a blessing."

It was reported at the meeting that companies shipping eggs to the eastern markets had lost approximately $40,000 during the last few months owing to the market conditions.

Test Pulverized Coal

Will Attempt To Demonstrate Commercial Possibilities Of Fuel

Ottawa.—Development of the commercial possibilities of pulverized coal will be proceeded with immediately by the government. To test and demonstrate possibilities, the government will (a) adapt one of its steamers on the Pacific coast to utilize pulverized coal; (b) use pulverized coal in one of the government buildings in British Columbia.

In making this announcement to the House of Commons, Hon. Charles Stewart, minister of the interior, said he thought there was a bright future for pulverized fuel, especially for use on freighters. Pulverized fuel was no longer in an experimental stage.

The matter was brought up on a resolution by A. W. Neill (Independent, Comox-Alberni).

Heads Research Council

Sir Joseph Flavelle Will Be Chairman Of Research Council In Ontario

Toronto. Sir Joseph Flavelle, prominent Toronto capitalist and philanthropist, will be chairman of the industrial research council for the creation of which legislation is now before the legislature, Premier Ferguson announced in the House.

A research council composed of University men and men interested in the various industries, including agriculture, is to be established. Persons interested in the work may contribute money to the board, and for each dollar contributed by private individuals the Government will contribute another dollar. The plan is to raise a sum of $2,000,000 in five years, the Government paying $200,000 a year, provided private contributions are of equal proportion.

Bicycle Teams Sold Race

Managers and Trainers Barred From Future Events In Germany

Berlin. — Berlin's 26-day bicycle race, which ended March 15, has had a sensational sequel in the revelation that the three leading teams were found guilty by the League of German Bicycle Riders of selling out to a betting ring less than six hours before the race ended.

Several managers and trainers of the teams implicated in the scandal have been definitely barred from future participation in German events.

Plague In Prison Camp

Sydney, N.S.W. — Following the murder of two white officials in the Solomon Islands last October, 170 tribesmen were rounded up and corralled in a hastily constructed camp. Word has now been received here that dysentery has broken out in the camp. Out of 40 natives affected seven have died. The magistrate to try the prisoners is now on the way from Fiji.

Will Discuss Thanksgiving Date

Ottawa. Armistice and Thanksgiving Day should be celebrated on the same day, November 11. This is the practice advocated by K. J. Ladner, Conservative, Vancouver South, in a resolution placed on the order paper of the House. The suggestion will be discussed shortly in Parliament.

Date trees in the world total 90,000,000, according to a recent estimate.

Start For North Pole

Advance Guard For Wilkins's Expedition Begins Long Trip

Rome. The advance guard and other equipment for the aerial expedition over the North Pole is headed for Arctic regions.

The ice breaker, City of Milan, which will be used as a mobile base by General Umberto Nobile for his dirigible flights over the Polar regions, sailed from Spezia for Kings Bay, Spitzbergen. The ship is outfitted with the latest scientific instruments and carries a wireless receiving and transmitting set.

The ship is expected to reach its Northern goal before the end of April and by that time the Polar summer daylight will have begun. Norwegian workmen are to refit the hangar at Spitzbergen, used by the dirigible Norge on its trans-Polar flight in 1926, for the Italia, General Nobile's present craft.

The Italia successfully completed a test flight of 22 hours with a full load of supplies and a complement of 21 men under General Nobile. It is now at the Baggio airport, near Milan, and is expected to start Northward about the middle of April.

Besides hoping to discover the fabled frozen continent of the North, Wilkins intends to find suitable locations for weather observing stations.

WILL CENTRALIZE RESEARCH WORK AT THE CAPITAL

Ottawa.—Centralized industrial research, made possible by the decision of the Dominion Government to establish national research laboratories at Ottawa, will be of distinct benefit to Canadian universities, as well as to Canadian industries.

Co-operating with the National Research Council, the universities have for the past ten years voluntarily given over their laboratories and their staffs to investigations outside the strict limits of academic research. The step finally decided upon at Ottawa, on the insistent representation of the National Research Council, means that these facilities will once more be liberated for the service of pure science.

The council will continue the bursaries and scholarships with which, since its creation it has stimulated the training of research specialists, to supplant foreign-trained experts in Canadian industries. The filling of scientists for research work is of the utmost importance to Canada, whose industries are still in an infant stage of development, it is pointed out.

The National Research Council has awarded 44 scholarships, as the result of which 155 Canadians complete their training in their own country, almost all of them finding employment in Canada. Before the inauguration of these awards it was necessary for the Canadian student to go abroad to complete his training, with the result that he usually found employment abroad and was lost to his own country. American institutions of learning give 2,000 such scholarships annually, the majority of which are open to Canadian students.

One of the great needs of today is an increased number of such scholarships, so that Canadian universities may maintain graduate schools for training in science and research of a sufficiently high standard to eliminate the necessity of the most brilliant graduate going abroad to complete his education and possibly taking his valuable knowledge permanently out of the Dominion. Such graduate schools will provide the technicians required by the universities and the government service, as well as the national industries.

INJURED BY FALL

Major-Gen. A. D. McRae, M.P., who suffered a fracture of the skull, caused by slipping on the ice on Parliament Hill, Ottawa.

Wants To Explore Northwest By Plane

Toronto Man Makes Application To Department Of Interior

Ottawa.—An ultra-modern mining application made to the department of the interior by Col. Cyril D. H. Alpine, of Toronto, said to be acting for the Lindsley interests, asks for the right to explore by hydroplane the northwest territories north of latitude 60, and at the same time to be given the exclusive right for a limited time to stake mining claims in that area.

The applicants pointed out that it would bring into review the policy of the government in co-operating with private capital in the exploration of extremely remote territories which for the present is beyond the reach of the ordinary prospector. The syndicate would agree to supply the department with air view maps and other information gathered as the exploration was carried on.

No decision has yet been given by the department but it is understood that a measure of the request may be granted. Cost of the exploration would be about $200,000.

Flies Over London

Afghan Monarch Views World's Metropolis From the Air

London. The first royal aeroplane tour over London on [illegible] was successfully carried out.

King Amanullah, of Afghanistan, flew in a large Imperial Airways liner over the city starting from Croydon and returning there after a swing through the air taking in the Crystal Palace, the Tower Bridge, St. Paul's, Westminster Abbey, Buckingham Palace, Chelsea and the southwest London District.

The Afghan monarch appeared intensely interested in the excursion and moved about in the plane viewing the various scenes through binoculars.

Smuggling Conspiracy

London. — Reports that Scotland Yard has unearthed a mysterious arms smuggling conspiracy seeking to provide arms for Irish republicans are published in the Evening Standard. Scotland Yard believes the weapons were smuggled into London for the purpose of arming companies of an Irish republican army, says the newspaper, adding that detectives have estimated that there are 100 Irish smugglers in London engaged in an illicit trade in revolvers and automatic pistols.

Manitoba Flight Abandoned

Winnipeg.—Word was received here indicating that the proposed test flight to Northern Manitoba of Commander Richard E. Byrd's South Pole 'plane has been definitely abandoned.

British Settlers for Canada

A good example of the type of British farm settlers now arriving in Canada can be seen from the above photo taken on the concourse of the Windsor Street Station, at Montreal. This group, which forms part of the 400 settlers who arrived recently on the S.S. Montnairn, are the first contingent this season of British farm laborers brought out under the auspices of the Canadian Pacific Railway Colonization Department.

They possess a thorough farming training, therefore being well equipped for the duties they are to take up in Ontario, where farms have already been arranged for them by the government.

British Medical Men Coming To Canada

Arrangements Being Made For Convention At Winnipeg In 1930

Toronto, Ont. In connection with the proposed meeting of the British Medical Association in Winnipeg, Man., in 1930, a program is already being arranged whereby the visiting medical men will be enabled to see as much of the Dominion as possible before they return to Great Britain. Dr. T. C. Routley, Toronto, secretary of the Canadian Medical Association, is sailing at the end of this month for the Old Country to arrange details of the 1930 meeting of the British Medical Association in Winnipeg, which is expected to be the greatest gathering of doctors ever held in the Empire.

This will be the third meeting of the British Medical Association outside of the British Isles, both of the previous meetings being held in Canada, in Montreal in 1897 and in Toronto in 1906.

After a week in Winnipeg, the British doctors will be taken through the Rockies to the Pacific Coast, and back again by another line. Thus they will see the prairies, the mountains and the wealth of British Columbia. They then will be taken through the Maritime Provinces.

Would Not Interfere With Ocean Flying

British Air Ministry Thinks Legislation Would Be Useless

London. A stand against Government supervision of trans-Atlantic flying was taken in the House of Commons by the air minister, Sir Samuel Hoare. The minister told the Commons that in his opinion it would be unwise for a department of the government to obtain legislative powers of that kind.

He added that while he agreed in the advisability of not attempting such flights until better qualified machines are available, he thought formidable difficulties would be found to stand in the way of any attempt to control by the government.

His statements came in reply to suggestions that the government impose some sort of control on people desiring to fly across the Atlantic to be sure that they possessed adequate knowledge of the air and navigation and properly equipped machines.

Given Free Hand

Alberta Cabinet Can Sell Government-Owned Railways

Edmonton. Premier Brownlee and the cabinet were given a free hand in future negotiations to sell the provincial government-owned railways, at a session of the Alberta legislature. Premier Brownlee will probably leave for the East at an early date.

The premier presented figures showing a vast improvement attained in revenue by the A. and G.W. and the E.D. and B.C. lines for the first two months of 1928, over the corresponding period of 1927.

It is expected a summer session will be called if the railway situation is to be considered.

NATIONS FROWN ON DISARMAMENT PLAN OF SOVIETS

Geneva, Switzerland.—Twenty-two of the 23 countries represented on the preparatory committee for a disarmament conference are lined up against the Soviet plan for immediate complete disarmament.

Hugh S. Gibson, the United States, Cosme de la Torriente y Peraza ... Whitmarsh, Cuba, Baron Rollin Jacquemyns, Belgium, Jonkheer Rutgers, Holland, E. Hennings, Sweden, M. Sokal, Poland, and M. Markovitch, Jugo-Slavia, added their criticisms to those of Lord Cushendun, making the Russian defeat overwhelming.

London. The Evening News, commenting on the speech of Lord Cushendun, British delegate at Geneva, expressing profound doubt of the Russian scheme of complete disarmament being possible under present conditions, says it is a real treat to see whistling through the League of Nations council chamber for once not a bouquet but a commendably heavy and well-aimed brickbat. "Lord Cushendun deserves the thanks of the civilized world for his judicious and skillful use of his strong right arm," The News says.

The Evening Star editorially says if the League of Nations could be convinced of Russia's good faith the Soviet peace proposals might be assured a friendly hearing.

DIFFICULTY OF MAKING TARIFF TO PLEASE ALL

Ottawa. Budget changes to the tariff on woollens brought sharp discussion in the House. Conservatives attacked the changes as having been inspired by English woollen interests. The tariff, Hon. R. B. Bennett, Opposition leader, charged, seemed to have been moulded by Huddersfield and Bradford rather than by Canadians for Canadians. Hon. Guthrie further expressed resentment at what he termed the "interference of Yorkshire [illegible]"

Hon. James A. Robb, minister of finance, remarked that there were instances where Canadian manufacturers had made representations to the British Government through the Canadian Chamber of Commerce in London. Representations of a similar nature had been made to the governments of South Africa, New Zealand and Australia, in an effort to obtain privileges in those markets.

At this very moment, said Mr. Robb, representatives of Canadian agricultural interests were at Washington before the United States tariff board in connection with the importation into the United States of milk and cream. The minister said that the discussion proved the difficulty of making a tariff which would suit everybody in Canada. The debate tonight had shown that the woollen industry was not over prosperous, but the T.A.B. in considering how best to help the woollen manufacturers had before them the alternative of raising the duty on the finished fabric or giving greater concessions on the raw material. Mr. Robb believed that the course taken, the latter one would commend itself to the people of Canada.

Conscription Of Wealth

Manitoba Command Of Canadian Legion Endorses Resolution

Winnipeg. — Endorsation of the resolution that property as well as men be conscripted in time of war was given by the third annual convention of the Manitoba Command of the Canadian Legion, British Empire Service League, here. A recommendation that this resolution be submitted to the next convention of the British Service League, to be held in Australia in 1930, also passed the convention.

Reaffirmation was given to a resolution on immigration, which recommended that the Dominion Government put into force the principle of the quota system from countries other than those of the British Empire and that at least 70 per cent. of all immigration be of British stock.

Lieut.-Col. Ralph H. Webb, Winnipeg, was re-elected president of the Manitoba command, and E. E. Spencer, of Morden, Man., was elected Dominion representative.

Power Contract Closed

Manitoba Company Will Supply Government With 20,000 Horsepower Yearly

Winnipeg. The Manitoba Power Company has closed a contract with the provincial government to supply 20,000 horsepower annually from its site at Seven Sisters Falls. The contract will operate over a period of 24 years at the end of which provision is made whereby the government can take over the private plant as a publicly owned utility.

According to Hon. W. J. Major, Attorney-General, the power will be sold to the government at a rate of $13.50 per horse power. This figure he claimed, was the most favorable received anywhere on the continent.

Alberta Legislature Prorogued

Edmonton. After a session which lasted seven weeks, the Alberta Legislature was prorogued by Lieut.-Gov. Egbert. Before prorogation the House assented to 81 bills. The final sitting was devoted to a debate on the railway situation which Premier Brownlee had previously announced may be made the object of a special midsummer session and the clearing order paper of three or four bills which were given final reading.

Capture Deer In Vancouver

Vancouver, B.C. While walking along Broughton Street in the west end of the city, two men captured a full-grown deer when it dashed toward them. A number of dogs from nearby residences were in eager pursuit of the animal. Where the deer came from is a mystery. It was uninjured and had apparently travelled considerable distance.

THE TOFIELD MERCURY

Published Every Wednesday at Tofield, Alberta
W. Werton, Publisher
WEDNESDAY, MARCH 28th, 1928

LAKE SHORE

Mrs. T. E. Seale returned from Edmonton on Thursday of last week where she had been in the hospital for some time.

Miss Margaret Moen has been suffering a temporary loss of voice but is improving at present.

Mr. and Mrs. McLean and infant son returned home on Wednesday of last week from Mrs. Schultz' nursing home in Tofield.

Mrs. R. Phillips was indisposed last week with a slight attack of pleurisy but is recovering at present.

Mrs. W. Lander and baby spent Saturday night at the Jack Johnson home enroute from Duhamel to her home at Ross Creek.

The many friends of Mrs. Wm. Abernethy will be pleased to know she is much improved in health after her long illness.

Mr. Sam Bethel returned from Lamont hospital on Monday.

Mr. Melvin Bethel was a Sunday visitor at the Anderson home.

Mr. and Mrs. A. T. Anderson and family left on Tuesday for Delia, Alta., where they will make their future home.

Miss Alice Berg has been on the sick list for the last few days. She has been ill with a kind of flu. We are glad to report she is now getting better.

E. A. Moen was a delegate to the stock pool meeting held in Edmonton last week.

Gunvald Flaaten who has been attending the technical school in Calgary for the winter, arrived home last Saturday.

Mrs. E. Pearson and daughter, have been in Edmonton for the last few days consulting the doctor.

E. A. Moen is shipping a carload of hogs and cattle from Ryley to the pool to-day (Tuesday.)

Mr. and Mrs. Sand and Ellen from Ryley and Mr. H. Lund from Viking were visitors at the Berg's home last Sunday.

AMISK CREEK

All the members and many visitors attended the ladies aid held at Mrs. I. C. Olson's on Wednesday of last week. About fifty persons were present. Next meeting will be at Mrs. Bruha's on April 4th. Everybody welcome.

Arthur Egenheim arrived from Norway last week and joined his father who came over last year. They are both working for I. C. Olson.

Thor Berg who came over from Norway not long ago is assisting at P. O. Flaaten's with the chores.

BARDO

Born.—To Mr. and Mrs. Iver Moen on March 21st, a daughter.

Twin girls arrived at the home of Mr. and Mrs. Johanson on March 22.

On Friday evening a large company of friends of Miss Hilda Nomeeland of Tofield, were invited to a party in the Bennie Anderson home at Bardo given in her honor. Lunch was served and a very pleasant evening was spent. In behalf of her Bardo friends, Mrs. Lerbekmo presented Miss Nomeland with a fountain pen and a small purse of money as a token of their appreciation of her universal kindness and courtesy, while clerking in "The Farmers' Supply."

Mr. Jensen is building a new house on his farm.

Mr. Johanson's new log house will soon be ready for occupancy. The family will move in as soon as possible.

Mr. Jacobson sawed wood for H. O. Carey on Friday; for C. J. Rude on Saturday.

On Saturday Mr. and Mrs. Pete Butts accompanied by Dr. Law took little Helen Butts five years old to Camrose, where she underwent an operation for appendicitis. At last reports she was doing as well as can be expected.

Mr. and Mrs. Lewis Johnson and their daughter, Mrs. Bergstad and family, from Grande Prairie, are visiting friends and relatives here. On Sunday evening, accompanied by Mrs. Pete Haugen, Mr. and Mrs. H. Haugen and Mr. Selmer Johnson, they were guests in the J. Jacobson home.

Ralph and George Kauffman reached home from Iowa last Wednesday. They drove through in their car.

Because of the snow storm, the Young Peoples' meeting at Lutheran church was postponed to next Sunday evening.

There was no school at Grande Prairie on Friday. The teacher, Miss Betsy Ness spent the week end in Edmonton.

The little daughter of Joe Burkholder is quite sick. It is feared it may be another case of appendicitis although the little one is only one year old.

The Harvey Brenneman family reached Tofield on Monday, on their way home from the coast, where they spent the winter months.

SURPRISE PARTY AT KETCHAMOOT

A pleasant surprise party was held at the Appleby home on Friday night in honor of Mr. and Mrs. Miller who is shortly leaving our district. A large crowd was present and enjoyed the evening very much. A treat of music and singing soon passed the time away, followed by a delicious lunch by the ladies. We regret the departure of Mr. and Mrs. Miller, but wish them every success in their new home.

An undesirable caller was at the C. A. Ingram home on Friday, after giving him a slight handout, he was sent on his way, but was captured near Camrose. A reward was out for his capture, but this was not known at the time.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Tofield—Assessment Roll 1928

NOTICE is hereby given that the Assessment Roll of the Town of Tofield for the year 1928 has been prepared and is now open for inspection at the office of the Secretary-Treasurer of the town from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon, until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer of the town.

Dated at Tofield, Alberta, this 20th day of March 1928.

FRIENDLY cushions, fashioned with the comfort of an easy chair, invite relaxation as your McLaughlin-Buick sweeps smoothly along.

Comfort that invites Relaxation

In the designing of McLaughlin-Buick for 1928, riding ease and comfort have been given unusual consideration. Lovejoy Shock absorbers on all four wheels absorb and cushion every road [illegible] and rebound. Rubber Engine Mountings prevent vibration from reaching the car-body. Extra deep, resilient seat cushions, beautifully upholstered, are specially shaped and tailored to fit, like an easy chair. The lower body-lines have been attained without any sacrifice of headroom. And in finish and appointments, McLaughlin-Buick establishes a standard of luxury which vies with your drawing-room or club. The G.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

Dr. Seager Wheeler Tells About Development Of A New Rust-Resisting Wheat

In further explanation of his development of a new wheat from the Kota strain, which promises to be rust resistant to a degree not approached by any other wheat, Seager Wheeler, of Rosthern, has given a statement on his experiments. He says he started with the Kota type which is famous for its rust resistant qualities, but is also noted for a weak straw and poor milling qualities. This variety of wheat is also of the bearded type. In 1923 Dr. Wheeler found that among his plots of Kota wheat were two heads of the beardless class, although positive that it would have been impossible for any other class of wheat seed to have become mixed with this plot.

Believing that, by that accident of nature, the natural cross, that he had something new, Dr. Wheeler kept these two heads separate and sowed the seeds in a separate plot. This was in 1924. In making the miniature harvest of his plots, he noticed that the product of this new experiment plot had broken up into several distinct forms of types, each different from one another, but only noticeable to one who had spent years in the wheat study.

Each of these different strains was planted in separate plots in 1925, which again divided, and at the end of the year Dr. Wheeler was able to count 60 different varieties of his original product, derived from his two heads. Many of these seeds had apparently not been affected by the rust of 1925.

The following year, 1926, there was practically no rust, consequently experiments carried on in this year could not demonstrate the ability to fight this enemy of the farmer. However, it was shown that a grain similar to that of Kota, with beardless heads, with straws of a much stronger description and whose milling qualities were much superior to that of the original strain had been developed.

Not content with this, Dr. Wheeler again carried on his series of experiments last year, and it is as a result of these, carried on in one of the worst rust years of the district, that Dr. Wheeler was able to announce definite results, he said.

Sowing about 20 selections of his original strain, he found that the seeds taken from the Kota product were more successful in warding off the damaging attacks of rust. On all sides (for the experimental plots of this untiring scientist reach for acres) were plots of other types of wheat that he was testing. All of these showed the effects of rust, not only in the stalk, but also in the shrunken seeds. This new type or types developed by him since 1923, showed but little damage. Small spots of rust were seen on the leaves but the seeds were fully developed and not damaged in the least, he said.

When questioned in regard to the future of this wheat, Dr. Wheeler said that he intended continuing his experiments, and believed that by careful selection and observation he would soon be able to give to the world a wheat that although not guaranteed against rust, would be so little affected by it that the damage could be [illegible].

Dr. Wheeler pointed out that he was not announcing that he had a wheat that was immune from rust attacks. He mentioned that in the past others had announced that they had a wheat of this type, consequently disappointing those whose livelihood depended on their crops when proved a failure. "What I do say, is that I have a wheat which I confidently expect will prove sufficiently rust repellant to greatly lessen the dangers of loss by rust."

Dr. Wheeler has been growing and experimenting with wheat in Saskatchewan for the past 40 years. In addition to developing such an early ripening wheat as Red Bobs, and carrying on endless experiments in all cereals, Dr. Wheeler has an orchard on his small farm three miles east of Rosthern, in which he grows practically all types of fruit with the exception of those which only survive in tropical countries.

Experiments with Kota wheat to develop a rust resistant type are being carried on by Manley Champlin, head of the University of Saskatchewan, also at Ottawa and in rust research bureaus at Winnipeg and elsewhere. Professor Champlin states that some of the selections being experimented with at the University show fair promise of proving of value to prairie farming.

W. N. U. 1738

Grain Mixtures For Hogs

Several Grain Mixtures For Hogs Of Different Ages

A number of experiments in feeding hogs have been conducted at the Nappan, Nova Scotia, Experimental Station. Based on observations made during these tests, the superintendent recommends several grain mixtures for hogs of different ages. From weaning time to three months of age, sifted or hulless oats 1 part, middlings 1 part, and 5 per cent. of oil meal may be profitably added. For hogs from three to five months old, oats 2 parts, shorts 2 parts, barley 2 parts, bran 1 part and oil meal 3 per cent. For summer feeding hogs of this age when on green feed the grain mixture might be oats 2 parts, shorts 2 parts and barley 2 parts. For the finishing period a good grain mixture is oats 2 parts, barley 2 parts, and shorts 1 part with 5 per cent. of oil meal. In all these rations the grains should be finely ground.

Icelanders Are Now Cultivating Soil

People Just Recently Have Become Interested In Farming

Icelandic agriculture is entering a new phase.

Rational cultivation of the land is now a national slogan, while formerly there was little cultivation of the soil.

The surroundings of Reykjavik afford a striking example. Land reclamation has gone on for five years. Bogs have been changed into green meadows, and all kinds of agricultural experiments have been undertaken, some with great success.

Things that Icelanders themselves had sworn would never be able to grow, thrive wonderfully well.

Winnipeg Newspaper Union Fashion

School Smartness For the Young Girl

The frock illustrated gives you an idea how smart a school frock can be when made from flannel, with just the right touch of contrasting color used for collar, cuffs and belt. There is an inverted pleat at each side of the skirt front, and the back is plain. The narrow belt fastens with a button at each pleat, while the long sleeves are gathered to cuff bands. No. 1397 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires $2\frac{1}{8}$ yards 36-inch material, and $\frac{1}{4}$ yard contrasting. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Mining in the West

Tale Deposits in Alberta Are to be Developed

"Manitoba is rapidly rising in importance as a mining province," R. E. Lemaître, chairman of the mining bureau of the Winnipeg board of trade and director of the industrial development board of Manitoba, remarked in Montreal recently, on his way to the annual meeting of the Canadian Institute of Mining and Metallurgy, which was opened at Quebec. "In fact, the public as a whole has little realization of the strides being made by Manitoba in directions other than agriculture—and especially in mining," continued Mr. Lemaître.

An important present development in the west, mentioned by Mr Lemaître as shortly to materialize, is that in connection with large deposits of talc, both of the blue and white variety, in Alberta, about 18 miles from Banff, the blue was quite rare, he said, and was used chiefly in the making of electrical insulators and gas burners, while the white, which was very pure in the region referred to, was the raw material for face powders.

A Remarkable Cow

Wetaskiwin District the Home Of Record Breaking Shorthorn

Wetaskiwin district has the distinction of being the home of a Shorthorn cow which holds the record for all Canada in the production of milk and butterfat as a three-year-old. She is owned by J. O. Harvey in the northwestern part of the city of Wetaskiwin, and a letter from Ottawa advises that the production of this cow has never been equalled in Canada. Gladys No. 200000 produced 10,304 lbs. of milk and 500 lbs. of butter fat in a test extending over 365 days. She is now undergoing her test as a four-year-old and is averaging about 40 lbs. of milk a day.

Revenue From School Lands

Nearly Two Million Dollars Collected By Federal Government In Saskatchewan Last Year

Revenues from Dominion and school lands in Saskatchewan during the fiscal year 1926-27 amounted to nearly $2,000,000, according to a report of the Federal Department of the Interior. Revenues originating in this province, chiefly through agencies at Prince Albert and Moose Jaw, amounted to $964,231.69 on Dominion lands, Crown timber, forestry, water power and reclamation, mining and national parks. School lands revenue amounted to $938,428.

Had Heavy Debt

The Boss was tired of being constantly importuned by one of the workers for the next week's salary, and finally said:

"Mose, you're the limit. Say, what would you do if you had all the money in the world?"

"Well, suh," replied Mose, studiously, "de fust thing Ah'd do would be to pay all mah debts—as fah as it'd go."

Homesteads Covering 54 Years

According to the Department of the Interior, 472,962 homestead entries were made between May 1872 and March 1927. In the last fiscal year 3,760 homestead entries were granted. Of these 1,519 were made by residents of various provinces of Canada; 874 by persons from the United States and 663 by persons from the British Isles.

Feeding Young Turkeys

Must Not Be Fed At All Until 48 Hours Old

Some good advice on the feeding of poults is given in a Dominion Experimental Farm bulletin on turkeys. According to the bulletin the baby turkeys should not be fed at all until they are at least 48 hours old, and even sixty hours without food is not too long. The first food, given in the morning, should be chick size oyster shell scattered on a small board, and sour skim-milk. Towards the end of the afternoon they should be given some hard boiled eggs chopped fine. Regular feeding should be started the next morning with hard boiled eggs and bread crumbs mixed together and given three times daily. After one week the egg may be gradually discontinued and the feed consist of bread alone. After the second week a little moist shorts are added, discontinuing the crumbs until the shorts alone are used. All these changes should be made gradually. Sour milk, grit and oyster shell should be given daily from the start. Never over feed or offer anything that has been mixed for previous feeding. As the poults grow they will travel over a wider range until very little feeding is necessary. The bulletin, which deals with the care and management of turkeys, may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Growing Flax For Fibre

May Be Harvested By Cutting Instead Of Pulling

The slow progress that has been made in the growing of flax in Canada for fibre has been due to a considerable extent to the old idea that the flax plants have to be harvested by pulling. Experiments in harvesting at the Experimental Farm at Ottawa indicate that flax that is harvested by cutting can be made into a high grade tow. By harvesting the crop in this way one of the most expensive items of culture is largely overcome. The significance of this conclusion is that flax may be grown over a very wide area of Canada and not confined as it has been largely in the past to districts where Indian labor could be secured cheaply to pull the crop.

Ranching In B.C.

Cattle Ranching Said To Be Getting Back To Its Old Stride

The cattle ranching business in British Columbia is getting back into its old stride and the future of the industry is bright in the opinion of C. G. Cowan who, in addition to his own extensive interests in cattle ranches in Cariboo, is agent for the Marquis of Exeter and Lord Egerton of Sutton. Arrangements are being made to carry several thousand additional head of cattle, while 3,000 sheep are to be introduced from Oregon this summer. Altogether Mr. Cowan estimates his companies will put at least $200,000 into purchases of additional stock.

Horse Meat For Belgians

A market is being found for the cayuses of the Okanagan, which are being rounded up in the hundreds by the Government. A Butte, Montana, meat firm is taking 700 of them, to be slaughtered at Butte, it is said, and the hams pickled and sent to Belgium.

Slogan for suppressing a Latin-American revolution: "Shoot the generals and you shoot all."

Office Force on Popular Cruise

As the result of a promise to his employees, for the faithful service given to him covering a period of several years, C. L. Brown, president of the United Trust Company, Abilene, Kansas, sailed recently on the four weeks cruise of the Canadian Pacific liner "Montroyal" bound for a tour of the West Indies, accompanied by seven women employees.

The president made a promise that he would take seven of his most efficient office girls on this cruise, the choice being left to the entire force who balloted as to who should be the fortunate ones. Mr. Brown is travelling with his wife and daughter who are seen on either side of him in the above photo.

Canada Spends Huge Sums In Construction and Maintenance Of Good Roads Coast To Coast

New Park Encloses Forty Townships

Prince Albert Park In Northern Saskatchewan a Land of Varied Beauty

Approximately forty townships are enclosed by the boundaries of Saskatchewan's new National Park. In square miles the area is slightly more than 1,000, which makes the park comparable in size to Glacier National Park in the United States. Prince Albert Park, as it has been called, lies no more than 30 miles north and northwest of the city of Prince Albert, which is on the lines of the Canadian National Railways and will be easily accessible from Saskatoon, Regina and other large centres.

Surrounding, as it does, three large lakes—Waskesiu, Little Trout and Big Trout—taking in many smaller ones and extending for miles along the eastern shore of Montreal Lake, the park is a land of varied beauty. The waters, which teem with fish, are beautiful and clear and are edged, in many spots, with clean white sandy beaches. All the lakes are connected by streams which makes it possible for the vacationist to wander for days by canoe or motor-boat. The forest is a mixture of evergreens, pine, spruce, tamarac, poplar and birch.

In all respects it fulfills the objective of the parks branch of the Dominion Department of the Interior—the permanent preservation of regions of outstanding beauty in their natural condition; conservation of plant and tree life from commercial exploitation and fire hazard and conservation of game. The new park provides and protects a large area of Saskatchewan's best forest and lake country, and the road development which has been planned will make its farthest corners accessible to those seeking health, recreation and data for scientific studies.

Yukon's Healthful Climate

Is Most Delightful From May To October

The climate of the Yukon Territory, Canada, is characterized by extremes in temperature and a very moderate precipitation. There is no more delightful climate than that which prevails from May 1 to October 1. The continuous light for the whole twenty-four hours, during the period from the middle of May to the first week in August, although anticipated, is a source of delight and wonder to the visitor. While the winters are long and cold, on account of the absence of high winds and the dryness of the atmosphere, the low temperatures are borne with less discomfort than in other parts not so favored.

Prairie Grown Fruit

Experiments With Different Varieties Of Fruits Meeting With Success

Efforts to produce by cross-pollination different varieties of fruit which will be "comfortable" on the Prairie Province farms, are meeting with an increasing measure of success, according to the superintendent of the Dominion Experimental Farm at Morden. Fruit plantations bearing well-flavored yields will soon be the rule instead of the exception, he said.

Getting Out a Paper

Getting out a paper is no picnic.

If we print jokes, folks say we are silly.

If we don't, they say we are too serious.

If we publish original matter, they say we lack variety.

If we publish things from other papers, we are too lazy to write.

If we are rustling news, we are not attending to business in our own department.

If we don't print contributions we don't show proper appreciation.

If we do print them, the paper is filled with junk.

Like as not some fellow will say we swiped this from another paper.

We did and we thank him.—Dental Craftsman.

Up to the end of December, 1927, the total wheat exports from Canada for the preceding five months amounted to 141,311,880 bushels valued at $193,632,200 as compared with 139,319,118 bushels valued at $194,366,019 for the same period in 1926.

Tape measures rolled in a bolt of cloth now tell salesmen how much cloth remains in the bolt.

There are now in Canada more than 100,000 miles of improved roads that are kept in good condition during the touring season, and in some districts during the winter months as well. In addition there are thousands of miles of roads of less costly types that are suitable for motor traffic. The construction and maintenance of all these roads have cost the Canadian an enormous sum of money. Highway improvement projects undertaken in co-operation by the Dominion Government and Provincial Governments under the Canada Highway Act of 1917 covered only 8,000 miles of the total road mileage of the country. Yet they involved a total investment of almost $40,000,000, of which the Dominion undertook to pay $19,396,344 and had paid $15,775,694 up to the end of March 1927. Expenditures made for road construction and maintenance throughout the Dominion amounted in the one year 1926, to $46,300,000, of which almost $16,000,000 represented the cost of upkeep. Furthermore there is reason to believe that expenditures of the kind will continue.

The Canadian people's investment in good roads has facilitated travel between centres of population throughout the Dominion. It has undoubtedly had an influence upon social and business relations between inhabitants of the country. It has afforded new means of access to the summer holiday grounds and to the most beautiful sections of the land. These advantages the expenditures on highways have procured for the Canadian people. These expenditures have also helped to attract visitors in large numbers from the United States. In 1927 3,153,800 touring motor cars came to Canada from the United States. The travellers in those cars, it is estimated, spent $276,236,150 in this country, as compared with $203,197,920 that tourists of the kind disbursed here in 1926. In 1927 Canadians visited the United States in 495,929 cars and spent there a total of $70,000,000, it is estimated. Thus in that year Canada showed a favorable balance of $200,000,000 in tourist trade.

The influx of tourists from the United States was beneficial to the country in more than one way. The visitors incurred travelling expenses in Canada, and in that way put money into circulation here. Under the tariff law of the United States, it must be remembered, each tourist was permitted to carry home with him, free of customs duties, goods to the value of $100 that were bought in Canada. Many of the tourists availed themselves of this provision of their country's law, and so contributed to the volume of business done last year by Canadian traders. Furthermore, it is probable that many of the tourists helped on their return home to advertise Canada's attractions as a summer resort, its resources and the opportunities it offers for the investment of capital.—Toronto Mail and Empire.

Couldn't Help It

"So your name is George Washington?" the old lady asked the small colored boy.

"Yessum."

"And do you try to be exactly like him, or as nearly as possible?"

"Lak Who?"

"Why, like George Washington."

"Ah kain't help being lak Jahg Washington, cause dat's who Ah is."

A Dairy Province

Alberta has rapidly become a dairying province in the last few years. In 1927 her production in this department was valued at $20,750,000, of which $5,479,000 came from 16,425,000 pounds of creamery butter and $161,300 from 848,000 pounds of cheese, the latter being a comparatively new industry.

"I must appear ridiculous like this."

"Oh, no. It shows that you will be very useful for cleaning the floors."—Pages Gaies, Yverdon.

WORLD HAPPENINGS BRIEFLY TOLD

Alberta is the only province to adopt daylight saving time, April 29 to Sept 1

Samuel Hoare, Conservative government leader, has retired from politics, when he became a member of the "Sam Hoare" Cabinet of Baldwin

Tourist traffic brought Alberta a revenue of $15,000,000 last year so Hon. R. G. Reid announced at the session of the province's legislature

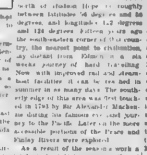
The sale of Scotched seals last December brought to the aid of the fight against tuberculosis in Canada over $40,000

Indian settlers in Hautland attract daylight saving a flight to feel a new territory was taken recently to plane from raising caused, but formation obtained for the issue of a preliminary map

King George has accepted the appointment of Field Marshal Sir William Robertson, colonel of the Royal Horse Guards. The Prince in succession to the late Field Marshal Earl Haig.

The bill providing for the establishment of diplomatic relations with Canada and the creation of a French legation in Ottawa, Canada, has been adopted by the French Chamber of Deputies and now goes to the senate.

During February 11 new members of Canadian chartered banks were reported through the Dominion. Of these eight were located in the three prairie provinces, the Bank of Nova Scotia opened branches at Gladys and Hemingford, Sask., while the Bank of Montreal and the Bank of Toronto opened new offices in The Pas mining district



The BABY

An Attractive New Frock

The smart daytime frock shown here is in fine French voile sheath for the bodice brocade to fashion. The skirt has panels set at each side of the front and is joined to the bodice while the back is in one piece. There are tucks at the shoulders, but sleeves gathered to wristbands. A three-quarter length fastening to cuffs to correspond with the skirt vestee and a narrow belt fastening with a buckle in front completes this modish frock. No. 1587 is in sizes 34, 36, 38, 40 and 42 inches bust. How to bust requires 3½ yards 36-inch material, 2½ yards 54-inch material, 2¼ yards 2-inch lace for frills, and ½ yard for Vice B. Price 25 cents the pattern.

Our Fashion Book, illustrating the latest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Children Cry for Fletcher's CASTORIA

VALUABLE LANDS DISCOVERED

Fresh Resources Are Unveiled By Recent Surveys In North

Each year in Canada surveys are pushed further into the hinterland and each advance discloses valuable resources of which settlers had not previously been aware. The Peace River District has been popularly thought of as the last inland empire in that direction, but an engineer of the Topographical Survey of the Department of the Interior during the summer of 1927 penetrated west and north of the outermost edge of Peace River and found a land of fertile grassy hills of high rolling open plateaux upon which roam flocks of Rocky Mountain goats and bighorn sheep and herds of caribou, and where the grizzly bear is not rare, with signify. The country is drained by four good-sized rivers, streams which have their rise in the glaciers of the mountains of the Rockies to the west

The investigations of the explorers party extended in general over two miles west and 175 miles with of shallow lie pr roughly between latitudes 56 degrees and 59 degrees, and longitudes 1.2 degrees and 124 degrees Fifteen years ago the south-western corner of this country, the nearest point to civilization, was distant from Edmonton by a six-week journey of hard travelling. Now with improved rail and steamboat facilities it can be reached in summer in as many days. The southern edge of this area was first made known in 1793 by Sir Alexander Mackenzie during his famous river and journey to the Pacific. Later on the move steps were taken to establish a possible portion of the Peace and Athabasca River districts.

A definite decision to facilitate air travel together with a flight to feel a new territory was taken recently plane from raising caused, but formation obtained for the issue of a preliminary map

CANADIAN NATIONALITY

Would Give Official Recognition To a Canadian Race

The public will concur with those interest the debate and the decision of the Canadian House of Commons on the bill introduced by Mr. Hubert, of Springfield, to establish a Canadian nationality and a Canadian race. Certain provision has been made by the Government to give Canadian nationality status official standing outside of Canada, but within the Dominion no one ever is born, married, or dies as a Canadian. They are listed as English, Scotch, Irish, Dutch, German, Russian, or what not, but there is no recognition of the term "Canadian." Dr. Hunsel's motion asks the Government to give official standing to Canadian nationality for use in all documents and papers, and also to confer official recognition in a Canadian race. Such a race would be made up of those persons of white stock born in Canada who for one or more generations shall be entitled to class themselves as of the Canadian race.

The Dr. Hunsel's idea of creating a Canadian race is a good one, and in our country that has given them birth and in which they have learned since it is to be hoped the Government at Ottawa will take whatever steps are necessary to give full effect to the purpose of Dr Hunsel's motion to establish a Canadian nationality

Manitoba Free Press

Demand For British Youth

Manitoba Farmers Anxious To Secure Immigrants From Great Britain

So many requests have been received from farmers in Manitoba to engage the services of youths who are being sent out from Great Britain under the Boy Immigration scheme that the Government has recently requested the authorities to increase the number from 50 to 100. Hon. Al bert Prefontaine, Minister of Agriculture, stated that 175 farmers have filed applications for boys and it is expected that the first batch of youthful immigrants will reach Manitoba this month.

Western Canada Hog Industry

West Will Soon Pass the Fifth Per Cent Mark in Hog Production

Western Canada will soon pass the 5 per cent mark in hog production in the Dominion, it is stated in the annual conversion of the Western Canada Livestock Union. Finally the percentage of select bacon hogs has been increasing while slow grading has been reflected in the number of hogs shows have practically doubled the output of the province alone. In 1927 there were 1,976,188 swines in Western Canada as against 909,057 in 1920

Mad Is Compensation

It was a very dark night Monky Glenda observed the moon in the sky a way as to make driving dangerous in the mountain light.

A dense mist was approaching the level crossing, travelling quietly round the rather sharp bend to the closed gates. At the precise moment an express train thundered over the crossing.

Too late, the driver of the car saw his danger and in a moment had a skid was the only result

a loud crash he struck the last coach, and the car completely left the track.

For a few moments there was a painful silence. Then came the cry:

"Well, it's cured my hiccups, anyway"; and the driver crawled out of the wreckage.

Encouraging Forestry Students

Every possible encouragement is being given by the British Columbia department of lands to the students of the University who are studying forestry, and to graduates who wish to do practical work of their studies. Hon. D. D. Pattullo states that members of the students are used yearly on forest surveys. Others, upon graduation, have been taken on the department staff.

British Columbia Sheep

While British Columbia's sheep population is relatively small, it increased 24 per cent in 1927, it is pointed out that there is no danger of an overproduction since only 60 per cent of the mutton and lamb consumed in the province is domestically raised.

"Cuticura continues to obtain for several years after nothing in air

Mrs. Edward's Lieutenant—Invaluable to the Studio.

Children's Colds Must Be Treated Externally

That's why modern mothers rub Vicks VapoRub on the throat, chest and back. Relieves at once, and, if used at first sniffle, checks most colds in early stage.

(1) Its breathing vapours, released by the body heat, are inhaled direct to the air passages. (2) It "Counteracts" the system like an old-fashioned poultice.

VICKS VapoRub

A Super-Loud Speaker

Twice Under Favorable Conditions Heard Five Miles Away

The latest claim to fame of the country round from a crystal set into a volume louder than that of the Albert Hall organ, is that of a resident of the country from the outlook

It is thought to be the loudest loud-speaker in the world.

Tested under favorable conditions on the Lake it was heard five miles away Built on the electro-dynamic principle and driven by a 500 watt generator, this loud-speaker has a 22 in. diaphragm, which floats on a powerful radial field, and is said to have 100 per cent volume over anything in its line. Its tone is rich, full and clear, the purposes of Dr Hunsel's mo- gramophone or radio can be reproduced plainly without distortion even at full volume.

A gramophone record was connected up to the loud-speaker when one engineer in the basement was instructed to increase the volume of sound.

Shuffling cur ears with cotton wool," says a listener, "we stood at the top of some stairs and listened to an organ record.

"Apart from the amazing compass and selectivity of the amplifier, the quality of the music was the surprise of the building and the substitute could be 1e2 reaching The windows of the office door facing it swayed to the notes."

Putting Rural Credits Scheme Into Effect

Will Probably Be Working Within Next Two Months

The rural credits scheme sanctioned by Parliament, session before last will be put into effect, probably within the next two months.

This is an act whose operation was contingent upon provinces going into the plan on a $5,000 basis for Nova Scotia, Manitoba, Alberta and British Columbia have expressed in legislation, adherence to the plan. Saskatchewan has not as yet taken action.

The Dominion act provides for a maximum loan which can be made by local provincial boards to supervise loans Fifteen million a was appropriated by Parliament, which has been increased to supplement the original amount.

The document contained a complete list of legally handwriting of late servants sent out under compulsory indentures to the plantations of the West Indies and Virginia between the years 1618 and 1662.

Twelve thousand names appear on the list and one of these is the family of Mr. Amerman who was naturalized by the Senate of Virginia and prospered

The list of names is being made into a book, and will be published in America shortly.

Alberta Sheep For Abyssinian Islands

Alberta sheep are to be introduced to the Abyssinian Islands, off the Abyssinian coast, it is being made by J. Nolin, a farmer, of the Stettler district. The shipment will consist of 90 sheep and two rams, and is expected to reach Stettler in September and then on. This is the first shipment of Alberta sheep to the Abyssinian

New Market For Sheep

A shipment of sheep from Alberta to the Abyssinian Islands, off the Abyssinian coast, is being made by J. Nolin, a farmer of the Stettler District. This shipment consisted of 90 sheep and two rams, and went forward from Stettler to Seattle and then on. This is the first shipment of Alberta sheep to the Aleutians.

Alberta Sugar Beets

General optimism is that the best acreage in Southern Alberta will be increased in 1928 by one-third over 1927, making about 2,000 acres in place of 1,630 acres last year Acreage is already being signed up.

The higher a man rises the more he has to depend on others to hold him up.

Mildred's Lieutenant kills wants.

JESUS THE SUFFERING SAVIOUR

Golden Text: "If any man would come after Me, let him deny himself, and take up his cross, and follow Me."—Mark 8.34.

Lesson: Mark 8.27-9.1; 9.30-32; 10.32-34.

Devotional Reading: Isaiah 53.7-9.

Explanations and Comments

The Demands Of Discipleship, verses 34-37. The great crisis, both in the Messiah, the disciples had reached in their thinking. Until this Messiah must suffer, they had been told, but as after events proved, they had not grasped; a third great truth they were now told the followers of the Messiah must suffer and sacrifice likewise.

To the multitudes as well as to the disciples Jesus said, "If any man would come after me, let him deny himself, and take up his cross, and follow me." Denying oneself does not mean the giving up of this or that, but the giving up of all, the repudiating of all self-centered aims, the yielding of one's will to Christ's will. Not only must his Master endure the cross, but he himself, Peter learned if he would be Christ a true follower, must be ready to suffer death, but "A Christian is a Cruciai" is both a command.

"The beautiful thing is that this appeal of Christ was not terrible, but stead of repelling men it drew them, He actually obtained the response he was hunting for, not by offering them their own things, but by making such appeals as anybody but Christ would have known to be the drawing the sacrificial spirit in them, and then making it appeal to their highest capacity for heroism. There is a wonderful lesson in Jesus' method in these characteristics in human nature, which we do not usually take into account, and which can answer to the highest motives, which do not need to be bought by any low compensations. Jesus' way is the way which always appealed to on the most heroic and self-sacrificing side of men's characters, this exaltation in difficulties of human nature."

"Whosoever will save his life shall lose it: and whosoever shall lose his life for my sake and the gospel's shall save it." Jesus continued. The world life and the pursuit it referring to the life here and in a threefold sense here. The sentence means: He whose only care is to save his natural life shall lose his spiritual life, and he who is willing to lose natural life for My sake shall find his spiritual.

Refused Large Sum For Old Document

Offer Of American Did Not Tempt Corporation Of Bristol

The Bristol Corporation has refused the offer of $3,000 from an American millionaire for a page of a 17th century document which was recently discovered in a lumber-room of the municipal buildings, which was being cleared out to provide more space.

The document contained a complete list of the early inhabitants of the city, and was sent under compulsory indentures to the plantations of the West Indies and Virginia between the years 1618 and 1662.

Twelve thousand names appear on the list and one of these is the family of Mr. Amerman who was naturalized by the Senate of Virginia and prospered

The list of names is being made into a book, and will be published in America shortly.

Not Just What She Wanted

A Paris dressmaker was paying up a Christmas visit to her daughter's in London, and found that in the little house a hospital nurse and baby also.

"Ah," she said, eyeing the nurse a uniform admiringly. "I don't know what you'd do without the Blue of you."

"Oh, now you are too kind," protested the nurse, with a smile, "I am quite sure you do things as worthy as every day."

"Not me, mon," replied the old lady emphatically. "I can kill a chicken or deal with the last of the family, but when it comes to human beings my 'art fails me."

Is Your Stomach Troubling You?

Hamilton, Ont.—"Dr Pierce's Golden Medical Discovery" is a remedy for stomach and liver troubles, and I have found it highly recommended. Before I took it, I suffered terribly from constipation, and was always sick and run down. I took it, I gained in weight and health and felt just fine My friends even commented on my changed appearance and advised me to take it myself. Mrs. Caroline Nelson, 74 Bond Street, S.

People in every walk of life today say Dr. Pierce's Golden Medical Discovery has restored them to health. It is a reliable medicine made from roots and herbs, sold by druggists, in both liquid and tablets. Send 50c for trial pkg. tablets to Dr. Pierce's Laboratory in Bridgeburg, Ont.

CHEVROLET

Use Your Best Judgment in Your Choice of a USED CAR

IT will pay you to select the Used Car you purchase with the same care and judgment as you would show in buying a new car. Buy from a dealer who has a reputation for honesty and fairness . . . a dealer who is successfully selling a well-known and respected line of cars. We can offer you better Used Car values because of our volume of Chevrolet business and because we are building for the future. And we want you to buy your used car carefully, because a satisfied customer means more to us than the profit on the sale. Come in and inspect some of our special values before you decide on your car.

C. HOBSON, Proprietor

LOCAL and PERSONAL

Born.—To Mr. and Mrs. Stauffer, on April 5th, a daughter.

Mr. G. McLaughlin visited Edmonton on business on Tuesday.

Mr. Alex Ross, manager of the Tofield Creamery attended a dairy convention held in the city of Edmonton last week.

Mr. John Chapman underwent an an operation in the Royal Alexandra Hospital last Friday and is doing as well as can be expected.

Mr. Orbin Sprouls, of the local telephone staff, has been off duty this week on account of sickness.

Mr. and Mrs. Spooner, left Tofield on Sunday for Edmonton. Mr. Spooner has been the local representative of the Northwestern Utilities here for the past year. We understand Mr. and Mrs. Spooner will shortly leave for the United States.

The Cornhill Municipal District council held a regular meeting on Tuesday of this week. J. O. Lotzer was appointed secretary-treasurer. A more detailed account of the meeting will appear in our next issue.

Miss Matilda Borrish made a business trip to Ryley on Tuesday.

Mrs. Hobson and Kathleen visited the city on Thursday.

Mr. P. O. Ball and daughters, visited Edmonton on Monday.

Betty, the two year old daughter of Mr. and Mrs. George Weatherill, was baptized on Sunday, April 1st, by Rev. A. A. Adams in Holy Trinity Church.

Mr. Charles Wolf has purchased the south half of section 21-50-15-W4M formerly known as the Lofler farm.

KETCHAMOUT

Robins and crows have arrived, but the weather during the past week has been very wintry.

Mr. and Mrs. Albert Setten have moved into the Farmington district.

Mr. and Mrs. John Wilson, who have been living on the Owen farm through the winter, are moving on their own farm in the Woodlawn district.

The regular monthly meeting of the M.A.S. will be held next Wednesday, April 11th at the home of Mrs. Chas. Whitmore.

All are cordially invited.

Members of the McGinnis, Bilinas, Williams, and McCowan families attended the wheat drive at the Gill home on Monday night.

Mr. A. J. Williams was on Edmonton visitor for a few days the first of last week.

Mr. and Mrs. McCowan are building a new garage.

Mrs. G. W. Sears received a box of daffodils from her brother, P. F. Iverson and family, from Victoria, in remembrance of her birthday.

Mr. Wm. Lee is improving his farm with a new up-to-date chicken house.

Sunday school was re-organized on Sunday with the following officers: Superintendent, Mrs. John Brown; assistant, Mrs. L. Carlisle; secretary-treasurer, Miss Lillian Carlisle; teachers, Bible Class, Gordon; children's classes, Mrs. McCowan; Mrs. Whitbine; Mrs. Peter Lee and Miss Fawcett. Sunday next at 2.30 p.m. sharp. Preaching service 3:00 o'clock.

Mrs. F. Fawcett visited friends in Edmonton last week.

Mr. Donald Campbell of Roundhill was the guest of his sister, Mrs. Herman Lawson on Monday night.

We were pleased to receive a confederation trophy for our school house on Monday.

Mr. and Mrs. Milton Ray and children were the guests of Mrs. Rays parents, Mr. and Mrs. W. E. Mitchell on Monday and Tuesday of last week.

Mrs. A. McMullen and Mrs. G. W. Sears visited with Mrs. John Wilson at her home on Thursday afternoon.

Mr. Martin Lawson spent over Sunday in Edmonton—looks rather suspicious Martin.

Master Walter Shultz of Tofield, spent a few days with his cousins, Harold and Alvin Shultz last week.

LOCAL TRACTOR CHANGES HANDS

The Variety Theatre was sold by the proprietor, Mr. F. O. Ball on Monday to Mr. Frisch. The new proprietor, will we understand take over the management on the 10th instant.

In addition to operating the theatre we understand Mr. Frisch will open a butcher shop in the Removed block, part of which is occupied by Mr. Gus Brown.

Alterations are underway to the store immediately south of Mr. Gus Brown, where it is expected Mr. W. Bullaway will open up a produce market. We understand Walter has purchased Mr. McClymont's milk route and will buy wholesale and sell retail, milk to the people of Tofield.

CARD OF THANKS

Mrs. Weatherill and family wishes to extend sincere thanks for the many kindnesses shown to them in their recent bereavement. To those who sent flowers they are especially grateful. They regret very much that owing to a misunderstanding some of the flowers were sent to the wrong church but they were very much appreciated.

NIGHT-FLIERS HERE ON FRIDAY, APRIL 13th

The Night-Fliers, of Edmonton C.J.C.J., entertainers, will be at Tofield in person on Friday night, April 13th. They will come prepared to give the concert lovers of Tofield, full value for their money. They are all and everyone artistes of ability and will render a programme varied enough to suit every musical taste. This is the first visit to Tofield, in person, of this aggregation, and as they are very much in demand, another opportunity of hearing them here, may not soon present itself. They are coming by arrangements with the curling club, and the proceeds after a certain amount has been deducted for the Sunshine Fund, will go towards the New Rink Fund. Whose desiring a good evening's entertainment should not fail to attend the Night-Fliers concert on the 13th.

P. Reagen, who has been spending some time at the coast, returned home this week.

LINDBROOK

The sympathy of the peoples of this district is extended to Mrs. Weatherill and family in their recent and bereavement. The late Mr. J. Weatherill was a well known figure in this district and universally esteemed and liked by all here and will be very much missed by us all. His genial, affable nature no matter what the circumstances, will ever keep him in our memories for he was a fine old gentleman, one of the right sort which are only too few nowadays. All that were able to at all, attended the funeral at Tofield to pay their last respects to an old friend.

Mr. J. Kooper spent the week end in Edmonton visiting his brother, Mr. L. Hoopor.

Mr. and Mrs. Whibley had a rather nasty mishap the other Sunday while out sleigh driving. It seems the sleigh struck a rock in a ditch and the sudden jar nearly precipitated Mr. Whibley out head first onto the tongue, but suddenly his feet became entangled with Mrs. Whibley's face, this just saved him, but he fell out the sleigh front and hurt his ribs. To date, however, we hear that they are not thought to be broken or fractured and he is nearly O.K. again, as is Mrs. Whibley's face. Say! Bert, did you learn the "navvie" whilst in France? looks like it.

Mr. J. H. Brown has purchased a Chevrolet coach from Mr. Swift of Tofield as old Mr. L. Pointer as well.

Mr. and Mrs. Frank Kortzman gave a whist drive at their home last week. The ladies' first prize was won by Mrs. J. Lindberg; 2nd, Mrs. C. Kortzman; the gent's 1st by Mr. E. Carlson; 2nd Mr. Lindgren. After supper dancing was indulged in until daylight when all departed home voicing it to be an A1 affair.

A Happy Easter to all from Lindbrook.

Billy McCauley had a close call the other day when he was dragged several feet behind a buggy. It appears that he was walking to school with the Worton brothers when Jack Wtpie came along with his buggy. Billy dropped back to get a ride and in getting on to the buggy while in motion he slipped and fell. His reins attracted the Worton boys who hastily released him. He was taken home in the buggy severely shaken up and bruised.

LINDBROOK EAST

Neighbors and friends of this district wish to extend their deepest sympathy to the Weatherill family in the loss of a loving husband and father.

The many friends of Mrs. Paul McMullen will be pleased to know she is much improved in health. Mrs. McKenzie also is improving slowly.

Mr and Mrs. Earl Wilson are the proud possessors of a new Chevrolet sedan.

Mr Lull suffered his annual loss last week, one of his horses having been cut badly with barb wire and died from the effects

Mr. and Mrs. Wm. Forman have moved to town, having their farm in charge of a married couple

Mr. Jos Brown is rounding a brand snake these days. Why! its a Chevrolet sedan.

Mr C Morden has been busy cutting wood and grinding grain for his neighbors.

Mr Elmer Carleton is in the city taking treatment for his arm and hand which were disabled during service overseas.

Mr and Mrs. Earl Wilson entertained their neighbors and friends to a good old whist drive on March 21st. The ladies prizes being won, 1st, by Miss Lillie Morden; 2nd, by Mrs. G. Bratton. Gents 1st, Mr. Crevaling; 2nd, Mr. C. Morden.

Mr. and Mrs. A. Gill also entertained their neighbors and friends to a whist drive. The ladies prizes going, 1st to Mrs. H. Diner; 2ill to Mrs. A. Smith. Gent's 1st, Mr. R. Hammersley, 2nd Mr. Crevaling. All report a splendid time.

Whist drives seem to be the order of the day. Mr. K. Hammersley also giving one to his neighbors on March 30th. The prizes were won, ladies' 1st, Mrs. Earl Wilson, 2nd Mrs. Wid. McGuffey, Gent's 1st, Mr. A. Appleby; 2nd Mr. D. McCowan.

C.P.R. Seed Train Tours West

With a view to further promoting the best use of their being given by H. S. Vogue, government's dairy promoter.

In the towns already visited, the train has been greeted with enthusiasm with the farmers displaying an eagerness which speaks highly of the reputation of the seed and forage crop demonstration train. It is operated in connection with the University and extension service of the Saskatchewan provincial government, with all cars having been equipped at the Western Shops of the Canadian Pacific Railway at Winnipeg. Several of the cars are provided with motor-driven grain cleaning machinery of various types, while other cars are fitted with motion pictures accessories for the showing of various phases of grain activities, with still others for the purpose of exhibiting grain and seed samples.

The entire train is opened for inspection at the various stops, demonstrators being on board to explain the future exhibit and to give advice on important points in seed selection.

WORLD HAPPENINGS BRIEFLY TOLD

Official British attempts will be made this year on the four principal world records, for speed, height, duration and long distance non-stop.

The Government was against the Fisheries Bill as it stood without at least six months according to a leader of the Department of Finance and Customs.

Amid the acrimonious tension of a fifty-mile portage between the Richardson arctic Yukon, two trappers were guided safely over the trail by the lead dog of their team, Kabloona.

Astronomers and physicists are deeply interested in the discovery that the star Nova Persei first discovered by Dutch Africa in 1920 has split in two. Developments are being closely studied by astronomers.

The temperature of St Francis dam at Los Angeles on May March 14, was 60 degrees below freezing point, it was announced in the report of the government commission investigating the disaster.

Trans-Jordania, the Western part of Palestine, was recognized as an independent government in the new agreement between Trans-Jordania and Great Britain made public at Jerusalem.

Funeral services of the utmost simplicity were held for Miss. Charlotte Pickford mother of Mary Pickford at the request of the motion picture actress, only intimate friends and relatives attended.

There was a moderate gain in employment at the beginning of March, according to the monthly statements furnished to the Dominion Bureau of Statistics by 6,332 of the larger employers of labor throughout Canada.

The battle flag and king's colors as well as the regimental colors of the 54th Kootenay Battalion, destroyed when St. Saviour's Church burned at Nelson will be replaced Pope Pius XI at Vancouver. The replacement will be about $800.

Average Wheat Production

Average Production Over Five Year Period In Three Provinces Enormous

According to the Dominion Bureau of Statistics the average production of wheat over the five years 1923-26 in Manitoba was 17.5 bushels to the acre, in Saskatchewan, 17.1 bushels to the acre, and in Alberta, 17.2 bushels to the acre. The average value per bushel in the same period was respectively $1.00, 97c and 98c, making the respective returns per acre from wheat for the three provinces $17.50 $16.78, and $16.14

Tractors Replace Horses

Apparently the splendor of the Brobdingnagian cavalry and artillery will soon be a thing of the past, and horses are gradually being replaced by tractors. Most of us who were at Viney Ridge will remember the hundreds of good horses lying by the roadside on the way to the big offensive and will be glad to hear such news. For the purpose of taking supplies up the line under shell fire, the tractors are proving

Small Town Papers

BY
FRANK PARKER STOCKBRIDGE
Reproduced by special permission from the Saturday Evening Post. Copyright, 1926, by The Curtis Publishing Company.

It was in the papers a little while ago that one of those modern geniuses had bought a couple of country newspapers without having seen them. Tempting he wanted something to make a living at it most which didn't involve too hard work.

I never read any of the gentleman's novels, but from the publicity he gets in the highbrow literary magazines every little he writes out a new one, I figure who don't know much about the novel business would think he realizes about half as to the fact that the author would never have to do any real work like running a country newspaper for example. But the funny part was his idea that he could make a living out of a country weekly, or two of them.

I have something about country newspapers I started my journalistic life by reading the editorials and rushing the paper to the printer and taking the form on the Washington hand press with a big two handled crank while Cheesy Cranmore pulled over to Yates and we had got the weekly run of two dozen off two pages at a time. After sweeping and dusting, we knew we'd been working.

You, my brethren on the press, I must not for get that you have your recognition. Instead of cover Ash Can Jackson's Sunday drinks, and Mrs. Cholmondeley Jones's party for the Reverend Ali Ben Ali, you write country newspapers. I never read one of these but I wish I could write and but there hasn't been a week of bad weather in more than forty years that I haven't been reminded of the old story of the farmer who had a spell my foreman-printer-delivery boy and the whole family. Every time a rain starts to come up. That stuff always cropped up during the rain so as a way of standing from the cow to the pump. It's funny how one can be so an entry in the editorial end. But that hasn't anything to do with country newspapers.

Where I got my idea was out of that newspaper boom of the new and great West. Every way it. Franklin Roosevelt, one of the old Colonel, had founder's and every Wednesday morning at just the precise moment the paper would be off the press. That took rain. Nobody ever heard of an editor's wife, so I'll say she never gave points though sometimes pasting when they felt like it or not at all. Often as not they would pay in kind instead of cash. Not that that was bad, and sometimes quite good. Oh, I'll say it was.

There was a moderate gain in employment at the beginning of March, according to the monthly statements furnished to the Dominion Bureau of Statistics by 6,332 of the larger employers of labor throughout Canada.

The battle flag and king's colors as well as the regimental colors of the 54th Kootenay Battalion, destroyed when St. Saviour's Church burned at Nelson will be replaced Pope Pius XI at Vancouver. The replacement will be about $800.

Few People Realize Marvels Of Postal System

In this day and age when almost every home contains a radio and a telephone conversation between New York and London has become a daily matter, it is small wonder that we seldom think of the marvels of the postal system which carries letters and parcels between one and another portal systems, when letters are carried on horseback from one post to another, when the time of travel between Philadelphia and New York was a matter of days, not of hours. Not so very long ago it cost $1.00 to have a letter carried from this country to Australia. When the first general post office was established in London, the rate of letter postage was eight cents for the first fifteen miles, with a rising scale to twenty-five cents for three hundred miles, and those rates prevailed in 1840, less than one hundred years ago.

Andrew Hamilton was the first postmaster-general of the American colonies in 1692, and he undertook the task of establishing an inter-colonial service This post was purchased by the British crown in 1707, and from that time until a year prior to the Revolutionary War the postal service in America was controlled by the general post office in London. In 1721 the mail was carried every two weeks between Boston and New York, and in 1737 a weekly mail service was established between New York and Williamsburg, Va. Ten years later there was a service every two weeks between Philadelphia and Annapolis. Today there are no limits to the reaches of the postal system. A letter is carried and delivered from any point in the United States to any other point in United States Mexico and Canada and England for two cents; to any point in Europe for five cents, and with the greatest possible speed. When you think of all the hands through which this letter must pass, and all the travelling it must do before it reaches its destination, you will agree that the postal service gives you a very real bargain, indeed.

Of all the prurient memorials, Alfonso XIII. of Spain has ruled the longest, his reign beginning in 1886.

"FLYING IRONCLADS" PROVE SUCCESSFUL

Britain's All-Metal Planes Reach Singapore Without Mishap

Great Britain's "flying ironclads," otherwise the four Royal Air Force Mayo composite aircraft at Singapore, have completed a flight of 2,000 miles and the first of its kind ever accomplished in the history of aviation.

It is pointed out that this is the greatest distance ever flown by a seaplane accompanied, and the fact that it was accomplished by a single machine proves that British research and British construction are unsurpassed.

All metal flying craft, it is now believed, are entirely suitable for extension in the empire—a conclusion subscribed to the subject of dispute between experts and those satisfactorily satisfied.

British air power throughout the eastern world has been enormously enhanced as a result of the cruise of the Royal Air Force flying boats, as their successful flight has proved that Britain holds the world in this class of fighting craft.

The air cruisers, whose base is at Singapore, shortly intend to resume their trip inward Australia, from whence they will return via Singapore, thus completing an Empire flight of 25,000 miles—the greatest ever undertaken.

Another indication of British supremacy in the air is shown in the announcement that in the next September trophy, Britain's representatives expect to achieve a speed of 200 miles an hour. In this event, time experts are agreed that at the present rate of speed development, Britain will soon be able to produce machines capable of travelling at a rate of 250 miles an hour—the only drawback to such a stupendous speed being that it is impossible to turn sharply in the air because an aircraft, owing to centrifugal force, is likely to become momentarily unconscious. This danger, however, is not to be feared when the flight is straight.

Livestock in Prairie Provinces

The value of livestock on farms in the Prairie Provinces, comprising horses, cattle, sheep and swine, in 1927, was $324,949,000, as compared with $263,250,000 in the previous year, all three provinces recording substantial increases. The value of poultry on farms in the three Prairie Provinces was $18,313,000.

Should Spend At Home

Seventy dollars per head was spent by Canadians las tyear on United States goods. A considerable proportion of this amount could be spent on good Canadian products and many be found in our Fashion Book. Our fashions are popular in the cities and in the heart of the style centres and further evidence of the value of local popularity brought within the means of the average woman. Price of the book 10 cents the copy.

THE RESURRECTION

Explanations and Comments

Three Women Visit the Tomb Of Christ, verses 1-4.—Very early on the morning following the Sabbath, during which Mary Magdalene, Mary the mother of James, and Salome had seen the tomb of Christ for the purpose of anointing the body with spices.

As these women went on their way to the tomb they kept asking themselves, "Who shall roll us away the stone from the door of the sepulchre?" The stone probably a cylindrical one which could be rolled back, down such a groove at the base of the opening. Such stones were used by wealthy families in order to have being exceeding great." As they approached they saw that the stone had been rolled back.

The Lord is Risen, verses 5-8.—While Mary Magdalene ran to tell Peter and John that the stone was removed, the other women entered the tomb and saw a young man arrayed in a white robe (an angel sitting within. Luke 24:4 speaks of two men, and in Matthew 28 an angel is sitting upon the stone without the tomb, but in the One Volume Commentary observed, "Such slight discrepancies harmonize well with the excited feelings which seem a reason would be likely to produce. Minor and detailed agreement in independent narratives are such circumstances would be suspicious."

The young man in the tomb said to the women, "Be not amazed: ye seek Jesus of Nazareth, which was crucified: he is risen; He is not here: behold the place where they laid him." Instead of being surprised at the resurrection of Christ, the women were amazed. Matthew 28:8 says they departed quickly from the sepulchre with fear and great joy, and all the travelling it must do before it reaches its destination, you will agree that the postal service gives you a very real bargain, indeed.

Looks Like Real Bargain

Few People Realize Marvels Of Postal System

In this day and age when almost every home contains a radio and a telephone conversation between New York and London has become a daily matter, it is small wonder that we seldom think of the marvels of the postal system which carries letters and parcels between one and another portal systems, when letters are carried on horseback from one post to another, when the time of travel between Philadelphia and New York was a matter of days, not of hours. Not so very long ago it cost $1.00 to have a letter carried from this country to Australia. When the first general post office was established in London, the rate of letter postage was eight cents for the first fifteen miles, with a rising scale to twenty-five cents for three hundred miles, and those rates prevailed in 1840, less than one hundred years ago.

Andrew Hamilton was the first postmaster-general of the American colonies in 1692, and he undertook the task of establishing an inter-colonial service This post was purchased by the British crown in 1707, and from that time until a year prior to the Revolutionary War the postal service in America was controlled by the general post office in London. In 1721 the mail was carried every two weeks between Boston and New York, and in 1737 a weekly mail service was established between New York and Williamsburg, Va. Ten years later there was a service every two weeks between Philadelphia and Annapolis. Today there are no limits to the reaches of the postal system. A letter is carried and delivered from any point in the United States to any other point in United States Mexico and Canada and England for two cents; to any point in Europe for five cents, and with the greatest possible speed. When you think of all the hands through which this letter must pass, and all the travelling it must do before it reaches its destination, you will agree that the postal service gives you a very real bargain, indeed.

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Carleton, Ontario.—"After a severe operation and a three weeks'

I resumed home duties I was unable to move a finger. I was very much run down and weak and felt discouraged. I was in bed until I thought I would never get up again. I had a friend who had received wonderful benefit from Lydia E. Pinkham's Vegetable Compound, five bottles of Dr. Pinkham's Blood Medicine, and have also used the laxative Pills. I am well."—Mrs. L. Lacelle, Box 105, Carleton, Ontario.

Read many every month. One day when I was able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and after I started using it, and also took the other medicines, I felt like a new woman. I was able to do my own housework and my baby is now two years old. I am the mother of four children and my baby is the only one I have lost. I am a farmer's wife, so you can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five bottles of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the laxative Pills."—Mrs. L. Lacelle, Box 105, Carleton, Ontario.

W. N. U. 1727

"She's a fine child," he said, and turned back to his supper.

"Whether she is an honest woman or not she's not honest." Mrs. Corbett concluded her recital, "but I do know this—she has been treated bad. Ain't it the limit, mean? You go off and leave a poor girl like that with no more money or worry about it than a moment?"

John Corbett went on buttering his bread on the palm of his hand, and making no attempt to defend his sex.

"Oh, I guess they are all bad, right enough," he said pleasantly "I often wonder myself why the Lord ever made them. It's a good thing they comes a war every wee while to kill them off—the devils!"

"Shut up, Dad, John, you sly old dog," said his wife, laughing, "you sure do like to get a rise out of me."

"And me just tryin' to agree with you, woman!" he said.

When Danny Corbett, aged ten, came in from delivering his papers, he found his mother in bed, and was sent to bed at the baby cuddled his head then off his outer garments and crept himself carefully in the fire, and even then he was not allowed by his mother to speak to her very much Danny offered no opinion.

After Danny had eaten his supper Susie came a prospection in him. "Sure, Dandy, you and me could raise the divil between us, for I'm not makin' a stir in there now no more than if she was dead. I could mind her, and you could mind the baby. It would be the best place.

Round and round in a red-raw circle Danny's mind went, trying to agree and sorrow with thinking, and came to no light.

Suddenly the baby, from the folds of its blanket at the foot of the bed, began to cry. Susie kept sound asleep, cry, like no other sound on earth, the wonderful call put the magnificent human cry.

From the region below the snow came Helmi in the nearest thing strong demon generations back of her, her speaking in every nerve ready to face the world. The Shelter was forgotten. She reached down to the sweet Fluffy, Helen Lilo, and, at it's all right, nothing can hurt my baby. I'll care for your all."

Lilo understood full words, and, lying in his mother's arms, went sound asleep. The problem of the future ceased to trouble her And Helmi, soothed by the presence of the little warm thing, as exquisitely cool and sweet, slipped gently into the kind gray mists of forgetfulness where tortuning hopes and choking fears were all lulled at bay by the gray wall in whose shadows her tired young soul found peace.

"She will be all right" said Maggie Corbett, when Mrs. Kalinski approached her fears. "She is strong and healthy, and the long sleep will do her good. It's God's mercy that she can sleep and forget her loneliness, whatever they are, poor girl. I don't blame them so much, for in sending for a doctor. They will not want to be disturbed on Christmas Day with sickness, and I'm sure I need not call the inspector either, for he will ask her a lot of questions that will only worry her."

"She has no ring on," said Mrs. Kalinski, lastly. "I am afraid everything is not right."

"She has come from the North," said Mrs. Corbett, "and there's no jewelry store there—that might account for her not having a ring. We will say that, anyway."

After Mrs. Kalinski had gone to her own side, Mrs. Corbett crept to the foot of the bed looking at her patient. Suddenly an idea occurred to her. She went to her rooms across the hall and soon a determined search in the middle bottom drawer which was known as the drawer "that has everything in it" Coming back, she lifted Helmi's left hand and put a ring on her finger. "If a little thing like that will give you poor girl back her character I will not to deprive her mate, that has been too tight for me for many a day, and in case she should die it will save the wee mite's name. I will tell Mike in the hamlet, for she noticed there was none, and I'll make it right for me I need know. It will save a lot of talk and wondering. Well, there's nothing wrong with the bad, ring or no ring."

Mrs. Corbett took the slumbering infant into her own rooms for the night, the instigation of her daughter Rose, aged twelve, who offered the young stranger a share of her bed and personal service in the Winnipeg couch she was placed, with a barricade of pillows in front of her to prevent any one from thoughtlessly rolling on her.

When John Corbett came home and found his family increased he expressed no surprise, nor did he offer comment when the events of the afternoon were related. But he did go to the couch to get a look at the baby, being warned by Rosie not to come too near for fear he would start a draught.

LESSON No. 15

Question: Why is unflavored cod-liver oil so important a part of nutrition with milk in the diet of children?

Answer: Because when it is mixed with milk it makes milk a more efficient rickets-preventing food and builder of strong bones. Children like it best in the form of

SCOTT'S EMULSION

Keep Minard's Liniment handy.

Recipes For This Week

(By Betty Barclay)

BANANA CANAPE

4 bananas
2 oranges.
2 slices pineapple.
Salad dressing.

Berries or candied cherries.

With a sharp knife cut a section of skin from the outer curve of the bananas, and carefully take out the fruit, leaving the skin in the shape of a canoe Pare oranges, remove seeds and cut in pieces, mix with pineapple cut in pieces and add the amount of banana pulp cut in pieces. Put canoes with fruit, cover with Mayonnaise or French dressing, sprinkle generously with paprika, lay on bed of shredded lettuce and serve with cherries.

EGG MILK SHAKE

2 cups milk.
2 eggs.
4 teaspoons sugar.
2 teaspoons vanilla.
¼ teaspoon salt
Few grains nutmeg.

Few grains cinnamon.

Beat the eggs until very light. Add the sugar, salt, vanilla and spices, then the milk. Stir till the sugar is dissolved, then beat well. Serve cold.

A Good Investment

Shortages On Any Land Title Is Not a Real Debt

A prominent banker makes the statement that four-fifths of all mortgagors are in debt. Only about a fifth of them are insolvent, however, he says, are free from financial worries. This sounds somewhat appalling but might stand for investigation. There are not an improvident nation of mortgagors in Canada, and we believe that it is not fair to be in debt. The feeling that one owes money for anything is a good one. There are people who take their financial responsibilities very lightly and refuse to lose any sleep over discrepancies in the state of family budget. But the average man and woman feel uncomfortable under any strain. There are, however, debts and debts. The man who owes for a home, an automobile, a piano or other furniture, may be in the soundest kind of financial condition. A mortgage is no longer regarded as a sort of family skeleton, but as a very useful and rational business investment.

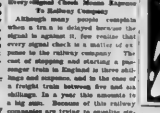
Forty-four Government employees are rewarded to serve the President of the United States in the White House.

The real joy of living consists in making one's own mind a pleasant place to spend one's leisure moments.

Train Stops Are Costly

Every stopped Check Means Expense To Railway Company

Although many people complain when a train is delayed because the signal to approach it, few realize that every signal check is a matter of expense to the railway company. The cost of stopping and starting a passenger train in England is three shillings and sixpence, and in the case of a freight train between five and six shillings. In a year this amounts to a big sum. Because of this railway companies are trying to organize signal systems, in order to eliminate unnecessary signals.



Silk Stockings

Have stockings in the very newest shades; your old or faded stockings dyed any tint in the rainbow in five minutes; with fifteen cents' worth of Diamond Dyes' but any dyes, but get the right kind. And be sure they're true dyes.

Try a pair tonight! Use Diamond Dyes, and see with dream they were tinted at home. And you can do such dyeing with just as perfect results as you will just use the true Diamond Dyes.

Every package with your druggist for the very kind you want to dye. Diamond Dyes are guaranteed to give every directions, and perfect results, even if you have never dyed before. Druggist or Color Craft, a big illustrated book of dyeing and tinting secrets. DIAMOND DYES. Dept N18, Windsor, Ontario.

Diamond Dyes

Just Dip to TINT, or Boil to DYE

Earth's Outer Atmosphere

Consists Of Helium One In Opinion Of Scientists

One hundred miles above the surface of the earth the atmosphere consists almost entirely of helium gas, believes Sir William Napier Shaw, eminent meteorologist.

If the conclusion is right it will never be possible, it is considered, for aircraft to navigate the upper atmosphere

In a new "manual of meteorology" in which Sir Napier Shaw sets forth his view he deals with many other matters bearing on atmospheric conditions.

He maintains that as the light of universe has been seen as high as 1,000 miles above the earth, gases of some kind must exist far out from this globe

Comparatively low down comes the famous "heavy side" layer in the atmosphere. It is the business of this layer which reflects wireless waves and renders wireless signalling possible.

A Household Medicine—They that are acquainted with the sterling properties of Thomas' Eclectric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and one of the few that can be relied upon in ordinary complaints it is an inexpensive medicine, every it at hand, for the call for it may come most unexpectedly

Demand For Land

The demand for farm lands in the Lethbridge District, Alberta, is very keen, and recently remained over a pre-war years. Real estate men report a veritable stamp by buyers and farmers looking for land

Use Minard's Liniment for Corns.

Happiness doesn't consist in having everything you want, but in the ability to get more

Just a teaspoon dose of Phillips' Milk of Magnesia in water. That is an ideal, effective, yet harmless, It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The genuine bears the name Phillips' Milk of Magnesia. Don't be persuaded by substitutes. Insist on getting it. Directions for correcting excess acids. Small bottle contains full directions.

Little Helps For This Week

"In quietness and in confidence shall be your strength."—Isaiah xxx. 15

I would be quiet, Lord!
Not clamor nor the crowd
Not even shall need of mine
Will Thou forget.

I schedule is the secret of strength of mind.

A mind may be still though active, and the quietness which is part of the Christian's we have in Him, the Christ, is only found in the living union in him, enshrined in His own parable of the Vine and the branches Rose Porter

First Woman Ship Broker

Young English Girl Has Quickly Fou t ssional Position .

Although not yet old enough to vote, Miss Dorothy Wonder, 22, has passed examinations which make her the first woman qualified as a ship broker in England. A ship's broker's duties require the negotiating of carriage of goods throughout the world the bearing of responsibility for discharging of cargoes, the chartering into arrangements with captains and owners of all nationalities and the keeping in touch with developments of all classes of ships and markets in the world Miss Wonder began her career in the man-directed field as a clerk in a London ship broker's firm.

NO BETTER MEDICINE FOR LITTLE ONES

In What Thousands Of Mothers Say Of Baby's Own Tablets

A mother is for the baby or growing child—one that the mother can find no better medicine, safe as well as efficient to benefit than Baby's Own Tablets The Tablets are praised by thousands of mothers for the quick results they secure in relieving the minor ailments of little ones and no other medicine is little ones to sound that I've a mother has used them for her children she will see nothing else Concerning them Mrs. Archie Hatt, Tancook Island N S writes: "I have two children, the baby is four and six months old. I have used Baby's Own Tablets for them for the past 20 years and can truthfully say I think they are the best medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so."

Baby's Own Tablets are sold by all medicine dealers or will be mailed up on receipt of price, 25 cents a box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Trappers Made Profit

The prairie fur trade of the region from Lethbridge to Medicine Hat would not be complete without trappers' records financially, and many trappers from that district have done well. Furs trapped and shipped are: badger, kit fox, weasel, rabbit and coyote, and the representative furnishes claims to have averaged over the year $60 or seven weeks $10 to $15 per day

---

To have the children sound and healthy is the first care of a mother They cannot be healthy if troubled with worms Use Mother Graves' Worm Exterminator.

Missed the Compliment

A clever girl, deliciously pretty but decidedly low-brow, somehow found herself at a dinner party given by a famous society woman.

Sour Stomach

Sour stomach is caused by too much acid—and you can't depend on crude methods. Simply the best way yet evolved is all the rage of scorching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia—prescribed by physicians for 50 years in correcting excess acids. Small bottle contains full directions.

THE TOFIELD MERCURY

Published Every Wednesday at Tofield, Alberta

W. Worton, Publisher

Wednesday, April 4th, 1928

A WELL KNOWN FIGURE GONE

MR. WEATHERILL, in the flesh is no longer with us. For fifteen years he faithfully devoted himself to the affairs of the Rural Municipal District of Cornhill, and to the last was kind, courteous and attentive to all who had business with the municipality.

His passing came as a shock to many people, all of whom would have liked to see the departed gentleman have several years nice quiet retirement after many years of arduous labors.

During the course of our daily duties we often came in contact with the late Mr. Weatherill, and we always found him, kindly considerate and he always was a perfect gentleman.

We ask to be pardoned for quoting a statement concerning him which was made to us. Discussing his passing, a gentleman said, "I have known him for many years, and never heard him say a bad word about anybody."

The sympathy of the Mercury is extended to the bereaved ones.

TAKE CARE

Germination tests of wheat which has been threshed this spring prove that the vitality has been badly damaged. If there is a widespread planting of this spring threshed wheat disastrous results will follow. The directors of the Alberta Wheat pool are greatly concerned over this menace and urge farmers to have their seed tested for germination.

TAKE ALL IN WESTERN CANADA

Foot-rot or root-rot diseases appear to be doing considerable damage to the cereal crops of Western Canada. These diseases are caused by fungous parisites which attack the crown and roots of wheat and related plants, interfering with the root development and the tillering of the plants. As a result, the yield and quality of the grain may be materially reduced.

One of these diseases is called "take-all." Take-all is primarily a disease of wheat, although it also attacks barley, rye and several of our native and cultivated grasses. Oats are apparently immune to it. Take-all was not definitely recognized in Western Canada until 1922, but it is probable that it has been present in the wheat in certain districts ever since the country was first settled. Traces of this disease are often found in the first crop of wheat on new land. by the seed, experiments have proven

As far as we know, it is not carried that the causal fungus can infect several of our native grasses; therefore it is able to spread from any infected grasses to wheat when the sod is broken. Continuous cropping to wheat tend to increase the amount of the disease until as much as one third of the crop may become affected. The damage done by take-all varies greatly from year to year, depending, apparently, largely upon weather conditions.

A study of take-all has been conducted for several years in Saskatchewan. Annual field surveys have been made and field experiments carried on during the growing season; many experiments were conducted in the greenhouse and laboratory during the winter. The main aim of this research is the control of the disease.

From these investigations it would appear that crop rotation is an important factor, and above all, the main thing is to avoid continuous cropping to wheat of new land, especially when infested with the disease. Farmers should, therefore, always be on the look-out for any suspicious symptoms and if in doubt, communicate with any of the dominion experimental farms, or the address given below.

R. C. Russell,
Dominion Laboratory of Plant Pathology, University of Saskatchewan, Saskatoon, Sask.

The following are some flashes from the address of Cyril T. Young, F.R.G.S., delivered before the joint meeting of the Edmonton Board of Trade and Canadian Club onMonday, the 2nd instant.

The annual per capita value of United States exports is $100.00; of Great Britain $190.00; of Canada $250.00.

Norway has the greatest water power development of any country. Canada comes second; but Norway's water power possibilities are ninety per cent developed while Canada's are only twelve per cent developed.

During 1927 Canada exported to the States one half of that country's paper requirements, the value being $172,000,000.00.

The Paper Manufacturer's Association has constructed a school of research, at a cost of three and one-half million dollars, near McGill University, Montreal.

Mining will be Canada's greatest industry.

The Hollinger Mine employs three thousand men. Its hoists each bring three thousand pounds of ore to the surface from the bowels of the earth at the rate of half a mile a minute.

One paper mill each day turns out a five foot roll of paper that would stretch from Toronto, Ontario, to Brandon, Manitoba.

Equipped Farms Wanted

We placed Mennonites on the Trent Ranch. We can place a limited number of these settlers in time for the coming season's work, if farms are listed immediately.

All our Mennonite settlers have had farming experience in Western Canada.

Canada Colonization Association

Subsidiary of the Department of Colonization and Development

Hunt, Kilburn Limited,
District Representatives,
Telephone 4611. 700 Tegler Building, Edmonton.

We believe the best private electric light and power plant made in the Americas is the KOHLER Automatic. To the first farmer placing a Kohler plant on his farm in this district, we will make an attractive proposition. Come in and ask us about it.

KOHLER OF KOHLER

Automatic Electric Plants—no Battery D.C.

W. WORTON, Kohler Representative
TOFIELD, ALBERTA

"Brown is a very good shot, isn't he?"

"Very good. We were practising with our guns out in the country the other day, and he hit the bull's eye the first time."

"That was very accurate shooting, wasn't it?"

"Yes, but Brown had to pay for the bull."

—:0:—

Wife—"Your honor, he broke every dish in the house over my head, and treated me cruelly."

Judge—"Did your husband apologise or express regret for his actions?"

Wife—"No, your honor; the ambulance driver took him away before he could speak to me."

—:0:—

Binks: I hear you are looking for a cashier?

Jenks. Yes, I am.

Binks: But I thought you got one two weeks ago.

Jenks: That's the one I'm looking for now.—"The Scratcher."

—:0:—

The following jokes are also from "The Scratcher"

The tired flea o'erslept himself
Nor waked till after dawn;
Observed the kennel tenantless,
And sadly moaned, Dawg-Gawn.

Protect Our Forest Resources

Among the varied natural resources which go to make up Canada's enormous potential wealth, the forests occupy a most important place. As is now generally known Canada has within recent years moved into first place among the nations of the world in the production of paper, having passed the United States which up to a few years ago was the world's largest producer. The great development of water powers, now so marked a feature of Canada's industrial progress, has been largely brought about because of the growth of the pulp and paper industry. This water power development is, however, vitally affecting the whole life of the Dominion.

Apart from the pulp and paper industry the forests have an influence, and play a direct part upon practically every department of Canada's national life whether it be the social, economic, financial, agricultural or industrial. It is of the utmost importance, therefore, that the forests of Canada be protected and conserved.

In full realization of this fact, the Dominion Government has by royal proclamation issued by His Excellency the Governor-General, set apart the week of April 22 to 28 as "Canadian Forest Week." Statements contained in this royal proclamation may serve to bring home to Canadians the effect and value of forests in ways to which they have given little thought. In this proclamation the following facts are emphasized:

1. Our national income depends on our forest industries more than on any other source except agriculture.

2. Our forest industries depend on the timber crops now standing ripe in the forest, and their very existence is jeopardized by any preventable wastage of these supplies. The future of the forest industries depends on the young growth and immature timber of today, and the prosperity of these industries will be in direct proportion to the care and protection afforded this growing timber.

3. Our water-powers depend upon the stability of stream flow throughout the year, the equilibrium of which is disturbed by denudation of the forest cover in the drainage basins resulting in alternate periods of floods and low water.

4. Our irrigation works demand protection—forests are the fountain-head of irrigation.

5. Our agricultural lands depend on distant watersheds for the maintenance of subsoil moisture during the growing period, and are robbed of productivity by wasteful run-off which occurs when the forests are destroyed.

6. Our game and fur-bearing animals depend on the forest for their natural protection, and decrease in numbers or retreat to more remote regions as the forest cover disappears.

7. Our tourist traffic depends in a great measure on scenic and other attractions offered in such abundance by the forest and would be seriously affected if verdant woodlands be transformed into desolate wastes.

This enormously valuable asset to any country—and Canada is among the wealthiest in forest resources among the nations of the world—is threatened by two dangers both of which are man-caused and therefore preventable.—(1) Almost universal carelessness with fire in the forest, resulting in the destruction, not only of timber and young growth, but of the very soil which produces it, and (2) the use of wasteful and destructive cutting methods without any thought of ensuring a new crop.

It is in recognition of all these facts that during "Canadian Forest Week," April 22 to 28, which is also the beginning of another season of travel and recreation in the forest with attendant fire danger, the people of Canada are officially urged to resolve for another year to recognize the situation as set out in the royal proclamation and to give careful heed to the information issued by the several forest authorities and agencies in Canada to the end that all may be encouraged to a sustained and patriotic effort in promoting the conservation of this valuable resource.

The Worm Has Turned

Union For Men's Rights Is Organized In Tibet

Masculinists are on the march in Tibet. There women's rights have been achieved. Every woman has at least three husbands whom she keeps or casts aside at will. A discarded husband is an outcast from society. And all except the favorite husband must work for the wife.

One of these working Tibetan husbands, Amouki by name, has seen what feminism leads to, risen above the ideology of his environment, and organized a union for men's rights. He and some five hundred desperate followers have even tramped to the holy city of Lhasso with a banner inscribed "Striking husbands of Tibet" and with placards reading "Down with the tyranny of women." "Men must have financial independence," "Abolish polyandry." The outcome is not yet known. At last reports, the rebellious husbands had not returned home.—The Outlook, New York.

School For Immigrants

The Saskatchewan Government has a community school scheme to provide adult immigrants from Europe with a thorough knowledge of the language, history, ideals and cultural methods of Canada.

Western Canada Range Areas

There are between five and six million acres of leased range lands in Saskatchewan and Alberta.

Cuts-Burns
Vicks' healing, antiseptic ingredients bring soothing relief. Apply gently.
VICKS VAPORUB

Praise For Canadian West

Success Assured For Those Who Are Willing To Work

Let it be thoroughly understood by all intending immigrants that the Canadian prairie either makes or breaks the man who sets out to subdue it. Prizes there are to be won, without a doubt. Broad areas of fertile wheat land regularly yielding their vast stores of golden grain. Great herds of sleek cattle dotting about the emerald hills in summer, or safely sheltered inside snug buildings in the winter. Big, warm, comfortable houses, furnace-heated, their basements piled with stacks of wood and coal. Lavish tables spread with wholesome food in such profusion as the Londoner never dreams of. Automobiles, radios, telephones, electro-power—everybody can have them. Prosperity and abundance are within reach of all who have enough tenacity to forge and use the magic key—work. — Wide World Magazine (London.)

A TIRED FEELING IN SPRINGTIME

Not Sick, But Not Up To the Mark—You Need the Help Of That Sterling Tonic, Dr. Williams' Pink Pills—They Give New Vitality.

With the passing of winter many people feel weak, depressed and easily tired. The body lacks the vital force and energy pure blood alone can give. In a word, while not exactly sick, the indoor life of winter has left its mark upon them. A blood-building, nerve-restoring tonic is needed to give renewed health and energy. Dr. Williams' Pink Pills are an all-year-round blood builder and nerve tonic, but are especially useful in the spring. Every dose helps to make new, rich, red blood, and with this new blood returning strength, cheerfulness and good health quickly follow.

If you are pale, easily tired, or breathless at the least exertion, if your complexion is poor or you are troubled with pimples or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you have twinges of rheumatism, are subject to headaches and backaches, if you are irritable and nervous, if your sleep does not refresh you, or your appetite is poor, you need the treatment Dr. Williams' Pink Pills alone can give—you need the new blood, new strength and new energy this medicine always brings. Mr. A. Marcotte, North Hans, Que., writes:—"I have found great benefit from the use of Dr. Williams' Pink Pills. Before I began using them I was in a badly rundown condition, and at times felt scarcely able to work. Dr. Williams' Pink Pills have changed all this and since taking them I am enjoying the best of health. Every man who feels rundown and easily tired should give this great medicine a fair trial."

Try Dr. Williams Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer, or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Settlers Making Good

Alberta Board Reports Payments Met By Large Number

Sixty-five per cent. of the settlers on land under the Calgary District of the Land Settlement Branch have already met their payments thus far in the year which ends June 30, 1928, according to W. S. Woods, superintendent of the Board in Calgary. More than $513,000 has been collected, out of $765,000 due, and the board has security upon wheat pool assignments yet to be realized upon covering deferred payments on more than 200,000 bushels of wheat. This is regarded by officials of the board as a particularly good showing.

A French astronomer now figures that the sun will continue to supply us with heat and light for 150 billion years.

Every man knows some other man who is smarter than himself, but he does not like to admit it.

Millions For Publicity

National Advertisers Spent $223,000,000 in 1927 in Newspaper Advertising

National advertisers spent $223,000,000 for newspaper advertising in 1927, the bureau of advertising of the American Newspaper Publishers' Association has announced.

Estimates showed that 333 companies had expended $122,500,000, of which the greatest sum, $32,505,000 was spent by 57 automobile concerns. Eighty-two food advertisers spent $24,045,000, and 14 tobacco companies spent $15,280,000.

Externally Or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Eclectric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Sight Makes a Difference

Race Horses Always Run Faster If They See Well

The horses that run fastest are those that can see best. Tests made with special instruments and powerful lights in an attempt to increase the speed of race-horses have shown that one horse out of every ten suffers from defective sight.

To correct this, racers were fitted with odd-shaped spectacles, and it is said that the animals' time for a quarter of a mile was often bettered by as much as three seconds. Many circumstances affect a horse's speed, but numerous tests with and without glasses have proved that sight does make a difference.

It is part of the Turkish religion to care for all people of Turkey.

PAYS FINE TRIBUTE TO A GERMAN DIPLOMAT

Lord Grey Refers To Sterling Character Of Prince Lichnowsky

Lord Grey of Fallodon, opening a new institute and training centre for the blind at Leeds, paid a tribute to the late Prince Lichnowsky, who, he said, did a great work for peace. Lord Grey said:

Prince Lichnowsky, whom the lord mayor very truly described as a great friend of mine, was the German ambassador in this country at the time of the outbreak of war. I was very closely associated with him for two years. During the London conference of 1912 I saw how earnestly he worked for peace, and on that occasion happily with success. In 1914 he worked no less earnestly for peace, but was unable to avert the catastrophe of war.

I will not say anything for a moment today upon the question of war responsibility. There will always be a great propaganda on the subject which will do more to obscure than to reveal the truth. Historians will differ in their accounts of the causes and the conduct of the war, according to their personal feelings and national prejudices; but I hope that history will give an honored place to the men of high position who did all they could to avert war, and amongst them Prince Lichnowsky's name must always have an honorable place.

We in this country should remember him favorably, because at a time when in Germany the public men of this country and British policy were the subject of intense misrepresentation he had the courage and fairness in his own country to speak the truth about us. I trust that those efforts for peace, though they failed to avert the Great War, will not be without fruit in an example for the future generations, and I hope that men of the same character and determination to avert war will be found, at moments of political crises, in the places of responsibility. I read with deep regret news of his death, for he did a great work for peace.—London Times.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc there. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Canadian System Best

Earl Of Elgin Thinks General Hospital Gives Best Service

An address on Canada was given by the Earl of Elgin, who recently toured this country, in the Victoria Hall, Helensburgh. In the course of his address, which was illustrated with limelight views, he said the people in Scotland could very well adopt the Canadian system of hospitals. In place of the private nursing home and the general hospital as separate institutions, one large hospital provided treatment for private paying-patients in separate wings of the same building to which non-paying patients were also admitted. The result was that the services of the best doctors and the most up-to-date equipment were available to all.

Canadian War Ace Feted In Germany

Colonel Bishop, V.C., Made Member Of German Ace Association

Colonel Bishop, V.C., interviewed on his experiences in Germany where he was the guest of honor of the German aces, said that quite unexpectedly he found famous aviators coming up and saying they were proud to make his acquaintance. They knew him as the Canadian who shot down 72 German machines during the war but now that the war was over they said they were no longer enemies but comrades who had all been doing their duty. They invited Bishop to lunch at the Aero Club.

Udet, who shot down 62 allied planes, came to Berlin specially to meet Bishop.

On proposal of Udet, Bishop was made a member of the German Ace Association. Bishop humorously replied that he deserved the honor for he was accused of crashing more British planes than the German had ever done.

It was recalled that Richthofen was given full military honors when he was shot down and that other German aviators, when captured, were made members of British messes and treated as guests of honor.

Apples Will Be Marked

Canadian Fruit Sent To England Designated As Such

A Canadian apple on the British market will soon be known and designated as such, according to a report received by cable from J. Forsyth Smith, Canadian fruit trade commissioner to Great Britain. In the past Canadian, Australian and other apples imported into Great Britain have simply been sold as apples. According to the new recommendation by the standing committee for agriculture and horticulture produce both retail marking and container marking on imported fruit will become law under the British Merchandise Marks Act.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath, too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Takes Out Many Patents

New Jersey Boy One Of Youngest Inventors

Fred T. Roberts, Jr., is one of the youngest inventors in the United States. At the age of ten he made his first invention and now, twelve years old, he has taken out seven patents.

His latest device, soon to be placed on the market, is a tool for raising automobiles without putting the jack under the axle. He thought of the idea while changing a tire, which had settled in the mud, for his mother.

A clip, placed over the spring, has an opening into which fits a bar 19 inches long. The jack may be placed anywhere under the bar.

Four Great War Figures

The premier of Britain when the great war broke out, the British commander-in-chief on the main front, the German ambassador to Britain in August, 1914, and Marshal Diaz, Italian commander-in-chief in the war—all died within a few weeks.

Long Air Trip Completed

Woman Has Finished Flight From England To Australia

The longest flight ever undertaken by a woman has been completed at Port Darwin, Australia, Mrs. Keith Miller and Capt. W. N. Lancaster, flying a two-seater light plane, the Red Rose, arrived here from Croydon, England, a flight of 13,000 miles. The couple started from England on October 14, and carried their luggage in two suit-cases. En route they met with several mishaps, the worst of which was at Muntok, Banka Island, Dutch East Indies. Mrs. Miller's nose was broken, and Capt. Lancaster's lip cut, and it was doubtful for a time whether they could continue their flight. The plane was repaired, however, and they covered the scheduled stages without further incident. The flyers intend to continue to Sydney, N.S.W.

Drill For Oil Near Cochrane

Denver capital will drill a test well in search of oil north-west of Calgary not far from Cochrane. Toronto interests will drill in the Suffield field in Southern Alberta. Both are closed corporations with no stock for sale.

"Ma, you were wrong about the wedding," bawled little Tommy, his mother having come in late.

"What do you mean?"

"You said Mr. Flubdub was going into it blindfolded, but he didn't."

FINISH SURVEY OF H. B. LINE TO FORT CHURCHILL

Winnipeg. — The Hudson's Bay Railway line has been surveyed as far as Fort Churchill and after four month's work in the North country, Major J. L. Charles, reconnaissance engineer of the Canadian National Railways; H. R. Wilkinson, locating engineer, and other members of the party of 24, have returned to Winnipeg.

"We reached the Bay on March 8," Major Charles said, "and left for home on the 19th." They travelled by dogs to the team road, 442 miles out from The Pas, covering a distance of 80 miles in two days. After camping a day, they took horses to the end of steel, mile 356, and came into Winnipeg by train. "We have had a very mild winter," the engineer said, "and lost only six out of our 60 dogs."

"A week ago Sunday the snow was melting at Churchill. The two Eskimos who arrived on St. Patrick's Day with the mail, which had been relayed by way of Eskimo Point, 150 miles away, had some difficulty because the mud runners of their sleighs thawed out." He explained the Eskimo custom of smearing mud on their runners and freezing them. "It is a very good practice, so long as the weather keeps cold. We had the Eskimos to dinner with us the day we left and our pork was quite a novelty to them."

The Department of Railways and Canals had a big gang of men working on the harbor at Churchill, Major Charles mentioned, and the wireless station was in operation, manned by three men. They kept in constant touch with the aeroplane patrol over Hudson Straits.

The contractors, Stewart and Cameron, were pushing the work of building the railway, he stated, and all was in readiness for the summer. Two draglines were out and ditching was going on north from Mile 356. Camps had been erected and caches were established. Supplies were all in readiness for the army of men which would commence grading as soon as the weather allowed. Donald Grant, superintendent of construction for Stewart and Cameron, who has just returned from a trip which took him as far as Deer River, about 60 miles on southwest of Churchill, says that by the end of May there would be at least 1,200 men on the job.

Viscount Cave Dead

Recently Resigned Post Of Lord Chancellor Owing To Ill Health

Burnham, Somerset, Eng. — Viscount George Cave, who recently resigned as Lord Chancellor after a distinguished career at the Bar, died March 29.

Viscount Cave, who was born in 1856, held various posts in the British Government since 1913, becoming Lord Chancellor in 1922.

He was appointed solicitor-general in the first coalition cabinet in 1915, and later named by Premier Lloyd George for the home secretaryship. He was created a Viscount in 1918.

Previous to entering high government office he was a member of parliament.

U.S. Wants Canadian Students

Because Educational System Is More Thorough Says English Editor

Hamilton, Ont.—People know little of Canada if they do not know that it is a land of cold winters, cool heads and warm hearts, John Walter, co-proprietor of the Times, London, Eng., told a large gathering here when he spoke at a Canadian club luncheon.

Referring to the exodus of Canadian students to the United States, Mr. Walter said the Canadian educational system is so thorough that United States institutions seek their services.

H.B. Railway Construction

Work Will Commence In Earnest As Soon As Snow Goes

Winnipeg.—Work on the Hudson's Bay Railway will commence in earnest as soon as the snow goes, according to Donald Grant, superintendent of construction for the Stewart Cameron Company, which has the contract for the remaining 154 miles yet to be built. Mr. Grant said there were from 200 to 300 men on the job at present and that in another month a great many more would be sent out. By the end of May, Mr. Grant expects there will be at least 1,200 on the job.

Apply For Railway Charters

3,280 Miles Of Railway In Canada Involved In Applications

Ottawa.—Hon. C. A. Dunning, Minister of Railways and Canals, informed the railway committee of the House of Commons that charters for 3,280 miles of railway in Canada were being applied for by companies other than the Canadian National and the Canadian Pacific Railways. The cost of this mileage he estimated at about $173,000,000.

In addition, there were applications before the provincial legislatures which brought the total mileage up to approximately 4,400, with an estimated cost of $242,000,000. This did not include equipment and when it was supplied the total cost would approximate $300,000,000.

The minister told the committee it was not possible at present to lay down the principle that no more charters were to be granted to companies other than the Canadian National and the Canadian Pacific Railways.

On the other hand, the Government was of the opinion that with the exception of railways, which were required for the development of mining properties or something of that nature, the two great railway companies could take care of the work. The committee would of course, give consideration to the applications which came before it.

At the opening of the meeting F. S. Cahill, Liberal member for Pontiac, was again elected chairman of the railway committee, and Dr. A. M. Young, Liberal, Saskatoon, deputy chairman.

The first bill considered was that of H. A. Stewart, Conservative member for Leeds, designed to place the issuing of licenses for the export of electric power under the control of parliament rather than with the governor-in-council. This bill was reported.

Two bills covering construction of railways in Western Canada were considered next. The first, sponsored by G. G. Coote, U.F.A. member for Macleod, asked for a charter for construction of the Highwood Western Railway Company. The second applied for an extension of time for the construction of the Calgary and Fernie Railway Company. It was introduced by F. W. Gershaw, Liberal, Medicine Hat.

Taking Risk On Dirigible

Lloyds Will Protect R-100 On Flight Across Atlantic

London.—A syndicate of underwriters at Lloyds is understood to have undertaken the risk of insuring the British dirigible passenger liner R-100 for its forthcoming flight across the Atlantic.

The rate, about 20 guineas per hundred, is looked upon as moderate, indicating the confidence of the syndicate in the ship's ability to make the flight successfully.

If the ship comes down at sea and is damaged, the underwriters will pay the cost of repairs, while if she is lost altogether they will pay to the limit of the insurance.

The dirigible, which is expected to make its first flight this spring, is equipped with six 700 horsepower engines, can reach a speed of 80 miles an hour, and has a cruising range of more than 5,030 miles.

It is designed to accommodate 100 passengers and to carry 10 tons of mail.

Officially Withdraws From Public Life

Lindbergh Weary Of Admiration Prefers Role Of Normal Citizen

Washington. — Acclaimed as no other individual in the history of the nation, Colonel Charles A. Lindbergh has officially withdrawn himself from public focus to follow his long cherished pursuit of a normal citizen.

Weary of the admiring masses, decoration ceremonies and the constant formal affairs in his honor, the youth calmly contemplated the future and how best he might acquit himself in the interest of his lone hobby. "Lindy" doesn't know what he's going to do just yet.

Was Prominent Solicitor

London.—Hon. Sir Charles Russell, prominent solicitor, aged 63 years, is dead. He was solicitor for the Dominion of Canada and acted as solicitor for the British Government in the Behring Sea arbitration between Great Britain and the U.S. in 1893.

Red Cross Official Dead

Basle, Switzerland.—Dr. Bohny, president of the International League of Red Cross Societies, is dead here. During the war he was in charge of arrangement for exchange and transport in Switzerland of the wounded prisoners of all armies.

Not Feasible For Canada

U.S. Bank System Impossible In Dominion Says Governor Harding

Ottawa.—A federal banking reserve system, organized on the same basis and along the same lines as the U.S. system, would be almost impossible in Canada.

This was the opinion expressed by Governor W. G. P. Hardin, of the Federal Reserve Bank, Boston, before the banking and commerce committee of the House considering a possible improvement in Canada's banking system.

The Federal reserve board of the United States was in no sense a bank, Governor Harding told the committee. "It cannot loan anybody five cents," he declared. "It exercises a general supervision of the twelve Federal Reserve Banks in operation. It can fix the character of the security which may be accepted but cannot compel a bank to make a loan."

Experiment With Fertilizer

Alberta, Saskatchewan, and Manitoba View Shipments Of Superphosphates From Trail Smelter

Winnipeg.—Manitoba is participating in experiments that are being made with the use of superphosphates from the Trail smelter in British Columbia, as a fertilizer, J. H. Evans, deputy minister of agriculture, stated recently when commenting on reports that six cars of the by-product had been shipped to points on the prairies.

The results of the experiments are being watched with great interest.

Saskatchewan and Alberta have also got their share of the shipments, the idea being to make tests of the fertilizer over as wide a range of territory as possible, Mr. Evans said.

ONTARIO BOARD WILL HANDLE ALBERTA COAL

Toronto.—The office of fuel controller, established during the war, has assumed a new importance in view of the Dominion government's action in requiring the railways to transport Alberta coal to Ontario, Premier Ferguson stated in the legislature in connection with the voting of an item for the fuel controller's office. A board was being set up to look after the handling of the coal and the Ontario representative would be the fuel controller.

It would be the duty of the board to see that the proper type of coal was brought east, Mr. Ferguson said. He suggested that in his opinion the railways should not be allowed to transport any coal not approved by the board.

Asked how the coal was to be distributed, the premier said: "I hope that we will have an organization created. I would like to see the Alberta government establish an office here, which would serve as a distributing centre and an information bureau. Persons wishing to buy the coal could arrange for it through such an office." It was not the intention of the government to take charge of distribution, he said, as had been done with the trial shipments.

Ottawa.—"Those engaged in coal operations in British Columbia have not made representations as to getting into the eastern market," was the answer given by the Government to a question asked by A. W. Neill (Independent, Comox-Alberni), as to whether or not the Government would extend the test movement rate on Alberta coal to coal from British Columbia with a pro rata increase for the extra distance.

NOTED ARCTIC EXPLORER

Vilhjalmur Stefansson, Arctic explorer, who is trying to prove men can "live off the land" in the north by strict meat diet for a month. He claims his all meat diet will not bring on scurvy as is generally believed.

For Promotion Of Peace

Miss McPhail's Motion For Creation Of Peace Department Is Withdrawn

Ottawa.—After a lengthy debate in the House, Miss Agnes McPhail withdrew her motion for the creation of a department for the promotion of peace. Miss McPhail expressed the hope that between now and next session the government would set up some agency to tell what was being done for the promotion of peace.

Miss MacPhail said: "While we have a superiority complex which nothing can puncture, there will always be danger of war. It can't be true that we can always be right."

Women, she said, were keenly aware of war. They placed a higher value on human life because they suffered so much for it and for this reason they should have a voice in Parliament. The sacrifices of 1914 to 1918 should be crystallized into something which should prevent the recurrence of war.

Sir George Perley (Conservative, Argenteuil), said the League of Nations had performed commendable work in preventing wars and solving labor, health and other social problems. But something should be done in the way of bringing to the direct attention of the people of all countries the object and benefits of the League. In Canada the League of Nations Society with headquarters at Ottawa might be profitably utilized for educational purposes of this nature.

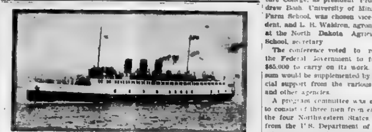
Hockey Titles Come West

Both Senior and Junior Amateur Trophies Annexed By Prairies

Ottawa.—The West climaxed its challenge for supremacy of the Dominion's amateur hockey circles when Manitoba University trimmed Montreal Victorias 1-0 here to lift the Allan Cup and carry it westward to keep the O.H.A. Memorial trophy, emblematic of the junior hockey title, company in its new home. Regina Monarchs won the O.H.A. trophy when they beat the Ottawa Gunners, and the victory for the Varsity made a clean sweep of the titular boards. The Allan Cup carries with it the all-Canada senior championship.

B.C. Eggs Shipped To New Zealand

Auckland, N.Z.—The arrival of 10,800 dozen British Columbia eggs on the Canadian-Australian liner Aorangi has caused a drop of between 2 and 4 cents a dozen in the price of eggs at Auckland. The eggs landed in splendid condition and they proved an unpleasant surprise for local producers.



Will Serve Vancouver Island

"The Princess Elaine," newest member of the Canadian Pacific Railway's Royal Family of steamships, now on her way to Victoria, V.I., via the Panama Canal, from the shipyards on the Clyde, Scotland. The vessel will be used for service between Vancouver on the mainland and Nanaimo on Vancouver Island across the Straits of Georgia, a distance of 40 miles, and is further qualified to ply between Seattle on the south and Skagway on the north. She will have a speed of 18 knots, is 2,000 tons gross register, will have accommodation for about 1,200 passengers, and is specially designed for the transportation of automobiles, a turntable being installed to reverse cars for disembarkation. On her trial runs on the Clyde the Princess Elaine did over 19 knots.

Discuss Activities Of Communists In Canada

Country Being Flooded With Red Literature Senate Is Told

Ottawa. The Senate recently discussed the dangers of Communistic propaganda in Canada and heard an address delivered at length by Senator C. P. Beaubien, who enquired what measures were being taken by the Government to repress the evil. Various religious bodies had petitioned the Government to close Communist schools, the Ukrainians in Canada fell easy prey to the Red agents.

There were 40 such schools in the country, attended by 2,000 children, said Senator Beaubien, while Labor Temples were also used for Communist meetings. Immigrants were taken there to listen to these doctrines. The country was being flooded with Communist literature.

Senator Griesbach declared that the Communist was the enemy of the Socialist and the Labor man. He assured the Senate that the Royal Canadian Mounted Police knew of these activities and kept the Government informed.

Senator Dandurand affirmed that the Government was watching the Communist movement closely. Senator McMeans declared that the Government for two sessions had sought to amend the law to prevent the deportation of anyone. It was the Government's duty to deport the enemies of the constitution.

Success Attends Spring Threshing

Alberta Wheat Grading Higher and Bringing a Better Price Than Last Fall

Montreal. — "Snowed-up spring wheat now being cut and threshed is grading higher and bringing a better price than that cut at the regular season last autumn. At least that applies to a number of farms in Alberta, notably a large 12,000-acre farm near Calgary, upon which only part of the crop could be cut last year," according to T. O. F. Herzer, manager of the Canada Colonization Association, Winnipeg.

"This goes to show that fortune sometimes smiles at the most unexpected times," he said, "for, in this case, instead of suffering a small or a large loss, the crop actually yielded an increase."

Mr. Herzer said that many of the farmers placed by the association were paying off their farms long before their 15-year terms were up.

Since the association was taken over by the Canadian Pacific Railway, under its department of colonization and development, in January 1925, it had placed 2,432 families of about 12,380 members on the land in Western Canada. This year to March 20, 81 families have been settled on 17,771 acres.

CANADA AND U.S. JOIN TO FIGHT RUST MENACE

Fargo, N.D.—Representatives of four Northwest spring wheat states, North and South Dakota, Minnesota and Montana, and three Canadian prairie provinces, Manitoba, Alberta, and Saskatchewan, formally launched an organization here to further the development of better quality wheat that is rust resistant and immune from stains.

The group, which is to be known as the hard spring wheat conference, named Dr. John Lee Coulter, president of the North Dakota Agriculture College, as president. Prof. Andrew Boss, University of Minnesota Farm School, was chosen vice-president, and L. R. Waldron, agronomist, at the North Dakota Agricultural School, secretary.

The conference voted to request the Federal Government to furnish $65,000 to carry on its work. This sum would be supplemented by financial support from the various state and other agencies.

A program committee was chosen to consist of three men from each of the four Northwestern States, three from the U.S. Department of Agriculture, one consulting member from each of the provinces and a member representing the Dominion of Canada.

Following are the Canadian representatives:

Manitoba, W. T. G. Weiner, Winnipeg.

Saskatchewan, Dr. J. S. Harrington, Saskatoon.

Alberta, Dr. Robert Newton, Edmonton.

Dr. C. H. Goulden, Winnipeg, will represent the Dominion of Canada.

BILL PROVIDES FOR NEW GRADES OF SPRING WHEAT

Ottawa. Amendments to the Canada Grain Act to provide for grades for the large number of new wheat varieties grown in the prairie provinces will be made by Parliament this season. Announcement of this is contained in notice of a Bill which appears on the order paper.

The Bill is being introduced by Hon. James Malcolm, Minister of Trade and Commerce, and in addition to providing for a number of entirely new grades for new varieties of wheat it is providing for some new grades for oats and revamping of the grades for barley.

The act as it stands now does not provide any grade for certain of the new wheat varieties developed within the past few years.

In regard to wheat, the Bill proposes to amend section 94 of the act to provide as follows:

"No. 1 Canada Western hard white spring wheat shall include all varieties of white spring wheat equal in value to quality wheat. It shall be matured, cleaned and weighing not less than 60 pounds to the bushel and practically free of damaged kernels and shall contain 60 per cent. of hard white kernels. It may contain 50 per cent. of red spring or winter wheat. It shall not contain, singly or in any combination, more than one per cent. of Amber Durum, Red Durum or Kota wheat.

"No. 2 Canada Western hard white spring wheat shall include all varieties of white spring wheat equal in value to quality wheat, shall be clean, weighing not less than 59 pounds to the bushel, and shall contain 45 per cent. of hard white kernels. It may contain 5 per cent. of Red Spring or Winter wheat and shall not contain singly or in any combination, more than two per cent. Amber Durum, Red Durum or Kota wheat.

"No. 3 Canada Western spring wheat shall include all varieties of white spring wheat which are excluded from the preceding grades on account of damage and shall be reasonably sound and reasonably clean, of fair milling quality, weighing not less than 57 pounds to the bushel. It may contain 10 per cent. of red spring or winter wheat. It shall not contain singly or in any combination, more than 5 per cent. of Amber Durum, Red Durum or Kota wheat.

"No. 4 Canada Western spring wheat shall be white spring wheat excluded from the preceding grades on account of damage and shall be reasonably clean, weighing not less than 55 pounds to the bushel. It may contain 20 per cent. of red spring or winter wheat. It shall not contain singly or in any combination, more than 10 per cent. of Amber Durum or Kota wheat.

"No. 5 Canada Western white spring wheat shall be white spring wheat excluded from the preceding grades on account of damage, and shall be reasonably clean, weighing not less than 53 pounds to the bushel. It may contain 30 per cent. of red spring or winter wheat. It shall not contain singly or in any combination, more than 10 per cent. of Amber Durum, Red Durum or Kota wheat."

Propose General Smuts For Defence Minister

Former South Africa Premier Suggested For British Post

London. The striking suggestion that General Jan Christian Smuts, former premier of South Africa, and present leader of the opposition in the South African parliament, should be appointed to fill the post of Minister of Defence in the British Government if the Liberal proposal for the combining of the three fighting forces, land, sea and air, should be carried into effect was made in the House of Commons by Commander C. Bellairs, Conservative member for Maidstone. Commander Bellairs based his suggestion on the fact that General Smuts was not only an eminent statesman, but a great soldier.

"If we could only bring Gen. Smuts home he would make a very good Minister of Defence," the commander said, "but he would have to be free of the trammels of being elected to parliament here."

Have Withdrawn From Council

Winnipeg. — The United Grain Growers, Limited, and the Grain Growers' Guide, two commercial organizations identified with the Canadian Council of Agriculture for a number of years, have withdrawn from membership in the council, it was officially announced here.

DEBATE WELL ATTENDED

An interesting debate "Tractors vs. horses," was held at the Variety Theatre on Saturday last. The Tractor won out by a safe margin. Those debating were, for the tractor, H. McGinitie and E. Stauffer, and for the horse, Reg. Beariste and J. Francis. There was a good crowd present, the debate being held under the auspices of the local U.F.A.

All debaters put forth good arguments for their side and the speeches were not devoid of humor. One good repartee was made when the tractor side claimed that the tractor was not eating when it was not working. The horse side came right back at them and claimed that the horse was not eating when it WAS working.

It is rarely however that the eloquence and persuasive qualities result in a debater changing his mind to the extent of purchasing something which he has debated against. Yet J. Francis bought a tractor from Frank Ball this week. Mr. McGinitie's and Mr. Stauffer's arguments certainly were forceful.

COMMUNICATION

Dear Sir

Will you kindly give me space in your paper to thank all my neighbors and friends for their many kind acts during my residence in Tofield district and especially those who attended my sale and helped make it the great success it was, although I might say that a great deal of the credit must go to Jim Hannan the auctioneer, who's work was more than satisfactory to me. I feel sure that my sale could not have been better conducted by any auctioneer in the province and feel safe in saying that anyone contemplating an auction sale will make no mistake in securing the services of Mr. Hannan.

Again thanking all my friends,

I am, Yours sincerely,

W. TEWARD.

Easter Day Services at
HOLY TRINITY CHURCH

11:00 a.m. Holy Communion and short address.
3.00 p.m. Holy baptism if desired.
7.30 Evening Prayer and Address.

Special Easter music at both services. It is hoped Mr. Carey will sing at the evening service.

Rev. A. A. Adams, Priest-in-Charge

THE END OF THE ROAD FOR SATURDAY

The famous picture, "The End of the Road," is billed to be shown at the Variety Theatre on Friday and Saturday of this week. This picture deals with a difficult question in a frank and sensible manner, and in such a way as to earn the approbation of ministers, social workers, etc. It teaches forceful moral lessons and one is the wiser for having seen it. No one under the age of 16 admitted.

W.I. NOTES

Our regular monthly meeting will be held on Tuesday next April 10th, in our rooms. We hope for many new members. Come and enjoy our programmes. We have them all ready for each month and we know that our afternoons spent in the Institute will be well spent. We very much regret losing one of our valued members in Mrs. Spencer. At one of our executive meetings a token was handed her as a note of appreciation.

Our April programme is as follows:

Roll call—"Favorite flower and why."

Question box.

Demonstration of smocking, by Mrs. Firth.

Lunch—Mrs. McClung, Mrs. Taylor.

FUNERAL OF THE LATE MR. JOHN WEATHERILL

On Saturday, the funeral of the late Mr. John Weatherill was held, service being held in Holy Trinity church, Tofield, Rev. A. A. Adams, officiating. There was a large number of friends of the departed present to pay their last respects to the departed gentleman. In addition to the Anglican burial service, the hymns, "O God Our Help in Ages Past," "Lead Kindly Light," and "Abide With Me" were sung.

The flowers were very numerous and beautiful.

Interment took place in the Tofield cemetery.

KINGMAN

Mr. E. A. Hoflin returned last Thursday from a trip to Grande Prairie where he has been looking over his business interests.

Simon Simonson who is attending Normal school is teaching at the Kingman school this week.

M. J. Dettwiler has opened up a grocery store in connection with the harness shop.

Mrs. E. Erickson was an Edmonton visitor over the week-end.

John Erickson was a Tofield visitor on Saturday.

Mrs. C. R. Blychert who has been taking electric treatments at the St. Mary's hospital in Camrose for the last two weeks, returned on Saturday.

Misses Myrtle Sjoquist, Alice Johnson, Esther Stolle and Judith Ossum who have been attending the Olds Agricultural School returned on

LOCAL and PERSONAL

Born.—To Mr. and Mrs. Marshall Mitchell, on April 12th, a son.

Born.—To Mr. and Mrs. John Lee, Jr., on April 8th, a son.

The W.M.S. of the United Church will meet with Mrs. Firth on Thursday, April 19th, at 3:00 p.m.

Miss Audrey Jobb spent a few days in Edmonton last week.

Those home for the holidays include the Misses Lillian Lee and Helen Jobb and Clifford Lee.

Mickey O'Brien of Ryley and Mr. Blackloch of Edmonton are visitors at the Lee home.

Miss Minnie Wood and Ethel McClyment were visitors to Viking last week.

Mr. and Mrs. McKernan were visitors at the Abbott home last week.

Frank Wood of Viking spent the week end at home. Frank is operating a picture show there.

Miss Bessie Carter and Mr. Wallis Hayne visited in Tofield enroute from Camrose to Holden last week.

Mr. J. D. Hannan made a business trip to Edmonton this week.

Mr. F. O. Ball made a business trip to the city recently and returned with a new Erskine six.

Miss Erickson was a business visitor at the Glover home over the week-end.

Mr. Orbine Sproule is back to work again after spending a few days in the hospital.

Mrs. Carver Sr., and daughter, Elizabeth of Edmonton spent the week-end at the Carver home.

Miss Clara Abbott is spending a few days in Edmonton.

Mrs. (Dr.) Law and son are spending a few days at Bawlf.

Miss M. Easton is spending a few days in Camrose.

Mr. Keith Bennitt spent Sunday in town.

Mr. Frank Carter has gone to Spirit River to work on the New Security elevator.

Dr. and Mrs. Terwillegar and Mrs. Hall, and Mr. W. Clark of Edmonton, spent Sunday in town.

Mr. and Mrs. W. Mertz returned to Rollinson on Tuesday, after spending a few days at the Gray home.

Mr. Lowell Gray of Banff is home for a couple of weeks.

Two plate glass windows were put in Tofield stores recently. One in the store of A. A. Beirnes and the other in the store of the Prairie Cafe. The glass was supplied and installation made by the Capital Glass Co., of Edmonton.

The Misses Eva Clutterham and Nettie Neal entered the Misericordia hospital last week, where they will undergo probationary training in order to become qualified nurses. Best wishes.

Mr. John Chapman, who is in the hospital at Edmonton, has been very ill, but we are glad to say, somewhat better at time of writing.

Mr. L. P. Woodhams will again be at Tofield on April 18th. He will, as usual, be at the Royal Alexandra Hotel, where those desiring examination or treatment for their eyes may see him.

THREE FAMILIES WITH 31 CHILDREN ARRIVE AT TOFIELD

The population of the Tofield district took a jump this week when three families from Holland arrived here to carve out their individual fortunes. They are Mr. and Mrs. Lammert Wierenga and family of 13; Mr. and Mrs. Andries Wierenga and family of eleven; and Mr. and Mrs. Henrik Wierenga and family of seven.

They will work on farms in the district until such time as they are able to take up land of their own.

They are of an excellent type and will no doubt, make first class settlers.

CARD OF THANKS

We sincerely appreciate the kindness shown us during our sad bereavement. We thank our friends for the beautiful floral remembrances.

E. V. GRAY AND FAMILY

SHOOTING FATALITY

A distressing occurrence took place on Wednesday last when Mr. John L. Gray was fatally shot by a gun in his own hands, presumably about nine o'clock in the morning.

Mrs. Gray had left to take charge of a nursing case and the son at home had gone to the mine with the team. Miss Johnson heard a shot in the morning, and believed it to be the son shooting something or other outside. When dinner time came and Mr. Gray did not appear, the son and Miss Johnson went in search of him, and were horrified to find his lifeless body near the farm buildings.

Help was immediately called and the deceased's body brought to Tofield.

The funeral was held on Sunday from the Anglican Church, a large number of friends attending. Mr. Gray was exceptionally well and favorably known and the funeral cortege was a long one.

Interrment took place in the Tofield cemetery, Rev. A. A. Adams officiating.

John L. Gray was born in Yorkshire, England in 1861. When in his twenties he went to America where he settled in the State of Iowa, near Le Mars in the U.S.A. Over 33 years ago he was married to Emma Virginia Mertz whom he leaves besides three sons and one daughter, John W., the eldest, living near home; Margaret Lucille, living in Tofield; James Lowell who works in the power house at Banff and Clarence, William, a younger son, at home. Mr. Gray leaves three brothers and two sisters in England whom he visited one year ago after an absence of 42 years.

Mr. Gray has had poor health since returning home from the other side. Mr. and Mrs. Gray homesteaded in the Tofield district over 20 years ago, and they have resided on the same farm up to the present time, and where Mrs. Gray expects to continue living.

TO ALL INTERESTED

The Tofield Women's Institute, have as their objective, for 1928 the fixing up of the school ground. Everyone far and near will agree with us that it is anything but attractive and we are determined with the help of the whole community to make it a beauty spot. We earnestly ask of everyone interested to help us. We are going to put on a drive and in this every family represented at the school will be asked for the small donation of one dollar. This is one dollar from each family. We have got promises from several of the farmers for a load of earth and this will be asked as well. We must have your help to make our school ground beautiful and a place where our children will enjoy helping to keep it attractive. We can do this but not without the help of every family attending school and also all who are interested in our school. The School Board have very generously offered help, and we have been given donations without the asking for which we are truly thankful. The Institute will work but we must have help. We are putting on a bridge, whist party, a picture, a plant sale, sale of home cooking and numerous other things to raise money for this fund. Come along, with your help and we will all be proud of the result in our school ground.

Thanking you,
Sincerely yours,
N. M. Beirnes, Sec.

NOTICE

IN THE ESTATE OF KNUT O. STORLI, late of Lane County, Oregon, United States of America, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named deceased who died on the 13th day of April, 1923 are required to file with the undersigned by the 30th day of May 1928 a full statement duly verified of their claims and of any securities held by them, and that after that date the executrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to her notice.

DATED this 10th day of April, 1928.

LYMBURN, REID & COBBLEDICK,
Solicitors for the Executrix,
322 Tegler Building, Edmonton, Alberta.

BARDO

Rev. Bjelde held services in the Lutheran church on Friday.

The new baby in the Will Stauffer home completes their girl quartette.

Axtel Kindley has a new Ford coupe.

The young married people of the Mennonite congregation were entertained by Mr. and Mrs. Dan Brenneman on Sunday, April 1st, and on Easter Sunday by Mr. and Mrs. Milo Stutzman.

The P. O. Lerbekmo and H. E. Brenneman families spent Sunday in the parental Hills home.

Mrs. C. J. Rude and Miss Nora, are spending some time in Edmonton, while Nora receives medical treatment.

Clarence Rude is digging a well on his farm.

Mr. and Mrs. J. L. Stauffer came back from Edmonton last week. Mr. Stauffer is feeling better.

Little Helen Mertz is at home again and is recovering nicely from the effects of the operation.

The A. Moen family from Amisk Creek and the Emil Rude family were guests of Mr. and Mrs. Jacobson on Sunday.

The Ladies Aid met with Mrs. A. Steen on Wednesday.

AMISK CREEK

Mrs. K. Bruhn and Mrs. Gensekie entertained the Ladies' Aid of Amisk Creek on Wednesday of last week. A large number were present and a very delightful lunch was served by the hostesses.

Miss Alice Berg has been very ill with an attack of rheumatic fever. She is improving very slowly.

Arthur Patterson have been attending the technical school in Calgary and spent the Easter vacation at the parental home here.

The Steen family from Bardo were guests at the E. A. Moen home on Good Friday.

Miss Anna Sand, who is attending normal school in Camrose is spending her Easter holidays with friends and relatives here. Miss Sand took her practice school week with Miss Molner at the Amisk Creek school the week before Easter.

Mrs. E. A. Moen left for the City on Tuesday night. She intends to be present when her sister, Miss Myrtle Anderson graduates as nurse from the Royal Alexandra Hospital on Wednesday of this week.

Mr. E. A. Moen is shipping a carload of cattle and hogs partly from Ryley and partly from Shonts today, Tuesday.

Mr. I. Annebo is driving a new Chevrolet sedan.

Mr. Hedley McLaughlin left for the Peace River country last week where he intends to take up a homestead.

Mrs. John Blackburn and children from Lavoy are spending Easter with Mrs. I. H. Olson, Mrs. J. Blackburn's mother.

Messrs. Ingval Ness and A. Aufinberg were visitors at the Flaaten's home on Good Friday.

Mrs. K. Bruhn and Mrs. P. O. Flaaten visited with Mrs. I. H. Olson on Easter Monday.

Mr. and Mrs. E. A. Moen and family were guests at the J. Jacobson home in Bardo last Sunday.

Miss Clara and Magda Annebo, Mr. and Mrs. Sand and daughter from Ryley and Mrs. Lund from Viking were visitors at the R. O. Berg's home on Easter Sunday.

Mr. A. Erickson had the misfortune to hit his foot against a nail in the sidewalk in Tofield last Saturday night, spraining his ankle. He is now compelled to use crutches. We hope for a speedy recovery.

Mr. John Wilson left for Grande Prairie last week where heintends to take up a homestead.

Miss Magda Annebo is assisting Mrs. I. C. Olson with her work through the spring.

Our deepest sympathy goes toward Mrs. Grey and family in their sad bereavement.

KINGMAN

Miss Mabel Simonson who has been working in Coronation for the past two years, returned home on Monday.

Mr. and Mrs. Lars Johnson of Grande Prairie visited relatives here for a few days last week.

Hans Bonese of Minburn visited with his parents, Mr. and Mrs. J. Bonese during Easter.

Miss Alice Simonson who is teaching school at Bruce is spending the Easter holidays at her home here.

Miss Gladys Pederson of Edmonton spent a couple of days with her parents, Mr. and Mrs. C. A. Pederson.

Mr. H. Sparby is spending the Easter holidays at his home in Bawlf.

Misses Gladys and Irene Hertz, and Josie Thompson, who attend High School in Camrose, are spending their Easter holidays at their homes here.

Miss Lillian Lindberg spent a few days in Edmonton with friends and relatives.

Mr. and Mrs. P. M. Haugen of Tofield were the guests of Mr. and Mrs. Thor Hertz on Sunday.

Mr. and Mrs. J. Munson and family of Camrose spent the week end with Mr. and Mrs. C. R. Blychert.

A number of Kingmanites were Camrose visitors on Saturday.

Mr. T. J. Regness was in Edmonton over the week end.

Mr. and Mrs. Roy Melvik and family, and Mr. and Mrs. A. Johnson and daughter and Mrs. Mabel and Alice Simonson were the guests of Mr. and Mrs. Wm. Christianson on Sunday.

ANGLICAN EASTER SERVICE WELL ATTENDED

The services in Holy Trinity church on Easter day were very largely attended and heartily enjoyed by those present. There was a large number of communicants at the morning service and at the evening service, special music was rendered. Mrs. McCarthey presided at the organ most acceptably. Mr. Corey sang a solo entitled, "Resurrection" in his usual splendid manner. The altar was very beautifully decorated with white flowers and these were sent to sick members of the congregation at the close of the evening service. The Rev. A. A. Adams took as his theme "The Risen Christ." The congregation filled every corner of the church, and it is said was the largest ever seen in Holy Trinity Church.

A TIMELY BIT OF PRAISE HELPS TO BRIGHTEN ALL THE DAYS, SAYS STORY.

"Best place on earth" is the description of Watsonville by "Dad" Asa A. Story, civil war veteran, 81 year "oldtimer" and versifier.

He submitted the following jingled good advice for the columns of the Pajaronian today:

If with pleasure you are viewing any work a man is doing—if you like him or you love him tell him now. Do not hold your approbation till the pastor makes oration as he lies with snowy lilies on his brow.

For no matter how you shout it, he won't really care about it, he won't know how many tear drops you have shed. If you think some praise is due him, now is the time to slip it to him for he cannot read his tombstone when he's dead.

More than fame and more than money is the comment timed and sunny and the hearty warm approval of a friend. For it gives to life a savor and it makes us stronger, braver, and it gives us heart and spirit to the end.

If he earns your praise, bestow it; if you like him let him know it, let the words of true encouragement be said. Do not wait 'till life is over and he is underneath the clover for he cannot read his tombstone when he's dead.

Editor's Note.—The above jingle taken from the "Watsonville Pajaronian," was written by "Dad" Story, whom many of our readers will remember having lived at Tofield for a number of years. The paper was loaned us by Mrs. J. W. Cookson.

RED ROSE TEA "is good tea"
The Orange Pekoe, at a little extra cost, is extra good
In clean, bright Aluminum

Railway Construction in the West

Only a few years ago there was a feeling throughout Canada that the construction of railways in the Dominion had been rather overdone. This opinion was freely stated by [illegible] by bank presidents and financiers and found expression in newspapers all over the country. The statement was frequently made that Canada had built railways fifty years in advance of the time when they would be needed and the population and productive capacity of the country warranted. The greatest financial danger confronting the Dominion, it was alleged, was its heavy commitments on account of railways.

The fact that Canada [illegible] greatest railway mileage per capita of any country in the world, and the further fact that a few years ago during the war the Canadian Northern, Grand Trunk and Grand Trunk Pacific Railways got into financial difficulties and had to be taken over by the Dominion Government, and that for some years following during the post-war depression the Canadian National was operated at a heavy financial loss, no doubt accounted for these rather pessimistic views. An entirely different opinion exists today.

When the C.P.R. was first projected the same faint-hearted views prevailed. The idea of a transcontinental railway across Canada from the Atlantic to the Pacific, crossing thousands of miles of undeveloped prairie land and over the Rocky Mountains, was ridiculed in the English press as the dream of madmen, and even in Canada it was predicted that such a railway would never earn the cost of its axle grease. The world realizes today how false all these dire predictions have proven to be.

The opinions expressed only a few years ago during the anxious days of the war and the world depression which followed are proving to be equally erroneous.

In a most instructive address before the Canadian Club at Regina recently Mr. Cyril Young of the Industrial Development Department of the Canadian National Railways, stated that for hundreds of miles along the main line of the new transcontinental through the clay belt of Ontario, the railway was earning an operating surplus, while bringing about settlement and building up important industries giving to Canada what heretofore it has lacked, depth in addition to its immense width.

In the past Canada has boasted of its boundaries resting upon two oceans, east and west. Now, with the rapid pushing forward of the Hudson Bay Railway, Canada looks forward with eager anticipation and confidence to the day not far distant when its commerce will likewise pass through a [illegible] ocean in the north. And even before that railway is completed to tidewater a branch line is being rushed to completion in order to handle the enormous traffic which will result from the development of the Flin Flon and other mining areas of the north which, it is predicted, will rival the richest mineral areas in the known world.

Today, instead of believing that railway construction has been overdone in Canada, the two great railway systems of the Dominion are steadily increasing their construction programmes. Last year Parliament authorized an extensive branch lines construction programme for the Canadian National, largely in Western Canada, and providing for the building within three years of some hundreds of miles of new railways. That work, which was started last year, is to be pushed with vigor during 1928.

Nor does the C.P.R. lag behind. The annual report of that Company issued [illegible] records the fact that during 1927 no less than 293 miles of new branch lines were graded and track laid on 170 miles, while for the year 1928 the directors recommend the building of no less than eleven extensions in the provinces of Alberta and Saskatchewan involving the construction of an additional 347 miles of new lines.

Not to be outdone by the West, the Ontario Government is steadily pushing its railway northward towards Hudson Bay, while branch feeders are spreading out into districts where mining developments are taking place.

The Government at Ottawa is confronted with applications for new railway charters for lines in northern Saskatchewan, Alberta and British Columbia aggregating thousands of miles with a view to providing for the opening up and development of the north country and the creation of new outlets to the [illegible].

These are the answers now being given to those who predicted disaster for Canada on account of its railway construction of a few short years ago. Take Saskatchewan as an example. Youngest among the provinces it already enjoys a railway mileage second only to that of Ontario, and during this year of 1928 work will be in progress upon approximately 500 miles of new branch lines, not including the Hudson Bay Railway and the Flin Flon branch, both of which will directly serve the Province.

And as if to provide the final answer to the faint-hearted of a few years ago, the Canadian National has turned its operating deficits into substantial operating surpluses, surpluses sufficiently large to meet all the interest payments on bonds and debentures held by the public, while, through the encouragement given to [illegible] and industrial development all over the country, the Federal Government is receiving a substantial, albeit indirect, return for the money Canada has invested in that system.

Railway development, past, present and future, is the foundation upon which Canada is erecting its future prosperity, and ultimately self-contained nation, a nation that is destined to occupy a place in the very front rank of world power.

[illegible]

A motoring journal suggests that the radiator should be more artistic. After all, it is often the first thing about a car that strikes you.

PHILLIPS MILK OF MAGNESIA For Troubles due to Acid

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer when you learn how quickly, how pleasantly this premier method acts. Please let it show you now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

Western Canada Livestock Union

Annual Convention For 1929 Will Be Held At Edmonton

The 1929 annual convention of the Western Canada Livestock Union will be held in Edmonton, it was decided at the recent session of this organization which was held in Vancouver. R. A. Wright, of Drinkwater, Saskatchewan, has been re-elected president of the organization for the coming year, J. L. Walters, of Clive, is the provincial vice-president for Alberta, Olaf Olafson, of Mortlach, occupies the same position for Saskatchewan, and George Gordon, of Oak Lake for Manitoba. C. M. Learmonth, of Regina, continues as secretary of the Union for 1929.

A SPRING TONIC AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through the Use Of Dr Williams' Pink Pills.

The good old fashion of taking a tonic in the Springtime, like most of the customs of our grandparents, is based upon sound common sense and good medical practice. Winter is always a trying time for those who are not in rugged health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach. A tonic for the blood and nerves at this time will do much for such people, by putting color in the cheeks and banishing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And in all the realm of medicine there is no safer or better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening jaded nerves and rundown organs, and bringing a feeling of new strength and energy to weak, easily tired, despondent men, women and children.

Mrs. L. Hupman, Summerville Centre, N.S., writes:—"Dr. Williams' Pink Pills have been of the greatest benefit to me. A few years ago I was in a badly run down condition. I became so weak and nervous that I could scarcely go about and doing my housework left me completely used up. Everything seemed to worry me, and I was in a very discouraged condition when I began taking Dr. Williams' pills helping me, and continuing their Williams' Pink Pills. I soon found the use I fully regained my health. Since then I always take a few boxes in the Spring to build me up for the hot weather and always I find the best results. I therefore cheerfully recommend these pills as the best of [illegible]."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Growth Of Catholic Church

Catholics In United States Now Total Nearly Twenty Million

There are 19,689,409 Catholics in the United States, the official Catholic directory for 1928 shows. This is an increase of 200,753 over last year.

The total of Catholic churches in the U.S. was listed at 18,293, with 25,773 priests. Of the latter, four are cardinal-archbishops, thirteen archbishops, and 91 bishops.

A Foe To Asthma. Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It [illegible] breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Heavy Apple Production In Okanagan

It is estimated that there will be an apple production of 1,675,000 boxes in the southern part of the Okanagan Valley, British Columbia, this year. The estimate is based on present excellent prospects, all conditions in the orchards being of a favorable nature. Peaches, apricots and cherries also give promise of heavy yields.

Theatres and movie houses of New York have 1,500,000 patrons daily. There are 208 theatres and 550 movie houses with a seating capacity of 854,[illegible].

People used to think the world was flat. Then it was found to be round. But it's still just a little crooked in spots.

In parts of North Siam both parties to a lawsuit are put under water, and the one staying under the longest [illegible].

With so thorough a preparation at hand as Miller's Worm Powders the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

Saskatchewan Creamery Butter

The output of creamery butter in Saskatchewan in February totalled 477,363 pounds, a ten per cent. increase over the January production.

Lake Superior, because of its altitude of 602 feet, is highest above sea level of all the Great Lakes.

PIMPLES ON FACE AND HANDS

Were Hard and Red. Could Not Do Hard Work. Cuticura Heals.

"Small pimples broke out on my face which later grew larger and were hard and red. Later pimples broke out on my hands and kept getting worse each day. I could not do any hard work with my hands on account of the breaking out.

"I began using Cuticura Soap and Ointment and they helped me. I continued the treatment and after using two cakes of Cuticura Soap and one box of Cuticura Ointment I was healed." (Signed) A. W. Babychuk, Wishart, Sask.

Use Cuticura Soap, Ointment and Talcum to promote and maintain skin purity, skin comfort and skin health; the Soap to cleanse and purify, Ointment to soothe and heal, and Talcum to powder and refresh.

SUNDAY SCHOOL LESSON

APRIL 15

TRANSFIGURATION AND SERVICE

Golden Text: "He that abideth in Me, and I in him, the same beareth much fruit, for apart from Me ye can do nothing."—John 15.5.

Lesson: Mark 9.2-29.

Devotional Reading: John 15.1-8.

Explanations and Comments

The Transfiguration, verses 2-8.—Six days after Peter's expression of his conviction that Jesus is the Christ, Jesus took Peter, James, and John apart from the rest and ascended a high mountain where he was transfigured before them. The other disciples may have been too superstitious or too dull of comprehension for such a revelation of His glory.

"The longer we live the more profoundly we believe that no one has actually more than two or three friends. He is a friend, and only he, to whom you can lay bare your heart without the pledge of secrecy. The real friend is interested in you—your joys, your triumphs, your failures become his very own."

Luke 9.29 says that the fashion of His countenance was altered. Matthew 17.2 says "His face did shine as the sun, the glory of the Godhead burst through the veil of the flesh." "It was not a splendour that fell on Him from without, and lighted Him up; the glory came from within; it corresponded to something going on in His mind." Davidson. It was as He prayed, Matthew and Luke tell us, that this transformation took place. The story is preceded and followed in the Gospels by Christ's predictions of suffering, death, and resurrection. The Transfiguration was a preparation for the events so near at hand.

"On that mountain, He laid Himself like another Isaac on the altar, and he knew that the sacrifice would be demanded. The very glory of the event contains a hint of the struggle which had been going on in His mind. He was no impassive hero of a romantic history. He was a Soul in the agony of a momentous spiritual transaction. The hour had come when He was to make a voluntary dedication of Himself for a sacrifice than which history knows no sublimer, and the self consecration was destined to be met by a distinct communication of divine approval. As He was praying about His Passion he entered into the ecstasy of oneness with the heavenly Father. In the heart of Jesus all the holy resolutions of a lifetime were encouraged and strengthened, as the fashion of His countenance became changed."

Songs Longest Remembered

Not In Long Program But Those Heard By Chance

Let any man shut his eyes and remember the occasion when he was most moved by music. How many of these occasions were concerts in large halls or moments of musical parties. And how many were chance songs in the streets of an inn, or a blend of voices on a lake at night, or a chorus in some mountain hostel? A long program of music is like a large gallery of pictures or a museum full of sculpture. It defeats its own purpose. A tune or a picture should be a full meal for the soul, the effect of which will only be spoilt by over-[illegible].

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Recipes For This Week

(By Betty Barclay)

DINNER PAIL DELIGHT

- 1 cup sugar.
- 2 cups flour.
- 2 teaspoons baking powder.
- Pinch of salt.
- ½ cup shortening.
- ½ cup nectar raisins.
- ½ teaspoon cinnamon.
- ½ teaspoon nutmeg.

Sift flour, sugar, baking powder and salt together; add other ingredients. Then add enough water to make a paste. Roll out on board, cut with biscuit cutter and bake 15 minutes.

CHOCOLATE JUNKET

- 1 junket tablet.
- 1 pint milk.
- 2 squares chocolate.
- 3 tablespoons sugar.
- 1 teaspoon vanilla.

Heat the milk until lukewarm; add the sugar, stir until dissolved. Melt two squares of chocolate in a half cup of the warm milk and boil a moment; add to it carefully the remainder of the milk, the vanilla and the dissolved tablet; stir and pour at once into dessert glasses. Serve with sweetened cream or custard sauce.

The normal atmospheric pressure on the body at sea level is 14.7 pounds per square inch.

Were it not for a man's faults he might live and die without ever hearing his name mentioned.

Minard's Liniment for cuts and bruises.

THE EXTRA STAMINA You Need For Spring Driving

Equipping with Gum-Dipped Tires is an investment in extra safety, speed, comfort and economy. That is why thousands of motorists throughout the country use Firestone tires.

On wet, slippery streets and highways—around sharp turns—maneuvering in and out of traffic—stopping suddenly—you can always depend on the powerful Firestone non-skid tread to hold without slip or skid.

Supporting this sturdy tread is the special Gum-Dipped carcass, built of cords dipped in a rubber solution which saturates and insulates every fibre of every cord with rubber. This minimizes the friction and heat of high speed service, and strengthens the whole structure of the tire to withstand heavy strains.

Your local Firestone Dealer will serve you better and save you money. See him today.

Canada's Water Power Resources

Of the 11,911,030,000 kilowatt hours of electricity generated in Canada last year, almost [illegible] per cent. of the total was hydro-electric. Fuel plants generated only 1.4 per cent. It is estimated that the water power of Canada would warrant the installation of about 43,000,000 h.p. of which 4,983,266 h.p. is under installation for electric power.

The Oil For the Farmer.—A bottle of Dr. Thomas' Eclectric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Sheffield, which now has a population of 500,000, was once a little Norman settlement and later a pleasant country place.

NAVIGATION TO PORT CHURCHILL SEASON OF 1930

Ottawa.—Navigation via the Hudson Straits to Port Churchill in the season of 1930 is the present objective of the Departments of Marine and Fisheries and Railways and Canals.

Plans are now being created for the setting up in the straits of two direction finding stations, similar to those operated by the Department of Marine on the Atlantic Coast, and in the Gulf of St. Lawrence.

The Canadian Government ship, Montcalm, will leave for the North about the middle of June, under the direction of Major N. B. MacLean, and the vessel will spend the summer in the straits. She will carry with her additional supplies and equipment to enable the three Royal Canadian Air Force bases to continue their work until the [illegible].

During the summer, the work on the direction finding stations will be commenced and the men who will be in charge of this work will take over much of the equipment which the air force will leave when they conclude their work and start South. The Fokker planes will be packed up and returned on the [illegible].

It is understood that the air force will retain those planes which were purchased specially for operation in the straits.

The Department of Railways and Canals will probably send a special crew and equipment North to undertake the refloating of the ship, Canadian Raider, which was beached last summer after some difficulties were encountered.

Dominions Must Decide

Signature Of Anti-War Pact Left To Countries Involved

Washington.—Whether the self-governing Dominions would sign separately any anti-war pact which is concluded is a matter to be decided between the British countries themselves, said Frank B. Kellogg, United States Secretary of State, to the Canadian press.

"The United States would, of course, welcome the signatures of any or all of the British Dominions," he continued.

The secretary of state had been asked if, in the event of Great Britain adhering to the proposed pact to outlaw war, Canada and the other British Dominions would be asked to sign separately.

Asked if he had had any conversation with the Canadian government on the subject during his recent visit to Ottawa, Secretary Kellogg replied that he had not.

The next step by the United States government has not been decided on, said.

Movies Sent By Wire

Ten Feet Of Film Used In Successful Experiment

Chicago.—An advance in the transmission of pictures by wire was made when for the first time a motion picture was sent over telephone lines to New York city for display there.

A close up of Vilma Banky, motion picture star, was taken in the telephone offices of the American Telephone and Telegraph Company, and within half an hour the film had been developed and was being transmitted over the wires.

The film was cut up into short strips and sent as "stills" or ordinary pictures. At the other end of the line the strips were pieced together and then photographed on a regular motion picture film. Ten feet of film were used in the experiment.

B.C. Student Receives Award

Toronto.—Dermot A. Davies, a student at the University of British Columbia, has been awarded a $1,000 graduate fellowship in economics offered by the Royal Bank of Canada to the students in attendance at any Canadian University who submitted the best paper on one of several topics in connection with the important problems confronting Canada.

Empire Fair Shows Deficit

London.—There was a deficit of £1,756,000 in connection with the British Empire Exhibition of 1924-25, according to Captain Douglas Hacking, M.P., parliamentary under secretary of state for the Home Department, who was asked about the matter in the House of Commons.

A Great Aid To the West

Building Of Railways To Outlying Parts Proves Big Factor

Toronto.—"One of the greatest things the Liberal Government ever did was the building of railroads to outlying parts of the country, such as the Hudson's Bay Railway and new lines into the [illegible] part of Western Canada," said C. R. McIntosh, M.P. for North Battleford, and proprietor of the North Battleford News, at a luncheon given by the Toronto Men's Liberal Association.

Years ago, he continued, Canadians flocked across the border, as there were no railroads in the back country. Today lines were being constructed and the result was that the country was filling up with good families from all over the world. Speaking of immigration, Mr. McIntosh said his district was populated by people from all parts of the world. "These people," he said, "who have toiled and labored to make homes for themselves must be given a place in the governing of our country. Otherwise in the future we will encounter trouble."

Commander Daniel Found Guilty

Sentenced To Dismissal From Ship With Severe Reprimand

Gibraltar.—The first court-martial growing out of the Royal Oak affair which has stirred the British navy ended with the conviction of Commander H. M. Daniel, on charges of conduct prejudicial to discipline.

The court, after deliberating one hour and ten minutes, found him guilty on all charges and sentenced him to dismissal from his ship and a severe reprimand. The sentence did not imply dismissal from the service [illegible] remain on half pay until it pleases the admiralty to appoint him to another ship or another post.

Baldwin May Have Another Term

Will Be Returned To Power At Next Election, It Is Predicted

Winnipeg.—The Baldwin Government will be returned to power at the next elections and the Liberal party will do better than it did last time, declared Sir Robert Horne, ex-chancellor of the exchequer in the British Parliament, who spent two hours in this city while en route east in the course of a tour of the Empire.

Sir Robert considered a Premier Baldwin safe in being returned to power and the Liberal party, he thought, would be solid under Lloyd George. The latter, he said, was the only leader available.

Ontario Session Ends

1928 Session Of Ontario Legislature Prorogued With Usual Ceremonies

Toronto.—With the usual military pomp and traditional ceremony Lieut.-Governor W. D. Ross formally prorogued the 1928 session of the Ontario legislature. Greeted on his arrival at the parliament buildings by a salute of booming guns, His Honor entered the legislative chamber sharp at three o'clock for the brief ceremony. The galleries were sparsely filled and many of the members had already dispersed to their homes. The desk of Alexander Stuart, M.L.A. for North Renfrew, who died on Sunday, was draped in a Union Jack surmounted with crepe.

Use Drastic Methods

Bandits Receive Short Shrift From Mexican Troops

Puebla, Mexico.—Bandits captured in the state of Puebla are being hanged to trees beside the highways wherever found in this region by federal troops and home guards. The bodies are being left until devoured by vultures, the authorities hoping that the grisly sight will deter other holdup men. At one point not far from Puebla three bodies swing from a tree beside the road and at another point are two bodies, while in several other places there are from one to three.

To Vote On Beer Parlors

Brandon.—Petitions containing over 1,700 names have been filed with the city clerk for a vote to be taken on the local option clause in the Manitoba liquor laws, and accordingly the council has decided that the vote will be taken on or about May 15. The vote must be taken within six weeks and on the result will depend the opening of beer parlors in this city.

Recognition For Herman Trelle

Alberta Government Purchases Quarter Section Of Farm At Wembley

Edmonton.—Payment of a first instalment in the purchase price of a quarter section of his farm at Wembley has been made to Herman Trelle, the Peace River wheat champion, through the department of public works. An appropriation of $5,000 was passed in the estimates for this province.

Under the terms of the agreement, the quarter-section is being leased to Mr. Trelle for a term of five years with the option of purchase at the end of that time. The land adjoins the remainder of his holdings, on which his prize-winning wheat was grown, and is itself under cultivation.

It is understood that Mr. Trelle will continue his experimental work in which he has already achieved such distinguished success, and the action of the government, which was fully sanctioned by the legislature, is by way of demonstrating a province's grateful recognition of services rendered and good publicity provided through a double championship.

YUKON ENTERS FEDERAL OLD AGE PENSION PLAN

Ottawa.—Yukon has entered the federal old-age pensions scheme. George I. MacLean, newly appointed gold commissioner of the Yukon Territory, has affixed his signature to an agreement with the Dominion Government to participate in the federal plan.

An order-in-council will shortly be passed by cabinet council, in accordance with the established procedure, authorizing Hon. Peter Heenan, minister of labor, to sign for the federal government.

Yukon Territory is the second to join in the federal old-age pensions scheme passed at the last sessions of the Dominion Parliament. Several months ago British Columbia, through Hon. A. M. Manson, provincial minister of labor, executed an agreement with Mr. Heenan along similar lines to that with Yukon.

Manitoba and Saskatchewan are now negotiating with Mr. Heenan; and it is probable that these two provinces will shortly also come under the federal plan. Legislation to enter into negotiations was recently passed by the legislatures of Manitoba and Saskatchewan.

The signature of Gold Commissioner MacLean was affixed under authority of an ordinance passed at the last session of the Yukon Legislature.

VETERAN PASTOR PASSES

Dr. G. M. Milligan, veteran of the Presbyterian Church in Canada, and pastor emeritus of Old St. Andrew's Church, Toronto, and widely known throughout the Dominion, who died recently in his 88th year.

Grant For Research

Placed At Disposal Of Canadian Society Of Technical Agriculturists

Ottawa.—A sum of $4,000 has been placed at the disposal of the Canadian Society of Technical Agriculturists by the International Education Board of New York, founded by John D. Rockefeller, Jr., in 1923, to be used in making a survey of graduate and research facilities available at Canadian agricultural colleges as in the Federal and Provincial Departments of Agriculture. A part of the money will be used in preparing and publishing a graduate calendar upon such a survey.

The C.S.T.A. has arranged for the release of Dr. Robert Newton, of the University of Alberta. He will undertake the survey in January, 1929.

Wins Ribbon For Livestock

Calgary Man Carries Off Honors At Alberta Stock Show

Calgary.—W. F. Fleming, of Calgary, carried off the red ribbon for the best carload of 15 finished steers, 1,100 pounds and over, at the Alberta spring stock show. Leading breeders from many parts of the Dominion were present and expressed the opinion that this carload of Herefords were the finest ever exhibited in Western Canada.

Mr. Fleming also carried off premier honors for the best five finished steers over 1,100 pounds.

Frank Collicut, of Crossfield, succeeded in winning first and second place for 15 steers under 1,100 pounds.

Western Rivers Re-stocked

Upper—The government hatchery at Banff, Alta. Lower—A live male cutthroat after stripping. Note the protruding lower jaw, characteristic of male cutthroats.

A full report of the activities of last year by members of the Banff fish hatchery staff show that the staggering amount of one million, seven hundred and sixty-six thousand, eight hundred trout fry were placed in the streams of Alberta, under the direction of Superintendent J. Martin. A still further number in addition to the fishy youngsters were eyed eggs totalling 71,040, which were also planted.

Spray Lakes and the surrounding streams received the eyed eggs and 205,000 of the total number of cutthroat. Of the remaining 716,000, some 110,000 were distributed between the Jumping Pound and its tributaries, Tough and Lees creeks, near Cardston, Alta., and Big Hill and Cold creeks near Cochrane, Alberta. The balance were placed in park waters.

Of the Rainbow species, tributaries of the McLeod River in Northern Alberta received 60,000; tributaries of the Highwood received 60,000, tributaries of the Elbow got 37,000, and, with the exception of 50,000 that were placed in the Old Man and Crow's Nest rivers, tributaries of the Bow got the remainder. The Bow River, running behind the Banff Springs Hotel, is popular for its fish. That it was a successful year for the Banff fish hatchery and that the benefit of this work will soon be felt by anglers none can doubt.

Plan Study Of Arctic

Nineteen Nations Will Contribute To Work Of Conference

Washington.—When representatives of 19 nations gather in Leningrad next June, in an international conference on Arctic explorations, the United States may be one of them.

If so, it will mark the first time that the United States has participated side by side with a Russian delegation in such a conference and the first time this country had sent an official delegate to Russia since it became the Soviet of Socialist Republics.

The foreign affairs committee of the House of Representatives has voted favorably on a resolution which proposed U.S. participation in the International Society for the Exploration of the Arctic regions by airship.

Among the 19 nations who are expected to contribute to the work of the society are also Great Britain, France, Italy, Germany and Japan. Canada is not included.

Completing Highway In B.C.

Federal Government Agrees To Co-Operate In Construction Work

Revelstoke, B.C.—A start on the last link of the trans-Canada Highway between Revelstoke and Golden will be made early next month according to Hon. W. H. Sutherland, Provincial Minister of Public Works.

According to the minister, the Dominion Government has agreed to co-operate in the construction of the highway around the Columbia River and the work to be undertaken will commence at a point on the big bend North of here where work stopped at the beginning of winter.

Dr. Sutherland stated that the federal government cannot undertake the building of a road through Glacier National Park but has offered to assist the province in building around the big bend. It is understood that Ottawa's contribution will approximate $1,000,000. The work to be undertaken this year will be extensive, it was stated, and may entail an expenditure of $225,000.

Will Borrow Three Million

Alberta Confident That Debentures Will Find Ready Sale

Edmonton.—A debenture issue of $3,000,000 will be made by the provincial treasurer at the beginning of May. It will be in part for refunding purposes, covering an item of $825,000 maturing June 1, and the balance will be used for general expenditure requirements of the government.

The exact terms and conditions of the issue have not yet been determined, but in view of the fact that the Eastern money market is now favorably disposed, the treasury is looking for just about the best sale it has ever made.

NO CHANGE IN BRITISH POLICY TOWARD EGYPT

Manchester, Eng.—Sir William Joynson-Hicks, secretary of the home office, told the Cotton Spinners' Association that the latest Egyptian note would work no change in British policy. He said:

"It is true we have received a somewhat foolish despatch from the Egyptian Government. But I ask you to put your faith in His Majesty's government, and realize that this despatch will mean no change in British policy. A reply to the Egyptian Government will be made shortly."

Sir William also said that he looked forward to the time when Lancashire would be independent of the cotton supplies from the "great west" and would get all its cotton from the British Empire.

Cairo, Egypt.—Premier Nahas explained to Cairo newspaper representatives briefly, Egypt's position with regard to Great Britain.

"In our note to Great Britain," he said, "we have striven on the one side to uphold our country's rights, and on the other to maintain unimpaired our friendly relations with Great Britain."

The note in question was Egypt's rejoinder to the British Government's latest note on the rejection by Egypt of the proposed treaty.

In his explanation the premier dealt solely with Egypt's rejection of the British claim to the right of interference with Egyptian legislation and with Egypt's ability unaided to protect foreigners. Nahas laid stress on his desire to prepare the way for "real friendship."

OTTAWA MAY CONTROL RADIO BROADCASTING

Ottawa.—Government control of all radio broadcasting in Canada looms as a strong possibility of the future. They have such a system in Great Britain and it may come to it here before long.

While there has been no official decision as yet, it is known that such a proposition is being considered by those who have to do with radio.

A great deal of trouble is being experienced owing to the fact that many people—a fast increasing number—want to be into the broadcasting, whereas the channels of communication are very limited. Much conflict arises and complaints are very numerous as to reception being spoiled and other disagreeable conditions existing.

In consequence of this, it is learned that some interests securing new licenses have been cautiously advised not to make extensive financial commitments lest, as a development of the near future, the whole broadcasting business be taken over by the state.

Heretofore, both in Canada and the States, control over radio has been by license, but the broadcasts have been privately-owned enterprises.

In Great Britain it is all done by the British Broadcasting Company, which is directly under the control of the British Government.

Although similar course here has not been decided upon, much is being said in favor of it and complaints regarding the present system tend strongly to encourage such a departure along the same lines as the British method. It is regarded as a strong possibility of the not distant future.

Trapper Found Dead In Northern Manitoba

Foul Play Not Suspected But Investigation Is Being Made

Nelson House, Man.—Word has been received here of the discovery of the body of John Lindbergh, 67 years old, in his cabin near Lake Trout, about six days journey from here. He left for the Northland last summer to establish a trapping line in the district.

Death is believed to have been due to natural causes.

The body was found by another trapper and his Indian companion who had decided on a visit to Lindbergh's cabin. They found several feet of snow piled against the entrance to the shack with the door fastened from the inside.

Forcing their way in, the men found Lindbergh's body stretched on a bed. He was fully clothed. The cabin was in order and the body showed no signs of violence. A little wood was in the stove and there was plenty of food in store.

The last day scratched off the calendar was February 18.

Provincial police are investigating.

Violation Of Elections Act

Fifty-One Men Fined $100 Each In Montreal

Montreal.—Found guilty of violating the municipal elections act, 51 men were fined $100 each here, as an aftermath of the municipal elections.

Three women taken into custody suspected of having either "telegraphed" or attempted to "telegraph" votes were detained until the polls closed and then released.

This was the first official case wherein a woman was arrested on such a charge.

Of the 51 men found guilty, twenty were charged with impersonation at the polls, while the other thirty-one were charged with "attempting to telegraph" votes.

Had Lucky Escape

St. Catharines, Ont.—Although he fell thirty feet from the new bascule bridge being built across the Welland ship canal at Homer, alighting on his shoulder on the concrete floor after striking and being turned about by the girders, Elmer Green, an employee of the Hamilton Bridge Company, regained consciousness and will be able to be out of the hospital shortly.

Three British Fliers Killed

Hong Kong.—Three British fliers were killed when the engine of their seaplane exploded as they were returning to the aircraft carrier Hermes. The victims were Flying Officers Hale and Graham, and the telegraph operator Jackson.

STERILIZATION OF THE DAIRY UTENSILS ON THE FARM

(Experimental Farm Note.)

Of the various sources of contamination to which milk is subject, the dairy utensils have been definitely established as one of the most serious, capable of contributing a high percentage of the bacteria found in milk. Consequently the sterilization of pans, pails or other containers, cannot be neglected if milk containing few bacteria is to be produced. Thorough cleaning is essential, but in itself is insufficient. Steps must be taken to destroy as many as possible of the bacteria still remaining, if the keeping quality of milk is to be improved.

For sterilizing, steam under pressure, the most satisfactory agent, is seldom available. In its absence, a SUFFICIENT quantity of BOILING water give good results. Pails, strainers, etc., after washing are scalded by pouring a pint of boiling water over the entire inner surface, cans are best treated by pouring in [illegible]

Cream Producers

The season is now at hand, when the cows, sensing spring, are apt to wander about looking for something green to eat. In their daily wandering they like to nibble the willow shrub which is one of the causes of so much bitter flavored cream being produced in spring. To overcome this, keep the cows at home as much as possible until the grass is really green. IT PAYS. IT ALSO PAYS to take or send your cream to THE TOFIELD CREAMERY where, to secure your patronage and hold it, we are always ready to give you HONEST and COURTEOUS TREATMENT.

The Farmyard Hen Produced In Canada Last Year Over 253 Million Dozen Of Eggs

Some one has figured that if the eggs laid in Canada in 1927 were placed end to end they would girdle the universe four and a half times. It certainly staggers the imagination to comprehend over three million eggs or 115,000 miles of them. And these are the farm eggs only. Dear knows how many more thousands of miles should be added for the eggs laid in poultry houses in the cities and suburban areas in Canada, but the number must be considerable. All of them, whether from farm or city, disappear down the national gullet at the rate of 6,000 per minute. The rate is of course much faster at meal times, for these figures are on a 24-hour basis. Still there are not enough to satisfy the national appetite and some eggs have to be imported into Canada.

Canadians are the greatest egg-eaters on the face of the globe and consumption has been increasing tremendously, especially since egg-grading regulations came into force. It is estimated that Canadians now consume something like 237 eggs per capita per annum. Production of farm eggs in 1927 equalled 330 eggs per capita. While production is increasing rapidly, principally through the breeding of better hens rather than increasing the flocks, consumption is increasing at a still more rapid rate as indicated by the excess of imports over exports of eggs.

Canada imported roughly 3½ million dozen eggs in 1927, and exported less than half a million dozen. Excess of imports over exports rose by a million dozen over the previous [illegible]

[illegible] ported eggs in 1925 and 1926. The Imperial Economic Committee reports that requirements from home and Empire sources are 5,700 million eggs a year or 475 million dozen—nearly twice Canada's farm egg production—this with a consumption of only 125 eggs per capita. The system of uniform grading and government certification to which they have been subjected has enabled Canada's eggs to command a premium over all other eggs on the British market. If enough of them were to be had, John Bull might contest Jack Canuck's title to champion egg-eater of the world. But as it is only 5 out of every thousand eggs consumed in Great Britain, according to last reports, come from Canada. The United Kingdom itself supplies 432, Irish Free State, 95, China, 138; Denmark, 121, Russia, 47; Netherlands, 35; Poland, 22; Egypt, 22, Belgium, 21. South Africa supplies 5 and Australia 3, so that Canada does not rank behind the other British Dominions, but what a big thing it might be for Canada if she could get a big slice of this egg trade and especially if consumption per capita increases as it has in Canada.

Canada's Matchless Advantage In Relation To The Growing Tourist Trade From U. S.

If the volume of United States tourist travel continues to grow at anything like its recent rate it will be only a matter of two or three years until the amount of money expended by Americans abroad reaches the colossal sum of a thousand million dollars a year. For 1926, according to the United States Department [illegible] to roughly $300,000,000 a year. And there is ample reason to believe that this total can be doubled in the next ten years. Canada possesses an endless variety of attractions for holiday seekers of all kinds, plus a 4,000 mile frontage facing the country which constitutes the world's wealthiest and largest source of tourist travel. COOL AND FRAGRANT

Small Town Papers

BY FRANK PARKER STOCKBRIDGE

"So they were," he conceded. "I was raised on the farm, but I never liked it. That is why I came down to New York in the first place. And when dad died I sold the farm and bought the paper the old Middletown Gazette. couldn't get the virus of printer's ink out of my system."

I wanted to hear to go on, but he said nothing more in response to my question.

"Why started you gold mine," I ventured at last. "I commented.

"What sort of business have you been in? You seem to have been everywhere."

Bert looked at me with a puzzled expression, as if he thought I were trying to kid him. "Why I just told you," he said. "I bought the Middletown Gazette."

I now of once that I must have seemed stupid to Bert. Some big industry had picked Middletown for a plant and made the country village into a big city, as the General Electric did at Schenectady. But for the life of me I couldn't remember which industry it was Middletown? I couldn't think of anything to connect the name of the town with. But didn't let on to Bert.

"Oh, I see," I responded cheerfully. "And so the town grew big enough for a daily you grew with it, eh? Fine! What's your population now anyway?"

Also the same as it always has been—eight a little less." he answered. "And I find I can make a better living in a town that size than I could in a big city. I've been there, and I'm not going through the change of life again."

"I was very weak and melancholy, and no nervous I hardly had to hear a clock ticking, and I had no sleep well.

"I was advised to try

so I sent at once for a box; took them and got no other, and before they were gone I felt good, my nerves are fine, I do not mind any noise now, and I can sleep well. I can-

not recommend them too highly to those suffering as I did."

Price 50c. a box at all druggists and dealers, or mail direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Before getting the appointment a man seeks the office early and late, but after getting it he isn't in any hurry about getting around in the morning.

WORLD HAPPENINGS BRIEFLY TOLD

Returns Large Revenue

The individual has to pay a comparatively small amount for farm animals, but collectively they return a large revenue. The Bureau of Statistics estimates the value of cattle held by Canadian boys in 1927 at $80,130,000.

A WONDERFUL TRIBUTE

Baby's Own Tablets Declared To Be Worth Their Weight In Gold

A mother has come to use Baby's Own Tablets after to be convinced that nothing else can equal them in banishing the ills of her little ones. Once used, always used, as long as there are small children in the home is that is the tribute thousands of mothers pay the Tablets.

Among the many, many mothers who are anxious to tell of their experience with Baby's Own Tablets is Mrs. Gordon of East Hamilton (not Hamilton, Ontario). Shortly after coming to Hamilton began giving the Tablets to her baby and was pleased to note a steady improvement in health that soon had the little one playing with the other children now and both of them are the picture of health. Baby's Own Tablets are the only medicine they have ever had and I really believe the Tablets to be worth their weight in gold."

Baby's Own Tablets are free from all injurious drugs and can be given to the youngest babe with absolute safety. They may be had from all dealers or by mail at 25 cents a box from The T. Milburn Medicine Co., Brockville Ont.

Canada's Agricultural Wealth

In a recent address in Canada, Ill. Prof. Prisoner of Economics, Yale University, stated in connection with agriculture in the Dominion "Canada is increasing her agricultural wealth. Farm production amounting to $1,700,000,000 during 1927 was accompanied by the second largest wheat crop Montreal handling seven successive leaders during the last. Canada's cheese and butter position among the great sports of the world."

The Poor Man's Friend. Put up in metal bottles that are easily portable and sold for the very small sum, 25 cents, Minard's Liniment of gumptuous power is the poor man's friend. Its penetrating qualities to which it can be put make it the poor man's friend and a stock is complete without it.

Manitoba Farmers Grow Sheep

It is expected that fifteen hundred head of sheep will be sent this season to Portage la Prairie District from Ontario under contract with the Manitoba Cartage Company, whose factory is located in that city. The industry is thriving and though many farmers of cartage only regard last year's shipments as necessary to install additional machines in order to keep up with Manitoba the number will be doubled.

Have Different Methods

Telephone girls in New York hotels know where a guest comes from by the way he answers the phone. A guest from the South will usually answer "All right," instead of "Hello." Those from Canada say "Yes." While those from the Middle West usually answer with a "What?"

Value Of Chemical Fire Extinguisher

Device Is Most Known Form Of Fire Aid

The secretary of the National Fire Prevention Association, who spoke in Montreal before the Safety League, stressed the value of chemical fire extinguishers not only for institutions, but for private residences.

These devices are the best form of first aid yet developed, and a very great number of fires in North America have been extinguished by the intelligent use of these extinguishers in the hands of householders and employees."

Says Canadian Wheat

The people of the West will be surprised to learn that Germany bought 48,296,324 bushels of the Canadian wheat that went out of Montreal last year, and France 28,641,186 bushels; Holland bought 23,356,697 bushels, Italy, 19,301,344 bushels and Belgium, 10,179,508 bushels.

The gray fox is much less swift than the red fox; it differs also in important structural characteristics and while all other foxes, to an expert climber

The mother of Horus, the historian, considered him weak-minded as a youth

The man who goes to church before his nothing else to do is an idle worshipper.

Industrialism In Alberta

Alberta's progress since its creation into a province in 1905 is indicated by the increase in the number of industrial establishments from 97 in that year to 730 last year. In the same interval the production increased from $3,000,000 to $69,000,000.

The greatest known age attained by an insect was that of a queen ant which Sir John Lubbock kept alive for fifteen years.

The more a man gets the more he wants and the more he wants the more he doesn't get.

LESSON No. 16

Question: Why do sleepy children, pasty-faced girls, and nervous, mental cod-liver oil?

Answer: Growing children, particularly girls, need vitamin-rich nourishment to help them through critical stages of extreme tax on their strength.

Pleasantly flavored, easy to take, children like it.

SCOTT'S EMULSION

PAINTED FIRES

BY NELLIE L. McCLUNG

Copyright, Canada, 1925

CHAPTER XXI—Continued

Then appealed to, Danny Corbett went over to the couch and cheerfully inspected the young thing that was likely to make inroads in his hard earned income. He put his clumsy and dirty little hand very tightly on the glassy, smooth head, and felt its tiny bones. "Fine baby," he said, and very shrewdly chuck and found it well as a man—but he hasn't got his pipe in his hand in his pocket and drew out thirty cents in change and looked hard at it for some moments, as if some wonderful and schling key he knew something of them But Lucy was crying, "Give Mike! I'll do it. Are you pretty sure her mother will die Mr.?" Danny was quite sure.

"We ain't wishin' her mother no harm, Ma," Rosie quickly interposed, seeing the rebuke that was coming to her business partner "We ain't wishin' nobody no harm." Danny was very anxious not to prejudice the case But we know there is always a danger you know yourself, Ma, that none of us knows one day from another, we're here today and gone tomorrow, so I have often heard you say and Danny and me are just talkin' it over in case sometain should happen that's all."

The warm heart of Maggie Corbett was tender to her offspring at that moment. "Look at that, John, would you? Good little things, after all, and yet it was only this mornin' they were fightin' like drunken sailors. I often thought if they had had a baby in the house it might have softened them. Well, don't be settin' your hearts on this we one, for her mother is not gone' to die, I don't think; though you never can tell about a woman when her man has gone has to leave."

Outside the snow was still falling The expressed trees were bending with the weight of it, their branches hanging down like great white bears paws. Christmas Eve surged onward with all its infectious gladness as the crowds of shoppers began to thronged. The electric fans in the windows were hard pressed to keep back the sheeting frost form, which threatened to hide the season's offerings. Handsome cutters, with beautiful robes thrown over the backs of the seats, stopped at the curb to let out hurrying shoppers, delivery boys on foot, on wheels, on runners, loaded with parcels, hurried to the suburbs of the city, sleighloads passing to look in at unexplained windows where the happy families gathered around sparkling tables and laughed as happy over the arrival of guests that they forgot to draw the blinds and so allowed scores of their happiness to overflow into the street. Busy shaded lamps threw patches of radiance on the glistening snow Christmas wreaths tied with satin streamers glowed deeply red against the windows. The pains of the city was beating with laughter and sleighbells.

At the corner of Second Street and Jasper Avenue a congested street car stopped to let out a man of fifty whose face was lined with care but whose eyes were full of tenderness. Accompanying them was a liberal sprinkling of parents, mostly mothers, with their little ones, and a man who had the appearance of having strayed from the past. He looked out an air of very conscious unconcern, as if they did not know their little ones and as if he were going to take no part that was bound to be the very best thing he had ever done.

The Salvation Army Citadel blazed with light and pulsed with activity. At the door the supper, where a free welcome, was going on, and the odors of the delicious Christmas dinner rose up out into the street, compelled the reluctant cease to go in

At the citadel the bells were ringing, the snow suddenly stopped in that abrupt Alberta way. The city lights were so many and so bright against the deep India blue of the sky, it was hard to tell them from the stars, but high overhead rose to be seen the North Star, beloved of all benighted travellers. Now it twinkled and gleamed above all these earthly and unearthly sights and noises, making with unmistakable approval. Into the concentrated window of the Corbett's big room it peered with a deeper interest and kindlier understanding. For it could see that the Winnipeg couch was drawn out from the wall to make it into a full sized bed, and in it there slept the unperturbed young Lil with Rose Corbett on one side of her and Daniel Corbett on the other—her two new friends, who had accumulated in her presence and in the presence of each other to furnish her with shelter, love and sustenance in the event of her mother's death. Rose and Daniel Corbett the undertakers!

CHAPTER XXII.

It was Christmas afternoon when Helmi awakened Christmas afternoon, the very sound of which brings pictures of Christmas Eve surged overhead, with all its infectious gladness as the crowds of shoppers began to thronged. Little Helps For This Week

"Be thou faithful unto death, and I will give thee a crown of life.—Rev. 2:10.

Why should our spirits be support ed? Was God's promise enough? Our Father knoweth what is best, and He hath made them all.

He made them, and he set their length Sets periods of gum;

And knows the hand to pain the strength To rise above our pain.

—Lydia Huntley Sigourney.

God, who in mercy and wisdom grants to every child a world over have suffered so many sadnesses, and have sent them especially to the most virtuous and most loved, has used the laissons they should be the seminary of their virtues, their certain reward, exercise of wisdom, the trial of patience, the comforting for a crown, and the crown of glory.—Jeremy Taylor.

Taking No Chances

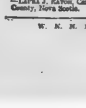
Nurse—"Whom are you operating on today?"

Orderly—"A fellow who had a golf ball knocked down his throat at the links."

Nurse—"And who is the man waiting so nervously in the hall—a relative?"

Orderly—"No, that's the golfer—Santa gentleman. He's waiting for his ball."

"Is that all the work you can do in an hour?" asked Sam's new employer. "Well, boss," said Sam, "I could do more, but I never was one for showin' off."



Salesman For Face Cream Learns a Good Lesson

Mr. Vandevier, New York, says "I was a salesman of cream for healing pimples, blackheads, etc., but when my own broke out with hateful, pimples and blackheads, I found one salve after another was no good. Finally I decided I would try to get at the cause of my trouble. I started to take Fruit-a-tives and within a few days after taking my first vegetable laxative pills for constipation my skin took on a new healthy look."

CARTER'S LITTLE LIVER PILLS All druggists—Bile and Pimples

Have Renamed Destroyer

Sculled Completion To Canada Soon In Action Of Admiralty

An implied compliment to Canada is seen in officials of the Department of National Defence, Ottawa, in the action of the British Admiralty in proposing sometime soon to the Dominion in the renaming of a destroyer of the Royal Navy.

When Canada decided to rename the destroyers Torbay and Tumult, the two vessels taken over by the Royal Canadian Navy, to Vancouver and Champlain, it was found that another destroyer of the British fleet already bore the name Vancouver. However, the Admiralty at once offered to rename the ship of the home fleet, to avoid any confusion, and to allow Canada to use this distinctive title.

Advices received at Ottawa headquarters are to the effect that effective April 1, the famous Highland regiment will be reorganized by the addition of a machine gun company.

THE NEW GERMANY

Enthusiasm For Military Training Gives Place To Interest In Outdoor Sports

Not the least significant of the characteristics of the new Germany, as contrasted with the old, is its growing interest in outdoor sports.

The youth of Imperial Germany were conspicuous for their enthusiasm for military training. The youth of republican Germany, particularly in the cities, are worrying their heart parents because they seem so much or more interested in sports and games than they are in their lessons. This turn of interest is not confined to the university young. A great many Germans are philosophizing on whether it is a healthy sign in the national life that 50,000 people should go to a football match, as it is now said, on occasion, and that only 5,000 should go to the Reichstag. The alleged extravagance of German municipalities have been partly directed towards developing public playgrounds, and swimming pools, and bathing. Self-respecting German communities are ashamed to be without one of the obligations of modern civilization as they regard it, to provide healthy opportunities for recreation for their citizens. There is a tendency also to develop large tracts, 100 acres or more, sometimes on a scale which would do credit to Imperial Rome, to a series of athletic fields reasonably for runners, and motor bicycles, a cinder track for cycle racing, and fields occasionally nearly a hundred miles from a centre, and a system of open-air theatre and a large gymnasium, plus a restaurant where all kinds of refreshments are served.

Wedding Bills In Japan

Marriage in first-class style in any of the larger Shinto shrines in Tokio, Japan, costs the equivalent of $30 gold. The ceremony includes the almsdeeds of high priests, a chorus of orchestra with flutes, cymbals and pipes, and all possible trimmings. Reception, dinner and ball, and so on down to weddings classed as "poor," "humble" and "plain," the plain style necessitating a shrine fee of $7.50

Jones (as he treads on tack): "I wish you wouldn't be so careless in throwing tacks about, Mary."

Mrs. Jones (plaintly): Honey, you are getting mummer every day. I can buy a whole package of tacks for a nickel."

Many Minard's Liniment handy.

Tooth and Health

Issued By The Canadian Institute Council and Provincial Health Authorities

THE BABY TEETH

How many should there be? Ten little fingers and ten little toes? Nothing twenty is all right and there you have their number. Easy to remember, isn't it?

And when should you begin to look for them? About the sixth or seventh month.

And which comes first? As a rule the lower front teeth, the central incisors.

So after all baby's freshmanese he has a broad new smile of two and white and so sound they look that you never give a thought to future

Then the other eighteen or nineteen white coated little "milkers" will follow at intervals of about a month until twenty in two years old, when he should have his full temporary set.

These are the temporary or deciduous teeth, being known also as the "milk teeth," from which no will be aware, of course, that they will be replaced right through adult age They should all remain in place, however, until about the seventh year when through the natural process of shedding, they commence to be lost

Then the permanent teeth, and the only ones that the child will have the first teeth are sufficiently separated to allow room for them. Of this absence of blotting paper between the teeth, food decays and properly expanded and the second set is ever liable to be crowded and irregular. In such a case, the family dentist should be consulted

Since Benny is going to lose those small teeth in good time and get his new set, why bother to care for them."

Well, little Benny does not want a tooth ache any more than do you, and for several other good reasons of which more to follow.

Too Much Food

People These Days Eat More Than They Need

The problem interesting users people these any other in this country today is girth control. There is no topic of conversation more general and more personally important to multitudes of people than how to keep from getting too fat. This is a strange phenomenon in a world that, from the dawn of history, has been hard put to it to get enough to eat. It is probable that there never has been a time when more than a part of the world's population was not more or less continuously hungry, but in the United States food is so abundant that everybody must be warned not to eat too much, and there is a protest against reclaiming land lest its cultivation should increase an already embarrassing surplus of foodstuffs.

Canada needs a larger population but to bring in people for whom present provision has not been made beforehand will only result in the additional "Some still are for settlers at any price—but we think not the results of their policy

Minard's Liniment for Backache.

That man doesn't live who has not thought he had all the elements of greatness in him.

Extending Air Mail Service

If Satisfactory Winnipeg May Be Served In Four Hours

There are being completed by the post office department for an extension of the air mail service connecting large centres the Montreal and Toronto with the first land stop of transatlantic liners The contract for the service to Toronto has not yet been actually awarded but will be in a short time. It will give Toronto quick delivery of letter mail to and from Europe If the Toronto service proves satisfactory it is probable that in another year an extension of it as far west as Winnipeg will be attempted

HERCULES

PERMANENT BUILDING PAPER

IT TAKES A SHARP BLADE

Ordinary boards can be removed most easily with a sharp blade.

So, we can Herculize Permanent Building Paper be cut it doesn't tear easily.

For this reason alone, carpenters and builders prefer Hercules to all others. When using Hercules as roughing or you like. Hercules will not tear or crack Hercules allows greater speed in using.

For various purposes, Hercules is made in three grades—light, medium, and heavy All grades are waxed and pow-an wind proof and damp proof. A sample gladly sent on request.

Appleford Paper Products HAMILTON, CANADA

BUTTLER AND DARBY SHOW WELL ATTENDED AND ENJOYED

The Buttler and Darby show, consisting of songs, music, magic performances, mind reading and ventriloquism found favor with the good audience at the Variety Theatre on Thursday night last.

The mind reading displayed by Mr. E. C. Buttler was astonishing, this individual by his wonderful reading of questions written down on a piece of paper which presumably never reached his hand or left the vicinity of the parties. Most of the people whose questions were answered acknowledged the correctness of same.

In addition Mr Darby, assisted by one or two local boys to supply the back ground and comedy, performed several mystifying tricks.

The concluding number was a splendid ventriloqual sketch by Mr. Darby and Tommy, the singing in this item being exceptionally good, and the comedy hard to beat. During the program musical numbers were given by the orchestra.

The orchestra played for a dance following the show and received much applause.

LOCAL and PERSONAL

Miss Alice Partido and Ted Partido were home for the Easter holidays.

Vernon Martin who is attending normal at Camrose returned after spending Easter at home.

A boxing bout between Battling Potvson and Chipmunk was held in the Variety Theatre last week. The bout went the full ten rounds, the decision being given to Chipmunk. The main bout was preceded by several interesting preliminaries.

Miss Mabel Thompson left on Wednesday for Edmonton, where she will be operated on for appendicitis.

Mr. Lars Johnson, who has been visiting at the P. M. Haugen home, left for his home at LaGlace, in the Grande Prairie district.

Healer Morris is at present in an Edmonton hospital suffering from blood poisoning. He had a badly infected arm, and Dr. Law, being called, sent him to a hospital.

Jack Blake also returned home from the hospital last week.

Mr. L. C. Hay now drives a Chrysler coach

NIGHT-FLIERS CONCERT WELL ATTENDED AND THOROUGHLY ENJOYED

The visit of the Night-Fliers in person to the Variety Theatre, Tofield, will long be remembered as an event of importance from an entertainment point of view. The well filled house were entertained right royally from from start to finish of the programme and the number of encores fully proved how popular the artistes were.

We have not the space for the full programme, but Harry Coles and his party certainly made a distinct hit here. The programme included numbers by Harry Brown and his orchestra; solos by Flo Clark; dances by Rita Coles; songs by Jack Strachan; songs by Harry Coles; monologue by Harry Coles and Jack Strachan; song by Miss Bessie Wood, Miss Mable Hawksworth and Jack Hawkes; monologue by Jack Strachan. Miss S. St. Laurent presided at the piano.

W. I. NOTES

There will be a bridge party at the W. I. rooms on Wednesday, April 25th in aid of the school grounds fund With the help of the citizens of Tofield and district, the W. I. hope to improve the school grounds, and it is hoped that as many as possible will attend the bridge party in order to swell the fund for this purpose.

CLUB CAFE INSTALLS FRIGIDAIRE

The Club Cafe, thoroughly up-to-date in its service to the public, has now installed a frigidaire to further give their customers satisfaction.

The new electrical refrigerator, will enable patrons to receive their ice cream just right, neither too hard or too soft., while in the hot summer months soft drinks from the "frige" will be ice cold and thirst quenching. It is automatic in operation, as when the temperature rises to a certain point, the motor commences and when it falls to a certain point, it stops, thus insuring an even freezing temperature at all times.

This is the first electrical refrigerator installed in Tofield.

NOTICE

IN THE ESTATE OF KNUT O. STORLI, late of Lane County, Oregon, United States of America, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named deceased who died on the 12th day of April, 1923 are required to file with the undersigned by the 20th day of May 1928 a full statement duly verified of their claims and of any securities held by them, and that after that date the executrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to her notice.

DATED this 10th day of April, 1928.

LYMBURN, REID & COBBLEDICK,
Solicitors for the Executrix,
822 Tegler Building, Edmonton, Alberta.

LINDBROOK

This "ideal springlike weather" still continues, delaying work on the land, and also running the feeding business to a slim end, still the old optimistic song is heard, that of a late spring heralding a bumper crop; let's hope it does! and stays fine long enough to gather same in.

Miss Ethel Pruden of Edmonton spent a few days with her brother, Mr. John Pruden of this district last week.

Miss May Blain of Condor, near Red Deer, is here from the Normal school at Camrose, to get first hand knowledge of teaching before graduating from normal school, this being part of a scheme being tried out by the Department of Education.

The basket social and dance given at Deville school last Friday was well attended and a great success and was enjoyed by all.

A dance will be given in the Lindbrook school next Friday, April 20th. So everyone come and have a real good time, it may be the last this season and a good orchestra has been engaged, so roll out and let'er go!

It looks as if fur farming is to be one of the "industries" of Lindbrook soon; half a carload of special muskrat wire being unloaded here. This wire is specially imported from England.

LINDBROOK EAST

Mr. F. Morden has sold his quarter section to two immigrants from Denmark. We wish these new settlers every success in their new venture. Mr. Morden has engaged with Mr. J. Appleby for seeding.

Mr. E. Greveling has purchased a Fordson tractor from Mr. Hannan.

Mr. Geo. Braaten made a business trip to Edmonton last week.

On Friday, April 13th, Mr. C. Morden, entertained his neighbors to a whist drive. Ladies' 1st prize being won by Mrs. E. Wilson; 2nd prize, Mrs. J. Johnston; gents' 1st prize, Mrs. T. Cookson; 2nd Mr. G. McKenzie. (Bow, wow.) All report a good time.

Mr. E. Carlson spent the week end at his home here, returning to University hospital the beginning of the week.

Mr. J. Bailey and family motored to Silver Lake on Sunday last, visiting his sister, Mrs. Malcolm.

LAKESHORE

Dr. Edith G. Hamilton of the University medical staff, and her mother, Mrs. J. D. Hamilton of Hemaruka, Alta., spent Wednesday at the T. R. Murray home renewing old friendships.

Mr. Eld. Ingram and Melvin Bethel were callers in the Woodlawn district on Sunday.

Miss Mildred Booth, lately of the Camrose Normal School is substitute teacher at the Ingram school this week.

Mr. and Mrs. Henry Tiedeman Sr., were visitors at the H. Eaton home on Sunday.

Mr. Harry Phillips of Edmonton, spent several days last week at the Roe Phillips home.

Baby Warner was quite ill for a few days the first of the week but is better now.

Miss Male Clemen recently of Denmark and a niece of Mr. Chris Moe is assisting Mrs. Phillips with housework.

Mr. S. Bethel returned to the hospital at Lamont on Monday of last week after two weeks at home. He is reported as being some improved.

U. F. W. A. NOTES

The regular meeting was held on April 14th. There were fifteen members and one visitor present. The roll call was answered with ways to cook eggs. A letter was read from the Department of public Health saying that Miss Amy Conroy would be in Tofield on May 25th to deliver a lecture on infectious diseases. W[illegible] for further particulars.

The next meeting will be on April 28th at 2:00 p.m. Note change of time.

The meeting will be in the form of a debate, subject: Resolved that rural life has more advantages than city life. Miss Jean Kellner and ———— will take the affirmative and Mrs. Booth and Mrs. Phillips the negative.

AMISK CREEK

Arthur Patterson left last Saturday for Calgary, where he intends to finish his electrical course at the technical school.

Miss Anna Sand left last Monday for Camrose to take up studies at the normal school there.

Mr. and Mrs. E. A. Moen attended the stock show in Edmonton last Friday.

S. Olsen from Shonts is leaving for Norway this week. He expects to be gone for three months and will visit friends and relatives there. He left Norway thirty-six years ago and this is his first visit to the old country His parents are living.

Florence Moline attended the Teachers' convention held in Calgary last week.

Quite a number of friends and relatives visited with Mrs. P. O. Moen last Friday, the thirteenth, being her seventy-first birthday.

Mrs. U. Garthee from Viking visited with her sisters, Mrs. R. O. Berg and Mrs. P. O. Finsten, last week, returning to Viking on Monday morning.

Mr. and Mrs. Sand and daughter [illegible] Ryley, Mr. and Mrs. Aanobo and Henry, Mr. and Mrs. P. O. Moline, the Misses Florence and Margaret Astrid were all callers at the R. O. Berg's home last Sunday.

Thor Berg who have been staying at the Finsten home for the past month and Einar Nomeland left for Saskatchewan on Tuesday morning where they are going to work on the section.

We are glad to report that Miss Alice Berg is improving, though slowly, after being ill with rheumatic fever for over three weeks.

Mr. and Mrs. L. Reistad and children were guests at the P. O. Finsten home last Sunday.

BARDO

On Sunday, the Emil Rude and Monrad Finseth families, Clarence Rude and Miss Foshaug, Mr. Selmar Johnson and Miss Eggen, and Ingolf Brevhan went to Edmonton to visit Mrs. Rude and Miss Nora. They reported a nice ride and a very pleasant visit. Mrs. Rude and Nora hope to return home next Sunday.

Mr. and Mrs. Lewis Johnson, who have been visiting their daughter, Mrs. Pete Haugen and other friends for some time, left for their home in Grande Prairie on Monday. Mr. and Mrs. Joe Stauffer and Mrs. Ole Presbohmo and little son, accompanied them to Edmonton. The latter will go with them to Grande Prairie to join her husband at that place.

Born.—To Mr. and Mrs. Abe Weber on April 14th, a daughter.

The young married people of the Salem congregation were entertained at the Kauffman home last Sunday.

On Wednesday evening the young people had a party at the Ben Lauber home.

Mr. and Mrs. Melvin Roth have moved to the Tren farm. They expect to build a new house later in the season. Mr. Roth will build on his farm near the Mennonite Church for Ruben.

Clarence Rude obtained a good supply of water at a depth of 28ft. in his well.

Mrs. Nora Stauffer has been quite sick but is better.

Remember the April meeting of the Bardo U.F.W.A. will be held at the Hills' home on Friday afternoon April 27th.

On Sunday, April 22nd the sacred cantata "Christ Triumphant" will be sung at the Lutheran church by the joint choirs of the Camrose Lutheran College and Moland [illegible]. C. A. Ronning will direct the singing and H. Holmes, 'cellist and Miss Grace Kvale, pianist. The program is too lengthy for insertion, but we earnestly urge all who can to attend, as without doubt this will be a sacred musical treat, seldom heard on the prairies.

KETCHAMOOT

April 17th

Miss Helen Shultz spent her Easter holidays in Edmonton, as the guest of her friend, Mrs. D. H. Mitchell.

Miss Jean Dirkson returned to her home in Edmonton after a week's holiday visiting friends in our district.

Mr. Howard Lee left last Wednesday evening on a trip to Vancouver and other cities along the coast.

Mr and Mrs. Hugh Mitchell came down from Edmonton last week and are now settled nicely in their own house on the Clarence Mitchell farm. We are all glad to welcome them back to our neighborhood.

Two new sons arrived in our district last week, one at the home of Mr and Mrs. John A. Lee and one at the home of Mr. and Mrs. Marshall Mitchell. Mothers and babies are both fine.

Mr. and Mrs. Roy Fleming and family of Kingman were guests of Mr. and Mrs. Herman Lawson on Sunday. They also attended the Ketchamoot service in the afternoon.

Sunday after Sunday sees every seat occupied at church services. If there were more room, more children would stay for preaching service, which must be encouraging for the minister and gratifying to the faithful few who hope to have a new church in the near future. Sunday school at 2:00 p.m. and preaching services at 3:00 p.m. sharp.

Mrs. W. K. Mitchell and Mrs. Herman Lawson have one each of the Wierenga girls working for them, they are just recently from Holland.

Mrs. John Brown entertained the girls of the community to an Easter party on Thursday afternoon, the girls enjoyed themselves very much.

Miss Dorothy Baptist who is attending normal school in Camrose is taking her practice school teaching at our school this week with Miss Lawson.

Mr. and Mrs. Geo. Lawson and daughter, Miss Mabel Lawson, returned home on Thursday after spending a few days in Edmonton.

Despite the cold weather and bad roads, a pleasant afternoon was spent at the Whillans home last Wednesday when Mrs. Whillans entertained the M. A. S. Several visitors as well as well as many members were present. The visitors included, Mrs. Sheppard and Miss Dirkson from Edmonton, Mrs. Currie of near Dodds, Mrs. Gordon and Mrs. Lerbekmo of Tofield; Mrs. Geo. Cookson, Mrs. Hill, Mrs. Haukedahl, the Misses Fawcett, Hannah Jensen, Mildred Lawson, Helen Cookson and Mary Hill. At the close of the meeting a delightful lunch was served by the hostess. The May meeting will be held with Mrs. Gordon at the Manse in Tofield.

Mr. and Mrs. A. McMullen visited at the homes of Paul and Harold McMullen on Sunday The many friends of Mrs. Paul McMullen are pleased to hear of the decided improvement of Mrs. McMullen. On Sunday evening Mr. and Mrs. Paul McMullen left for Edmonton where Mrs. McMullen will undergo further treatment for her health

Miss Emma Bruha spent her Easter holidays with her sister, Mrs. Henry McGinitie and family.

Mr. and Mrs. Harrison had a visit from Mr. Harrison's father and mother, Mr. and Mrs. Joseph Harrison and brother and family, all of Lamont, on Sunday

LOWER ROSS CREEK

Mr Robuvka and Mr. Milbrandt have returned from the Waterhole district. Mr. Robuvka has taken up a couple of homesteads for himself and son

A double surprise party occurred on Friday evening when a member of neighbors gathered at the home of Mr. and Mrs. McNeil and presented them with an address and a fine auto robe, on the eve of their departure for Coronado. Mr. Martin was also presented with a very nice club bag prior to his departure for Berwyn, Peace River district. All parties are old timers and will be missed from their accustomed places.

Quite a number of Danish and Russian men are being placed on the farms in this district this spring.

Mr. Alex Lonnie has moved into the house on Mr. Rogers' half section on the creek.

Mr. Joe Niemetz and bride returned from the old country last week.

Praise For Anti-Toxin Cure

The number of cases of diphtheria and deaths resulting therefrom, have been reduced 60 per cent. in Pennsylvania in the last few years, says Dr. Theodore B. Appel, secretary of health, at Harrisburg. This phenomenal decrease, Dr. Appel held, has been due almost entirely to the use of toxin-antitoxin.

"Nothing has been more definitely proven," Dr. Appel said, "than the power of toxin-antitoxin to ward off that most dreaded childhood disease diphtheria."

NEW BLOOD NEEDED IN THE SPRING TIME

Try Dr. Williams' Pink Pills As a Blood Improving, Health-Restoring Tonic

Every man, woman and child needs new, rich, red blood at this time of the year. That is a scientific fact. All doctors know it. The blood grows thin and poor in the winter; there is not enough of it and spring shows the effect. Take notice and see how many people are pale and sallow at this time of the year. They complain of being easily tired, their appetite is poor and they are often depressed and low-spirited. That is Mother Nature urging them to improve their blood supply, but often their digestion is weakened so that they cannot turn food into blood without help. Here is where modern medical science comes to the rescue. Dr. Williams' Pink Pills have a direct action on the blood and enable you to get full use of the blood-making elements in your meals. You soon feel their effect, your appetite improves, your nerves are steadier, color returns to the cheeks and lips, you have more vim and energy, and can work with less fatigue.

The value of Dr. Williams' Pink Pills to all who are in what is known as a run-down condition of health is proved by the experience of Mr. John A. O'Neil, Port Hood, N.S., who says:

"It is not possible for me to recommend Dr. Williams' Pink Pills too highly. I had been gradually growing weaker and found it hard to do my work. I suffered from severe headaches and pains in the back. I was nervous and easily irritated, and altogether my condition was deplorable. A friend urged me to take Dr. Williams' Pink Pills, and I got a half dozen boxes. I had only taken them a short time when I found them helping me and by the time I had taken the supply I got, I was again enjoying good health. Headaches and pains had disappeared, my nerves were strengthened and I had good reason to be thankful that I had followed the advice of my friend."

Whether you are seriously ill or merely feel easily tired and out-of-sorts, you should try Dr. Williams' Pink Pills this spring. They are sold by medicine dealers everywhere, or will be sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Blue and White Talc

Development of the deposits of blue and white talc which are found in the vicinity of Banff, Alberta, is to be undertaken. The blue variety of talc which is very rare and valuable is used in electric insulators and gas burners while the white is extensively used in the preparation of cosmetics.

Asthma Cannot Last when the greatest of all asthma specifics is used. Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has to its credit thousands of cases which other preparations had failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

A Zulu woman may not call her husband by his name, either when addressing him or when speaking of him to others, she must use the phrase "father of So-and-so."

An Oil Without Alcohol. Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Eclectric Oil, and there is no alcohol in it, so that its effects are lasting.

Working On New Device

Dr. Whitney Thinks Idea For "Talking Books" Practicable

And now talking books, boon to the blind, the ill, and those with tired eyes.

Dr. Willis R. Whitney, director of the General Electric's laboratory, is working on such a device and thinks it is practicable. The plan is for a long strip of film to be translated into words by a loud speaker about three times as fast as reading.

Hawkers sold cabbage in the churchyard of St. Paul's, London, three hundred years ago until banished by the clergy because of the noise they made.

There are nine hundred miles of silk fibre in a pound of silk. China's yearly production is [illegible] pounds.

Red Cross Celebration

Fifty-Eight Nations Will Celebrate Hundredth Birthday Of Founder Of Organization

On May 8, 1928, fifty-eight national organizations, banded together under the Red Cross flag, will celebrate the hundredth birthday of Henri Dunant, founder of Red Cross and joint winner of the Nobel Peace prize.

In Toronto, the Ontario Division of the Canadian Red Cross Society will signally honor the occasion by giving a banquet on April 20th to welcome the delegates attending the Annual Meeting of Central Council. A limited number of tickets are being sold outside of the membership, and it is expected that nationally known speakers including the Lieutenant-Governor of Ontario, will attend and give the celebration speeches. Similar functions will also be held in every Canadian province.

It is fitting indeed that such a centenary should not go by unnoticed, for Dunant did much to promote the idea that suffering in war, the agony of the battlefield, could be largely mitigated.

It was while this great benefactor of humanity was travelling in Lombardy in 1859 that he saw 40,000 dead, dying, wounded and sick men lying on the Battlefield of Solferino, without anyone offering as much as a drink of water in kindly service. The sight of this so wrung his heart that he did not rest until an impromptu hospital was prepared in the nearby town of Castiglione, with a voluntary ambulance and nursing service in attendance. Thus he became known as the "Good Samaritan of Castiglione."

The sight of so much agony never left his mind and he wrote a brochure that was fraught with much significance to the world thereafter.

Dunant for several years travelled about Europe lecturing and giving his opinions regarding the treatment of soldiers in battle, pressing home the need for a reorganization of the medical services, for the rearrangement of plans for repatriating prisoners of war and caring for disabled men who had been broken in fighting for their country's cause. Out of Dunant's first idea grew the Conference at Geneva, which resulted in Red Cross being made law for the world. The first Treaty of Geneva was signed by twelve out of sixteen national delegates, the first Red Cross Society being formed in the German principality of Wurtemburg.

From that time the symbol of the Red Cross, which was originally adopted in honor of Switzerland, where the first treaty took place, became the chief organization to serve the soldier in war, and eventually to follow him and his family into civilized life, caring for the sick and promoting health in general.

Great Britain adopted the Treaty of Geneva on February 18, 1865; Prussia joined June 22, 1865, Russia was linked up on July 5, 1865, and the United States on March 16, 1882. The Canadian Red Cross Society at first was an offshoot of the British organization, but is now entirely autonomous within the boundaries of the Dominion of Canada. Turkey also subscribes to the same ideals but uses the symbol of the red crescent in place of the Red Cross, Turkey being purely a Mohammedan nation.

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectually that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

More Trackage For Vancouver

C.P.R. Will Instal Over 100 Miles Of New Trackage To Provide For Increased Business

Over 100 miles of trackage serving the ports of the Vancouver District will shortly have been laid by the Canadian Pacific Railway, according to a statement issued by the general superintendent of the district. The trackage is designed to take care of a steady and normal growth in trade through Vancouver and also to handle expansion in westward grain movement which this year has reached the record of 83,000,000 bushels.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Results Are Satisfactory

Big New York Store Starts Day With Song Service

Music as a method of "pepping up" and stimulating [illegible] has been adopted by Arnold Constable & Co., New York, and, according to the consensus of opinions of the various executives, the results are satisfactory.

Early buyers at this establishment who arrived before the usual hour of opening have been puzzled and rather intrigued by the sounds of melody, the strains of singing choruses, proceeding from behind the closed portals.

This feature occupies the period from 8.30 until the doors open at 9 a.m. Under a competent leader the chorus, made up from every department in the large establishment, enters into this brief song service. The inertia which has been a noticeable feature of early morning activities has disappeared at the close of the "songfest," all the participants are "on their toes" and the day starts off with a vim and swing that is astonishing.

A New Slip

Did you know that a fifteen-cent envelope of Diamond Dyes will duplicate any delicate tint that may be the vogue in dainty underwear? Keep your olde lingerie, stockings too, in the shade of the hour. It's easy if you only use a true dye. Don't streak your nice things with synthetic tints.

Dye or tint anything, dresses, or drapes. You can work wonders with a few, inexpensive Diamond Dyes (true dyes). New colors right over the old. Any kind of material.

FREE: Call at your druggist's and get a free Diamond Dye Cyclopedia. Valuable suggestions, simple directions. Piece-goods color samples. Or, big illustrated book Color Craft free from DIAMOND DYES, Dept. N9, Windsor, Ontario.

Just Dip to TINT, or Boil to DYE

Returned Soldiers' Insurance Act

26,000 Policies Are Issued, Representing $37,000,000

Under the Returned Soldiers' Insurance Act there are 26,000 policies, representing $37,000,000 today, according to a statement by L. H. Scammell, assistant deputy minister of soldiers' civil re-establishment, to the special parliamentary committee on pensions and returned soldier problems. He said the cash already collected amounted to $5,000,000, an amount that was in excess of death claims. The actual loss of operating the act totalled $1,200,000, based on the idle time of the insured.

The girl in love who has a rival should keep an eye on her and if the rival is a widow keep both eyes on her.

WHITE STAR LINE CANADIAN SERVICE

Farmers Well Represented

Lawyers and Farmers Have the Largest Representation In Parliament

Lawyers and farmers are the two principal vocations represented among the 245 members of the Canadian Federal House of Commons. There are 70 of the former and 50 of the latter. In third place come doctors with 30, then merchants with 22, followed by 12 journalists and nine manufacturers. The remaining 51 members represent a variety of callings.

Among the cabinet council of 17 there are six lawyers, four farmers, two journalists and the other five represent as many vocations. Each of the four farmer Cabinet Ministers, Hon. Robert Forke, Minister of Immigration and Colonization, Hon. W. R. Motherwell, Minister of Agriculture, Hon. Charles Stewart, Minister of the Interior, and Hon. Charles Dunning, Minister of Railways and Canals, represents a constituency in Western Canada. Each began farming on homestead land and has become a successful farmer. Hon. Mr. Forke and Hon. Mr. Dunning came from the British Isles as young men without any capital. Hon. Mr. Motherwell and Hon. Mr. Stewart are natives of Ontario, but as young men heeded the advice of Horace Greeley and went west to Saskatchewan and Alberta.

Dad Understood

"And what do you propose to do now, Henry?" asked a farmer of the son who had just come home after graduating at college. "Oh," yawned the optimistic young man, "I think I'll go to London and look for a position at five hundred pounds per—you understand? At five hundred pounds per!" "Oh, yes," said the old man, "I understand. You mean at five hundred pounds, per-haps!"

Distemper. Mix Minard's Liniment with Molasses and pour over a bran mash. Brings quick results.

MINARD'S "KING OF PAIN" LINIMENT

KING OF ITALY ESCAPES DEATH FROM BOMB

Milan, Italy.—Slight delay in an official program saved King Victor Emmanuel from assassination. A powerful bomb was exploded in some unknown way killing 15 and injuring 40 people in the Piazza Giulio Cesare while the king was making a triumphal tour of the city on his way to open the Milan fair. He made brief stops at historic points along the routes and reached the scene of the explosion ten minutes after it occurred. He was about ten minutes late in his schedule.

Most of the killed were blown to pieces. The infernal machine, composed of a tube filled with high explosives and controlled by a time clock, had been concealed inside the base of a lamp post.

Terrific havoc was wrought and there was a scene of terror and confusion when the sovereign appeared accompanied by his suite and the municipal authorities. The bodies of the dead and injured were taken into the exhibition grounds and King Victor immediately proceeded to carry out his duties of opening the fair.

Over the long distance telephone Premier Mussolini personally supervised measures for discovery of those responsible.

The premier sent warmest congratulations to King Victor Emmanuel on his escape.

The king displayed no anxiety for himself, but much for the wounded and the families of the victims.

A monster mass meeting in Cathedral Square was held this evening to give thanks for the king's escape.

A throng estimated at 100,000 crowded the square. Ringing addresses of loyalty were delivered by Pietro Fedele, minister of public instruction, and by Secretary Giampaoli, of the Milan Fascist Council.

The base of the lamp-post where the bomb had been placed had a circumference of about 7 or 8 feet. Therefore the explosive powers of the bomb were increased many fold. When it burst, fragments of metal were scattered over a radius of an eighth of a mile. A huge hole was ripped in the pavement for a distance of a hundred or more feet.

Bliss Carman Awarded Medal

Presentation Will Be Made At Winnipeg In May

Ottawa.—Bliss Carman, M.A., LL.D., F.R.C.S., sometimes called the poet laureate of Canada, has been awarded the Lorne Pierce medal of the Royal Society of Canada in recognition of his great contribution to Canadian literature. This medal is conferred by the Royal Society upon a Canadian writer whose total literary achievement is of outstanding excellence and represents the highest literary distinction a Canadian can win.

He will receive the medal at the meeting of the Royal Society in Winnipeg, May 22.

Unable To Pay Visit

London's Lord Mayor and His Gilded Coach Will Not Visit New York This Year

London.—London's Lord Mayor and his gilded coach will not visit New York this year. Sir Charles Batho said that he greatly regretted the fact that he was unable to accept the invitation extended some time ago by Mayor James J. Walker, to come to New York and bring his ancient coach and gaily-liveried footmen.

"I have too much to do and it is impossible to get away even for a few weeks," said the Lord Mayor. "I am booked for banquets nearly every night of my term of office, which has eight months yet to run."

League Against Alcoholism

Manitoba Prohibition Alliance Condemns Present Liquor System

Winnipeg.—A resolution endorsing the appointment of a commission of 50 representative citizens of the province to consider the future type of organization and the policy and program of the Manitoba Prohibition Alliance was adopted at the annual meeting here. The name of the alliance probably will be changed to "The Manitoba League Against Alcoholism." Another resolution adopted condemned the present system of government control of liquor, which, it says, has proved itself to be "a liquor sale system lacking every element of effective control."

Protect Eastern Consumers

Will Make Public Price Of Alberta Coal At the Pit Mouth

Calgary.—That the new provincial coal standards board will act only in an advisory capacity and that the Government is desirous of having the price of Alberta coal at the pit mouth made public, were two important statements made by R. J. Dinning, a member of the new provincial board, at a meeting of coal operators held in Calgary to discuss the new $6.75 coal rates to Ontario.

Mr. Dinning also intimated that the onus of having the various coals placed on the "preferred" list would rest with the operators themselves.

The list he said, would be submitted to J. A. Ellis, fuel controller in Ontario, at the earliest possible date. The point was stressed by W. W. McBain, of Edmonton, the chairman, that because a rate of $6.75 had been [won, the] Ontario market. He intimated that the battle had been won. They had merely won the first round.

It depended upon operators, working in conjunction with the Alberta Government, to win the rest of the Ontario market. He intimated that if the movement was to be a success it was absolutely necessary to safeguard the Ontario consumer in every possible way.

I.B.S. Broadcast Question

Matter Still Stands On Order Paper In House

Ottawa.—"Is the government considering refusing to continue the license of the broadcasting station CHCY, Edmonton (International Bible Students), and if so, for what reason?" asked H. E. Spencer (U.F.A., Battle River), in the House of Commons.

Hon. P. J. Cardin, minister of marine and fisheries, replied that he had already answered a similar question. In view of this fact, and also because he proposed later to make a statement on the matter, he thought the question might be dropped. Mr. Spencer objected and said he would prefer to have the question stand on the order paper.

J. S. Woodsworth (Labor, Winnipeg North Centre), declared that the minister had given no reason at all for refusing to renew these licenses. He failed to see why the minister should not answer the question. Mr. Speaker decided that the question would remain on the order paper.

Endorses Hudson's Bay Route

Canada Needs Another Outlet and Entrance, Says Noted Arctic Explorer

Montreal.—Favorable endorsation of the Hudson's Bay route was given here by Captain Joseph E. Bernier, noted Arctic explorer, in an address before a local service club. There was a problem on the horizon, he said, which Montreal and the Dominion as a whole would have to face in future years.

As the population of the country grew and the trade of Canada increased, the port of Montreal was bound to obtain a congested condition and then Canada must look to the Hudson's Bay to provide another entrance and outlet.

Coupled with this problem, he remarked that the waters of the St. Lawrence were receding and he felt that if the large liners were going to be able to dock at Montreal there must be a damming up of the waters of the river to maintain the necessary level.

Fall Grains Winter Well

Come Through In Ontario Better Than Anticipated

Toronto.—Fall wheat, alfalfa and other clovers have come through the winter in Ontario in better condition than had been anticipated is the general consensus of opinion gleaned from reports received by the Ontario Department of Agriculture.

While little seeding has been done in the counties of Essex and Kent, very little, if any, has been attempted in other parts of the province. Plowing, however, is fairly general in many counties of Southern Ontario.

There is a general shortage of grain in nearly all parts of the province.

The demand for farm labor is keen, and particularly so for boys of 15 to 17 years of age who are being brought out by the Department of Colonization.

Amalgamation Of Vinegar Works

The amalgamation of a number of Western Canadian vinegar manufacturers under the name of Western Vinegars, Limited, has just been effected.

Canada's Autonomy

Canada's Representation On League A Good Thing For the World At Large

Montreal.—Canada's election to the council of the league of nations was international recognition of the Dominion's autonomous status, Sir Herbert B. Ames, former financial director of the league's secretariat, declared in an address here.

With this recognition of Canada's autonomy, Sir Herbert said, came the necessity for greater participation by Canadians in the responsibilities of the league. Canada, he added, had not been elected by any one group, but her candidature had been endorsed by states which had nothing to gain from her election, but which thought that Canadian representation on the council would be a good thing for the world at large.

NET DEBT OF CANADA REDUCED BY 87 MILLIONS

Ottawa.—A decrease of $87,160,704 in the net debt of Canada during the fiscal year which closed on March 31 last is shown in the financial statement issued by the Department of Finance.

Until the department is in receipt of all the revenue collected in distant parts of the Dominion and until a number of obligations which properly come into last year's financing are met, the figures for the year cannot be regarded as complete, however.

Last year, the statement issued at the close of the fiscal year showed a decrease in the net debt of $61,429,300. The net debt as on March 31 last, according to the statement, was $2,260,673,563.

Ordinary revenues collected during the past fiscal year amounted to $410,144,530, or an increase of $26,233,336 over those of the previous year, the statement shows. Ordinary expenditure also recorded an increase amounting to $15,407,065, and stood at $306,708,741 on March 31 last.

Customs duties yielded revenue of $155,871,770 during the fiscal year just closed, as compared with $140,683,899 in the previous year.

Revenue from excise duties showed an increase of $8,837,037 over the 1926-27 figures.

There was a decrease of $14,194,964 in excise tax collections, which include the sales tax. The total amount collected was $97,046,220. Income tax collections recorded an increase of $9,260,270 over the 1926-27 revenues. The total amount collected in the year just closed was $64,847,570.

In the expenditure column, the big item was one of $120,780,973 for interest on public debt. This was over a million dollars less than in the previous year.

The amount expended for pensions during the year just closed was $36,195,558 against $34,533,661 in the previous year.

Honors For Aviator

Washington, D.C.—A bill proposing to give the congressional medal of honor to Clarence D. Chamberlin for his non-stop flight from New York to Germany last summer was introduced in the senate by Senator Brookhart, Republican, Iowa.

Shorthand Speed Record

Dr. Hans Janouschat, official stenographer of the German Reichstag, claims the world's speed record for shorthand. At a recent contest, Dr. Janouschat wrote 470 syllables a minute for three minutes.

MAKING TOUR OF CANADA

John Walter, co-proprietor of the London Times, now making a tour of Canada under the auspices of the National Council of Education.

All-British Settlers For Western Provinces

Large Party Of Boys Were Among New Arrivals

Winnipeg.—Resembling more a large party of tourists from the Old Country with cameras and fishing outfits in solid leather cases hanging from their shoulders, some 400 new settlers from the British Isles arrived in Winnipeg last week over Canadian Pacific lines to take up agricultural work in the Western provinces.

The party, one of the largest all-British to arrive in the West for some time were discharged at St. John from the S.S. Montcalm and proceeded here by special train.

Outstanding in the party was a group of 32 young British lads in their middle 'teens who were brought out to the Dominion under the auspices of the Agricultural Department of the Manitoba Government.

They were met on arrival at the Canadian Pacific Depot here by Prof. C. H. Hopper, member of the faculty, Manitoba Agricultural College, who is looking after newcomers of this type for the Government.

Does Canada Lack Creative Art?

Assertion Is Made That Great Canadian Novel Is Yet To Be Written

Toronto.—That the great Canadian novel has not yet been written, that there is a dearth of creative effort in music, and that Canadian drama has still to come were assertions made by Fred Landon, M.A., of the University of Western Ontario, when addressing the opening session of the Ontario Library association here.

Dr. George H. Locke, of Toronto, stated that the British Library associations were likely to form a loose federation in London, which would be the centre of library activity for the United Kingdom. That the federation should become still greater and embrace the other nations of the empire was the speaker's suggestion.

Park Site For Ottawa

Ottawa.—The Russell hotel and theatre buildings which are to be razed to make way for a confederation park in the heart of the capital have been sold with the property on which they stand for a sum of $1,125,000, it is announced. The sale was consummated when counsel for the property holders and the federal district commission met in joint session and settled the purchase price.

Empire Singers Enthrall Canada

Singing a repertoire that includes over one hundred pieces of part-music, ranging through practically every style and taking in folk-songs of England, Scotland, Ireland, Wales and America, with both sacred and secular music, the Westminster Glee Singers are now engaged in a tour of Canada that will be a delight to music-lovers. They are singing in the Dominion under the patronage of His Excellency, the Governor-General of Canada, and have recently completed tours of Australia, New Zealand, the Straits Settlements, India and Ceylon, a record unequalled by any other musical organization.

The singers are composed of male altos, tenors, basses and a number of boy sopranos who, like the men, are taken from the finest Cathedral choirs of Great Britain. They will give concerts in most of the cities of Canada from Halifax to Victoria and return. They are travelling for the most part on Canadian Pacific lines during their tour of the Dominion.

Aid Communist To Escape

Sympathizers Free German Writer Being Held For Treason

Berlin.—Otto Braun, Communist writer, being held on a charge of treason, was freed by seven sympathizers.

Braun had been granted permission to see his fiancee and was chatting with her in a room in the criminal court building in the presence of two officials. Suddenly the door opened and seven well dressed men entered. They drew revolvers and before the officials recovered from their surprise they escaped with Braun and his fiancee.

One of the men was caught in the corridor and refused to disclose his identity.

For Trans-Atlantic Flight

Another Aviator Has His Mind Fixed On "America By Air"

Madrid.—Another aviator has his eye fixed on the goal of "America by air." He is Captain Reginald Foich Truslove, an English flier, formerly chief instructor at the Gosport airdrome in England, and later instructor of Spanish army aviators. He informed the Associated Press that he was preparing for a flight from the airdrome at Seville, Spain, to New York by way of the Azores some time in June. He has not yet selected an airplane, but intends to use a light machine.

EDUCATION IS VITAL FACTOR IN SOCIAL PROGRESS

Saskatoon.—"Which is it to be: education or jazz?" This was the question asked by J. W. Barnett, Edmonton, secretary of the Alberta Teachers' Alliance in an address before the Saskatchewan Teachers Alliance. Mr. Barnett was brought to Saskatoon to be the chief speaker to the alliance as Dr. G. M. Weir, University of British Columbia, was brought here to be chief speaker to the Saskatchewan Educational Association.

"Chicago," said Mr. Barnett, "with its huge proportion of jazz voters swayed by unscrupulous political manipulators, has its Big Bill Thompson. What agency will make our polyglot western population a harmonious Canadian nation? We must face the fact, whether or not we like it, but we have just the same potentialities for political monstrosities and corruption in the western provinces as in Chicago, similar elements in the electorate: foreigners, illiterate and unacclimatized to freedom to western Canadian ideals, to a discreet use of the ballot. Their lack of appreciation of Canadian institutions makes a fertile soil for the growth of mob rule.

"In Chicago voters by the thousands whose desire and use of the ballot extends no further than putting a cross alongside names indicated by ring managers of a corrupt political circus decide the situation. They outnumber the educated, better informed type of voter, those able to read and write and think in English, who are not so easily swayed by lurid denunciation, able to resist delusions and of ready will to choose. The latter are too discouraged even to go to the polls.

"Education is no longer a luxury nor an accomplishment, it is a bitter necessity. The more instructed a population, the less liable are they to the delusion of enthusiasm and superstition, which among ignorant nations frequently occasions the most dreadful disorder.

"A democratic community, in order to be truly free, wise, self-governed, needs minds that are wise, self-governed. Lacking it, the national life is at the mercy of every catchword, machine boss, or brazen demagogue.

"We must face this question. Do the teachers really believe in education? Do they believe that making the world safe for democracy is synonymous with educate the masses? Do we believe education is the most profitable investment in the world today? Do we believe the country should provide an equal degree of educational opportunity for every child irrespective of social or endowment? Do we believe the school is the place to inculcate the spirit of goodwill the basis of world citizenship and world peace?

"If these are mere confessions of the mouth rather than beliefs of the heart, then the sooner we cease talking about education and leadership in education the better they are as sounding brass and tinkling cymbals."

STRAY BALLOTS DID NOT AFFECT ELECTION RESULT

Toronto.—The result of the 1926 provincial election in the riding of South Ottawa was not affected by the stray ballots, according to the findings of Mr. Justice Magee and Mr. Justice Hodgins, who were appointed a royal commission to investigate the matter following disclosures by Hon. W. E. N. Sinclair, Liberal leader in the legislature, that ballots had been picked up on the streets of Ottawa, some time after the election. Their Lordships also find that there is no evidence to justify strictures upon the poll clerks or constables in the election.

The report of the judges is dated April 11 and was received by Premier G. H. Ferguson prior to a cabinet council meeting held here. The prime minister had no comment to make upon the findings.

Their Lordships do not find that any criminal act was committed in relation to the ballots, but the fact that the ballots were found out of custody in the opinion of the judges, might create suspicion or uncertainty.

The judges find that F. M. Scott, returning officer for South Ottawa, was guilty of carelessness, irregularity, negligence and incompetence, as well as of unintentional wrongdoing.

Western Professors Honored

Recommended For Membership In the Royal Society Of Canada

Ottawa, Ont.—Councillors of the Royal Society of Canada in session here approved the awarding of the Flavelle medal of the society for this year to Professor A. P. Coleman, of the University of Toronto and of the Tyrell medal to Hon. Senator Thomas Chapais of Ottawa. Professor Coleman was awarded the Flavelle medal for his work in the interests of science, while Senator Chapais earned his award by his meritorious work in the interests of Canadian history.

It was reported to the council that the various sections of the society had recommended for election this year the following western Canada candidates for membership: Prof. D. C. Harvey, University of Manitoba; Prof. Robert H. Clark, University of British Columbia; Dr. Lloyd L. Dines, University of Saskatchewan; Prof. Stanley Smith, University of Alberta; Prof. Justin S. Delury, University of Saskatchewan.

Radio Waves Cause Storms

Such Is Belief Of Captain Of White Star Liner Homeric

New York.—Radio waves are increasing the violence of storms on land and sea, declared Captain W. H. Parker, of the White Star liner Homeric, which arrived here 24 hours late after a buffeting from 60-foot waves which broke three windows on the promenade deck.

The atmosphere of the world, he contended, has been so disturbed and upset by wireless electrical waves that clouds have precipitated as rain with resulting strong winds. He declared there was no precedent for the continuous storms on the ocean, the snows in Egypt and the cold along the Riviera.

He pointed out that March 7 was the coldest day of that date in Cairo and the hottest ever recorded in London. As radio activity increases the storms will increase in violence, he said.

Will Stay On the Job

Mayor Thompson Will Remain Chief Executive Of Chicago

Chicago.—Despite the fact that most of the candidates he had backed were defeated in the primary, Mayor William Hale Thompson will stay on as the city's chief executive for the next three years. He declared that he had no intention of resigning the post he was elected to last year.

"I positively will not resign," the mayor said. "Why should I? We captured the ward committeeships and we also got the sanitary district, so there's no reason for me to resign."

During the campaign the mayor had announced that if his favorite candidate, States' Attorney Robert E. Crowe, co-leader in the Republican faction, was defeated, he would seriously consider giving up the mayoralty.

Crowe lost the primary to Judge John A. Swanson, Deneen candidate by more than 100,000 votes.

W. Worton, Publisher

Wednesday, April 18th, 1928

THE SOUL'S EMANCIPATOR

PART I

By Rev. J. E. Harris, B.A., Pastor Dolton Baptist Church

(The Burrhead News)

(Continued from a previous issue.)

This is what he writes - the bold type is ours.

"They cannot" - it is a moral impossibility. The law of God is 'Thou shalt love Me with all thy heart, and thy neighbour as thy self'; the thought of Jesus is, 'I will love my self and all will first and most.' Let this be forgotten as it may, even from the most honest! It is always the same thing as the essence. It may mean a defiant choice of open evil. It may mean a subtle and almost unconscious preference of literature, or art, or work, or home, to God's will as such. It is in either case the mind of the flesh', a thing which cannot be refined and educated into holiness, but must be surrendered at discretion, as the eternal enemy."

When sin is thus seen to be an attitude of parental hostility to God [illegible] of the flesh-self, life's capable of expression in reflected forms of self love - at once assumes a most serious character and as fraught with the most fateful possibilities for each one of us. It explains at once why against Israel the sin-enslaved we may set Paul the sin-enslaved.

Externally the two cases are in the strongest contrast. David's had been a choice of open evil, but Paul could truthfully say concerning his life before conversion that "as touching the righteousness which is in the law"—external rectitude of life, he was found "blameless." Yet this Paul of blameless conduct is one with King David of shameful conduct, in crying out for the emancipation of his spirit. Hear him in anguished introspection exclaiming:

That which I do I allow not: for what I would that do I not, but what I hate that do I . . . I find then a law that, when I would do good, evil is present with me . . . Oh wretched man that I am WHO SHALL DELIVER ME." Romans 7., a hell."

How can this cry of Paul be explained except upon the ground that he has seen sin as the average man has not seen it? And Paul is not alone among men of blameless conduct who have had such distress of soul. Many another who has known an earnest but unavailing struggle with sin in its more subtle forms can be set beside him, and they all have that consciousness of inner bondage that made David exclaim: "I plead twine."

me so a free spirit."

Unhappily Christ's response to such sin sick souls is being obscured by much that passes for Christianity today, but is really a repetition of the error of those of old who wanted a political liberator in Christ. It is true that the Gospel has social implications, but in its essence it is fundamentally individual and spiritual. The cry today for a Christianity that will liberate the mass alone, that will secure better living conditions for the [illegible] that will promote good will peace and prosperity and at the same time will relegate to the past the emphasis on individual salvation is a repudiation of the mistake of the Jews who wanted a Christ who would better their external conditions of life but leave them undisturbed in the essential sinfulness of their souls. The preaching that leads such "social" Christianity and declares the day of [illegible] phase upon individual conversion is having many a wistful soul unsatisfied who want to hear in strong, ringing tones the words of Jesus concerning a freedom that can make them free indeed. They stand beside David and Paul, mute perhaps, but conscious of the same cause of inner enslavement, that make them cry out for Divine deliverance. And their Divine deliverer has come, but His message has been obscured.

It is the more of the Gospel that all such souls are longing to hear it in the splendid message of a Saviour who

"Breaks the POWER of cancelled sin
And sets the prisoner FREE."

that the day's needs so much as any day. Let it be sounded forth in strong and certain tones and then "dulled souls by thousands weakly stealing" will turn "their weary steps" to their powerful Liberator our Lord and Saviour Jesus Christ, and, putting their case in His hands, shall know the outworking of His mighty emancipating power in their own souls. And the work be undertaken in response to the faith whereby they commit themselves to Him He will surely carry on until the day when they take up the song of those who sing,

Unto Him who loved us and LOOSED us from our sins in His own blood and hath made us kings and priests unto God and His Father; to Him be worship and dominion for ever and ever. Amen."

"I can't marry him, mother, he is an atheist and doesn't believe there is a hell."

"Marry him, my dear, and between us we will convince him that he is wrong."

"I tells you dad count at a grand sacrifice" said sam.

Customer "You say that of all an eternal hell. How do you make a living."

"Mine friend," said Sam, "I make the schmall profit on the paper and the schmall profit on the paper and

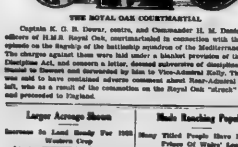
Development of Marquis Wheat Considered Most Outstanding Contribution To Agriculture

While the contributions to agriculture from scientists and plant breeders have been many and important in recent years, the development of Marquis Wheat has been by far the most outstanding. Its importance to the Canadian agriculturist merited a special appeal in the agricultural and industrial life of Canada, and to some extent in the United States.

Marquis Wheat originated from a cross made in 1892 at the Canadian Experimental Control Experimental Farm, Ottawa, between an early maturing variety obtained in India under the name of Hard Red Calcutta, and the leading Canadian wheat, Red Fife. It was developed by Dr Charles Saunders, the Ottawa, who, on his retirement a few years ago, was given an honorary degree by the Canadian Government of $5,000 a year in recognition of his great contribution to agriculture. He is still living in the Canadian Capital.

The chief points which distinguish Marquis are its ability to mature from six to ten days earlier than Red Fife, greater strength of straw than the latter variety; its greater resistance to stem rust; and its greater productiveness. It is probably safe to say that no new cereal variety since Red Fife introduced anywhere has excelled in so many points or has taken the place of other varieties over so wide an area. By 1915, only six or seven years after its introduction, Marquis had taken the lead over all other varieties throughout the ever growing areas of the spring wheat area. It must also be remembered that the advent of Marquis has made it possible to grow a high yielding, high quality wheat in many districts in which wheat might not have been otherwise grown, or if attempted would have yielded much less, and, in many cases would have been of lower quality and grade. While, as may naturally be expected, Marquis may have to give way in localities to other and more productive strains more better adapted to meet the conditions which prevail there, yet at the present time Marquis reigns supreme as a "general" variety. It is also interesting to note that practically all varieties of crossmen having wheat which contains no place in Western Canada are to-day or less closely related to Marquis, to which many have inherited some of their unique virtues.



THE ROYAL OAK COURTMARTIAL

Captain K. G. B. Dewar, centre, and Commander H. M. Daniel, right, officers of H.M.S Royal Oak, courtmartialled in connection with the recent episode on the Mgouth of the harbor of the Mediterranean fleet. The charges against them were laid under a blanket prevision of the Naval Discipline Act, and concern a letter, deemed subversive of discipline, sent by Dewar to Commander Daniel and forwarded by him to Admiral Sir Roger Keyes. The letter was said to have contained adverse comments about Rear-Admiral Collard, R.N., who as a result of the commotion on the Royal Oak "struck" his flag and proceeded to England.

Largest Acreage Sown

Increase In Land Ready For 1928 Crop

Acreage prepared for the 1928 crop in the Province increases by 1,000,000 at 16,388,979 acres, as compared with 15,374,983 acres in 1927, an increase for the season of 1,013,996 or 6.6 per cent., Statistician, an interim report of the Department of Agriculture, Edmonton, has announced. Of this total 10,000,000 acres are under crop, 2,000,000 acres are summerfallow, 1,000,000 acres are new breakings in all provinces, with the exception of Manitoba; all provinces record an increase in summerfallow, while Alberta records a decrease in fall plowing.

Canadian Included In List

The name of one Canadian is included in the list of official judges appointed by the Helsinki-Finnish Association of the United States for 1928. It is that of R. E. Hobby, Ontario, Chief Publisher of the Canadian Standard-Finnish Association. He is the only one from the Dominion to be included in the list.

Construction of a combination paper mill and saw factory, the estimated cost of which will be $1,000,000, commences in Winnipeg among those this year.

"You seem to your wife that you would never come home drunk at all night again.

"That's right. I am not going home until the morning." — Winnipeg Tribune.

W. N. U. 1720

Main Reaching Popular

Many Tilled People Have Followed Prince Of Wales' Lead

The Prince of Wales's purchase of his ranch in 1919 started a migration of tilled European youth to Alberta, which in making nobility almost as numerous as native Indians around the Calgary railroad station. Another noble migration has become so manifest in the last one year. Lord Hesketh has bought a 700-acre ranch where he and Lady Hesketh have opened a school of ranching for the tilled boards of Europe. Among their pupils are people who are taking a two-year course and living in an outhouse like the hired hands are: R. A. H. Prince Charles Phillipps d'Orleans, the young duke of Luxemburg, Lord Montagne, the Hon. John Stanley and the Hon. Philip Stanley. A few miles from Lord Rodney's ranch the Crown Prince of Denmark runs a large dairy farm from which he now ships tons of butter to Europe annually. Twelve miles west of Calgary Prince D'Alen, of Italy, has one of the biggest cattle ranches in Southern Alberta, Lord Minto, Count DePenna and Count De Rosmay are his neighbors.

The Best Varieties Of Vegetables

How Tested Varieties Proven To Be Of High Merit

Vegetable growers, whether gardeners or commercial producers, could find much information of value in the reports of the Dominion Horticulturist. Besides the new varieties originated at the Experimental Farms, practically all of the better varieties of all kinds of vegetables are given thorough test throughout the Experimental Farms System. In the latest report of the Dominion Horticulturist, available at the Publications Branch of the Department of Agriculture at Ottawa, the varieties that have proved themselves to be of high merit are named and described. The vegetables covered are: asparagus, beans, bush and pole, beets, Brussels sprouts, cabbage, cauliflower, carrots, celery, corn, cucumbers, Kohl rabi, lettuce, muskmelons, onions, parsley, parsnips, peas, popcorn, pumpkins, radish, rhubarb, salsify, spinach, squash, tomatoes, tomatoes and watermelons.

SAID WAR IS A DISEASE

Dr. Henry Van Dyke Points Out Three Facts For Age Admitted

"War is one of the diseases to which surrounding flesh is heir," says the Rev Dr. Henry van Dyke, of Princeton, N.J., formerly United States Minister to the Netherlands.

Dr. van Dyke set forth three reasons the first cause of war lies in the human heart—original sin, pride, covetousness, selfishness and hatred. The first element of cure is regeneration, or change of heart, education, religion, philosophy, and end of. God over all—world evil.

"The relevant element of cure for war is a reduction of armaments," he continued. "They are supposed to be the protection of peace, but 1914 proved they are the promoters of war.

"The third element in the cure of war is the provision and use of peaceful means of settling disputes between nations. The two old agencies are diplomacy and conference. They have failed, and failed utterly. They sometimes failed. The two new means are the League of Nations and the World Court.

"It is astounding, incredible, that America has stood aloof, proudly proud of her splendid isolation, refusing to join the League, keeping in the mail world and his driving whip Small boils are long above the grave and then dead to the wind stirs them, keeps away evil spirits. Practically all the tribes of Northern Siberia are nomadic in character and among some it is the custom to clot the old people of the tribe, who, in the family affair, accompanied with no ceremony, to the grave.

Immediately south, in the steppes, the country is much like Northern Ontario, with rocks, lake, pine trees and silver birches. Here, after an early spring, occur the very hearty Days" when a bitter cold wind sets in for a week or so, and preserves the carcasses of even the most hardy orchard fruits.

Valuable Aunt To Farm

Good Wheatcrop Useful and Adds Greatly To Appearance

A wheatcrop is a valuable asset to any farm. Livestock will suffer better behind a good wheatcrop and you Paul will be needed in hoeing the turn home. Driving snow is kept from the yards and buildings if they are protected by a good wheatbreak.

The well-grown wheatcrop also provides a real fuel supply The farm on which there are plenty of trees is a much more pleasant home than the barren farmstead.

A gentleman who was in the habit of giving toast-and-water drops into a long glass of cold milk on the table so as to have a sip now and then

On one occasion somebody managed to put writhely into the glass of milk before it was put on the table

The temperance lecturer took a sip now and then, until at the conclusion of his lecture he held up the tumbler and when it was emptied, looked at it and said "Good cow."

A customer rang up a doctor in a state of great agitation.

"Come at once," he said, "me wife have just swallowed a sixpence."

"How old is it?" "1896."

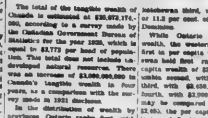
Four Western Provinces Take The Leading Place In Per Capita Wealth of Canada

The total of the tangible wealth of Canada is estimated at $35,972,176,000, according to a survey made by the Canadian Government Bureau of Statistics for the year 1926, which is equal to $3,772 per head of population. This total does not include undeveloped natural resources. There was an increase of $3,000,000,000 in Canada's tangible wealth in four years, as a comparison with the survey made in 1921 discloses.

In the distribution of wealth by provinces, Ontario ranks first, with estimated aggregate wealth of $9,009,737,000, or 30.1 per cent of the total. Quebec second, $8,232,264,000 or 26.5 per cent of the whole. Saskatchewan third, with $3,979,814,000 or 11.2 per cent of the total for the Dominion.

While Ontario led in absolute wealth, the western provinces came first in per capita wealth. Saskatchewan held first rank with a per capita wealth of $5,544. British Columbia second, with $5,150. Alberta third, with $5,036 and Manitoba, fourth, with $3,980. These figures may be compared with $3,304 and $2,685, the per capita wealth of Ontario and Quebec respectively

The total agricultural wealth is placed at $7,332,942,000, the largest item in the national wealth, and 20.31 per cent of the whole



TYPEWRITING COMPETITION

Three winners in the seventh annual typewriting championship contest in Toronto are now known. No. 1 is Miss Marjorie Mathews, of the senior winners. No. 2 is Irma Wright, Canadian champion who successfully defended her title with 111 words a minute. No. 3 is Rhea Kennedy of Brockville, first in the intermediate class

THE AMIR OF AFGHANISTAN

The Amir of Afghanistan, photographed on his arrival in London, with His Majesty King George, who welcomed him at the Metropole. The visiting monarch received a wonderful reception wherever he went in England.

WHEAT VARIETIES BY

Much Labor Involved in Developing An Earlier Maturing Wheat

In order to develop an earlier maturing variety of wheat, many factors had to be considered. Extensive collections were made and experiments were carried on at the Canadian Government Experimental Farm at Ottawa. The variety Marquis is the most favorable to come with Red Fife was Ladoga, introduced into the region in North Russia from which it came Two varieties were developed from cross breeding and were given the names of Preston and Stanley Both were similar in maturing to Red Fife, but neither was as good in baking quality although superior to Ladoga. They undoubtedly marked an advance in breeding work although, in themselves were not good enough to receive the recommendation of the Dominion.

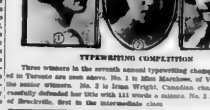
A cross between Ladoga and White Fife, a white-bearded variety similar in all other respects to Red Fife, yielded a number of forms, two of which received the names Huron and Percy. Of the former is now considered the most promising variety for most parts of Eastern Canada however people are not too particular about the matter of bread-making qualities.

Another interesting variety bearing the name Early Riga resulted from this early crossing work. This came from a cross made in 1891 between two imported varieties. One of these called Goldon, came from the Himalayan mountains of East India, from an elevation of about 11,000 feet. The other called Gneya, was brought from near Archangel, Russia. Early Riga proved to be one of the earliest ripening wheats. It possessed very fair baking quality but was less productive than Red Fife.

Canadian Postal System

The Canadian Post Office Department issued between 600,000,000 and 700,000,000 circulars, and 40 000 000 parcels annually in Canada. This delivery is made through about 12,640 post offices, and over 200 000 rural mail boxes extending over an area of nearly 3,700,000 square miles

The last of the British-owned four masted sailing ships, the Garthpool, was built in 1891.



"Do you really fish at night?"

"Yes. With glow-worms for bait."

Co-Operative Poultry Marketing

The head office of the Manitoba Co-operative Poultry Marketing Association has been transferred to Winnipeg. The Association has grown from 479 members in 1922 to 9,900 in 1927 making a total of 93 such groups in Manitoba.

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience a Guide to Women Passing through the Change of Life

Hamilton, Ontario.—"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound and I cannot speak too highly of it as I wasn't the Change of Life and was all run down and had no appetite. I was very weak and sick, and the pains in my back were so bad I could hardly move. I got very sad at times and thought I had not a friend on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. A friend advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always worked hard until lately, and was in bed for two months. I began to feel like a new woman after the first bottle and I recommend it with great success, also Lydia E. Pinkham's Liver Pills. I am willing to answer letters from women asking about your medicines, as I cannot speak too highly of them."—Mrs. EMMA WILSON, 471 Wilson Street, Hamilton, Ontario.

Sold by druggists everywhere.

Imperial Agricultural Research

Proposed Empire Chain Of Agricultural Research Stations

The Imperial Agricultural Research Conference which met in London last October, in its report just made public, recommends the creation of an empire chain of agricultural research stations. The report also recommends creating in Great Britain clearing houses of information in agricultural science for the purpose of serving the whole empire and the training of scientific workers in agriculture for the empire. It suggests that training stations should be located at Queensland, Ceylon, East Africa, West Africa and Malaya. Ten highly qualified men should be the minimum staff at a station, the report suggests, and the annual maintenance is estimated at £20,000.

The report emphasizes the need of highly trained men for colonial agricultural service, and suggests that scholarships should be founded with a view to promoting agriculture. It also recommends the establishment of corresponding centres and stations as smaller clearing houses of information at an estimated cost of £20,000 annually, this fund to be administered by a body of men on which the governments of the Dominions and India should be represented.

GREAT HELP TO YOUNG MOTHERS

Baby's Own Tablets Have Many Uses and Are Absolutely Harmless

To have in the house a simple harmless remedy for the minor ills of babies and little children is a great boon to young mothers, and this is exactly why Baby's Own Tablets have been found in thousands of households. The Tablets regulate the stomach and bowels, break up colds and simple fevers, allay the irritation of cutting teeth, yet they have no drug taste and the children like them.

Concerning the Tablets Mrs. Ruthven Crommiller, Ruthven, Ont., writes: "Kindly send me your little book on the Care of the Baby. I have two children, one four years of age and the other a year and a half. Both are in excellent health and the only medicine they have had is Baby's Own Tablets. I always keep the Tablets in the house and am happy to recommend them to other mothers."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Small Town Papers

BY FRANK PARKER STOCKBRIDGE

Reprinted by special permission from Saturday Evening Post. Copyright 1928, by the Curtis Publishing Company, Philadelphia.

(Continued)

"I tell you what, you skeptical old type louse," he continued, looking at his wrist watch and slapping me on the back, "I'm in town for a meeting of the executive committee of our editorial association to make arrangements for our convention next summer. If you really want to know what the country newspaper is like in this year of grace, come on along with me to the hotel. We haven't any secrets and you can speak the language of the craft well enough to pass for one of us. You'll meet some good fellows, live newspapermen, from the small towns all over the country, and they'll tell you better stories than I can. Can you spare the time? I'd love to have you come."

"I've time enough," I told him, "but I don't like to butt in."

"Butt in, my eye!" said Bert. "You used to be my boss, you know, and I want to show the other chaps the guy who taught me the beginnings of journalism. They'll be tickled to meet you. Besides, if you don't hear what they have to say I know what'll happen. You'll go round to the newspaper club and tell the old-timers whom I used to know what a flat Bert Mills has turned out to be. Come on!"

I went. And I found out that that novelist's idea of making a living out of a couple of country newspapers wasn't so funny as it had seemed to me. Things have changed in the small towns, and, as the saying goes, how!

It didn't take long, after Bert had introduced me all around, to discover that the thirty or forty country editors in the crowd were immensely proud of their profession, their papers and their home towns. That was the most noticeable difference between them and the sort of country editor I had known in my youth. The old-time country editor had plenty of professional pride, but if he was proud of his town, the feeling was not often reciprocated. These were men of standing in their communities; you could tell that by the way they talked and carried themselves.

"The successful country newspaper publisher today is no longer primarily a printer," is the way one of them explained it to me. "You notice that I said publisher. That means that he is a business man. He may or may not be also an editor or a printer, or both, but the emphasis is on the business end. Most of us are our own editors as well as publishers, and there are still a good many who began as printers and will always be printers at heart. But publishing a country paper of today is definitely a business, and a very profitable business."

There were country publishers from every part of the United States at this meeting, as well as representatives of business concerns having merchandise to sell to country papers. Between listening to the discussions in the committee and the conversation around the luncheon table where Bert Mills brought a dozen other good fellows together, I discovered that my former ideas about country papers were based upon conditions which are as extinct as the passenger pigeon.

Much of the picturesqueness and glamour which surrounded the old-time country editor and his shop have disappeared, to be replaced by modern efficiency. There are still occasional pioneers, penetrating into new fields with the vanguard of civilization, to set up their presses and preempt the field in advance of population; but these are rare instances on the few remaining frontiers, and even in such cases, subscribers, advertisers and profits follow faster than B. Franklin Simms, my old boss, ever dreamed of.

A California editor told us of a man in his own state, F. L. Drexler, who took a pioneering chance less than five years ago.

"I don't know how much capital he had," said the California man, "but it wasn't much. He bought a little paper, the Free Press, at Riverdale. Riverdale has a census population of 264. It's just a wide place in the road. After Drexler had made his first payment he had just $150 left, he told me. But he made the paper pay, and since then he started two others, each in a village of less than 250 people. I don't know what he's worth, but he's always paid his bills and wages promptly, kept his children in the best schools, own two automobiles and two printing plants, all paid for, besides some real estate, and has a cash surplus in the bank."

A Florida delegate matched that with the story of Howard Sharp's Everglades News.

"I don't think there are as many as 250 people in the town of Canal Point, on Lake Okeechobee, where Sharp started the News a few years ago," he said; "but today the News has about 1800 circulation, which is higher than the national average of country weeklies, and it covers its local field exclusively and intensively. Anybody who wants to know what is happening in Washington or Russia, or whether Lindbergh made another flight yesterday, can subscribe to some city daily; but the city daily can't give the space to tell how many acres of muck land each farmer in Everglades has under cultivation, how many cars of beans were shipped during the week, and the rest of the intimate personal, local news, which is what the people living there really want to know."

That is the secret of the success of the country newspaper, just as it always has been—the ability to give its readers news about themselves which the city paper, no matter how near by it may be published, cannot possibly give them. Instead of trying to compete with the daily papers, the country editors of today are leaving the fields of national and international news to the dailies—even state news to a large extent—and concentrating on the news of their own counties or circulation territory. The country weekly in the old days had to print a good deal of general news because its readers were out of range of the dailies. Now the dailies penetrate everywhere, but, paradoxically, the country newspapers are more flourishing than ever before.

In Greenfield, Massachusetts, for example, a town of 15,000, there is a substantial daily paper; but there is also the Greenfield Gazette, which has been published as a weekly for 135 years. The Gazette has forty correspondents, one in every town in Franklin County, two in some towns, and there isn't a farmer in the territory who can paint his barn or buy a new flivver without the news of it getting into the Gazette. The result is a circulation above 5,000.

SUNDAY SCHOOL LESSON

APRIL 22

JESUS AND THE HOME

Golden Text: "Honor thy father and thy mother" (which is the first commandment with promise).—Ephesians 6.2.

Lesson: Mark 10.1-6.

Devotional Reading: Ephesians 6.1-9.

Explanations and Comments

The Teaching Of Jesus About Divorce, verses 2-9.—Pharisees came to Jesus and in an effort, not to obtain instruction, but to entangle Him, put to Him this much-disputed question, "Is it lawful for a man to put away his wife?" As later in their question about the tribute money, so here they thought that whichever way He answered they would have a case against Him. If He said "Yes," He would offend the Jews who believed in the teaching of Rabbi Jochanan, who said, "The putting away of a wife is odious"; if He said "No," he would be opposing the teaching of many rabbis, and would offend Herodias (for Herod had put away his own wife and married Herodias), the wife of his brother, while the latter was still living, and her fury might cause Him to share the fate of John the Baptist.

As was His frequent custom Jesus referred them to their law: "What did Moses command you?" He questioned. "Moses suffered to write a bill of divorcement, and to put her away," they replied.

"You threaten the very life of the Nation when you relax the ties of marriage and weaken the family bond. There is nothing we want more than a new grasp of our Lord's teaching—that there is but one moral law, and that law the same for man and woman. The sacredness of marriage ought to be a subject upon which we have no doubts. On this point it is well not to have an open, but a closed and settled, mind. Let no specious and plausible talk about 'unhappy marriages' unsettle that conviction. The remedy for 'unhappy marriages' is not greater facility for divorce, but increased thought and seriousness in the contraction of marriage. Laxity in this will mean rottenness sweeping in like a flood. It is ours to maintain and assert the more austere and exacting view of Christ. Marriage is an ordinance of God. It is meant for the perfecting of character. It is essentially and ideally permanent and indissoluble."—J. D. Jones.

The Oil Of Power.—It is not claimed for Dr. Thomas' Eclectric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Canadian Ice Cream For China

Gradual Education In China and Japan For Canadian Products

Growing shipment of ice cream to Shanghai from Vancouver, occasioned within the past year by the parched throats of British and American troops in China, is one of the contributing causes of the construction of the new cold storage plant at New Westminster, says C. A. Cotterell, superintendent for British Columbia. Mr. Cotterell reports that a gradual education in China and Japan for Canadian apples and butter, as well as for Canadian beef and bacon, has come about. The new plant will cost about two million dollars.

LESSON No. 17

Question: Why is emulsified cod-liver oil so efficient a food for young children?

Answer: Rickets or weak bones are evidences of lime-deficiency. Emulsified vitamin-rich cod-liver oil helps Nature supply this deficiency.

Pure, pleasantly flavored, nothing quite surpasses

SCOTT'S EMULSION

IGNORANT OF SYMBOLISM

Hundreds Of Scarves With German Monarchical Design Worn By Britishers

We would like to know whether Germany has been chuckling over the incident as an excellent joke, or whether with familiar Teutonic stolidity she has done the thing because it happened to be the easiest way out of a bad deal. The other day a Newcastle, England, police court justice observed so many scarves in his courtroom, all of black, white and red, that, his curiosity aroused, he asked one of the defendants where he had got his.

The latter said it was a Christmas present, but pursuing the matter further, the judge discovered that this and vast numbers of such scarves of the same colors and design, worn not only at Newcastle but at London, Manchester and other British cities, were parts of a huge shipment from Germany.

The colors named are of course the German monarchical ensign. Further examination disclosed that the fatherland had manufactured a tremendous quantity of these scarves as preparation in interested quarters for a restoration of the monarchy. When the anticipated coup failed to come off the surplus stock of the red, white and black adornment was "dumped" in Britain and a public ignorant of their symbolism but finding the scarves attractive adopted them as the fad of the hour. It must have amused German visitors of the more intelligent sort to see the English thus parading by the thousands the emblem of the Kaiser's empire.

Tar Sands For Manitoba Highways

Alberta tar sands in huge quantities are likely to be utilized in the big programme of Manitoba for new highways this summer. The plan worked out is to try to have a plant at McMurray or some other point adjacent to these deposits and now extract the tar from the sands to avoid shipment of the voluminous raw material.

Canadian Muskrats Go To Belgium

Muskrats have been added to the fur bearers to leave Canada to become foundation stock in other countries. Forty of these little animals have been shipped through the Canadian Pacific Express Company to Belgium to become the nucleus of a fur industry.

Use Minard's Liniment for Corns.

CHAPTER XXII.—Continued

Dr. Symond felt very stern about all this as he stood looking at Helmi. "Where is your husband?" he asked. His tone implied that he suspected foul play. She had probably murdered him and concealed the body. Dr. Symond's manner warned Helmi that it would be better for her to tell the truth. Roused from her dream, she stared at him with a frightened face.

"You must answer me," said the doctor, sternly. His manner was patient but firm.

Helmi did not know where to begin. How could she tell this man her fears.

Maggie Corbett came to the rescue. "She has not the best English, Doctor, but I make out her man joined up early in the war and she got afraid and came in. It is all right, Doctor, she's married, safe and sound; she has the ring on her finger and has a valise full of nice things for the little one, and she's not a charity case, Doctor, at all. She has money to pay her way."

The doctor grew more cheerful. "That is fine, Mrs. Corbett," he said. "You see, I get so many cases where these foreign girls think they are married. Some fellow shows them a paper which he says is a license, and away they go with him. They have great respect for a paper, especially if it has a red seal on it. But almost everything will do—a tax notice or a water bill—even an unpaid one." Dr. Symond was quite cheerful now. Then he grew more serious. "I tell you, Mrs. Corbett, it is disgusting how easy these girls are!"

"Sure enough," said Mrs. Corbett, "easy is right. Ain't nature wonderful, doctor? Don't it beat all how she puts it over on us?"

"I tell you, Mrs. Corbett," went on the Doctor, not wishing to discuss this angle of it, "if the women of this city who meet in their local councils and women's institutes and a lot of these other organizations they are spending so much time on, would make it their business to get in touch with every foreign girl and warn her of these things—well, I wouldn't have so much to do; neither would the Superintendent of Neglected Children and there would not be so much congestion at the Childrens' Shelter."

"You are right again, Doctor," said Mrs. Corbett, amiably, "and did it ever strike you that it might be grand work for the Rotary Club and Kiwanians and such like to say a word to the men? They're doin' a fine work, buildin' Homes for these little ones, but maybe if they worked a little harder on the men they would have less need for Homes. But I see what you mean, Doctor, and I know it's a grand thing to always be able to lay all the blame on the women. You see the Lord lets her bear all the pain, and we see to it that she gets all the shame; so why not let the rest of the women bear the blame—there's no use spreadin' it any further."

"You misunderstand me, Mrs. Corbett," said the doctor, quickly. "I have the utmost sympathy for these unfortunate girls, and that is why I would like the women to do something. Indeed, I spoke to the Local Council about it when they asked me to address them."

"That was fine and good of you, Doctor," Commended Mrs. Corbett. "I'm a good hand at givin' advice, too. Don't it make a person feel grand to give out a good gob of advice; and then if anyone does go to the divil we can say, 'I warned you, anyway—you can't say I didn't.' But take the tip I gave you now, Doctor, get busy on the men. Leave the women to women—it's women who look after women, anyway."

The doctor interposed: "Now, Mrs. Corbett, I cannot agree with you there. You must have noticed that women are very hard on women." He was pulling on his gloves now, rubbing out the wrinkles carefully.

"No, I haven't noticed it, but I've heard it—I've heard a lot of men say it."

"Now, Mrs. Corbett, I see you are a great cynic, and I would not have thought that of you" Dr. Symond said, laughingly, as he shook hands with her.

"Don't let me keep you, Doctor," she replied, "and it Christmas and all."

When he was gone Helmi opened her eyes. "I can speak English," she said, lifting her head from the pillow, "I heard what he said. Did you give me the ring to wear?"

"Just so," said Mrs. Corbett, "and it's grand that you can speak so well. Swede girl, are you?"

"No, Finn," said Helmi, "two years in Canada. Do you know anything about me? You said my man had joined up—do you know anything about him?"

"Not a word, but you'll tell me when you feel like it," said Mrs. Corbett encouragingly.

Helmi regarded her friend gratefully. "You were good to me just now to say things for me and put the ring on my hand. I could not tell him when he asked me—he made me want to die."

"Sure Mike, I know, he's a good little man in his own way, but it's none of his business. He may be sure no woman goes knockin' round the country without her man at a time like this for the fun of it. Oh, well, you don't need to confess to him, or anyone for that matter, but only to God Himself."

"God don't care," said Helmi bitterly, "I pray and pray but God never hears!"

"Save us all!" cried Mrs. Corbett. "That's an awful way to talk about God, who is more anxious to do right by us than we are to let Him."

"Are you a Christian?" asked Helmi.

"My gracious, how do you think I could ever run a Rooming House if I wasn't and keep from committin' murder. If the love of God hadn't been shed abroad in my heart why do you think I would butt in and tell lies for you?"

"Is it always wrong to tell lies, even kind, good lies like yours? Will God be mad with you for telling a lie for me?" Helmi was afraid her good friend might get into serious difficulties over her.

Mrs. Corbett threw out her hands and laughed. "No fear! God ain't as touchy as lots of people try to make out. It isn't as if I lied to be mean or to hurt someone, and I'll tell you how I've got it sized up. It's a sort of treat for Him to hear someone lie for a woman instead of to her, or about her if you can get what I mean."

Helmi nodded.

"Don't be talkin' now, for tomorrow is the third day, and then's the time for the fever, if it is comin' at all. Rosie is bringin' your hot milk, and Mrs. Kalnaski has your supper cookin' on her stove, and I must be runnin' now to see how the wee lamb is. She's done nothin' but sleep yet, and that's the best thing she can do with the long road of life ahead of her."

CHAPTER XXIII

Helmi stayed on in Number 18, taking her meals with the Corbetts, and trying to pay for their kindness by cleaning up their congested suite and making clothes for Rosie and Danny, who had become the baby's devoted attendants. Mrs. Corbett was full of encouragement when she heard Helmi's whole story.

"Your man has been delayed, that's all. Sure he'll come—never say die, Helmi, dear—and just think of how pleased he will be to find this fine little girl, the very picture of himself, with her lovely dark eyes. She must be the spittin' image of him, for she's not a bit like you. But looks don't matter so long as you are healthy, and a better child I never saw.

Encouraged by Mrs. Corbett's confidence, Helmi, as soon as she was able, began to go to the station on the two nights of the week the Peace River train came in, sitting huddled on a seat that commanded a view of the big moon-faced clock. Although due to arrive at four in the afternoon, it was often past midnight before the train drew in.

The station agent began to notice the pale girl with the big eyes who came each train night and who seemed so anxious.

One night an iron gray old man was met by his iron gray old man was met by his iron gray old wife, who looked so much like him she might have been his sister. Helmi watched them, noting their fervent kiss, their light steps as they walked happily away arm in arm, both talking. Helmi saw it all, and somehow it comforted her to know that some had found happiness in life, even if it had apparently passed her by.

Motherhood!

Peterboro, Ont.—"Dr. Pierce's Favorite Prescription was very beneficial to me. I had become all rundown, tired, weak and miserable, had no appetite and my nerves were all upset. I saw the 'Prescription' advertised as being helpful to prospective mothers so I decided to try it. It built me up, quieted my nerves, gave me an appetite and I got along fine the remainder of the time—was able to do all my own work. I had comparatively no suffering, and my baby was very strong and healthy."—Mrs. Lottie Murray, 301 Townsend St.

At all drug stores. Tablets or liquid.

Send 10 cents to Doctor Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. of tablets.

Aluminum serves mankind in many ways—one of them being as a container for fine teas. All Red Rose Tea is put up in clean, bright aluminum, thus insuring its coming to your table as fresh and flavory as the day it was packed.

Recipes For This Week

(By Betty Barclay)

WAFFLES

- 1 cup milk.
- 1¾ cups flour.
- ½ teaspoon salt.
- 3 teaspoons baking powder
- 2 eggs.
- 3 tablespoons melted butter.

Mix and sift dry ingredients, add milk gradually, yolks of eggs well beaten, butter and whites of eggs beaten stiff. Cook on a greased hot waffle iron. Serve with syrup.

CROUTONS FOR SOUP

Cut slices of stale bread thinly spread with butter in 1-3-inch strips, removing crusts. Cut each strip in one-third-inch cubes, put in pan and bake until delicately brown.

HOT-SPICED LEMONADE

- 4 lemons.
- 1 quart boiling water.
- 1 teaspoon whole cloves.
- 1 cup sugar.
- 6 cherries cut in small pieces.
- 1 tablespoon minced crystallized ginger.

Extract juice from 3 lemons, cut remaining lemon into thin slices, pour boiling water over sliced lemon and add remaining ingredients.

PHENOMENAL GROWTH OF ENGLISH LANGUAGE

Appendix To Oxford Dictionary Needed To Accommodate New Words

The English language expands so fast that philologists cannot keep up with it.

This phenomenal growth is indicated in the work upon the New Oxford English dictionary which was begun seventy years ago in an attempt to produce a completely modern etymological record. But so rapid has been the expansion that the new volume will not contain many of the words in current usage unless they will be included later in a special appendix.

Many of the philologists who started upon this colossal work already have died and their task has been taken up by other scholars. Dr. C. T. Onions, the present editor, who commenced his duties in 1895, has personally supervised the compiling of the letters S, W, X, Y, and Z.

"Although this is perhaps the greatest dictionary in the world," he declared in an interview, "there are many discrepancies caused by changes of language. For instance, the word appendicitis is not in the dictionary because the section A appeared before the word was ever heard of. Similarly, airplane, tank, jazz, vitamines and many such modern words have been omitted. We hope to include them in an appendix.

"Even cross-word, which has caused such a tremendous boom in the sale of dictionaries, is not included."

Indicating that the new work is extremely intellectual, Dr. Onions continued: "It is interesting to compare an old dictionary of the eighteenth century with the Oxford dictionary. The old one defines horse as simply a beast. Whereas our definition is: 'A solid hoofed perissodactyl quadruped (equus caballus).'"

Has Famous Library

King Has Wonderful Collection Of Books At Windsor Castle

King George, of England, is very fond of reading and is an authority on naval history. His personal collection of books at Buckingham Palace numbers about 3,000. Among these there are first editions of the works of Emerson, Longfellow, and Oliver Wendell Holmes. He also possesses a large library at Sandringham, containing 15,000 books, and also the famous library at Windsor Castle, one of the largest in Europe, containing more than 170,000 books, as well as a large number of valuable prints and MSS.

"And J. Hawk McNoodle is a tight one, say you?"

"Tight? That fellow wouldn't give a beggar a bite if he owned the Sandwich Islands."

If men are always judged by their company it's pretty tough on some men who are always alone.

The Wrigley Swimming Marathon Trophy is a perpetual trophy to be competed for each year. The first Wrigley Marathon was held off Catalina Island, and won by George Young, of Toronto. The second Wrigley Marathon was held at Toronto and was won by Ernst Vierkoetter, of Berlin, Germany. The third Wrigley Marathon will be held in 1929, either in Canada or the United States. The Wrigley Trophy is a reproduction in sterling silver of the famous "Flying Mercury" modeled by Giovanni da Bologna. The position of the figure is changed to show Mercury presenting to Father Neptune a wreath. Neptune with his trident, dolphins and water surrounding are in bronze. The figure Mercury contains over 1,000 ounces of silver. In addition to the big trophy there will be provided annually a replica in sterling silver and bronze, to be presented to the city where the Marathon is held.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

WHY CARE FOR THE BABY TEETH

Of course, as we said, they will be lost eventually then why bother to care for them?

First, there is the inevitable decay, as a result of neglect, with it's attendant tooth-ache; and it may be that because of this destruction and pain, the tooth is lost prematurely through extraction and as a sequence, the little jaw does not develop at this point as it would have done with the tooth left in place.

Second, there is this other danger, that the too early and meddlesome extraction of the temporary teeth, there is the grave possibility of bringing away, or otherwise destroying the developing bicuspid, which frequently lies within the spreading roots of the former tooth.

Third, there is the reverse condition where the temporary tooth is retained too long because of interference, through pulp disease, with the natural process of shedding, thus causing the succeeding tooth to erupt out of place or not at all, either of which is bad.

From any or all of these causes, little Sonny is going to have some crooked teeth in his second set, and a malformed jaw, which means a facial deformity of greater or less degree.

Fourth, it is further true that neglect of these "baby teeth" may bring about more serious results than equal neglect of their successors, since decay will make much more rapid progress in them than in the larger and better developed teeth of the second set.

Above all, remember that these little teeth are to serve Sonny throughout the formative period, which includes the years of his greatest growth and development, and that his growth will depend largely on his ability to properly masticate his food, which ability is exactly proportional to the soundness of his teeth.

Would Teach People How To Eat

Sir William Arbuthnot Lane, famous surgeon, would like to be dictator of Great Britain so he can reduce the number of hospitals by one-half. He would do it by teaching people how to eat. They stuff themselves now, he says, every mouthful is a coffin nail; ten years hence if we stop people committing suicide by overloading their stomachs we may begin breeding a race of supermen and superwomen.

Appropriating an unused house in Cobourg, Oregon, colonies of bees working steadily for four years or more, have packed the walls of the building solidly with honey.

GILLEX FOR ALL CLEANING

Little Helps For This Week

"Fight the good fight of faith; lay hold on eternal life, whereunto thou art also called."—Timothy vi. 12.

Great duties are before me and great songs;
And whether crowned or crownless when I fall
It matters not, so as God's work is done.—Alexander Smith.

The true hero is the great wise man of duty, he whose soul is armed by truth, and supported by the smile of God, he who meets life's perils with a cautious but tranquil spirit, gathers strength by facing its storms, and dies, if he is called to die, as a Christian victor, at the post of duty.

—Horace Bushnell

Slow But Always Sure

Efficiency Of Scotland Yard Has Again Been Shown

On the outskirts of old London last fall a policeman held up a car which was believed to have been stolen. He was alone, and it was dark. One of the two miscreants in the car shot him dead, then they drove off into oblivion.

A few weeks ago a man entered his apartment in old London and encountered an intruder. The latter shot him dead and ran out of the house, in amongst the teeming nine millions of human beings who comprise the population. The only clue to his identity was that he was tall. But in his flight he dropped his revolver.

Scotland Yard was on the job. Four months after the murder of the policeman they arrested the two men who were in the car. One was in London, and the other in Liverpool. One week after the other murder, Scotland Yard arrested a man who afterwards confessed to being the wanted man.

The mills of Scotland Yard grind slow, but they grind sure.

Cuticura Talcum is Cooling and Comforting

Daily use of this pure, fragrant, antiseptic Talcum Powder is soothing and refreshing to the skin. An ideal toilet powder.

THE TOFIELD MERCURY

MUNICIPAL COUNCIL MEETING

The Carbhill Municipal District Council held a regular meeting at the Municipal Hall on Tuesday, April 3rd.

There were present: the reeve, Councillor Williams and Councillors Christenson, Holmberg, Morden, Verge and Wood.

Applications for the position of secretary-treasurer were considered, and it was moved by Reeve Williams, that the application of J. O. A. Letourneau be accepted.—Carried.

Moved by Councillor Holmberg that a letter of condolence from the council be forwarded to Mr. John Wentzell.

Moved by Councillor Verge that the salary of the secretary-treasurer be $2000.00 per annum.—Carried.

The minutes of the previous meeting were read and adopted.

Moved by Councillor Holmberg that the auditor's report for 1927 be accepted.—Carried.

Moved by Councillor Holmberg that Messrs. McConnel Bros. Co. be appointed auditors for 1928.—Carried.

Moved by Reeve Williams that the secretary-treasurer, J. O. A. Letourneau be authorized to sign and endorse cheques and all other documents appertaining to his office.—Carried.

Moved by Reeve Williams that secretary be instructed to interview Mr. Wm. Chapman and employ him to bring all books and records up-to-date, viz. April 3rd, 1928. If Mr. Chapman is unable to accept to employ someone who is capable of carrying out the above, as per suggestions made by auditor.

Moved by Councillor Verge that 11-3, be S.E. of sec. 18, tp. 50, Rg. 21, time of sale; rum cow, age 7, just when he grows to the mortgagor on fresh; yearling heifers: 2 young calves. Above cows are the best milk cows offered for sale in the Tofield district for some time.

MACHINERY—Heavy farm wagon nearly new; stock trunk, good, thribble box; hay rack; Cockshutt gang plow; set diamond harrows; Cockshutt 14—16 disc; Massey-Harris Mower; Dearing hay rake; buggy in good condition; cutter; bob sleigh, corn cultivator; sulp, fanning mill; two water barrels; two tank heaters; carpenters' bench and vice; hog troughs; roll of hog wire; complete set of wings and tail for Massiston wood mill; saw; step ladder; brush scythe; quantity of lumber; large pole pole wood.

HOGS AND CHICKENS—2 sows with litter at side; 2 sows will farrow by sale time; 40 chickens.

GRAIN—75 bushels Barley 6 row barley, cleaned ready to sow; 60 bushels Pembroke mapes, good; kitchen table; several kitchen chairs; kitchen lossleus; Primrose cream separator; double; five dining chairs; large leather rocker; rocking chair; wicker rocker; wicker arm chair; Morris chair; hall chair; Singers sewing machine; writing desk; Blackford organ in A.1. condition; centre table; congoleum rug; dresser; three commoder; four beds, springs and mattresses; several small rugs; oil cloth, quantity of potatoes, quantity of canned fruit; dishes; pots, pans, pails, cooking utensils; cushers, forks, shovels, hoes, rakes, chains, tools and numerous other articles such as are found in the average farm home. Free Lunch at Noon—Sale Starts Immediately After Lunch

TERMS.—All articles of $20.00 and under cash; over that amount, time will be given till November 1st, 1928, on furnishing approved joint local notes bearing interest at 8 per cent. Discount of 5 per cent for cash on credit amounts.

ALEX KELLNER, OWNER
W. Webb, Clerk.
J. D. HANNAH, AUCTIONEER.
Do not miss this sale as everything will be sold without reserve.

HOLY TRINITY CHURCH
Second Sunday after Easter
11:00 a.m. Sunday school and communion service.
7:30 p.m. Evensong and sermon.
Subject. "Honest Doubters."
Rev. A. A. Adams,
Priest in charge.

"Little Annie Rooney" the picture put on by the C.G.I.T. was well attended and a very good production.

Robert Whyte, who was taken to an Edmonton hospital suffering with appendicitis, returned home last week.

KELLNER'S
Auction Sale
OF LIVESTOCK, MACHINERY, FURNITURE AND GENERAL FARM EQUIPMENT

Instructed by Mr. Alex Kellner, who has sold his farm, and is leaving the district, I will sell by public auction, without reserve, his entire farm equipment, and effects on

The South-East Quarter, of Sec. 26-50-19-4th, being one mile east and one mile south of Tofield, on

THURSDAY, APRIL 26th, 1928

C. HOBSON, Proprietor
MAIN STREET, — TOFIELD

LOCAL and PERSONAL

Mrs. W. C. King of Calgary are visiting at the Bruce home. Mrs. King will be remembered as a former Tofielder and a sister of Mrs. Bruce.

Miss Jennie Ormsby of Edmonton spent the week-end with Miss Polly Gepner.

Mrs. H. Rollens and family are spending a week or so at the Henry Wood home.

Mr. Lorne Gray returned to Lake Louise on Saturday.

Mr. John Chapman returned from Edmonton on Tuesday. He was in the hospital there.

Messrs. Clutterham, Hobson, Miss Annie Hobson, and the Misses Mabel and Nova Wood, visited the city on Tuesday of this week, travelling by motor.

Mr. Clifford Retherington of Edmonton has been transferred to Tofield as buttermaker and H. Lewis has gone to Chipman.

Mrs. Tebo Sr., and daughter returned the beginning after spending a few days here.

New millinery lines have been added to Miss Bewick's stock and there are now new shades from $1.50 to $6.50. Also some children's straw play hats.

The C.W.L. Ladies are holding a whist drive in the basement of St. Francis Church on April 30th, commencing at 8:45. Everybody welcome.

The following land sales have been transacted through the office of Mr. A. J. H. McCauley. The N.W. qr. of 23-51-19, from the C.P.R. to Mr Lloyd Wood. The N.W. qr. of 27-51-19, from the C.P.R. to Mr. Henry Tiedman. The M.E. qr. of 23-52-19, from the C.P.R. to Mr. Charles A. Clark.

Mr. Walter Bellamy has been appointed shipping agent for the egg and poultry pool.

Mrs. Burton visited at the Worton home over the week end.

The tennis court at the Canadian National Railway Station is rapidly nearing completion. It will be a cinder court, rolled hard and smooth.

Three more families of Hollanders arrived over the Canadian Nitional lines last Friday. They were accompanied by an interpreter furnished by the railway. They are in the country becoming accustomed to Western Canadian farm life. Another family, of these people, we understand, has moved into the Worton house.

Mr. F. H. Haugen visited the city on Monday.

Mr. Clutterham, we understand, brought home a new Essex sedan from the city on Monday.

One of the Wierenga brothers, who came to Tofield recently, was taken ill with pneumonia. He is progressing nicely.

SHE GUESSED WRONG
He (seriously): What was the last three hairs in a dog's tail called?
She (very seriously): Well, truthfully, Jack, I don't know. You tell me.
He (very, very seriously): Why, dog hairs.
—Wabash Caveman

NOTICE
IN THE ESTATE OF ENUT O. STORLI late of Lane County, Oregon, United States of America, Deceased

NOTICE is hereby given that all persons having claims upon the estate of the above named deceased who died on the 13th day of April, 1923 are required to file with the undersigned by the 30th day of May 1928 a full statement duly verified of their claims and of any securities held by them, and that after that date the executrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to her notice.

DATED this 10th day of April, 1928.

LYMBURN, REID & COBBLEDICK, Solicitors for the Executrix, 823 Tegler Building, Edmonton, Alberta.

GOLF CLUB HOLD ANNUAL MEETING

A very enthusiastic meeting of the Golf Club took place in the town hall on Monday, April 23rd at which some twenty-one members were present.

The following officers were elected for 1928:

Hon. Pres., Mr. Claude Gallinger.
Pres., J. Carver, Junior.
Vice-Pres., George Agnew.
Sec.-Treas., A. E. F. Cary.
Grounds Committee: Messrs. Agnew; Carver; McClurg; Constantine; and Calvert.
Entertainment Committee: Messrs. Bebren; Carey; and H. E. Rogers.
Reception Committee: Messrs. J. D. Hannan; Joseph Rogers; and Dr. Law.
Membership and Finance Committee: Messrs. McClurg; Hessel; Calvert; Hammond; J. D. Hannan and Jos. Rogers, all re-elected from last season.

It was decided to complete the course by the addition of two new holes; work on these has already commenced.

The chief executive were asked to request the town council to renew the annual lease of land and to inform them that the Club would lend their support to the scheme to complete the highway east from Hannan and Carver's Elevator, which was always draining the slough.

The Ladies' Club promised generous financial support to assist in liquidating the total indebtedness of $1,000, which is $231.00, this amount being more than offset by the value of the new mower purchased last season for the sum of $450.00.

With improvement to the grounds and the two new holes, golf should prove more popular than ever this season.

COMMUNICATION

Mr. Editor:

May I have space in your valuable columns to extend my thanks to the Board of Trustees of the Woodlawn School District for the payment in full, for fifteen cords of wood supplied by me.

While it is regretable that it was necessary for me to take rather harsh measures to collect same, yet "all is well that ends well."

The district has the wood, the trustee have had the experience and I have my money, so let us all be satisfied.

Thanking you Mr. Editor for your kindness, I am,

Yours truly,
CLIFFORD C. PLANTS.

HINGHAM

Mr. and Mrs. R. D. Bruce and family of Minburn spent a couple of days with Mr. and Mrs. J. Bonnes last week.

Mah Hin was a business visitor in Edmonton over the week-end.

Chas. Ayre of Camrose, was a business visitor here on Saturday.

H. Sparby and W. Melemore spent the week-end in Bawlf.

Mr. and Mrs. J. Munson and family and Helen Hyndort of Camrose were the guests of Mr. and Mrs. C. E. Hyndort on Sunday.

A. Asp spent Sunday with his family in New Norway.

Mr. and Mrs. W. Hartsehen, Mrs. Iverdale and Mr. and Mrs. E. Erickson visited with Mr. and Mrs. W. Jacobs on Sunday.

PRIZE WINNING FAT STEER FOR TOFIELD BUTCHER

The prize winning fat steer of the Edmonton Spring Stock Show was purchased by Mr. C. Hobson from P. Burns and Co., this week. The steer was bought by P. Burns and Co. at the sale for 18c. per lb. live weight. The carcas will be shown with ribbon attached at Mr. Hobson's refrigerator, where it is cold and sanitary, over the week-end. Most likely it will be cut up the following week. During the warm weather, all meats are kept in the refrigerator under sanitary conditions. The refrigerator is large and many will be pleased to see Alberta's best prime fat steer in the refrigerator and more pleased still to see some of it upon their own dinner tables. Mr. Hobson is to be commended for his enterprise in stepping right out and getting the best there is in the province.

BARDO

Born—To Mr. and Mrs. Roy Rock, on April 19th, a daughter.

The stork left a 9½ lb. boy at the John King home on April 20th.

The mission given in the church on Sunday afternoon, by Canerum people was enjoyed by a large audience. The church was more than full. The Girl's Club served lunch at the village after the concert.

Mr. and Mrs. Pete Kegan are settled now. Mr. and Mrs. Rubin Eide visited them on Friday evening and Mr. and Mrs. Jacobsen were their guests on Sunday evening.

Mrs. Rude and Miss Nora came home from Edmonton on Sunday morning. The latter returned Monday evening.

The Emil Rude and Flaaten families were guests in the Iver Moen home on Sunday.

KITCHAMOOT

Two families just recently from Holland have moved into the Jacob Henderson house, better known as the Jones home. Three children started to school on Monday.

Miss Margaret Mitchell spent the week-end with her friend, Miss Jessie Munroe, near Tofield.

Mrs. Keith Oliver is caring for the mother and new babe at the Marshall Mitchell home.

Mr. and Mrs. Frank Shupe and daughter, Erma, were guests of Mr. and Mrs. A. Hester in Tofield on Sunday.

Miss Margaret Moline, who is convalescing after an illness, spent a few days with her aunt, Mrs. C. A. Ingram.

Messrs. Detwiler of Kingman are building an addition to Mr. Carlisle's barn.

Miss Lillian Carlisle visited her friend, Mrs. Emily McAllister, at the McCowan home on Friday evening.

Mr. and Mrs. C. Coombes and family were Sunday guests of Mr. and Mrs. Marshall Mitchell.

Miss Mildred Ingram spent a few days the first of the week visiting her friend, Miss Pearl Welch at the Wesley Ingram home

Communion services were held on Sunday after the regular preaching services. Mrs. L. Carlisle and Mrs. John Brown sang a duett, accompanied by Mrs. Maurice McGinnis at the organ. Mr. Martin Lawson, violin; and Miss Mabel Lawson, at the organ accompanied the singing at the regular church service.

Mr. and Mrs. McCowan are enjoying the comforts of a new Chevrolet car these days.

Mr. Carlisle visited Mrs. Brown, Senior, on Monday afternoon, Mrs. Brown being confined to her bed by illness. Mr. Brown has been in the hospital for some time taking treatments for his health.

CALGARY BULL SALE MAKES RECORD

The twenty-eighth annual sale of pure-bred bulls held in Calgary on April 5 and 6, not the highest average price ever obtained at one of these sales. During the twenty-eight years that these sales have been held, never less more confidence been shown on the part of the buyers.

With an entry of 253 head, the sale opened on Thursday morning with Herefords, and from the moment the first bull was led into the ring, keen bidding continued throughout the sale.

Mr. D. E. Ball, of Red Deer, was holding an addition to Mr. Carlisle's one of the actioneers again this year.

Western Population and Education

[illegible] time such widespread discussion throughout Canada [illegible] immigration together with its allied subjects of [illegible] into the Canadian family, education of [illegible] and newcomers including mastery of the English [illegible] by the latter [illegible] it is well people generally should have placed before them the actual [illegible] and be guided by those facts rather than general assertions in support of which no proof is advanced. It is well that these discussions take place provided they are fair and reasonable and based upon facts rather than hearsay. As a contribution to such constructive discussion of an important national question this article is written.

According to the official census figures for the three prairie provinces of Manitoba, Saskatchewan and Alberta for the years 1916, 1921 and 1926, the British-born and the foreign-born were as follows:

	British born	Foreign-born	Total
MANITOBA			
1916	136,180	117,704	553,860
1921	[illegible]	160,300	610,118
1926	[illegible]	116,882	639,046
SASKATCHEWAN			
1916	[illegible] 632	201,868	647,835
1921	[illegible]	190,332	757,510
1926	[illegible]	[illegible]	807,737
ALBERTA			
1916	[illegible]	167,030	496,525
1921	[illegible]	175,972	588,454
1926	[illegible]	158,616	594,372

The figures of British born or foreign born for the year 1926 do not include Indians of which there were 13,216 in Manitoba, 12,001 in Saskatchewan and 13,227 in Alberta.

The above official figures disclose the fact that whereas the total population of the three prairie provinces increased during the ten-year period 1916 to 1926 by 329,729, the British-born population increased by 350,000, the difference being accounted for by a decrease in the foreign-born population of 20,380.

Evidence as to whether or not new comers to these Western provinces and the Canadian-born children of parents of non-British origin are being assimilated into the Canadian family, also whether or not education of the people is keeping pace with the growth in population, is furnished by statistics of illiteracy compiled by the census enumerators, and set forth in the following table of persons ten years of age or over:

	Total	Illiterate	Per Cent. Illiterate
MANITOBA			
1916	406,800	32,975	8.1
1921	452,166	32,005	7.00
1926	490,107	27,900	5.71
SASKATCHEWAN			
1916	465,204	36,021	7.7
1921	537,005	31,817	5.92
1926	596,000	23,734	3.98
ALBERTA			
1916	368,201	23,753	6.5
1921	434,000	22,487	5.18
1926	461,279	19,600	4.25

In other words, notwithstanding an increase in population in Manitoba of persons ten years of age or over of 83,286 between 1916 and 1926, there were 4,068 fewer persons who could not read and write.

In Saskatchewan, with 130,775 more people ten years of age or over, there were 12,267 fewer people of the illiterate class.

In Alberta, where the number of persons ten years of age or over increased by 93,998, the number of the illiterate decreased by 4,144.

The official figures quoted in the above two tables conclusively show that the danger feared by many people of these Western Provinces losing their British and Canadian character is not being realized; that, on the contrary the percentage of foreign-born to British-born is steadily decreasing.

They further establish the fact that steadily, even rapidly, the children and the younger generations of non-British settlers are learning to read and write English thus fitting themselves to take their place in and be efficient members of a common Canadian citizenship.

To Ship Thousand Buffalo Northward

Eleven Hundred More Wainwright Buffalo To Be Sent To Mackenzie River District

Early in June the Canadian Government will ship 1,100 more buffalo, principally year-olds, from Wainwright National Park to the Mackenzie River District in the north, as has been done in the past three years. A quarter of a century ago, anxious to save the buffalo from extinction, the Canadian Government bought a herd of 715 from Montana and established Wainwright Park. Within a few years the herd grew to so many thousands that a slaughter was necessary and the buffalo meat came on the market. Then the scheme of shipping the surplus animals north was adopted and found to be very satisfactory. Plans are nearly completed for the extension of the Wainwright Park boundaries to the Canadian National Railway tracks, so that travellers on their way to and from Jasper National Park and the Pacific coast may glimpse the herd from the windows of their train.

Flin Flon Railway

More Than Half Of the Steel Has Now Been Laid On Branch

Fifty-one miles or more than half the steel have been laid on the branch line from the Hudson's Bay Railway to Flin Flon, according to H. A. Dixon, chief engineer of the western lines of the Canadian National Railway, who returned to Winnipeg from an inspection of the line and also to the end of steel on the Hudson's Bay Railway.

Thirteen hundred men are engaged in building the Flin Flon branch line, Mr. Dixon said, and the work is well ahead of schedule. Six hundred of these men are busy on rock work on the last 24 miles. There is a considerable amount if this work to be done, but such progress has been made that steel will be into the Flin Flon before the end of the year. Seven hundred men are engaged in track work, including ballasting and bridge filling and two steam shovels are also busy on this work. The discovery of a large deposit of suitable ballast close to the line will assist in expediting construction.

Shorthorn Cow Makes Record

U.A. Rosa Lady 101st—[illegible]—a registered Shorthorn cow in the herd of the University of Alberta, Edmonton, recently completed a 365 day test during which she produced 15,420 pounds of milk with an average test of 4.3 per cent., making a total of 664 pounds of butterfat. This record places her sixth highest in Canada in point of butterfat production for Shorthorn cows.

Burns.

Spread Minard's Liniment mixed with sweet oil on brown paper, and cover injured parts. Soothes and heals rapidly.

MINARD'S [illegible] LINIMENT

New Fighting Planes

Machines Now Designed To Carry Guns On Wings

Fighting planes bearing gun turrets on their wings are being considered by the Air Ministry, it has been revealed. One big bomber has been designed for carrying three turrets, one on each wing tip and another in the centre. Another machine has a turret in the tail for mounting machine guns.

Royal Air Force officers are particularly interested in the tail turret design, which is said to have no "blind spots" or places where the gunners can not aim at a foe. On the planes with turrets handrails are provided so they can be manned while in flight.

NEW STRENGTH FOR WEAK STOMACHS

Indigestion Disappears When the Blood Is Enriched

The most urgent need of all who suffer from any form of indigestion is a tonic to enrich the blood. Pain and distress after eating is the way the stomach shows that it is too weak to perform the work of digesting the food it takes. New strength is given to weak stomachs by Dr. Williams' Pink Pills because they purify and enrich the blood. This accounts for the speedy relief in stomach disorders that follows the use of this medicine. The value of this medicine in cases of indigestion is shown by the case of Mrs. George W. Johnson, Lequille, N.S., who says:—"I have no hesitation in recommending Dr. Williams' Pink Pills. I was greatly distressed with indigestion. Always after eating I suffered from pains in the stomach and other distressing symptoms. I tried different remedies, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills, which I readily did, and I am feeling very grateful ever since to the person who gave me the advice. The very first box helped me and before I had taken a half dozen boxes I was restored to my former good health and all traces of this distressing trouble disappeared. It is now about a year since I took the pills, and I have not been troubled with indigestion since. I have taken every occasion to recommend Dr. Williams' Pink Pills to those in need of a medicine and shall continue to do so."

A little booklet, "What to Eat and How to Eat," will be sent free to anyone asking for it. You can get the pills from any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Nations Take Naval Holiday

For First Time In Century No Battleships Being Built

For the first time for many centuries, certainly as far back as the reign of Henry VIII., there is not a single battleship building anywhere, now that H.M.S. Rodney has passed into commission. "The Naval Holiday," which was proclaimed when the Washington Treaty was signed, has really begun.

Will the Rodney be the last battleship to be constructed? That is not an idle question. It concerns intimately the taxpayers of the British Empire, the United States, and Japan, if not also the peoples of France and Italy, whose representatives also signed the Treaty. Under the terms of that memorable agreement, the building of battleships will be resumed in 1931, and designs are already being prepared, at any rate in the United States.

Automatic lighters are forbidden in Peru, because of the match monopoly granted to Sven Karrell by the Government.

WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and would not be without it now. I had a female trouble so badly I could hardly walk and I was all rundown and could hardly get around to do my housework. I would be in bed three or four days at a time. I was told by a friend to try your Vegetable Compound, [illegible] by the time I took two bottles I was beginning to get around again. I took ten bottles in all, and now I am all right again and doing my own work. I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Sanative Wash, and I [illegible] it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be better off. I would not be without it if it cost much more."—Mrs. Nellie Jameson, 405 East [illegible] Street, Hamilton, Ontario.

Do you feel broken down, nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently, will relieve this condition.

Sore throats
Rub Vicks on throat and chest. Relieves two ways at once—absorbed, inhaled.

Making Good Progress

Marked Increase In Canadian Business Shown By Survey

Canada is in the midst of marked economic and business development according to a survey of business trends in the Dominion just completed by the Sherman corporation, research engineers. Reports of Canadian manufacturers, made for the survey, indicate substantial increases in the purchase and installation of new machinery in 1927. Ninety-two per cent. of the manufacturers reported increases.

Recognition of selling and distribution as a major Canadian problem is evidenced by the reports on the importance of developing new merchandising plans. Seventy-seven per cent. of the manufacturers agreed this was the case. The third matter given outstanding attention last year was the reduction of manufacturing cost per unit of product.

To Assist Pilots If Machine Fails

Device Worked By Compressed Air Shoots Fliers From 'Plane

A device for shooting pilots from aeroplane cockpits clear of their machines will be demonstrated at the International Air-Traffic Exposition which will be held at Cologne in October.

The invention is intended to assist pilots to make use of their parachutes in cases where the falling machine prevents jumping. The pilot's seat, with parachute attached, is placed on a compressed air chamber, the power from which is sufficient to hurl the average man twenty or thirty feet. The air is released by a pull on a lever with safety controls.

The inventor got his idea from the cannon used in German vaudeville and which shoots a man from 8 to 100 feet.

The indications of worms are restlessness, gritting of the teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

Recipes For This Week

(By Betty Barclay)

FRUIT SPONGE CAKE

- 2 eggs.
- ¼ cup orange juice.
- 1 tablespoon lemon juice.
- ¾ cup sugar.
- ¼ teaspoon grated orange rind.
- 1 cup flour.
- ¼ teaspoon soda.

Beat egg yolks with orange and lemon juice until thick and yellow; mix sugar and grated orange rind and add gradually to egg yolks; add stiffly-beaten egg-whites and cut and fold in flour sifted with soda. Turn into buttered and floured cake pan and bake in a moderate oven (325 degrees) 45 minutes.

A DOZEN HEALTH MUFFINS

- 1 cup flour.
- 4 teaspoons baking powder.
- ½ teaspoon salt.
- 1½ cups bran.
- 1 cup chopped dates.
- 1 egg.
- 1 cup milk.
- 1 tablespoon melted butter.

Sift flour, baking powder and salt together. Add bran and dates and mix thoroughly. Add well-beaten egg, milk and butter. Beat until thoroughly mixed and pour into greased muffin pans. Bake in moderate oven 25 to 30 minutes.

One American automobile company has established five assembly plants and three branch companies in Europe.

Young Wife: "I took the recipe for this cake out of the book."
Husband: "You did perfectly right. It should never have been put in."

After you do a man a favor he is likely to be afflicted with a partial loss of memory.

Minard's Liniment for Backache.

SAYS RICHES OF NORTH NEED NO EXAGGERATION

Canada Forging Ahead To Take Her Place Among Nations Of the World

The wealth and the [illegible] of the mining country of [illegible] north need no exaggeration, in the opinion of Cyril T. Young, F.R.G.S., superintendent of development [illegible] the Canadian National Railways. "If Canada, without losing one bushel of her wonderful western [illegible] continues to develop her mining industry," he says, "an industry which, while only in its infancy, last year produced more than half the value of the wheat crop of 400,000,000 bushels; continues to develop her pulp and paper industry to the limit of the market to absorb newsprint and is now annually more than half the wheat crop in value, and continues to develop her electric power, that white coal which never goes on strike, she is surely marching forward toward that destiny her natural resources entitle her to among the great nations of the world."

By building herself up "basically level" through her resources of mine, forest and electric power, Canada is pushing out into an unexplored empire which reaches as far north as Chesterfield Inlet on Hudson Bay. Oils and asphalt in Alberta, gold, copper and zinc in Manitoba and Ontario, added to immense paper and power resources, are bolstering up the farming industry and are giving the prairies of Canada the all-year round employment which they need, he says.

"The test of endurance is dividends," he declares, "and four mines alone the Hollinger, the Lake Shore, the Mond and the International Nickle—are now paying more dividends yearly than all the standard banks of Canada put together." And this is to say nothing of the newer developments such as the Flin Flon and the Sherritt-Gordon of Northern Manitoba.

Greatest Cause Of Accidents

Automobile Is Chief Offender According To Insurance Company Report

What causes accidents, anyway? Travelers Insurance Co. recently drew up a table of causes of accidental deaths based on its own statistics. The results are interesting and informative.

According to this tabulation, the automobile is the chief offender, 30 per cent. of all fatal accidents being caused by traffic. A close second is the home accident, which accounts for 26 per cent. Sports and recreation are in third place with 20 per cent.

An Oil Of Merit.—Dr. Thomas' Eclectric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Could Produce More Timber

By protection and proper management the accessible forest land of Canada could be made to produce in perpetuity several times the present annual cut. It will take many years to bring about this adjustment. On the other hand if present methods continue, the annual cut will have to [illegible].

The Lady: "Has nobody ever offered to give you work?"
The Tramp: "Only once, lady. Apart from that I've met wiv nothink [illegible]."

Firestone Dealers
Are Trained and Equipped to Save You Money and Serve You Better

Firestone sells tires only through regular established dealers—the outstanding tire merchants in every community. This great manufacturing organization—controlling raw materials in primary markets—having branches and distributors in all parts of Canada, ensuring fresh, clean stocks and quick, efficient distribution—is behind every dealer. Firestone Dealers know tire construction and tire service, having been trained at Dealer Educational Meetings.

Firestone Dealers have the latest equipment; the knowledge—the Firestone spirit and idea of service. No other dealer can give you the same values and serve you so well.

Navigation In Hudson Straits

Two Direction Finding Stations To Be Set Up By Federal Government

Plans are being created for setting up in the Hudson Straits two direction finding stations similar to those operated by the Canadian Government on the Atlantic Coast and in the Gulf of St. Lawrence. The Canadian Government Steamship Montcalm will spend the summer in the Straits and will carry with her equipment to establish three Air Force bases. These activities are designed for the protection of navigation in Hudson Straits with the opening of the Hudson Bay Railway, now under construction to Fort Churchill.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, [illegible] they know from experience how useful it is.

Western Canada Airways

The Western Canada Airways, which established the pioneer flying service into the Manitoba mining fields, is expanding its operations considerably this season. They have this year added ten monoplanes to their fleet and are now in a position to give regular daily service between The Pas, Flin Flon, Sherritt-Gordon, and other points.

THE MERCURY, TOFIELD, ALBERTA

BULGARIA IS DEVASTATED BY SECOND 'QUAKE

Sofia, Bulgaria. — A population numb with despair and fear was pictured in reports from the Philippopolis district, visited by the second shattering earthquake within a week. Almost 100,000 people are shelterless. And the dead have not been counted.

Their homes are in ruins, their possessions gone, their highways broken. Bridges have been destroyed and railway tracks twisted on rights-of-way that have sunk six feet in spots.

The changing face of nature shows whole hills moved and their contours altered. In places underground reservoirs have broken through and are spouting water and sand like miniature geysers.

The dead are uncounted because of the interruptions to communications and the disorganization of local governments. But in Philippopolis there are more than 20 dead, and 60 of the more than 100 injured there are in serious condition. In five villages near that city 27 persons were killed and scores injured. Sadovo, seat of a school of agriculture and model farms, was destroyed.

People throughout the stricken districts are in a state of deplorable destitution. Many have gone insane. Government and charitable agencies are trying to bring order out of the chaos, and King Boris is on the field in person. He has as his immediate assistants, Premier Liaptcheff and M. Vassileff, minister of public works.

Luck Of the Irish

Major Fitzmaurice Is Surprised At World-Wide Interest Shown In Flight

New York, N.Y.—The amazement of Major James Fitzmaurice when told that the world had been following the trans-Atlantic flight of the monoplane Bremen was related by Lt. Robert S. Fogg, air mail pilot, who with a photographer had greeted Fitzmaurice at Seven Islands, Que. Fogg said he congratulated Fitzmaurice and then told him that it was hard to realize they were seeing him. Fogg explained that the world had thought the fliers had run out of gasoline and were lost.

"'The whole world!' he exclaimed," said Fogg.

"'The whole world—' He seemed surprised that there was world-wide interest in the fliers. He grinned when informed he had the 'luck of the Irish'."

"Duke" Schiller, the Toronto airman, who had brought Fitzmaurice to Seven Islands, recognized Tom Hogan, the photographer, and grabbing him carried him to Fitzmaurice.

"Fitz," he said, "meet the first Irishman in America to greet you. His name is Hogan."

"Glory be, an Irishman!" said Fitzmaurice. "Wonderful as all these people have been to us, it seems good to meet one of one's own countrymen in all this desolation. I didn't know an Irishman would allow himself to get this cold to meet the ghost of Brian Boru."

U.S. Duty On Seed Wheat

Sentiment Growing In U.S. For Reduction Or Abolition Of Duty

Washington, D.C.—Abolition or reduction of customs duties on seed wheat entering the United States is one of the possible results of the tangled situation in this country produced by a deadlock over farm relief legislation.

Sentiment in favor of making Canadian seed wheat available at the lowest price to the American farmer has been growing in recent years and it is known that a number of western members of Congress would support the proposal if it could ever be brought to the floor of Congress.

Department of agriculture officials admit there has been an increase lately in pressure from the main wheat growing centres for consideration of the tariff on seed grain.

With the administration preparing to veto the farm relief bill for the second time and growing hostility amongst western farmers in consequence, there is a possibility that the president may exercise his power to amend the tariff under certain conditions of which this would be one. One congressman expressed the opinion that the United States farmers would gain in the long run if they sacrificed some of their seed grain markets at home and gained a reputation in the world market which Canadian grain enjoys.

Auto Gasoline Tax In Saskatchewan

Only Car Drivers To Pay Levy Of Three Cents Per Gallon

Regina.—Only gasoline used for automobile traffic will be liable to the three-cent tax to be imposed May 1, by legislation that becomes effective May 1.

The purchaser will pay the tax on all gasoline at time of purchase and will be given a refund on the gallonage used otherwise than that for his automobile, provided the amount named in the application for the refund amounts to more than $3.

Every person selling gasoline has to collect the tax at the time of sale and deliver a stamp therefor. These stamps shall be purchasable from the Department. Every importer, producer, manufacturer, refiner and distributor is required to forward before the tenth day of each month a return showing the number of gallons sold in Saskatchewan and the persons to whom sold. Every dealer selling or delivering gasoline is required to keep a record of the stamps so sold and to make a return before the tenth of every month of the outturn of the same, together with the amount of gasoline sold. It is the duty of the purchaser to see that he receives a receipt duly stamped on the purchase of gasoline.

Inspectors may be appointed under the regulations to see that the payment of the tax is made.

Contravention of the law renders one liable to penalties of from $10 to $300.

Considering New Route

Moving B.C. Coal To Montreal Via Panama Canal Might Be Feasible

Ottawa.—The feasibility of moving British Columbia coal to Montreal by way of the Panama Canal is being investigated by the Canadian Government Merchant Marine. This statement was made by R. C. Henry, director of the bureau of economics, Canadian National Railways, before the railways and shipping committee of the House.

"Really, we have no boat in the C.G.M.M. service that is available," remarked Mr. Henry. Boats on the Pacific coast service were now fully employed. The boats which were now operating from Vancouver to Montreal were carrying full cargoes and were not fit to be used as coal carriers. There were, however, two 4,400 ton boats available, but in his opinion they were altogether too small to be considered from a commercial viewpoint for such long voyages.

The question was brought up by A. W. Neill, Independent, Comox-Alberni, B.C., who suggested that the government should give a fixed rate on British Columbia coal.

Oriental Vote Is Problem At Coast

An Asiatics Occupy Important Place In B.C. Industries

Vancouver, B.C.—Should Orientals resident in British Columbia be allowed to vote?

The question is now agitating trade union circles here and at a recent meeting of the Vancouver and New Westminster Trades and Labor Council it was decided to leave the issue to the various locals, who will record their opinions on the subject and forward them to the council.

Oriental enfranchisement has been opposed by organized labor in this province for some years. The question has been revived by the action of the Canadian Labor Party in supporting equal voting privileges for Asiatics. The large number of Asiatics in this province and their important place in industry and trade give the matter greater significance here than in other parts of Canada.

Cost Of Harbor Survey

Palmer Received $9,423 For Report On Nelson and Churchill

Ottawa.—Senator Dandurand, in reply to a question, stated in the Senate that the sum paid Frederick Palmer for his report on Nelson and Churchill Harbors, was $9,423. He was selected as there was a controversy between Canadian engineers and public officials as to the relative merits of these harbors and it was deemed advisable to secure the opinion of an engineer of unquestioned authority who was not a party to the controversy.

Price Of Bread May Advance

Regina.—Bread prices are showing a tendency to rise as a result of the rising price of flour due in turn to the enhancement of wheat values. At Swift Current a one cent per loaf advance has been made.

NEW LEGATIONS ARE CRITICIZED IN THE SENATE

Ottawa. — Canada's legations and diplomatic service were discussed in the Senate recently. Hon. J. S. McLennan drew the attention of the Senate to this service and asked of the Government the nature of appointment, the emolument and what provision was made for training candidates for the diplomatic corps.

Senator McLennan said that the confederation celebration last year made Ottawa a real capital. With the coming of a United States minister, Canada has assumed certain national responsibilities. He did not believe that a glorified commercial traveller was the highest form of [illegible] needed by Canada in foreign countries. The appointment of a Canadian minister to Washington was another step in national responsibility.

He thought the appointments of last year did not come with any surprise as they had been discussed for some time. The selection of the United States to represent that country here was very satisfactory. The people of Canada were disposed to look upon Canada's adventure into foreign diplomacy as settled but he thought there should have been more preparation and knowledge given before sending envoys to Paris and Tokio.

Senator McLennan further observed: "I take upon myself to say that I believe the establishment of legations other than with Washington have not been authorized by Parliament or people of Canada. To that extent, if for no other reason, they are objectionable. I also think that such an establishment is premature; that we can get on as well without them by continuing the use of existing diplomatic machinery which Great Britain has placed at our disposal."

He believed at the earliest opportunity Canada should begin training juniors for diplomatic service.

Hon. Raoul Dandurand, Government leader, said the address from the Throne had made mention of the appointment of ministers to Paris and Tokio. He had not discussed it at length because the question had not been raised and it really appertained to the Prime Minister. He welcomed the approval of public men of the creation of a legation at Washington. This was the work of all parties, having emanated from Sir Robert Borden, being endorsed by Mr. Meighen and completed by the present Government. Concerning the legation in the United States, both parties had approved it.

Farm Women To Convene

Saskatoon.—Part of the extension program at the University calls for a United Farm Women's week to be held at the University on June 12, 13 and 14. Dean Rutherford, Prof. Murray and Prof. Rayner are in charge of the program for this course. The main question to be dealt with is that of improvement in labor saving devices on the farm especially dealing with the question of water supply.

Brings High Price

London.—A copy of the original six-leaved edition of Gray's Elegy was sold here at auction for $6,450. When first published two centuries ago, it was sold at sixpence. The highest price yet paid for the Elegy was $7,500, at the MacGregor sale four years ago.

The state church of Russia before the revolution was Greek orthodox.

Controls Wheat Shipments

George McIvor is only 33 years old, but as general manager of the Canadian Co-operative Wheat Producers, Ltd., sales department, at Winnipeg he is said to control the shipment of half of the Canadian wheat crop until it reaches the buyers in all parts of the world. He started out as a telegraph messenger.

Weather Suits Farmers

No Need To Worry Over Lateness Of the Spring

Edmonton.—"No occasion for anxiety or worry," says Hon. George Hoadley, minister of agriculture, in response to an inquiry about the probable effect of the way winter is lingering in the lap of spring. Some inquiries have been coming also from the east as to how seeding operations will be affected, and the minister is replying that if a break comes reasonably soon and the weather then stays warm the conditions are just what Alberta wants. That is to say, the soil will be in excellent order with abundance of moisture and seeding will not be any later than it has often been before.

The present snowfall is not adding much to the wetness of the land, according to reports from the country, as it is evaporating quickly. Somewhat more moisture than is really needed is reported from some localities, but in general the land is just right for promise of another bumper crop. As usual, Mr. Hoadley says, it's the city people who are doing the most worrying; the farmers know that seed time and harvest will not fail.

Vice-Regal Home At Coast

Governor-General Might Spend Summer In B.C. Is Report

Vancouver, B.C. — Reports that Lord and Lady Willingdon are seriously thinking of establishing a vice-regal summer home on the Pacific Coast have been revived as a result of their visit again this year and their inspection of several homes described as suitable for such a purpose.

The feasibility of making Vancouver or Victoria the social capital of the Dominion during the summer months has been mooted on several occasions, and while no pronouncement has ever been made by the Governor-General or Lady Willingdon, it is understood that they would not be averse to leaving the stately grandeur of Rideau Hall, Ottawa, for a few months during the year to enjoy the surroundings of Canada's farthest West.

Ottawa.—Canada's population is estimated by the bureau of statistics at 9,519,000. The estimate is as of June 1, 1927. Actual population at the last census (1921) was 8,788,483.

DENMARK MOVES TO SASKATCHEWAN

One of the largest families among this year's arrivals of immigrants over the Canadian National Railways was that of Hans Peter Petersen Potholm, of Denmark. Mr. Potholm has come to Canada with his wife and nine children and is settling near Melfort, Saskatchewan. He was met on his arrival at Winnipeg by two sons who had preceded him and who were living in Manitoba.

New Seed Grain Warehouse

Plan To Construct a Modern Plant At Moose Jaw

Ottawa. There is every likelihood of a new seed grain warehouse being established at Moose Jaw at a cost of something over $100,000. The present building is not suited to the purpose and a move is on foot for a new one. It is being sponsored by J. Gordon Ross, M.P. for Moose Jaw, and backed by Hon. C. M. Hamilton, provincial minister of agriculture, who had a conference on the subject with Hon. W. R. Motherwell.

The plan is to construct a most modern plant, the Dominion Government, the province and the association operating the present warehouse each contributing one-third of the cost.

There is reason to expect that, when the supplementary estimates come down, the Dominion Government will provide its share. This would ensure the warehouse because the other prospective contributors are ready to put up their share.

B.C. Farmers Want Horses

Paying Higher Prices Than For Years Past Says Dealer

Kamloops, B.C.—British Columbia farmers haven't yet found a complete substitute for the horse and they are paying higher prices for the animals now than for years past, according to D. B. Johnstone, Kamloops horse dealer.

"Work horses that a year ago I would have sold for $10 or $15, were sold recently for as high as $72, and good cows, not the best at that, fetched as high as $45," Johnstone stated. Good draught horses are scarce in British Columbia and are being shipped as far east as Montreal.

NAT. ASSEMBLY LIBERAL WOMEN ELECT PRESIDENT

Ottawa.—Hon. Mary Ellen Smith, M.L.A., Vancouver, was unanimously chosen by the national assembly of Liberal women as their president.

In answering the applause which greeted her election, Hon. Mary Ellen Smith said:

"I thank you from the bottom of my heart."

She went on: "There was a feeling throughout the country that the women were being chloroformed. But we refused to re-act to the anaesthetic. I did not want the presidency. But now that I have it and that you have set up the machinery to make this a permanent organization I am going to stay until that machinery is in smooth running order, and I shall welcome criticism. From now on we women want to go on record as being constructionists."

Nine hundred women met at the banquet which followed upon the close of official business of the assembly. The Hon. Mary Ellen Smith made her first appearance as president of the newly-formed National Federation of Liberal Women, and was received with cheers as she entered the hall.

The honorary president, Mrs. Norman Wilson, of Ottawa, announced the permanent officers of the new organization:

President, Hon. Mary Ellen Smith, M.L.A., Vancouver.

Honorary president, Mrs. Norman Wilson, Ottawa.

The honorary vice-presidents are: Miss B. McKinnon, P.E.I.; Miss Carrie Carmichael, N.S.; Mrs. A. E. Smith, N.B.; Madame Beique, Professor C. Derrick and Mrs. S. Jacobs, Que.; Mrs. David Dunlop, Mrs. Arthur Hardy and Mrs. M. Pourpore, Ont.; Mrs. Robert Forke, Man.; Mrs. J. G. Gardiner, Sask.; and Mrs. Finlayson, B.C.

The vice-presidents are: Mrs. Riley, for Prince Edward Island; Mrs. J. Hanway, for Nova Scotia; Mrs. F. E. Holman, for New Brunswick; Mrs. P. Paradis, for Quebec; Miss Florence Edwards, for Ontario; Mrs. W. G. Sanburn, for Manitoba; Mrs. Mary Sutherland, for Saskatchewan; Mrs. Robert Marshall, for Alberta, and Mrs. Henderson, for British Columbia.

The association will henceforth be known by the name "National Federation of Liberal Women of Canada."

The objects of the federation are defined as:

"To encourage the organization of Liberal women throughout Canada; to uphold the cause of Liberalism; to raise the status and advance the political education of women; to aid in securing and maintaining good government and to encourage a broad spirit of Canadian nationality within the British Empire."

CHICAGO WATER DIVERSION FROM GREAT LAKES

Ottawa, Ont. Hon. Charles Stewart, Minister of the Interior, related to the House the story of correspondence with the United States Government on the Chicago water division from Lake Michigan. "The Government of Canada," he declared, "has consistently refused to recognize the diversion in the slightest measure and will continue to present the Canadian viewpoint with all possible firmness to the United States against the principle of abstracting water from the Great Lakes to another watershed."

The correspondence tabled covers notes exchanged between the two governments since February 24, 1926, when Mr. Stewart tabled correspondence.

In his review Mr. Stewart mentioned a specific inquiry sent by the Canadian Government to the United States administration asking what progress had been attained by Chicago in the curtailment measures called for by the permit of the United States secretary of war. It is under this permit that diversion of water is now being made.

The United States replied that detail plans, it was expected, would be prepared during the ensuing year for the installation of control works at the intake to the sanitary canal, that progress made by Chicago in carrying out installation of sewage treatment works was satisfactory; that installation of water meters would, it was expected, result in a reduction of domestic consumption in the near future.

From these statements, Mr. Stewart continued: "We would be warranted in assuming that the United States Government was satisfied that the progressive reduction which was anticipated on November 25, 1925, would be realized."

The United States suggested a discussion of the practical question of providing compensatory works.

The Canadian Government replied, Mr. Stewart went on, that "while recognizing the marked advantages which may be gained by the construction of suitable compensating works, Canada would not be prepared to enter upon a discussion of any plans for the construction of such works if this course involved an assumption that the present abstraction through the Chicago sanitary canal is to continue."

Railway Plans Extended

Parliament Gives Companies More Time To Commence Construction In West

Ottawa.—Third reading was given in the House of Commons to a number of private bills.

These measures included:

A bill to incorporate the Highwood Western Railway Company with a capitalization of $3,000,000, and with its head office at Calgary, Alberta. The proposed railway line will run from a point near the Calgary and Edmonton Railway in Townships 20 or 21, Range 1, Alberta, to a point near Sparwood, on the C.P.R. in British Columbia.

A bill extending for two years the time in which to commence the construction of the Calgary and Fernie Railway. The proposed line is to run from Calgary, Alberta, to Fernie, B.C.

A bill extending for two years the time in which the C.P.R. commence construction of the following branch lines:

(a) From Acme, Alta., to a point in Township 33, Range 26 or 27, Alberta, a distance of 23 miles.

(b) From a point on the Rosemary north branch of the C.P.R. in Township 21, Range 15, to a point in Township 22, Range 16, Alberta.

A bill extending for two years the time in which to commence construction of the Manitoba and Northwest Railway from Tuffnell, Sask., to Prince Albert, Sask.

To Discuss Peace Plan

Britain Will Confer With Dominions On Outlawing War

London. The United States note to the powers inviting British adherence to a multi lateral treaty for the outlawry of war, is receiving most careful and sympathetic consideration said Godfrey Locker-Lampson, under secretary of state for foreign affairs, in the House of Commons.

The note, he added, will form the object of conversations between the British Government and the Dominions. The statement was made in answer to a question.

THE TOFIELD MERCURY

Published Every Wednesday at Tofield, Alberta

W. Worton, Publisher

WEDNESDAY, APRIL 25th, 1928

Clearing land in Canada was once an industrious habit. Eastern Canada was a forest, and the first thing to do was to clear land to grow wheat, potatoes and hay. The forest was the enemy to be routed. To-day, the people of Canada are awaking to the fact that the forest they once regarded as an enemy is Canada's second [illegible] asset, and furthermore, that it is a rapidly disappearing asset.

White pine was once the most commonly used lumber in this country, and a generation ago it was comparatively plentiful and cheap. Not so to-day. The original stands of white pine are nearly gone. For [illegible] timber we now depend largely on spruce and fir. Seventy per cent of the timber in Canada of saw-mill quality stands in British Columbia. Eastern Canada, once a forest, is now buying lumber from the Pacific slope.

The [illegible] forests of Northern Canada today are chiefly valuable as sources of spruce pulp for paper making. How long they will last, subjected to the present rate of exploitation plus the ravages of forest fire, has been calculated, and the resulting figure is not at all reassuring. In twenty-five years, unless Canada wakes up soon, her forest industries, her lumber mills and paper mills and wood-working factories will be closed up. Because her forests will be gone.

Canadian Forest Week calls attention to this situation and to [illegible]. If we can prevent forest fires, the natural growth from year to year, foresters say, will provide for the demand of axe and saw. The Canadian people as a whole must realize the great and increasing value of the forests of Canada which remain, and each individual must do his or her best to prevent forest fires. Carefulness and good management will save Canada's forest industries in perpetuity.

Hon. Charles Stewart, Minister of the Interior, views forestry work as one of his most important tasks, and not the least important part of his effort is to make the people of Canada realize that forest fires can and must be prevented.

Hon. Charles Stewart

(The Barrhead News)

A recent writer in "The News" stated that the silk worm and the honey bee are the only domesticated insects in the world. What about the flea?

I do not know what God has planned to come to me to-day;
I only know that He has promised me to be my stay.
And that His hand has mapped out all the way
That I must go.
I do not know the road o'er which my feet must run the race,
But I do know tho' rough it be; tho' steep in many a place
That He has said, "Sufficient is My grace,"
As on I go.

(The above is one of the gems of the 1928 Scripture Text Calendar, issued by The Evangelical Publishers, Toronto, price 25c. Both in illustration and in other selection of material, this firm's calendars during every year surpass all others published throughout the wide world. This is not an advertisement, but a gratuitous expression of the editor's opinion.)

The Bible Society circulated God's Holy Word in six hundred and two languages.

It distributes annually over ten million scriptures.

It employs one thousand colporteurs in the remotest corners of the earth.

It supplies God's word in embossed type for the blind in forty-three languages.

It maintains Bible depots in one hundred principal cities of the world.

It supplies the subjects of the British Empire with God's word in three hundred and forty languages.

It translates some portion of the Holy Scripture into a new language every month.

It expends nearly two and one-half million dollars annually in giving God's word to God's world.

The following little thoughts on big principles are quoted from L. E. Froom in the Canadian Watchman.

Position does not automatically confer wisdom upon the recipient.

We can earnestly contend for the faith without being contentious.

The Scriptures were given to satisfy our faith, not our curiosity.

The world's fashions and modes leads on to the world's sins and vices.

The Gospel is the power of God to save a man from doing things he would like to stop doing but cannot.

One may have a perfect theology, and yet be a lost sinner.

It is the old story of trying to be good without God.

The party at one end of the telephone had become thoroughly exasperated, and asked his friend if he was losing his hearing. His friend was an Irishman, and replied: "I can hear you all right till you begin to talk, and then I can't understand a word you say."

Farmer: "John, you know that I disapprove very much of your fighting, but I cannot help feeling very proud of you for thrashing such a big boy as that. What did you thrash him for?"

Son (indignantly): "Why, he said I looked like you."

Survey Of History Of Titles In This Country Reveals Very Many Points Of Interest

Now that the question of Canadians receiving titles is being revived at Ottawa, a survey of the history of titles in this country may be of interest.

The fact that titles had sometimes been conferred upon people who have not appeared to merit them, and that they did not quite chime with the democratic atmosphere of Canada, fomented the agitation against them ten years ago. It was even proposed to abolish existing ones. That would not only have been grossly humiliating to the possessors, but an insult to the King from whom they are supposed to come. Moreover, it would have been ultra vires of the Canadian Parliament to abolish something which had received royal sanction.

The history of titles in Canada goes back several centuries to the French regime, the oldest Canadian hereditary title being that held by Reginald d'Iberville Charles Grant, Baron de Longueuil. This dignity was conferred upon his ancestor, Charles Le Moyne, who owned the largest seigneury in Canada, by Louis XIV., in 1700.

In 1880 Queen Victoria officially recognized the title now held by the eighth baron of the name, who lives abroad and is registered with the elect in Burke's Peerage. About 1793 Governor Simcoe proposed to found an aristocracy in Canada by bestowing baronetcies upon executive councillors whose sons would, of course, [illegible] to naught, and since that distant day titles have been granted rather sparingly in this country, generally to lieutenant governors, chief justices, generals, premiers and federal cabinet ministers.

Not counting Canadian women who [illegible] and taking into account British titled people who have settled in Canada, there are today approximately 140 Canadian or quasi-Canadian men and women with titles—the latters' titles, of course, being tributary to those of their husbands, living or deceased. This list, too, may not include all titled Canadians in other parts of the Empire.

According to the best information, the Canadian men who hold peerages are: The second Earl of Strathcona, the second Baron Shaughnessy, Baron Atholstan, Baron Beaverbrook, the sixth Baron Aylmer, and the eighth Baron de Longueuil, who, unlike the others, does not hold a seat in the House of Lords.

Canadian baronets or hereditary knights are: Sir Edward Gordon Johnson (5th Bart.), Sir John Beverly Robinson (4th Bart.), Sir Francis Rose (4th Bart.), Sir Charles Stewart Tupper (2nd Bart.), Sir Gilbert Parker, Sir Vincent Meredith, Sir Joseph Flavelle, Sir Francis Knowles (5th Bart.), Sir Hamar Greenwood and Sir Edward MacKay Edgar.

The knights [illegible] die with [illegible]: Sir Robert [illegible], General Sir Arthur Currie, General Sir George Kirkpatrick, General Sir Percy Lake, Major-General Sir Frederick Loomis, Major-General Sir A. C. Macdonnell, General Sir William Otter, Major-General Sir Richard Turner, Major-General Sir Edward Morrison, Major-General Sir George Carey, Major-General Sir W. Hensker, Major-General Sir L. J. C. Herbert, Major-General Sir Richard Lake, Sir Allen Aylesworth, Sir Frank Barnard, Sir H. Cochrane, Sir Robert Falconer, Sir John Gibson, Sir William Hearst, Major-General Sir Percy Girouard, Sir Lomer Gouin, Sir J. D. Hazen, Sir Edward Kemp, Sir Daniel McMillan, [illegible] George Perley, Sir Rodmond Roblin, Colonel Sir Percy Sherwood, Sir Clifford Sifton, Sir Thomas White, Sir J. A. M. Aikins, Sir Herbert Ames, Sir George Burn, Sir George Bury, Sir Henry Drayton, Sir Eugene Fiset, Sir G. Garneau, Sir Frederick Haultain, Sir Samuel Holt, Admiral Sir Charles Kingsmill, Sir H. Laporte, Sir Felix Lemieux, Sir Hugh John Macdonald, Sir Donald Mann, Sir Andrew McPhail, Sir Henry Pellatt, Sir Frederic Stupart, Sir Thomas Tait, Sir Frederick Williams-Taylor, Sir George McLaren Brown, Sir Arthur Harris, Sir William Wanless (lately in Toronto) and Sir George Badgerow, the last creation.

Knighthoods have been advocated for Canadians, not only because they are supposed to be marked reward for merit, and to grace high office, but because they die with the holder. But in Canada, which lacks a regular aristocracy and landed estates to support such dignities, hereditary titles may sometimes prove almost embarrassing to the successors. In Britain inheritors of titles can go into politics or enter the army, navy, the diplomatic service or even the dignified bar or church where the surroundings fit their rank.

But in workaday Canada conditions are very different. One finds, for instance, a Montreal successor to a baronty earning his living as a lawyer in the courts, where the barrister-peer has the right to be addressed even by "his lordship" on the bench as "my lord."

In Winnipeg the baronet grandson of a great Canadian statesman is partner in a law firm, and in Montreal the baronet descendant of a famous soldier is a hard working C.P.R. official. Similarly the baronet who inherited the title conferred upon an illustrious chief justice in Toronto was, long after his accession to the dignity, a busy agent for paving supplies in New York City, where he modestly and, to the amazement of Americans, kept his prefix in the background.

RECEIVES APPOINTMENT

Hon. T. C. Norris, former premier of Manitoba, who has been appointed to the National Board of Railway Commissioners, succeeding A. C. Boyce, who has retired.

Vice-Royalty To Lead Parade

Governor-General Will Attend Stampede At Calgary

The Governor-General and Lady Willingdon will head the stampede parade at Calgary this year. They will both be mounted and following them will be the Royal Air Force band, and then the thousand or so horses under saddle and all the various chuckwagons and frontier features that go to make up what has been admitted to be the most spectacular parade on the continent.

The Governor-General has expressed the desire to see the stampede from beginning to end and has arranged to be present at nearly all the performances. On the programme on the closing night he has consented to present trophies to the champion cowboy and the winners of other events. They have also expressed their pleasure to lead off the grand march at the cowboys' ball which is one of the events of the week and at which a portion of the street is roped off for a dance.

Ted: "Last night when I got home my wife had my slippers ready, my pipe filled and —"

Harry: "How much did her new new hat cost?"

There are a thousand good talkers to one thinker. If the order were reversed what a happy world this would be!

"Growing pains" in children are the first warning of rheumatism, according to the Ministry of Health experts, London.

Pitler has dropped his hat after a festive evening. Kobes makes several unsuccessful attempts to pick it up, and then Pitler says: "Now, Kobes, you hold the lamppost still while I pick up the hat."—Lustige Kolner Zeitung, Cologne.

Map Of Edmonton District

A New Edition Of Edmonton Sectional Sheet Reflects Increasing Demand For Maps In Canada

According to the Topographical Survey, Department of the Interior, our Dominion is becoming more and more a nation of map users. This is reflected in the increasing demand requiring successive editions of some of the more popular map sheets issued by this organization. The Edmonton sheet of the sectional map of Canada, for instance, has already gone through ten editions since it was first published thirty-seven years ago.

The latest edition, which has just been issued, shows in seven colors all topographical features, both natural and artificial, possible for the scale employed—three miles to an inch. A study of the successive editions of this map would afford a ready means of tracing the progress of settlement in this district. When the first edition was issued the Calgary and Edmonton branch was the only railroad in Alberta north of the C.P.R. main line. Today, as the present edition shows, the area is served by a network of main and branch railway lines and is also filled with other features resulting from the works of men, such as towns, villages, farmhouses, schools, churches, elevators, telephone lines, post offices, and so on.

Another interesting feature recorded upon the latest edition is that in the 104 townships covered there are some 280 miles of trunk roads, 463 miles of secondary roads, and 2,200 miles of local roads in fair condition. These are shown respectively in red, in buff and in black.

The site of old Fort Augustus, shown upon the map as located on the north side of the Saskatchewan below Fort Saskatchewan provides a link with the past. Alexander Henry, the younger, tells in his journal of cutting barley at this place on the 3rd of September, in 1810, some time after the fort itself had been abandoned. Edmonton, a city of over 65,000 is built on the site of "new" Fort Augustus, erected in the latter part of the 18th century and designated Upper Fort des Prairies by early explorers and traders. "New" Fort Augustus was maintained by the North West Company until their fusion with the Hudson's Bay Company in 1821. Later the name was changed to Fort Edmonton.

The Edmonton sheet may be obtained from the Surveyor-General, Topographical Survey, Department of the Interior, Ottawa, upon application for the nominal sum of 25 cents in sheet form or 50 cents when linen-backed or in folder form.

Chagrined Orders

Hemphill: "Anybody call when I was in my private office?"

Office Boy: "Nobody except a colored woman."

Hemphill: "Great Scott, why didn't you tell her I was here? She was going to give me some valuable information."

Office Boy: "Why, you said if any lady called today to say you were out, because it might be your wife!"

Lothario: I was nearly married once to a widow; but she disappointed me.

Sleeper: Did she jilt you?

Lothario: Practically. She had a good job in the laundry and she gave it up.

Winnipeg Newspaper Union Fashion

A Smart One-Piece Dress

A style that proves a favorite for the [illegible] dot. The collarless V-shaped neckline is completed with a vestee crossing in diagonal line. The side tunics are simply stitched to the lower part of front along perforations. Tucks at shoulders are made on the wrong side for decorative effect, and the set-in sleeves are dart-fitted. No. 930 is in sizes 16 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3¾ yards 36-inch, or 2¾ yards 54-inch material, and ⅜ yard 27-inch contrasting. Price 25 cents the pattern.

Home sewing brings nice clothes within the reach of all and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

Had First Requirement

Bill Mooney, after running a barber shop in Pawtucket for two or three years, decided to become a dentist. His uncle Si, hearing of his decision, dropped in to talk it over with Bill. "Yes, Billy," said he, "dentistry is about the easiest new job you could tackle. You know how to work the chair already, so the rest ought to come easy enough."

Switzerland has just placed in service its first Pullman train.

Farmers Will Increase Yields And Lower Operating Costs By Using Clean, Graded Seed

Canada's life, her very existence as a nation, depends upon her agriculture. Probably the most important phase of this great industry is grain growing, and the crop yield, the harvesting and marketing costs, depend upon the quality of the seed.

Two phrases might well be printed and posted in all places where seed grain is bought and sold: "the best seed grain is none too good," and "You never stop paying for the losses resulting from the use of poor seed."

It seems hardly credible, yet it is a fact that officers of the Dominion Seed Branch found a farmer sowing with his wheat 40,000 weed seeds to the acre. In another case 472,000 weed seeds to the acre were being sown. In other words, they were very carefully sowing a "smother" crop and much of the labor of cultivation was in reality making for a rapid multiplication of weeds. The use of the fanning mill will correct much of this evil.

Farmers would [illegible] yields and lower their operating costs by using clean graded seed. The Dominion Department of Agriculture administers through its Seed Branch a "Seed Act" which provides that all seed offered or exposed for sale in Canada must come within minimum standards provided for the removal of small, shrunken, immature or broken kernels or inert matter that the seed itself be mature, plump, sound, etc., and that the seed comply with minimum standards for purity and germination test.

The highest grade of seed is termed "registered". Seed growers producing such "registered seed" are under Government inspection, and their crops must be 99.99 per cent pure to variety before they receive recognition. Crop registration is assigned by the Canadian Seed Growers Association. Samples of such seed are subjected to laboratory inspection, and the entire lot from which the sample has been taken is inspected and if found up to standard it is tagged and officially sealed.

Farmers would do well to secure a small quantity of this "registered" seed and the following season with the seed produced from the small quantity seed a larger acreage.

The lower the grade of seed the more weed seeds they contain, and generally speaking the lower the vitality and poorer the quality.

Copies of the Regulations governing the Grading of Seeds may be obtained by applying to the Publications Branch Department of Agriculture, Ottawa.

PASSING OF FAMOUS AMERICAN

Chauncey M. Depew, famous American after-dinner speaker, humorist, politician, railroad magnate, who died in New York in his 94th year, after a brief attack of pneumonia.

Government May Take Over Radio Control

National System Similar To British Plan Being Considered

Hon. P. J. A. Cardin, Minister of Marine, announced in the House that the Government was considering adoption of a system of national broadcasting similar to that adopted by the British Government.

"In view of the development in recent times of broadcasting, and having regard to the seemingly useful condition now obtaining," Mr. Cardin said, "the government is giving consideration to the question as to whether or not it would be generally advantageous to adopt a policy of national broadcasting along the lines adopted in this respect by the British government."

Trade With China

Good Market For Canadian Products In the Orient

"I am satisfied with the progress of Canadian products in the Chinese trade field and prospects for the increase of trade are extremely good," Col. Moore Cosgrave, Canadian Government Trade Commissioner to China, said on his arrival from the Orient. "Canadian products of all kinds and especially those from British Columbia are being very well received in China now. There is no real boycott against Canadian goods; the Chinese merchant knows his prices and knows where to place his orders."

Ascension Is Limited

There is a limit to the height which a balloon may ascend. The balloon rises because of the buoyancy of the air, and as the distance from the earth increases, the atmosphere becomes more and more rarified and eventually ceases.

In 1862 the population of the United States had barely passed the 30,000,000 mark.

Peace River Population Growing

Predicted That Population Will Increase By Twenty Per Cent. This Year

Government officials predict that the population of the Peace River country in Northern Alberta will increase by twenty per cent. this year. The wheat crop of this area last year was 9,000,000 bushels. The fact that Herman Trelle, of Wembley, won world's championships for his grain in two consecutive years at the International Stock and Seed Show at Chicago, is responsible for much of this activity in settlement.

Over 100 homesteads were filed on at the Peace [illegible] Office, during the first two months of this year.

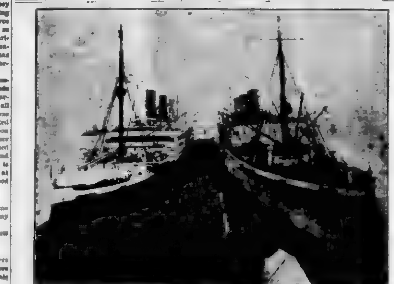
Lady (at theatre, to man in seat behind)—I hope my hat is not worrying you.

The Man: It is worrying me a lot; my wife wants one like it.

Fire alarms newly installed in Edinburgh (Scotland) streets work on the loud-speaker principle. Once the glass is broken it is only necessary to call into the instrument.

Professor: You manage [illegible] well since you can afford so much beer.

Mason: Yes, and if you had learned a good trade you would have been able to do the same.—Fliegende Blätter.



Mammoth Canadian Liners Abroad

When East meets West: The Canadian Pacific steamers "Empress of Australia," of the Company's Atlantic [illegible] and the "Empress of Canada," Queen of the Pacific, alongside the same pier in Kowloon, Hong Kong's deep-water port.

LESSON No. 18

Question: Why is *emulsified cod-liver oil so needful* for a child who is pale and losing weight?

Answer: It is food and tonic rich in vitamins and other nourishing factors *that are particularly helpful* to a weakened child.

For your child—old reliable

SCOTT'S EMULSION

WORLD HAPPENINGS BRIEFLY TOLD

Montagu Norman, distinguished British financier, has been re-elected governor of the Bank of England by the stockholders. He became governor of the Bank in 1920.

The first commercial shipment by air to Toronto arrived at the Leaside airport. It consists of a number of models of fashionable dresses, ordered for a department store.

The British post office is experimenting with a process by which telegrams may be sent like pictures and reach the persons to whom they are addressed in facsimile of the handwriting of the sender.

Third reading has been given in the House to a bill amending the Dominion Lands Act. The measure extends second homesteading privileges to certain classes of settlers in Western Canada.

Fifty-one miles or more than half the steel has been laid on the branch line from the Hudson Bay Railway to Flin Flon. Thirteen hundred men are engaged in building the line, and the work is well ahead of schedule.

Spurred on by the successful flight of the German aeroplane Bremen, Stephan Dubois and Alexander Kurz, widely known Hungarian pilots, have announced their intention of attempting a flight from Budapest to New York in June.

Confident that the Italia is able to withstand the rigors of an Arctic flight, General Umberto Nobile, commander of the Italian polar expedition, announced that no trial flights were planned for the dirigible before its start for King's Bay, Spitsbergen, its Northern base.

How Much Water Should Baby Get?

A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays that during the first six months babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing it before and after feeding for the whole day, and it is easily calculated for the bottle fed one. Then make up the deficiency with water.

Giving baby sufficient water often relieves his feverish crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of infants and children such as colic, cholera diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable, the recipe is on the wrapper and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution: Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

Small Town Papers

BY

FRANK PARKER STOCKBRIDGE

Reprinted by special permission from the Saturday Evening Post. Copyright 1928 by the Curtis Publishing Company, Philadelphia.

The Independent-Reporter of Skowhegan, Maine, has more than 4,500 subscribers, an advertising revenue of some $21,000 last year, and half as much besides from subscriptions, and the editor wouldn't change places with the editor of any daily paper in the country.

These figures of income surprised me when one of the New England men at the luncheon table quoted them.

"They're not especially high," said the vice-president of one of the national country-paper organizations. "Higher than the average, but I could give you hundreds of examples of country weeklies with bigger incomes. Our organization has been trying to find out which weekly carried the largest volume of advertising for the past year. The highest figures we have got so far are from the Times Record, of Spencer, West Virginia, which ran 71,333 inches during the year. Their rate is low for a circulation of above 5,000, only 32 cents an inch, but that gives them an advertising revenue of more than $22,800. I could name fifty country weeklies offhand which regularly carry from 40,000 to 60,000 inches of advertising annually, at rates from 30 to 50 cents an inch."

"Maybe you'll believe me now," suggested Bert Mills. I was ready to believe anything. But I was curious to know where all this advertising came from.

"Perhaps 5 per cent. of it is national advertising—foreign business, as we call it," explained the head of an agency which serves some 9,000 country weeklies. "The rest of it is local advertising by local merchants to local people. Mighty little of it is mail-order advertising, most of the foreign business is of commodities which are handled by local merchants and is what is known as institutional advertising. And the foreign advertiser pays as high a rate as the local merchant, or higher in many cases."

"You can buy space in daily newspapers at a great variety of rates," put in an editor from Oklahoma, "depending upon the amount of space used, the number of insertions in a given time, and other considerations. The tendency in the country press is toward a flat rate per inch for everybody, no matter how large the advertisement or how often it runs. That is one of the things our state and national editorial associations have been educating our members to."

"There must have been some effective educational efforts among local merchants too," I suggested, remembering old Otto Muncaster's six barrels of lime.

"That of course," replied the Oklahoma man; "but how the small-town business men have learned that lesson! Never heard of Bob Mooney, did you? His store is in an Oklahoma town which had 906 population the last time they took the census; but Bob does $2,000,000 a year in business, all from advertising in the country weeklies around his part of the state.

"What has happened in this country since the war is that business everywhere is done in the same way and in the same commodities," he went on. "There is no longer any great difference between the city markets and the country markets except in the volume of business done in a given area. The only differences now are of degree, not of kind. Country folk buy the same things city folk buy, country merchants carry the same lines you can find in State Street or Fifth Avenue. And the country newspaper presents the story of the country merchant to its readers in the same way the city papers do.

"We who publish country newspapers are the beneficiaries of a new nationalization of interests, of a drawing together of all the people until there is no longer any sharp distinction in appearance, dress, manners, business methods and habits of thought between the people who live in the small towns and on the farms and those who live in the big cities."

"Yeah, they bob their hair and roll their stockings out on the farm now just as they do in town," drawled an editor from Maryland. "I've got a paper down on the Eastern Shore—been running sixty-five years or more. We used to carry advertising of fertilizers and mules, with a couple of standing half pages from the general stores. Here's a copy of my latest issue; look it over."

I looked. They still use mules on the Eastern Shore. Rhoda and Toby, Kate and Dolly and a dozen other teams of mules were advertised for sale, also fertilizer, seed potatoes and other essentially agricultural commodities. No question about it, this was a rural paper. But the biggest advertisements were of the Centerville department stores and drug stores. Silk stockings and bathing suits for the farmers' wives and daughters. Golf knickers, a big display advertisement offering special bargains in that truly rural commodity!

"Preserve your youthful beauty," a drug-store advertisement exhorted the farm women, listing a sale of lotions and face creams including—whisper—rouge and lipsticks. And automobiles. Not only trucks and flivvers but high-grade cars, half a dozen makes.

"And that's typical," said an Illinois editor who had been looking over my shoulder. "We're making a drive in our paper now for a country golf course. I live in a dairy country, and our farmers don't take enough time off to play, and neither do our business men. You'd be surprised at the interest there is in golf, especially among the younger farmers."

"I've got some figures here that will interest all of you," the advertising-agency man put in. "It took some work to get them together because the census [illegible] help us much. The Government classes all communities of 2,500 or more as urban, which is misleading. For the study of the country newspapers' field of activities we take 5,000 population as the maximum unit of a rural community—a village or town. That's too small to be a city, too small to support a daily newspaper.

"There are now 11,500 weekly newspapers published in 5,000 villages of 5,000 or smaller population. That is a reduction of about 2,500 from the maximum of 13,800 which was reached about 1910. The reduction has come about for two main reasons: first, the growth of some towns into daily-paper size, but principally from the consolidation of competing papers, making one prosperous paper where two or three were struggling for existence. The time has passed when the country weekly was chiefly a political organ, which has made this process of consolidation easier.

Her Secret Beautifier Envy of Her Friends

Miss C. Delano, Washington, writes: —"About two years ago I was bothered a great deal with a muddy, sallow and pimply skin. I found I could cover the blemishes with cosmetics, but this was only a temporary relief. "My druggist recommended your purely vegetable laxative, and suggested my [illegible] might be constipation. After [illegible] short while I noticed a wonderful [illegible]ence. My complexion has improved, also headaches, indigestion and biliousness never bothered me any more."

CARTER'S LITTLE LIVER PILLS

Sold all druggists 25c and 75c red pkgs.

Personally Conducted Tours

All Parts Of Canada To Be Visited In Tours Arranged By Canadian National

Announcement of personally conducted tours which will be operated during the coming tourist season by the Canadian National Railways shows that all parts of Canada will be covered in these journeys and also that opportunities will be given to Canadians who wish to visit other countries with the advantages of personal direction by experienced tour conductors. A tour to Great Britain, France, Belgium, Switzerland, covering the places of historic interest and beauty spots of these countries will leave Montreal on July 7, sailing on S.S. Laurentic, of the White Star Line.

A tour to the Pacific Coast from the Prairie Provinces will again be operated this year, this being the seventh annual personally conducted tour of its kind. This tour has been exceedingly popular with westerners during the past years, and it takes in all the interesting places en route from Winnipeg-Prince Rupert and also such magnificent playgrounds as Jasper National Park.

From Vancouver, a tour will leave on July 23, for Jasper National Park and thence to Prince Rupert. This party will be limited to 100 persons and has been arranged on an all-expense basis.

This year again the Kerr-Bryson Tour will operate from Toronto to the Pacific Coast, leaving Toronto on July 4, and returning July 26, after visiting the cities of Western Canada, the National Parks, and making the steamship journey between Vancouver and Prince Rupert. An extension of this will take part of the party to Alaska. There will also be a Toronto to Yellowstone Park with a roundabout journey which touches both Canadian and American points of interest.

From Montreal and Toronto there will be operated the Adams Across-Canada tour which will take from July 12 to August 4, the party visiting all points of interest on the journey across Canada and returning via the Great Lakes route.

Agents of the Canadian National System report heavy bookings for these tours already being received.

We don't blame some men for refusing to take their own advice.

Woman's Wisdom

Kingston, Ont.—"Dr. Pierce's Favorite Prescription is such a great help to nature in motherhood, I marvel that every prospective mother does not take it. I had two children before I knew that there was such a tonic. My former experiences caused me dread. By chance I read that Dr. Pierce's Favorite Prescription quieted the nerves and strengthened the body of the expectant mother and I proved that statement to be true, also I had comparatively no suffering and did not lose any of my strength or vitality. My baby is now 2 years old and weighs 30 lbs., is the picture of health."—Mrs. Olive Brown, 12 Markland St.

Buying On Credit

Man Who Pays Bills When Possible Always Receives Consideration

Modern business is founded on credit. Credit is [illegible] on the desire or ability of the average [illegible] the obligations that he contracts. No man can have a finer asset than a good credit standing. Business men are reasonable, of course. They appreciate that the most conscientious individual sometimes finds himself in a position where, despite the best of intentions and the greatest of efforts, he is unable to meet his bills. To this type of buyer every good business man is prepared to extend the greatest possible consideration. There are others, however, who merit little consideration—those who buy far in excess of their means, those who have no intention of meeting their liabilities, those who are prepared to take an unfair advantage of the merchant who gives them his confidence and permits them to buy on liberal terms.

WHY TORTURE THE LITTLE ONES

Mothers, do you think it fair to torture your little ones by forcing them to take ill-tasting oils when they need a laxative medicine? Don't you find that the child's dread of these medicines often do more harm than good?

Baby's Own Tablets are the modern substitute for these nauseous doses. They are the very medicine the child requires and are so pleasant to take that they are as easy to administer as a glass of water. They are the perfect remedy for all the minor ailments of little ones, being absolutely guaranteed free from injurious drugs.

Baby's Own Tablets accomplish all that castor oil and other bad-tasting remedies can do. In fact they accomplish more as they do not leave the child exhausted from its struggle against taking medicine. They relieve teething pains, banish indigestion and constipation, break up colds and simple fevers and promote healthful, refreshing sleep. They are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

345

Unusual Apron

An unusual apron, cleverly designed, that appears more like a pretty morning frock, is found in pattern No. 345. It has a comfortable fitting waist, which is cut in one with front panel. The side sections are gathered and a dainty sash ties at the back. Japanese pongee silk, cotton crepe in floral design, zephyr will give unending service for general wear and will launder beautifully. Small, medium and large size. The medium size requires 3¾ yards 27-inch; 3 yards 32 or 36-inch; 2¼ yards 40-inch material with ½ yard 18-inch contrasting, and 2½ yards binding. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

SUNDAY SCHOOL LESSON

APRIL 29

THE COST OF DISCIPLESHIP

Golden Text: "Where thy treasure is, there will thy heart be also."—Matthew 6.21.

Lesson: Mark 10.17-27; 12.41-44.

Devotional Reading: Isaiah 55.1-5.

Explanations and Comments

The Great Refusal, 10.17-22.—"Good Teacher, what shall I do that I may inherit eternal life?" was the question which a young aristocrat put to Jesus one day, as he ran and kneeled down before Him. He realized that he had missed the summum bonum, the greatest good, of life, and he believed that there were certain good things (Matthew 19-16), which he could do to win it.

"Why callest thou Me good?" Jesus questioned in His turn, adding, "None is good save one, even God." This question seems a challenge to the young man who had used the word good with as little thought as we [illegible] when we say "Good morning." J[illegible] would have him weigh his words [illegible] see whether he meant what he said. The young man was a close student of the Law; he came to Jesus as a peripatetic pupil seeking the latest knowledge. The maxim of the rabbis, "There is nothing good but the Law"—held full sway over his mind. Jesus had to fling him out of the groove and suggest a goodness higher than the goodness of the Law—namely, God's goodness. Thou callest Me good—you are judging from the point of view of the Law; you are saying what you would say to any rabbi. I am not good in that sense. I am good in a better sense. There is none good but God, the goodness I have is God's goodness. That is what you have to learn. To learn it, become My disciple.

Jesus looking upon the young man loved him. "One thing thou lackest," Jesus said. His penetrating glance showed him the man's dissatisfaction with himself, his soul-discontent, his earnestness in seeking moral heights to which he knew he had not attained, and to which he knew not the way.

"The diagnosis of Jesus was unerring. Two things were wrong in this young man. The commands he had kept were chiefly negative. They were summed up in the rabbinical saying: 'Thou shalt not do unto others what thou wouldest not have other do to thee.' Our Lord changed the negative path of duty into the positive all along the line. He applied his great principle to this young man's case. 'Give yourself to others,' He said, 'contribute to others' good.'

"But there was another fatal weakness in this delightful and admirable person. He clung to his wealth in a way quite incompatible with any just estimation of the higher good. There was hidden in that love of riches a luxurious self-love and a lack of sympathy with the wants of men that made it endanger the very roots of character." He was accustomed to a cushioned life. He was being made a prisoner for life. He must find a way of escape." R. C. Gillie.

"Sell whatsoever thou hast, and give to the poor." This was not a universal command of Jesus; it was not spoken to all the rich in general, but only to this rich man in particular. To part with his possessions was a necessary thing for this man; to another man the one thing necessary might be something different. Mary and Martha and Lazarus were rich, but Jesus never gave them this counsel. Jesus never condemned riches in themselves; he condemned the devotion to riches which makes one lose his sense of the value of better things.

The one thing we lack may be the carrying on of our business in accordance with Christian principles; it may be the engaging in genuine prayer; it may be the rendering of some service; whatever it is, each one himself best knows.

Famine Conditions In China

Parents Forced To Sell Children On Account Of Lack Of Food

Six-year-old boys are being sold in Western Shantung province for the Chinese equivalent of $3 because of famine conditions, the federal council of Churches of Christ, in America announced it had been informed in cables from the famine relief committee in Peking.

The famine, due primarily to a three years' drought, but aggravated by disturbed conditions due to civil war, has brought half a million Chinese to the verge of actual starvation, with four millions facing the prospect within two months, the council said.

The international relief commission is without funds to carry on its programme of relief through employment on road construction and river conservation.

Alberta Oil Leases

A total of 9,708 oil leases covering 1,190,267 acres are held in Alberta according to the annual report of the Department of the Interior. Oil production from wells on these lands for the year ending March 31st, 1927, is given as 250,000 barrels with an estimated value of over one million dollars.

Fastest Flying Bird

There are several species of birds that can travel much faster than any airplane. The fastest is the "frigate bird," which has its home in the tropics. This bird is remarkable for its long wings, and is said to be capable of flying 200 miles an hour.

Pioneers Establishing New Empire

"Go North, Young Man," Is Canadian Envoy's Advice To Californians

"Go north, young man!"

Opportunity's compass has turned upward since Horace Greely pointed a classic finger to the west.

That is what Vincent A. Massey, Canadian Envoy Extraordinary and Minister Plenipotentiary to the United States told the Commonwealth Club at San Francisco, in a luncheon address. Pioneers who are carrying Canada's boundary northward, he declared, are hewing a new empire and establishing their fortunes at the same time.

"Canada is thinking in terms of northwestern development," he said. "We are now growing wheat within 500 miles of the Arctic Circle.

"The spreading north is the only boundary we have. Thanks to the spirit of amity we enjoy with the United States we never think of a southern boundary."

Despite total blindness, Howard Alerman, 17, won the honors of his mid-year graduating class in high school in Mansfield. He studied by the Braille system.

Jake—"You was in business, wasn't you? You had a laundry, wot?"

Spike—"Yeah, but she divorced me."

TORONTO WOMAN IS GRATEFUL

To Gin Pills For Relieving Pain and Listlessness

Household duties were burdensome; pain wracked her body; medical skill accomplished nothing; then—and how often this happens!—a friend advised Gin Pills. This former sufferer writes:

"For about one year I had trouble with my back. I got tired so easily, had a terribly listless feeling at all times. I had medical attention all during this period but couldn't obtain relief.

"After using the first box of Gin Pills I got relief and, after taking three boxes, I feel that I am completely relieved. I always keep Gin Pills in the medicine cabinet."

(Name on request)

Don't suffer needless agony! Don't lay yourself wide open to scourges like Rheumatism, Sciatica, Lumbago and acute Bladder ills, by neglecting your kidneys. Severe backache and dizzy spells are warnings. So are headaches, swollen joints, painful, scanty or too frequent urination. Safeguard yourself. Relieve pain quickly. CHAPTER XXIII.—Continued.

Another night she saw a trim young lady, with many bags, a pair of snowshoes, a camera slung over her shoulder, a tapestry purse and a huge white fox fur, coming down the platform. She was met by a plain, hard working woman, with wisps of gray hair escaping from the hard little nub at the back of her head, a skirt that did not match her coat and needed to be pulled straight—evidently put on in a hurry, and with feet disfigured with bunions, hands red and bare, and shoulders bent.

Helmi watched the meeting. The girl was the last to leave the train, and the mother had almost given her up, and had gone to the wicket to see if a wire had come. While the mother was at the wicket the girl came bursting into the station. "Mother," she called. "Here I am, I was helping a lady with her baby."

The two women caught each other in a warm embrace, and as they were leaving the station Helmi heard the girl say, "The trustees paid me for the whole time, and now, old girl, you will have that fur coat—we'll get it tomorrow."

Helmi saw the mother's arm tighten. The girl's eyes were defiant and proud. She dared anyone to even think she thought her mother shabby.

Helmi wondered, wondered.

When the last person had come through and the doors were closed, Helmi walked slowly to the North Star Rooming House, lonely, tired and sad. She resolved she would not go again, but the next train night found her sitting in front of the clock, watching its tardy hands making their reluctant rounds. She had written to good old Slim, giving him her address—he would see Jack if he came.

At the end of two weeks Helmi began to look for a situation. Her money had lasted until now, but the little stock in the black, shiny purse had dwindled and dwindled. Fortunately her clothes, by careful brushing and pressing were still presentable. The kindness of the Corbett family, and the exquisite joy she found in caring for the little Lili, kept her heart from breaking with loneliness. The nights were the worst; even the regular breathing of the warm little treasure beside her, the feel of the velvety little fingers which clasped hers, could not entirely win her away from her sorrow. Why had God forsaken her? Or was He just doing this to try her faith, as he tried that of Job. Then she thought of Abraham, whom God commanded to sacrifice his little son. That was a terrible story, and Helmi wished she had never heard it, even if God did repent and say, "Oh, well now that I know you would do it that's all right—I just wanted to be sure." In happier days Helmi had decided the story wasn't true at all. God wasn't like that, someone had just made up that story. Now, she wasn't so sure.

Often in these long dark [illegible] Helmi thought of Aunt Lili. It had all seemed so easy when Aunt Lili came back for the visit to [illegible] and now. Aunt Lili was gone, her little girl too. She had come to Canada so sure she could conquer all difficulties, and she had come on evil days. But little Lili here would have a chance. . . . . One might succeed out of four . . . surely God would let one Finn girl out of four do well in Canada! Maybe it was too much for her to expect to succeed and be happy but she could be the ladder on which dear little Lili would rise, like the woman at the station, bent, shabby, tired, with the glorious successful daughter, who loved her mother loyally in spite of her old-fashioned dress and knotted hands.

It was only when Helmi could get her thoughts out of the lonely, dark roads where disappointments and loneliness lurked, into the pleasant green meadows of the future where plans for little Lili could be made, that peace would come to her, and to her burning eyes the blessed dews of sleep.

On the day that Lili was three weeks old Helmi went to the Employment Bureau to look for work. She wore the blue motor coat, a black velvet hat on which she had transplanted the flowers from her summer hat, and her best shoes and gloves. She was still pale, and her cheeks had grown thinner.

"It's a question," said Mrs. Corbett, eyeing her critically, "how a person should dress when lookin' for work. If you're not well dressed they'll think you are needin' a job too bad, and that you must be shiftless and no good; on the other hand, if you're too well dressed they wonder why you need to do housework. Women are sure the limit, despisin' their own work and makin' everyone else despise it too. A woman may forgive the woman who makes her dresses, she is even more likely to forgive the one that makes her hats, and who charges her three times what they're worth—but God help the poor dud that cooks her meals. No woman ever thinks well of another woman who merely does the work she could do herself if she wanted to. So, Helmi, dear, don't be hurt if they talk snippy to you—I know how you feel—the Finns and the Irish are blood cousins when it comes to temper—but just say what you want to, to yourself. You can come home and abuse them all you like to me. I know them—haven't I done washin's for them for years?"

Helmi, as usual, went early, but the room—a large one, with windows that ran to the ceiling—was already half filled. Her first thoughts were thoughts of discouragement—What chance had she among so many? But as she listened she learned that many of the women were employers, for the topic of conversation was the old difficulty of getting efficient household help. The conversation rose and fell like the fire in the chimney on a windy night.

"I am out so much," one woman said, in a loud voice, "I simply must have reliable help. The last one left on the electric iron until it burnt through the table." She was a worried woman, short of breath, as if she had been perpetually climbing stairs. Helmi wanted to talk to her, but she was surrounded by other women, all intent on their own grievances.

"It makes a difference when one has boys in the house you see I have my own two, and Fred, my nephew."

"Well, I have just one rule—I must have a British subject. When I came home from the Red Cross the other day I found my house in a state. My German washwoman had the cook and the housemaid in terror of their lives. She had told them she was washing for me now, but I would be washing for her next year, and the Kaiser would be living in the Governor's house, and we would be begging jobs from the German aristocracy, who, it seems, are going to come over here to live. She flew when I came in, and she hasn't come back yet for her money. She never told me she was German, you may be sure. She was Russian—they are all Russians now."

Helmi at last got her chance at the desk. A kind-faced Scotchwoman, who called her 'dear', asked her what sort of work she wanted, and had she registered. Helmi said she wanted housework by the day if she could get it. She could cook, yes, and fresh, and make things clean.

The Scotchwoman called the lady whom Helmi had noticed first—the stair-climber.

"Here's a smart girl for you, Mrs. Angus," she said, "I doubt if you'll get better—she looks both clean and smart."

Mrs. Angus appraised Helmi critically. "Are you honest?" she asked at last. "I have lost so much by petty thieves."

"Yes," said Helmi, hotly, "I am honest, and I tell the truth, and I am square."

Mrs. Angus turned to the Scotchwoman angrily. "Is this the way you allow your patrons to be spoken to, Miss Ritchie?" she said.

"I doubt she meant no harm," said Miss Ritchie, soothingly; "she was taken by surprise—that's all."

"Have you worked before?"

"Yes, in Winnipeg—in the Yale Hotel—and at Eagle Mines in a boarding-house."

"Yes, I thought so," said Mrs. Angus, "you are certainly quite the hotel type, sharp and pert. Well, have you references?"

"No," said Helmi, when Miss Ritchie had explained.

Mrs. Angus looked sternly at Miss Ritchie. What did she mean by exposing patrons to the possibility of getting a girl who, by her own confession, had no references.

Miss Ritchie asked Helmi if she could send and get her references.

Helmi shook her head. "I would rather not," she said.

(To Be Continued.)

THERE is nothing quite equal to Aspirin for all sorts of aches and pains, but be sure it is Aspirin. The name Bayer should appear on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box when you buy it:

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Saskatchewan Census Details

Nearly 43 Per Cent. Of Population Born Within the Province

Nearly 43 per cent. of the population of Saskatchewan was born within the province itself, and of the 820,738 persons listed 624,349 are of British origin, according to a provincial report. Native-born Canadians comprise 525,272; those from the British Isles, 96,011, and from other British possessions 1,060. Of the foreign-born citizens, numbering 196,190, or nearly 24 per cent., Russia is the largest contributor with 27,327. Austrians are second with 11,504, and Ukrainians third with 10,607. There are 8,284 Galicians, 7,256 Germans, 9,340 Norwegians, 7,283 Swedes, and 2,006 Danes.

He: "Do you know what biceps are?"

She: "Of course, the same as forceps, only not as many."

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Editorial Prize Contest

Centenary Of Henri Dunant, Founder Of Red Cross, To Be Fittingly Observed

This year, on May 8th, fifty-nine nations of the world banded together under the Red Cross Flag, will celebrate the centenary of the birth of Henri Dunant, founder of Red Cross and winner of the Nobel Peace Prize of 1901.

Dunant's untiring efforts in the interests of humanity were responsible for the first Treaty of Geneva, and they awakened the world to a new consciousness of its responsibilities in regard to medical service, both in peace and war, until now practically every nation has joined in subscribing to the covenant of nations which has developed from Dunant's initial idea.

In order that the people of Canada may know about Dunant and his work, a prize contest for the best editorial appearing in any Canadian Daily newspaper on May 8th, or in any Canadian Weekly paper between May 4th and May 12th, on Dunant or co-related subjects, has been arranged by the Canadian Red Cross Society. The French Newspapers of the Dominion are also invited to compete in their own language under similar conditions.

The prizes to be offered are, $90.00 for the first prize; $50.00 for the second; and $30.00 for the third in each section, or $640.000, divided into proportions as here mentioned, including the French newspapers, both daily and weekly.

The contest will close on May 20th, when all entries received will be judged by a committee of competent judges. Every entry must be in the hands of the National Office at 410 Sherbourne Street, Toronto 5, by that date, and must comply with the conditions announced herewith. Every possible effort is being made to acquaint the public with the history of Henri Dunant through special literature being mailed to all editorial offices through the usual press avenues and in the pages of the May issue of "The Canadian Red Cross."

Contest Regulations

1. In order to facilitate the work of adjudication, contestants are requested to clip their editorials, paste them up as if preparing "copy" for the printer and add headline and date of editorial page on which it has appeared, despatching the entry so that it shall reach the office of the Chief Commissioner, Canadian Red Cross Society, 410 Sherbourne Street, Toronto 5, Ont., not later than May 20th.

2. All entries must be accompanied by a sealed envelope with the name of the entrant on a letterhead from the office of the competing newspaper. No contestant's name will be known until all decisions have been made.

3. The covering envelope should be marked "Editorial Contest."

4. The following is the list of judges who are being invited to act: Dr. James W. Robertson, Ottawa, Chairman of the Central Council of the Canadian Red Cross Society, Professor J. G. Fitzgerald, Toronto; Mr. J. F. B. Livesay, Toronto, Dr. Lorne Pierce, Toronto, Dr. Charles G. D. Roberts, Vancouver, Mr. R. J. C. Stead, Ottawa; Professor G. M. Wrong, Toronto, Mr. John M. Elson, Toronto.

French Committee—Hon. Mr. Justice F. Surveyor, Hon. Athanase David, and Dr. Victor Morin, will be asked to suggest a sub-committee from the French section of the Canadian Authors' Association, to act in collaboration with the General Committee.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

Funny people: Play bridge because they haven't anything to talk about and then talk all the time they're playing bridge.

"A friend in need," said Uncle Eben, "is de one dat lends assistance instid o' givin' big advice."

The silk worm and the honey bee have been domesticated by man.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Orser, Elginburg, Ont., writes:—"I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would have real bad spells. I suffered in this way for some time when one day, I saw

advertised, so decided to try them. I had only taken a few boxes when I noticed that I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Soothing— yet a man's smoke

COOL AND FRAGRANT

Save the Valuable "POKER HANDS"

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

CARE OF THE "BABY TEETH"

Paradoxically speaking, the care of baby's teeth should begin before they arrive.

A soft cloth should be used daily to cleanse the gums and keep them healthy before the coming of the little teeth.

Symptoms of tooth eruption in the young child are, as a rule, not lacking. Locally there will be slight inflammation, with swelling, the area in which the tooth will erupt showing a tenseness and shinyness of tissue. The child will exhibit a tendency to bite at anything such as its toes, fingers etc., and evidence a general irritability and restlessness, accompanied, possibly by a slight fever.

Should the eruption of the tooth seem too tardy and cause the child considerable pain, the family dentist should be consulted.

As soon as the first tooth has erupted the use of the mouth cloth should be supplemented by a soft brush, using clear water in the daily brushing. Later when the child has reached the age when it will not swallow everything that is put in its mouth, a little good dental cream may be put on the brush.

However, along with these efforts attention should be given to a correct diet, and the parent should insist on proper mastication of its food by the child.

Little children should not be allowed to eat candy or other sweets; they are ruinous to the young teeth.

It would not be too early to take the child to the dentist at two and a half or three years of age, and thereafter at intervals of from three to six months, as may prove necessary. In this way, small cavities can be detected early and treated with practically no discomfort to the child and so the teeth are preserved from further and extensive decay.

Serving No Useful Purpose

Nothing Gained By Attempting Ocean Flights In Land Planes

Surely the disasters of the last twelve months have convinced us that flying a light land plane over the ocean is a dubious gamble with destiny. It does not advance the cause of rapid transportation a whit, for nobody is so bold as to believe that such planes will eventually be used in trans-oceanic service. On the other hand, the repeated failures have caused pain and disappointment to the world and extreme inconvenience to ships which must go out of their courses and lose valuable time in hopeless hunts over the water.

"Does that mule ever kick you, Rastus?"

"No, sah, he ain't yet, but he frequently kicks the place where I recently was."

Cats and owls are better equipped for seeing in dim light than humans, due to the peculiar construction of their eyes.

A man is never satisfied until he can induce some woman to think he is better than he knows he is.

Little Helps For This Week

"Neither is it in our power to redeem them."—Nehemiah v. 5.

But yesterday, but yesterday
She stood beside our dusty way
Out-reaching, for a moment's space,
The key to fortune's hiding-place;

With wistful meanings in her eyes,
Her radiance veiled in dull disguise
A moment paused, then turned and fled,
Bearing her message still unsaid.

So fast, so far she sped and flew
Into the depths of ether blue;
And we, too late, make bitter cry,
"Come back, dear Opportunity."
—Susan Coolidge.

There are four things that come not back, the spoken word, the sped arrow, the past life, and the neglected opportunity.—Arabian.

Ready-Made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Eclectric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable, for scalds, burns, bruises, sprains, it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

Recall Historic Event

School children of the province on the 150th anniversary of the landing of Capt. James Cook at Nootka, were given a historical outline of the event and its significance in retaining what is today the province of British Columbia under the British flag. This historical extract was prepared under the auspices of the Native Sons of British Columbia, and was circulated to all schools by the Provincial Department of Education.

Use Minard's Liniment for Corns.

A man doesn't do his courting all to himself because he is ashamed of it, but because he wants it all to himself.

FACE TERRIBLY DISFIGURED

Pimples Itched and Burned. Cuticura Heals.

"I had a breaking out of pimples on my face, neck, shoulders and arms. They itched and burned so badly that I had to scratch, causing severe irritation. My clothing aggravated the eruptions terribly, and I could not sleep on account of the irritation. My face was terribly disfigured. The trouble lasted about four months.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After about the fifth application there was a marked improvement so I purchased more, and in four weeks I was healed." (Signed) Miss Millie Dickout, Brown's Mine, Ont., Sept. 16, 1927.

Use Cuticura to clear your skin.

MANY VISIT GENERAL MOTORS FACTORIES AT OSHAWA

More than five thousand persons, including many from foreign countries visited the huge factories of General Motors of Canada at Oshawa, Ont., during a period of twelve months. A check of the register shows that an average of more than 20 visitors inspected the plant each working day.

Every province in Canada, almost every state in the Union, and places as widely separated as England and Australia, Calcutta, India, and Bermuda, are represented by those who came to see how motor cars were manufactured in Canada.

Those who visited the factories say they "wouldn't have missed their experience for anything." In addition the interest of a tour through a modern automobile plant a tremendous amount of information is gathered, as guides thoroughly conversant with all manufacturing processes are supplied to escort visitors through the factories at Oshawa is a revelation to those who formerly thought that the cars were only assembled in Canada. Visitors are always welcome, when in Oshawa, to take these trips

---

A WILLIAM the FOURTH CHARTER

THE original Royal Charter of the Bank of Montreal, bearing the seal of William the Fourth, and renewing the charter previously granted by the Legislature of Lower Canada, is well preserved in the Bank's museum.

During more than one hundred years since it was first incorporated, the Bank of Montreal has gone steadily on its course, serving the people of Canada and enjoying the unshaken confidence of successive generations.

BANK OF MONTREAL

Established 1817

Total Assets in excess of $1,0,000,000

VERY PITIFUL

A gentleman was walking down the street with a little boy at his side, when the boy cried out: "Oh, pa! there goes an editor!

"Hush, hush," said the father, Don't make sport of the poor man, God only knows what you may come to yourself, some day."

Hobson's Meet Market

C. HOBSON, Proprietor

MAIN STREET, TOFIELD

LOCAL and PERSONAL

Born.—To Mr. and Mrs. James Cunningham on April 13th, a son. Mrs. Cunningham was formerly Miss Connie Bewick.

Dr. and Mrs. Ward and Doris of Leduc, Mrs. McLaughlin and Mr. and Mrs. Ward of Edmonton, spent Sunday at the J. W. Chapman home.

Mr. and Mrs. Allan Lewis of New Sarepta spent Sunday at the Hosler home here.

Mr. and Mrs. Laurie Scott returned home from the States on Friday last, where Laurie played professional hockey throughout the winter.

The Misses P. Sater and Marion Carter of Camrose motored to the Wood home on Sunday.

Mr. Ole Strand of Camrose spent the week-end in Tofield and Chipman.

Miss M. Easton spent the week-end in Chipman with her friend, Miss Ethel Calvert.

G. McLaughlin motored to Camrose on Sunday.

Mr. Frank Wood and Horace Rawlins motored up from Viking on Saturday.

Word to hand advises us that the chautauqua dates for this year will be July 11th to the 17th.

You can now obtain first class bread at the Club Cafe. This bread is made by Conner of Camrose one of the leading bakers there.

With bright May weather you will be needing a new hat. We have many styles at different prices. Drop in and look over our stock. We will be pleased to serve you.—M. C. Bewick at Lucille's Beauty Parlor.

Quite a number of Tofielders journeyed to Shonts on Sunday last when it became known that a bad railway wreck had taken place there. A fast freight going east spilled eighteen cars from the middle of the train. The cars were piled helter-skelter on and on both sides of the track. It is assumed some portion of the under carriage of one of the cars broke, causing the derailment of it and a number of other cars following. The caboose in which the train crew were riding did not leave the rails. Mainline passenger traffic was routed via Camrose on Monday, but by Tuesday the line was clear.

W.I. NOTES

You will have a call from one of the Institute members for your donation for the school ground fund. We know you will be glad to have us call and the Institute feel sure everyone is anxious to have our school ground made beautiful. We need your help very badly, so all come along with your dollar and everybody will smile when they see the improvement that shall be made. We can't proceed without money and we want every family to give the small sum of ONE DOLLAR. Make the children happy by fixing up the grounds and so instill in their heart a big desire to love their school when we are through with this improvement.

The Women's Institute will hold their regular meeting on Tuesday, May 8th, at 3 o'clock sharp. Everyone welcome at our meetings. Our program for May follows:

Roll Call—Recipes.
Paper by Miss Argue.
Demonstration by Mrs. Johnston Ferguson.
Refreshments by Mrs. McCarthey and Mrs. Plum.
Don't forget our plant sale.

KETCHAMOOT

Farmers throughout the district commenced work on the land the first of last week, with good drying weather. Some seeding of wheat has been done.

Miss Hannah Jensen is assisting Mr. and Mrs. C. A. Ingram with their spring work.

Mr. A. McMullen made a business trip to Edmonton on Thursday.

Mrs. Monty, niece of Miss Fawcett, is assisting with the home work at the Joe Sutton Sr. home. Mrs. Sutton being in very ill health.

Mrs. McMullen and Mrs. Segrs visited our Holland neighbors on Thursday. They seemingly find it a difficulty to use the hard water and to bake bread as they were always used to buying their bread and other pastries. We found them a neat, clean, and industrious people.

LINDBROOK EAST

A very enjoyable evening was spent on April 20th, when a number from this district were entertained to a whist drive given by Mrs. R. Davison and brother, Will Stairs. There were about fifty guests present. Whist was played until mid-night when a dainty lunch was served by the hostess, after which the prizes were awarded to the winners. Ladies' 1st, Mrs. G. Jobb; gents' 1st, R. Hammersley. Consolation, ladies' 1st, Mrs. G. Braaten; gents' Mr. D. McCowan. An hour of social chat was spent when the party broke up thanking Mrs. Davison and Mr. Stairs for their kind hospitality.

Mr. D. Gladwin of Vancouver, arrived here to visit his sister, Mrs. P. McMullen.

Mr. Todd and Sons of Deville have taken a contract of brushing from Mr. C. Merden.

Mr. E. Creveling has leased the Foss and Sherlock quarters and is going into farming quite extensively.

The weather of the past week had warmed up considerably and most farmers were on their land away to a good start; owing to the blizzard on May 1st, opperations on the land will be delayed for a few days.

LINDBROOK

Work on the land has been started here and some little seeding done, but this blizzard of May 1st, will again postpone operations.

Quite a windstorm at see here last Friday night, luckily not much damage was done, but in one case it lifted up a heavy hay rack from the ground and blew it one hundred yards smashing it in pieces and smashing it through two fences.

The dance given by Messrs. J. Hooper and W. Kortsman was a very successful jolly affair. The music of Messrs. Coles of Ministik District being favorably commented on; in fact the whole business was quite up to standard and enjoyed by all.

Mrs. M. Swain returned home this week from Edmonton.

Messrs. L. Hooper and F. Nickerson motored down from the city to spend the week end.

Mr. D. Macaw made a visit to the city last week and Mrs. McCaw later on in the week.

Mrs. Hedley Burton spent the week end in Tofield with Mr. and Mrs. Worton and family.

We hear that a prairie fire last Friday burnt a stack of hay and one of straw belonging to Mr. R. Foss and partially burnt a barn on the adjoining place belonging to Mr. Sherlock.

Mr. and Mrs. Trelenberg who resided several months in the Dick Turner house moved to Tofield on Thursday.

The newly weds, Mr. and Mrs. Geo. Francis, are now nicely settled on the Miller farm. We are very glad to welcome Mrs. Francis, nee Miss Skinner, and wish them much happiness and successful farming.

Quite a commotion was stirred up in our neighborhood last week on Wednesday morning when Mr. and Mrs. Hart's youngest child was missed. Search parties were out until mid-night and the police were notified. Search was resumed on Thursday, when the police arrived about noon, twenty or more men being out until about one o'clock. Chester Coombes found her curled up in the ashes of a burned straw stack that had been lit the night before. The child was burned considerably, but not seriously.

Next Wednesday, May 9th, the monthly meeting of the M.A.S. will be held at the manse in Tofield. A cordial invitation is extended to all.

Mr. and Mrs. Carlisle, Mrs. Hugh Mitchell, Mrs. Barnes, Mr. Frank Hull and Lillian and Belva Carlisle motored to Camrose on Sunday evening to visit Mrs. Hull who is still at the hospital. While Mrs. Hull was having a siege of the grip, she has improved wonderfully well and is able to walk with the aid of one helping her. Mrs. Hull will be able to return home du another two weeks.

On Tuesday, May 1st, a regular blizzard raged all day on Tuesday. Though not freezing cold, we were unable to hold school.

KINGMAN

Chas. Mah Hong who was a formerly a well known merchant in Kingman, arrived from Edmonton on Tuesday to take charge of the new restaurant.

Mr. and Mrs. Ed. Johnson and son left for Vegreville on Friday, where they will make their future home.

Mrs. Ed. Thompson visited with Mr. and Mrs. Ted Severson in Edmonton.

Mr. and Mrs. S. T. Severson and family of Edmonton were Kingman visitors over the week-end.

T. Grahn was a business visitor in Edmonton last week.

Mr. and Mrs. A. Bartness moved to Kingman on Friday, where they will make their home.

Sam Cinnamon spent last Wednesday in Edmonton.

Mr. and Mrs. H. Brue were business visitors in Edmonton on Tuesday.

Mr. and Mrs. A. Gudmundson left for Forestburg on Friday, where they will spend the summer.

Mr. and Mrs. C. Tyrhog moved to Kingman on Monday.

Mrs. E. Erickson, John and Inez, and H. Sparby motored to Edmonton on Saturday.

Mr. and Mrs. W. Jardie and Mr. and Mrs. W. Hartschen and family were the guests of Mr. and Mrs. E. Erickson on Sunday.

Quite a number of people attended the gospel meeting held in Kingman on Sunday.

BARDO

The Grande Forks School sent Mrs. Hills a boquet of the very first crocuses, which was very much appreciated. Surely we can all join with the poet in singing, "Welcome the beautiful spring."

The Johanson family are settled in their new home and Mr. and Mrs. Jensen are again "at home" on their farm.

Miss Rude, being sick, there was no school at Bardo on Thursday and Friday.

Mrs. Eggan Sr., entertained the Aid Society on Wednesday.

On Friday afternoon the Bardo U.F.W.A. held their April meeting at the Hills home. Eight members and three visitors were present. The latter were Mesdames Whillans, Haakedal and Brenneman. Roll call was responded to by incidents in the lives of noted women and was very interesting. Mrs. Alice Finseth's paper on "The Sunny Side of a Farm Woman's Life." was VERY GOOD and was appreciated by all.

Born To Mr. and Mrs. Axtel Kindley on April 26th, a son.

Mr. McLean had a week of practice teaching in the Grande Forks school with Miss Betsy Ness.

Through the courtesy of Mr. Jacobson, we were able to see the railroad wreck at Shonts, or rather, the result of it. It was a sight one will not soon forget.

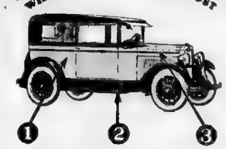
Rev. Hillman of Sask. spent Sunday here.

Mr. and Mrs. Monrad Finseth and the Misses Myrtle and Irene Rude visited in Edmonton on Sunday.

BIG NORWEGIAN CONVENTION TO BE HELD IN WINNIPEG, JULY FIFTH TO TENTH

The following Norse organizations in Canada and the United States are planning a great joint convention and reunion to be held in Winnipeg July 5—10 next; League of Norsemen, Norwegian Bygdelager, Norwegian Singers, Danish and Norwegian Press association, Norwegian Lutheran Church. Committees are now making arrangements for the gathering. Large delegations are expected from the South.

THE HIDDEN PLACES
WHERE QUALITY COUNTS MOST



1 Body The emblem "Body by Fisher" stands for modern styling, safe, substantial construction . . . lasting beauty, and a score of important contributions to your comfort.

2 Chassis Compare the "Bigger and Better" Chevrolet Chassis with any other car in the low-price field. Look at its rugged, 4¼" deep steel frame, its sturdy cross members, its long semi-elliptic, shock-absorber springs, its safety gasoline tank in rear, its one-piece, banjo-type rear axle of enormous strength and ready accessibility. Check the four-wheel braking system and the independent set of emergency brakes.

3 Engine Look beneath the stylish hood of the "Bigger and Better" Chevrolet. See that sturdy, valve-in-head engine (the most powerful type of automobile engine yet designed), fully enclosed and protected. Note the AC Oil Filter, the AC Air Cleaner, Crankcase Breather System, Oil Pump. Notice the new alloy "invar-strut" pistons . . . the new hydro-laminated camshaft gears . . . the high grade electrical equipment.

The G.M.A.C. . . . General Motors' own deferred payment plan affords the most convenient and economical way of buying your Chevrolet on time.

Empire Builders.

[illegible] which was observed throughout Canada last month [illegible] an especially strong appeal to the people of Western Canada. [illegible] be surprising to many people in the Eastern provinces who [illegible] under the delusion that British and Empire sentiment [illegible] in the West and that it has been weakened by the influx [illegible] other than British origin. But it is not surprising to the average Western [illegible] on the contrary to him it is but the natural outcome of the [illegible] outlook of the West.

It is not [illegible] in the West that the strongest approval is given to the British Preference feature of the Canadian tariff and it is in the West rather than the East that public opinion favors further albeit gradual extensions of the [illegible] preference with a view to a lowering of duties and still greater [illegible] British trade in this Dominion. In fact there is a very strong sentiment in the West which would welcome the development of Preference [illegible] point where all customs duties on British made and British produced goods were wiped out entirely.

Empire Shopping Week had for its object the focussing of people's attention upon [illegible] factors in the development of Canada as a component part of the British Commonwealth of Nations and of the Empire as a whole. [illegible] sentiment provides a mighty urge to all Canadians to give a [illegible] preference to Empire goods when making purchases but as was the case with prohibition of the liquor traffic, sentiment is not in itself sufficient [illegible] is the economic factor which, in these modern days, provides the most powerful argument. And Western Canada is profoundly interested in the economic factor.

World trade today is as it has always been and always will be a system of barter — the exchange by one country of those products and articles of which it produces a surplus to another country which requires these things and to accept payment therefore in other goods of which such country produces a surplus and which the first mentioned country requires to import. Money is merely a convenient means of effecting such exchange. In other words trade between nations operates on exactly the same principles as trade between individuals.

Western Canada and Canada as a whole has a surplus of products to sell. If those countries which require the things Canada has to sell are to be in a position to buy and pay for them we must, in turn, buy from those countries the things they have to sell and which we cannot or do not produce ourselves and must import.

Last year Canada sold to the rest of the British Empire $200,000,000 more products than we purchased from them. On the other hand Canada bought over $200,000,000 more from the United States than we sold across the line. Canada was enabled to pay the United States for the excess of goods imported because of its excess of sales to other parts of the Empire. While Canada did not lose by this procedure, the Empire did not gain; in fact, it sustained loss.

Now as our major exports must cross the seas to Great Britain, Ireland, Australia, New Zealand, South Africa, it will be to Canada's advantage in a purely business way to buy as largely as possible in those countries and thus provide return cargoes for the ships which carry Canada's products into the markets of the far-flung British Empire. The larger these return cargoes the more profitably can the vessels be operated, the greater the number of ships that will be put on these ocean lanes of transportation, the keener the competition for the business and, as an inevitable economic result, the lower the freight charges levied on both out-going and in-coming shipments.

The more Canada buys from its sister nations in the British Commonwealth the more they can buy from us. The one re-acts on the other, and trade both ways can thus be built up and grow like the proverbial snowball. It has long been declared that "trade follows the flag" but it is also true that the flag has followed trade and to the traders of the past we largely owe the Empire of today.

It is equally true that the development of inter-Empire trade has a direct and pronounced effect on immigration, and, inasmuch as Canada [illegible] to secure a larger proportion of British settlers, the more we trade with Britain the more widely will Canada and Canadian products and Canadian resources and possibilities become known among the British people.

The slogan of Empire Shopping Week is indubitably true: "Empire Buyers are Empire Builders." Let Canada build by buying.

Radio Phone Service Extended

Three Western Cities Have Been Added To List

A considerable extension in Canada of the list of towns and cities from which wireless telephone in Europe may be had has been announced by Alex. Johnston, Deputy Minister of Marine and Fisheries, following the receipt of a statement from the office of the Secretary of State for the Dominions in London.

Up until April 11 the service was available to certain towns in Belgium, Germany, Holland and Sweden, but since that date it has been extended to France and to certain towns in Switzerland including Geneva. Further extensions on the Continent of Europe will be made later. It is also announced that after April 11, last any further extensions would embrace simultaneously both Canada and the United States.

The following cities in Canada have already been provided with this wireless telephone service across the Atlantic: Montreal, Toronto, Quebec, Ottawa, Hamilton, St. John, Halifax, Winnipeg, Calgary and Vancouver.

Western cities added recently to the service are: Fort William, Edmonton and Regina.

If You Need A Tonic Get The Best!

Guelph, Ont.— "There is nothing better as a building tonic than Dr. Pierce's Golden Medical Discovery. Several times when I was rundown, suffered from weak stomach, this and I [illegible] had blood, I took it and always obtained good results. It enriched my blood, relieved me of the weak stomach, built me up in health, and made me feel like a new person. I also found it splendid to take following [illegible] to give me strength. I always recommend Dr. Pierce's medicines to those whom I find ailing for I know them to be just as advertised." —Mrs. W. H. Skirving, 52 Nottingham St.

Write Dr. Pierce's Invalids Hotel in Buffalo, N. Y., for free advice.

World's Stock Of Gold

Reserve Board Reports $9,475,000,000 At End Of Last Year

The total stock of monetary gold held by Governments, central banks and similar institutions throughout the world, either in their own vaults or under earmark with correspondents, at the end of 1927, the latest date for which comprehensive figures are available, appears to have been not less than $9,475,000,000, and to have shown an increase for the year of at least $300,000,000, according to the Federal Reserve Board's bulletin for March, just made public.

Charity covers a multitude of sins and a tailor covers a multitude of manners.

Minard's Liniment for Toothache.

It isn't always the strongest person who has the best hold on life.

Uncanny Inventions Exhibited In London

One Machine Types, Adds, and Multiplies At Same Time

Uncanny efficient inventions were to be seen at the Business Efficiency Exhibition at Holland Park Hall, London, Eng., recently. The devices shown included: An electric machine that opens envelopes at the rate of 30,000 an hour. A machine that types, adds, and multiplies at the same time. A machine that seals, franks, counts postmarks and prints a slogan on envelopes at the rate of 300 per minute. Portable typewriters in colors to match the home or personal color scheme. A lock which records on a tape the time the door is opened, by whom and whether from the outside or inside of the room.

NEGLECTED ANAEMIA

Often Leads To the Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McEachern, Port Hood, N.S., says: "I praise the day I began the use of Dr. Williams Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

"Dry Ice" New Idea

Substitute Has Been Used Successfully In States

By the use of "dry ice," or solidified carbon dioxide, the price of ice cream will be cut considerably within the next few years, says Fred Rasmussen, of Harrisburg, executive of the International Ice Cream Manufacturers' Association, during the annual convention of the body.

Only fifty pounds of the "dry ice" will supply the needs of an ice cream delivery truck for nearly a day, he declared, and use of the substitute will spread rapidly when it is made in quantity. It is now being used in transporting ice cream by truck from Philadelphia to Atlantic City.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

Forest Effect On Temperature

Forests have an equalizing effect on extremes of temperature. Records for Canada show that in forested districts maximum temperatures are lower and minimum temperatures higher than in adjoining deforested tracts.

The British museum library has announced that there are nearly 4,000,000 books on its 50 miles of shelf.

Short of Breath Dizzy, Sinking Spells COULDN'T WALK FAR

Mrs. L. A. Oliver, Granville Ferry, N.S., writes:—"A few years ago I had dizzy, sinking spells so bad I could hardly stand up without taking hold of something to support me, and I could not walk any distance on account of being so short of breath.

"I had taken a lot of doctor's medicine, but it did me no good, only for the time being, so reading in the B.B.B. almanac about [illegible] I decided to try them and found them to be just what they are recommended to be, and I feel that I owe my life to them."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

AFTER ALL There's Nothing To Equal Zam-Buk FOR THE SKIN!

A Region Of Wondrous Beauty

Plea Is Made For Establishment Of Government Park In Bella Coola Valley, B.C.

If you like to get out in the wild country and hunt wild animals, such as grizzlies, with the camera, by all means go to the Bella Coola Valley, B.C. I have spent the last four summers there, and I am advocating the establishment there of a Dominion Park to be known as MacKenzie Park, in honor of the first white man who crossed Canada and who reached the sea at that point; this to be connected up by means of a highway to be known as Mackenzie Highway, paralleling part of Mackenzie's route so that people can go from New York to California and to Bella Coola over the Mackenzie Highway, visiting Mackenzie Park and returning by way of the Rocky Mountains Park, and so on. This would bring money into British Columbia and Canada. If the Dominion will not carry out this plan I hope to get some wealthy men interested, as the region is one of wonderful beauty. Within a distance of 70 miles, it is easily traversed in one day by motor boat or auto, the can visit both the so-called rainy coast and the desert interior. One can go from sea level to 12,000 feet, can have boating on both salt, fresh, swift and still waters, paddling, poling, motor boating, sailing, etc. There is excellent trout fishing and good animal photography, grizzly bears being very numerous. Thousands of water falls, one of them over 800 feet high. 18 glaciers may be seen from one place, and there are many others. It costs only $40.00 for a round trip from Vancouver by boat through the fjords of the Norway of Canada. I have taken my first moving picture, showing life in this region. Board in the valley can be had at 50 cents a meal, good cream, fresh fruit, kindly, nice people, largely of Norwegian descent, noted for cleanliness, and good cooking. Please let me know of anybody who will help me get this park and highway established. We should get about 20 miles wide by 70 miles long of country which is still in the Crown, that is, it is government land, and it is of practically no other value except for park purposes. —Harlan I. Smith, Department of Mines, Ottawa.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Settlers From Across the Line

Many Inquiries Are Being Received From Prospective Settlers

"Not only will a large number of Canadians return from the United States, but many citizens of that country will seek homes in Canada during the coming year," predicted Hon. Robert Forke, Minister of Immigration. His prediction, he explained, is based on reports of Canadian agents in the United States, who state that they are receiving an almost unprecedented number of inquiries for information concerning Canadian settlement.

Has Unusual Occupation

For twenty-three years Lawrence Quinn, chief oysterman at the Hotel Lincoln, New York, has been opening oysters for a living. He opens an average of 3,900 oysters a day, and during his twenty-three years in this work has found dozens of pearls. None of the stones were of fabulous value, but there have been enough small ones to make a very fine necklace and some pendants, and Quinn still has hope that some day he will pick up one that will be of real value.

Winnipeg Population

The official figure of the population of Winnipeg proper for 1928, as given by the Assessment Department, is 202,277. Not since 1916 has the 200,000 mark been reached. This year's figure is exceeded only by the population totals for 1914 and 1913, when the figures were 203,255 and 212,889 respectively.

A manufacturing concern in Indiana has made paper covers to protect automobiles from fine dust when standing in garages.

Minard's Liniment for falling hair.

FIRST CONTRACTS AWARDED

Canada's Air Mail Service Will Eventually Cover Dominion

The nucleus of a transcontinental aerial mail service is being established by Canada with the awarding of contracts for four important mail services. Eventually letters will cross the country from Halifax to Vancouver in 36 hours by aeroplane, instead of in five days by railway as at present.

The contracts now entered into provide for a service between Father Point and Montreal and Ottawa, another service of four trips per week between Montreal and Toronto, and all year-round service between Montreal and Albany, N.Y., to connect with the United States Transcontinental Air Service. The total cost will be $201,150.

The Father Point to Montreal service and the Montreal to Ottawa service will be provided by the Canadian Transcontinental Airways, Limited, of Quebec, the Father Point to Montreal section costing $49,500, or $1.25 per flying mile. The Montreal to Ottawa service is to cost $8,250 for the season. For the Montreal-Toronto service the cost will be $40,500, or $1.25 per flying mile, and the Montreal to Albany service will cost $86,900.

According to J. A. Wilson, Director of Civil Aviation in Canada, 60 per cent. of the Royal Air Force pilots during the war were Canadians. Since the war Canada has been devoting her activities to such operations as forest protection, surveying, mapping, and the assisting of engineering and geological survey work in the northern region. It would take some time to build up a transcontinental air mail service, owing to the sparse population of the Dominion, but eventually the people would demand more rapid service than could be given by the present method.

An Oil That Is Prized Everywhere. —Dr. Thomas' Eclectric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Monarchy Nationalized

People Look On Royal Family As One Of Their Possessions

The profound difference between the relationship of the people to the Monarchy during the "Victorian Age" and what it is now is that Queen Victoria held, in principle and in practice, to the ancient idea that the people were her people, the country her country, that she possessed them and ruled over them in virtue of a scarcely mitigated conception of Divine Right, whereas now the people look upon the King, the Queen and the Royal Family as their possessions and are fonder of them and prouder of them than of any other national institution. The sense of ownership has ceased to be autocratic or semi-autocratic and has become democratic. Unlike the railways and the coal mines, the Monarchy has been nationalized. —Review of Reviews.

A Square Deal

Farmer: "What will you give me for the horse."

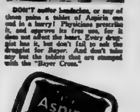
Scotchman: "A load of hay."

Farmer: "But what could I do with a load of hay with no horse to eat it?"

Scotchman: "Well, I'd lend you the horse till the hay is gone."

When a man weds an heiress her face is his fortune.

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every druggist has it, but don't fail to ask the druggist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."



Americans Have Faith In British Surgeons

Millionaire Found Way To Get Famous Doctor's Services

Americans have great faith in British surgeons. A few months ago an American millionaire wanted one of the most famous surgeons to go to New York to treat his small child, and offered a very large fee.

The surgeon, however, was not prepared to make the journey. He was surprised when shortly afterwards an American doctor arrived with a complete cinema film of all the child's movements during a period of 24 hours.

To exhibit the film it was necessary to take the local cinema hall at a high fee. The British surgeon carefully examined the film and drew a report, which the American doctor took back to America.

Later, he arrived again with another film showing the result of the treatment in detail, a big cheque, and a letter of thanks from the relieved father.

The difference between an alarm clock and a hen is that when you set a hen she sits there, but when you set an alarm clock it goes off.

Toothache

Fill cavity with cotton soaked in Minard's. Also bathe the face. Quick and sure relief.

MINARD'S "KING OF PAIN" LINIMENT

A Chicago manufacturer has invented a photographic machine that can produce 4,000 finished prints in an hour.

It is estimated that $100,000,000 is annually spent in U.S. for retail store display advertising.

HERCULES

PERMANENT BUILDING PAPER

Smooth the Bumps on the Sales Road

Regardless of price, if quality is in the merchandise, it is half sold.

Hercules Permanent Building Paper is tested and proven wind proof—absolutely. Hercules not only aids in selling but brings repeats. Hercules also has the quality of toughness which, making it easy to use without fear of tearing or cracking, appeals strongly to the user.

Hercules—in three grades, x, xx, xxx—will smooth your building paper sales road. Samples sent on request.

Appleford Paper Products

HAMILTON, CANADA

PROBLEM OF IMMIGRATION IS BEFORE INQUIRY

Ottawa.—Rev. Canon Burd, of Prince Albert, quoting immigration statistics before the Commons committee on immigration, expressed his "very deep alarm" over the preponderance of Europeans entering Canada. Last year, he said, the increase over 1926 had been 1,088 British, 3,962 from the United States, and 2,836 Europeans. In March 3,150 British people came to the Dominion and 8,132 non-British.

"This is to show that the present system is detrimental to those of us living in the West," said the canon.

The census of Saskatchewan showed that in 1916 the proportion of British residents in the province was 54.5, in 1921, 52.8, and in 1926, 50.7.

"Would you have the development of the West arrested until we can get British immigrants, who seem reluctant to come?" asked C. H. Cahan (Conservative, St. Lawrence-St. George).

A letter was read from a rural dean of the Peace River, who stated that every train into that country was bringing in foreign-born, but no British. The foreigners, he said, would never become Canadians.

"It is a libel on my district to say that foreign-born are not becoming good Canadians," said George McPhee (Liberal, Yorkton).

"I do not say that is true of every district, but where foreigners are in blocks it is correct," replied the Canon.

The British Government had voted £18,000,000 to spend in emigration. They had been able to spend only three and a half million. If it was made clear to the British Government that Canada wanted settlers it would go deep in its pocket for overseas settlement.

C. McIntosh was "not afraid of the future of Saskatchewan," so far as immigration was concerned.

The Canon made it clear that he did not represent the Anglican Synod, but the diocese of Saskatchewan. He represented the whole church in so far as he spoke from the general diocese journals.

Hon. Robert Forke, Minister of Immigration, interrupted: "I have direct information from the church that Canon Burd does not represent the church as a whole but only the diocese of Saskatchewan."

This was correct, agreed the Canon, but he would quote from the journals of the general diocese which were the opinion of the whole of the Church of England.

He said that there was no unfriendliness toward the Department of Immigration. He quoted from a memorial passed by the Saskatchewan synod pointing to the employment by the department of 25 Roman Catholic priests and only a few clergymen of other denominations. This was described as "a glaring unfairness."

Profits From Liquor Sales

Annual Report For Saskatchewan Shows Increase Over Last Year

Regina.—Profits from the sale of liquor in Saskatchewan in the year ended March 31 last, were $2,443,390.88, it was officially announced on receipt of the annual report of the independent firm of auditors.

In the corresponding period one year earlier, the profits were $2,114,868.44.

In the last 12-month period revenue from the sale of beer exceeded that from the sale of wines and liquors. Beer sales totalled $6,174,002.25 while wine and spirits sales totalled $5,534,442.27.

Awarded Highest Honor

New York.—For his three years' explorations in the Arctic, culminating in his flight across the Arctic basin, Captain George H. Wilkins was awarded the Samuel Finlay Breese Morse gold medal, the highest honor in the bestowal of the American Geographical Society.

Won Sailing Race

San Francisco, Calif.—The thirty-three-year-old "Star of Alaska," a single rigged sailing ship, won a race from San Francisco to Alaska, from the barque "Star of England," it was learned here. The owners had offered a $100 purse to the crew of the winning ship.

Charged With Evading Law

Mexico City.—Newspaper despatches from Tuxtla, Gutierrez, state that Catholic priests and nine nuns were arrested at San Cristobal, state of Chiapas, charged with conducting religious services without having first complied with the law of registration.

Gave Life To Aid Bremen

Floyd Bennett Dies In Quebec Hospital From Double Pneumonia

Quebec.—Floyd Bennett, one of the world's best known aviators, died in hospital here, following a severe attack of double pneumonia.

Bennett, who, in conjunction with Bernt Balchen, was one of the first to try to bring tangible aid to the stranded German and Irish trans-Atlantic fliers at Greenly Island, contracted his illness as a direct result of his attempt to help his stranded fellow airmen whose plane, the Bremen, was in a disabled condition at out-of-the-way Greenly Island.

Bennett had been suffering from a heavy cold prior to his take-off from Detroit and had undertaken the flight against advice of physicians.

His wife and Commander Byrd, both of whom rushed here from New York when informed as to Bennett's serious condition, were at his bedside when he died. Mrs. Bennett herself was ill when she arrived here and was occupying a cot in the hospital, suffering from tonsilitis.

Pleased With Senate Prospects

Janey Canuck Sees Results Of Twelve Year Campaign

Edmonton, Alta.—Announcement from Ottawa, that the Dominion Parliament would take steps to amend provisions of the British North America Act so that it would be legal for women to receive appointments to the Senate, brings to a climax a 12-year campaign to achieve this objective instituted and waged with unerring vigor by Mrs. Emily Murphy, first woman to be appointed police magistrate in Canada, and who, under the pen name of Janey Canuck, has contributed much literature to the cause of woman's advancement in the social and political life of the country.

Asked regarding the statement on the subject made in Parliament, by Hon. Ernest Lapointe, Minister of Justice, Mrs. Murphy expressed her heartiest appreciation of the Government's action, and said it was one with which the people of Canada, for the most part, were in perfect harmony, irrespective of "class, creed, party or sex."

Germans Planning New Trip Across Atlantic

Completing Plans For Another Flight To North America

Dessau, Germany.—Negotiations for another flight to North America in a Junkers plane by way of Baldonnel, Ireland, have almost been completed.

The Junkers officials, however, have declined to divulge the details, but the latest Associated Press learns that the project is being engineered by Lilli Dillenz, Viennese actress who last year got as far as the Azores in the D-1230 in an effort to make the Westward passage.

The Europa, sister plane of the Bremen, which last year was compelled to land after a valiant effort to start for the U.S., will be used and, will be piloted by Johann Risticz, who was aboard the Europa on her unsuccessful attempt.

It is understood that Fraulien Dillenz owns the Europa and that she will be a passenger on the new attempt.

Proceeds Go To Nurse

New York.—The proceeds of a matinee under the auspices of Sir Wilfred Grenfell in a play house here, will go to Miss Great Ferris, of Saint John, N.B., who carried supplies to the Bremen fliers on Greenly Island, and afterwards through the Saint John Telegraph-Journal and the Canadian Press, gave the first detailed first-hand account of their plight to the world. Miss Ferris is a nurse at the Fortean Mission in Labrador.

Willing To Pay Part

Ottawa.—The Government is favorably disposed toward payment, in part at least, of amounts which may be due Home Bank depositors who have not received 35 per cent. of their claims under legislation enacted two sessions ago. This was the statement made in the House by Hon. J. A. Robb, Minister of Finance, in reply to a question by G. R. Geary, Conservative, Toronto, South.

Killed By Chinese Soldier

Shanghai.—Dr. Walter F. Seymour, superintendent of the Presbyterian board of foreign missions hospital at Tsinan, southwest of Shantung, was shot to death by a Chinese soldier. Dr. Seymour, a graduate of Wisconsin University and Northwestern Medical School, Evanston, Ills., came to China in 1893.

Increase In Immigration

More Britishers Arrive and Canadians Returning From U.S.

Ottawa.—In the fiscal year ended March 31, 1928, immigration to Canada amounted to 161,587, an increase of 5 per cent. over the previous year when it totalled 143,991. These figures were made public by the department of immigration and colonization.

During the last 12 months, as compared with the preceding year, there has been an increase in British immigration of 1,088. Immigration from the United States has increased by 3,962 and from other countries the increase has been 2,534.

A significant feature of the statistics is the increase in immigration from the United States, which was greater than the increase from all other sources combined.

During March the total immigration to Canada was 11,665, of which 3,150 were British, 2,383 from the United States, and 8,132 from other countries.

During March 2,670 Canadians who had gone to the United States to reside returned to Canada, declaring their intention of remaining permanently in this country. The number of such returning Canadians in the fiscal year was 30,887.

BRITAIN NAMES SIR WM. CLARK OTTAWA ENVOY

London.—Sir William Henry Clark, comptroller-general of the department of overseas trade since 1917, has been appointed British high commissioner to Ottawa.

Sir William Clark is the eldest son of the late W. J. Clark, Scroope House, Cambridge, and is in his 63rd year.

Sir William was educated at Eton and Trinity College, Cambridge. He has had an exceptional training in the public service. He was a clerk in the Board of Trade Department of the government in 1889; secretary to the special mission to Shanghai to negotiate a commercial treaty with China in 1901; acting second secretary in the diplomatic service in 1902; secretary to the Royal Commission on the House supply of food, etc., in time of war, 1903-5.

Sir William was private secretary at the Board of Trade to Lloyd George in 1906, and to Winston Churchill in 1908; secretary to Lloyd George as chancellor of the exchequer, 1908-10; member for commerce and industry of the council of the Viceroy of India, 1910-16, and comptroller-general of the commercial intelligence department of the Board of Trade, 1916-17.

As soon as the necessary arrangements are completed, Sir William will proceed to Ottawa.

CANADIAN GIRL AVIATOR

Miss Caroline Sykes, of Toronto, the first Canadian girl to make a parachute jump from an aeroplane, is the only Canadian girl attending the all-American aircraft convention in Detroit. She predicts a bright future for aviation in Canada and is anxious to become an air mail pilot.

Socialist Leader Has World Peace Scheme

Would Confiscate Half Gold Reserve Of Nations Declaring War

Paris.—While Foreign Minister Aristide Briand and Secretary of State Frank B. Kellogg are getting on slowly in their proposals for outlawing war, Dr. Weill, Socialist leader in Paris, hatched a powerful idea for putting old man Mars out of business.

Dr. Weill says in a proposal made public:

"Let every power that is a member of the league of nations deposit half of its gold reserve at Geneva, agreeing that it will be confiscated the moment it declares war, and I guarantee shooting irons will go right out of fashion."

Russian Whites Lose Leader

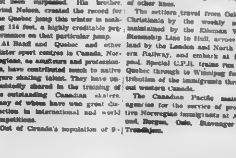
General Wrangel, Enemy Of Bolsheviks, Dies At Brussels

Brussels, Belgium.—Baron Peter Wrangel, the last hope of the Russian Whites, whose army the Bolshevists chased into the Black Sea seven years ago, is dead.

The end came in the little suburban home to which he retired in 1926, leaving the last remnants of his command, a few Caucasians and Don Cossacks, in Jugo-Slavia. He suffered from intestinal trouble which affected his heart and lungs.

General Wrangel was born at St. Petersburg, now Leningrad, August 15, 1878. He was a member of a remarkable family which traced its origin to the nobility of the Baltic states as far back as 1300.

Norwegians Aid Canada's Development



1. A group of Norwegians photographed after having spent a few years in Canada.
2. Young girl dressed in the costume typical of her native country.

By introducing into Canada such winter sport talent as that of the Nelson brothers in ski-jumping, and others in figure skating, Norwegians have won much favor and esteem in the eyes of Canadians.

Nels Nelson, C.P.R. brakeman, created a world's record in 1925 at Revelstoke, B.C., in making a successful leap down the mountain side of 240 feet, a distance that has not yet been surpassed. His brother, Ivind Nelson, created the record for the Quebec jump this winter in making 114 feet, a highly creditable performance on that particular jump.

At Banff and Quebec and other winter sport centres in Canada, Norwegians, as amateurs and professionals, have contributed much to native figure skating talent. They have undoubtedly shared in the training of the outstanding Canadian skaters, many of whom have won great distinction in international and world competitions.

Out of Canada's population of 9,500,000 roughly 60,000 are of Norwegian origin. The annual average influx of immigrants from Norwegian ports is 5,000, the majority travelling by Canadian Pacific ships to Quebec and Montreal in the summer, and St. John, N.B., in the winter. These vessels are splendidly equipped for this purpose and carry as many as 900 immigrant passengers at a time, considerably exceeding the capacity of other lines.

The settlers travel from Oslo and Christiania by the weekly service maintained by the Ellerman Wilson Steamship Line to Hull, across England by the London and North Eastern Railway, and embark at Liverpool. Special C.P.R. trains run from Quebec through to Winnipeg for distribution of the immigrants throughout western Canada.

The Canadian Pacific maintains agencies for the service of prospective Norwegian immigrants at Aalesund, Bergen, Oslo, Stavanger and Trondhjem.

Automobile Racer Killed

Car Overturns When Lockhart Was Seeking New Record

Daytona Beach, Fla.—Frank Lockhart, noted automobile racer, was killed almost instantly here when he lost control of his machine while racing down the beach at more than 200 miles an hour.

On his first run, Lockhart had been clocked at 147 miles an hour. The return trip was made at a speed of 193 miles. Starting South on the beach again the machine's speed was timed at 203.45 miles.

In the final trip it was apparent that he was making more than 200 miles an hour when the racer went out of control, about 500 yards south of the beginning of the [illegible] directly in front of the grandstand.

Lockhart's machine was demolished. The car in which the famous speed king met his death was the one in which he plunged into the ocean here on February 22 last while making an attempt to set a world's record during the annual speed trials here.

Must Exercise More Care

Charge Dry Officers At Border Cities Careless With Guns

Ottawa.—Canada will communicate immediately with her minister in Washington, Hon. Vincent Massey, in respect to the endangering of lives of Canadian citizens from bullets believed to have been fired by American preventive officers operating under the Volstead Act, stated Premier King in the House.

Mr. Massey will ask that more care be exercised by these U.S. officials.

According to S. F. Robinson, Conservative, Essex West, several times within the last month Canadians have been nearly killed by bullets from American preventive officers at the border cities of Windsor, Walkerville, and Sandwich.

BEATTY STRESSES CANADA'S NEED OF POPULATION

Ottawa.—More executive efficiency and greater administrative latitude under experienced executives commanding high salaries were among the suggestions offered by E. W. Beatty, president of the Canadian Pacific railway.

Mr. Beatty indicated his belief that the present efforts being made by the government and the railways were bringing inadequate results. He approved of the training in Great Britain as a method of eliminating "misfits" from immigrants.

Millions of Canada's 9,500,000 people were of British and French origin, he said.

"This would indicate that we have not yet reached the point at which the admission of continentals, even in considerable numbers, should cause apprehension," said Mr. Beatty.

"We are all, I think," said Mr. Beatty, "impressed with the fact that Canada has made substantial progress in the last few years but we think progress can be expedited and even greater prosperity follow the admission of more people to this country. I share the views of the president of the National Railways, and I agree with others that our ambition should be to admit, first from Great Britain and afterward from the United States and selected continental countries, men who are physically fit, and able, and willing to follow agricultural pursuits.

"If the figures for the past three years are approximately correct that 90,000 per year was the net increase in our population, other than from natural increase, and the extent of the country and its resources are considered, it cannot, I think, be said we are admitting an adequate number of new settlers. I feel, too, that with present condition of things the fundamental principles underlying the legislation are correct and that immigration as applied to Canada relates almost exclusively to land settlement and colonization. The entrance of men who followed other pursuits will depend upon the opportunities for employment existing in Canada and when these opportunities are known to exist they will be secured without difficulty and without effort. In fact, the history of the U.S. has indicated that where jobs are available applicants are usually found for them in great numbers.

"If I am correct in assuming that the question is one of land settlement and colonization, our efforts must be of necessity largely restricted to obtaining settlers or those who can in time become settlers. We have a great deal of unoccupied land in Canada.

WOULD REDUCE THE NUMBER OF WHEAT VARIETIES

Regina.—Realizing the necessity of maintaining uniformity in the standard of pool wheat, the directors of the Saskatchewan Wheat Pool have been actively investigating ways and means of encouraging the production of fewer and better varieties in the [illegible] and have actively associated themselves with the promotion of a [illegible] system.

One of the factors [illegible] for lack of uniformity [illegible] Wheat Pool official, is the great increase in wheat varieties that has developed since the introduction of Marquis in 1911. It is true that great advances have been made in the production of wheat by cross breeding and selection by different agencies such as experimental farms and prominent seed growers, but with no restriction on the number of varieties produced the result has been that a large number of varieties have been produced, not all of which have proved superior to the existing varieties.

In many cases the new wheat varieties are higher yielding or have greater rust resistance but are lower in milling or baking qualities than the previous standard varieties. The result of mixing several varieties of more or less different characteristics has been a steady trend away from uniformity in the whole crop. The fewer the varieties the greater the uniformity.

One such recent introduction is the Vermillion wheat variety, which has exceptionally low milling and baking quality and is in no way superior to other varieties that might be used for seed.

Dominion and provincial government institutions have tested and experimented with cereal varieties for many years, but the results of these experiments have sometimes been conflicting owing to the location of the experimental stations in different portions of the country where different climatic and soil conditions prevail. The lack of co-ordination of experimental work between all the stations concerned has tended to confuse farmers as to what are really the most desirable varieties from both the production and marketing standpoint.

Commissioner Of Lands Dead

John W. Greenway Was Son Of Former Premier Of Manitoba

Ottawa.—John W. Greenway, aged 67 years, commissioner of lands, Department of Interior, and son of the late Hon. Thomas Greenway, former premier of Manitoba, died here.

He had been in ill health since the death of his wife, March 4 last.

Under Mr. Greenway's supervision some thousands of settlers took up land in the West and he was largely responsible for the success of the various plans used in providing homesteads for these settlers.

Mr. Greenway was born at Devrie, Ont., at the time his father was Federal member for Huron.

The family moved to Manitoba in 1879 and after his father became premier of that province most of the management of their farm at Crystal City fell on the shoulders of the son. In 1896 John Greenway was appointed inspector of School Lands in Manitoba and became commissioner of lands under the Dominion Government in 1901.

Wants Envoy Recalled

Irish Embassy To U.S. Not Worth the Money Says de Valera

Dublin.—Abolition of the post of Free State representative at Washington was urged in the Dail Eireann budget debate by Eamonn de Valera, the republican leader, who said that it was not worth the money it cost.

It was based on false pretences, he said, and it would be better if the Saorstat ceased to have a minister who merely was part of the British embassy. It did not deceive Americans, De Valera said.

Patrick MacGilligan, Minister for Industry and Commerce, replying for the government, denied that the Irish minister at Washington was connected with the British embassy and said that the U.S. had recognized the position in sending its own minister to Dublin.

Plan Regular Atlantic Flights

Berlin, Germany.—Nineteen Lufthansa company pilots have been trained as ocean navigators and a group of nine to eleven ton airplanes is being constructed ready for regular trans-Atlantic flight service, probably to South America it was announced recently.

THE SOUL'S EMANCIPATOR

PART II.

By Rev. J. R. Harris, B.A., Pastor Beiton Baptist Church

(The Survival News)

If Jesus Christ is really to be the Emancipator of the Soul what must he be able to do? Certainly it will be essential that he free us from the shackles of the past, that keep us in bondage. There is first of all The Condemnation of the Past, and next The Bias of the Past; from both of these Christ must be able to liberate us if he would make us free indeed. It is the glory of the Gospel that our Saviour is abundantly able to compass for us both of these deep needs.

I. The Condemnation of the Past

Though, as we have seen, there are those who have no particular sense of guilt, who entirely lack that "sinner feeling," which lies at the foundation of all strong and deep Christian experience, yet there are those who are keenly alive to the fact of personal sin, wide awake to their condition and by that very sense of guilt are moved to despair. So heavy is the burden of guilt they carry as to benumb all hope in their every effort at freedom. The first essential to the emancipation of the soul is the removal of this sense of guilt. That Jesus Christ must be able to do; that He is perfectly able to do; that He has done for multitudes.

"There is therefore now no condemnation," says St. Paul, "to them that are in Christ Jesus." These words occur at the beginning of the eighth chapter of Romans. After having established in the opening chapters the fact of human guilt, and the fact that humanity possesses no right-...

... brought them freedom from the condemnation of the past. The sense of relief, the hope that succeeds despair, and the joy that floods the soul, together constitute nothing less than a mighty emancipating power. No longer can the oppressive sense of guilt so bind the soul as to choke every effort to break with that past. What the soul could not do for itself, that Jesus Christ has achieved; the shackles of condemnation fall off, and the man arises to enter into a life in which all things are new.

II. The Bias of the Past

While it is true that life assumes an entirely new complexion for the soul that stands free from condemnation, yet, in the living of the new life it is speedily realized that the bias to sin, that comes to us from the past, still exists in the old nature. All of us are bound by it to a greater or lesser extent, and if we are to be made free indeed Jesus Christ must prove Himself capable of breaking the power of sin in this realm so that it shall no longer tyrannize over us in practical life. If we think of this bias of the past as a cord that binds us, we may recognize it to be formed of three strands. There is the strand of tainted heredity, the strand of defective environment, and the strand of wilful choice. The first is that bias to sin handed down to us by our ancestors; the second is that tendency to evil produced by the circumstances of social environment; the last and strongest cord is that which we have bound about ourselves by the repeated exercise of our will in choosing the wrong. Each makes its contribution to the sinful bias given to us by the past. It is part, and a very important part, of the salvation of Christ to provide for our deliverance from this force that handicaps us for the Christian life. If we are to be free indeed, the bias of this past must be broken and Christ can do it for us. ...

... "There is therefore now no condemnation" ...

Pat:—"What's the matter, Mike?"

Mike:—"Well, Pat, wimmen are not at all consistent. Me wife chased me out wid a rollin' pin this mornin' an' then cried because I left the house widout kissin' her good-bye."

Hardy Norse Explorers Make Trip To Barren Lands On The Coppermine River

Waking the echoing silences disturbed only at long intervals by white men over the centuries, two young Norwegians — Hjalmar Nelson-Dale and Helge Ingstad—are today, if all has gone well with them, beating their dangerous way back across the barren lands from the headwaters of the Coppermine River.

Only twice in the last 160 years, so far as is known, have white men penetrated to the source of the river in the mysterious hinterland through which the Coppermine River flows.

Its discovery was made in 1772 by Samuel Hearne, following an earlier attempt in 1769, when the desertion of his Indians compelled abandonment of the effort.

Hearne's successful expedition of 1770-1772 was marked by the massacre—which he was unable to prevent—of a peaceful Eskimo tribe by his own Indians, and history has marked that fateful spot on the map of the Northland with the name of "Bloody Falls," the slaughter occurring close by some falls on the Coppermine River.

Then in 1821 came the thrilling and ill-fated Franklin expedition, which traversed 5,550 miles out and back across the barren lands from Hudson Bay, to leave the bones of many of its members lying in the inhospitable earth over which the survivors dragged their weary way.

Another 100 years almost elapsed until, in 1924, G. H. Blanchet, of Ottawa, made his brilliant dash into the unknown to discover the outflow of water through a rock wall of an elevated lake from whence, looking northward toward the Arctic, the peaceful Coppermine meandered slowly through a broad plain dotted with herds of caribou, to the shores of the Northern Sea.

It was in the summer of 1927 that the two young Norwegians—Nelson Dale was born in Canada, and so is Norse-Canadian—left Edmonton for Fort Resolution, there to start out on the first leg of their hazardous journey.

In July, 1927, they wrote to O. C. Hanson, Edmonton lawyer, that they were leaving Resolution—last outpost of civilization—in a few days and that if all went well they hoped to reach the Coppermine river in the fall of that year, spending a year in the "terra incognita," and returning to civilization by dog train.

The fall of 1928 should see the two adventurers safely back provided they have met with no mishap.

Ingstad is a qualified attorney-at-law in Norway and for some time was correspondent for "Tidens Tegn," the largest newspaper in that country.

His partner has hunted and trapped in the north for some years and went north with Ingstad after a trip home to Norway in 1926-27.

Neither adventurer apparently was aware before he left that Mr. Blanchet had preceded them by three years in their attempt to reach the Coppermine river head waters.

BRITISH NAVY PROMOTIONS

At the youthful age of 42, Capt. Gordon Campbell (V.C.), (left), has just been made rear-admiral in the British Navy. Vice-Admiral Sir Frederick Field (centre), has been promoted admiral, and Admiral Freemantle has been placed on the retired list at his own request in recent navy changes.

Personality Can Be Changed

Roosevelt Was Example Of What Person Can Do

Personality is a strange thing. Sometimes I think we are born with one special kind just as we are born with a certain nose and with hands whose finger prints are unlike any other in the world, and which can't be changed. But, on the other hand, if Theodore Roosevelt had allowed the personality he was born with to rule him, he would have gone through life a despondent anaemic individual with a spirit weighed down by the despair of tuberculosis. But he pulled himself up and out of it. Sometimes I think anybody can do the same thing. And sometimes I think that selfishness is harder to cure even than a physical disease.

Mistress: It is very ungrateful of you to leave. Haven't we always treated you as one of the family?

Servant: Yes. That is why I am leaving.

He: No. Fortune has never knocked at my door, but his daughter often has.

She: His daughter?

He: Yes—Miss Fortune.

Canadian "Moth" Planes Are Helping To Combat Spread Of Wheat Rust In West

How Canadian "Moth" planes are helping to fight wheat rust in the West is told in a statement made public by the Department of Agriculture, as follows:

"It would be almost impossible to imagine two more widely separated things than an aeroplane and the rust which attacks our wheat. Yet we find the Royal Canadian Air Force co-operating with the Department of Agriculture through the Dominion plant pathological laboratory at the Manitoba Agricultural College, Winnipeg, in the great work being done by Drs. D. L. Bailey and C. H. Goulden in studying and formulating a plan of control for one of Canada's worst and most costly enemies.

"The aeroplane has been extensively used for the purpose of locating diseased conditions in our forests, and also in dusting from the air for the control of the spruce budworm. The work differs considerably, however, in connection with wheat rust and consists mainly in the exposure of slides at different altitudes and in different locations. These aeroplane exposures attempt to collect from altitudes of from one to five thousand feet the date of the earliest appearance of rust spores, the region over which they first appear, the rate at which the spore content of the air increases over various regions, the viability of spores caught at these higher altitudes, and the relation of certain environmental and climatic factors to the rate of development and spread of rust.

"The air force stations at Lac du Bonnet, Norway House, Cormorant Lake, and High River, have assisted in this work. Each station is supplied with tightly stoppered bottles containing wooden paddles to which are attached microscope slides lightly smeared with vaseline. These slides are exposed for 15 minutes of varying altitudes, the slides replaced in the bottles and then returned to the Government laboratory at Winnipeg.

"In one instance at Lac du Bonnet a surprisingly high number of spores was caught on a slide, which seemed to indicate the plane at an altitude of 5,000 feet had travelled through a pocket or eddy of air where the concentration of rust spores was very dense. Where the spores originated is speculative, but the fact that at the time threshing was being done at Morden where there was a heavy local outbreak of rust seems to point to that district as the originating point. When the patchy nature of these outbreaks is considered, one is led to suspect that there may be some relation between these clouds or eddies of spores and localized heavy field infections. One can well imagine a rain washing down these spores on a more limited area, where they would germinate and produce a heavy infection.

"The Department of Agriculture has proved on several occasions the efficiency of the aeroplane in many lines of investigation, and the day may not be far distant when "Moths" will be common in our agricultural communities."

TRANS-CANADA HIGHWAY

Construction work on the last part of the trans-Canada highway will be started early next month. The finish of the last link between Revelstoke and Golden, B.C., will complete a motor highway across Canada from Halifax to Vancouver. The above illustration shows the route and indicates the portion just being completed.

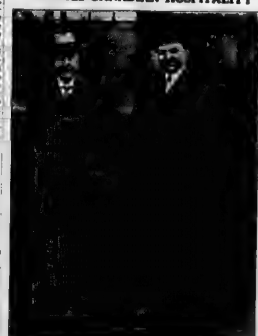
It is expected that some 1,100 head of buffalo, mostly year-olds, will be shipped from the Wainwright Park, Alberta, early in June to the range in the far northern part of the province. ...

The average man's word is considered as good as his bond—by a stranger.

The proudest moment in a successful man's life is when he tells his ... to get there.

PRAISES CANADIAN HOSPITALITY



Baron Perenyi, Minister of the Interior for the Republic of Hungary, who visited the Hungarian settlements adjacent to the lines of the Canadian National Railways in Western Canada recently, expressed himself as much impressed by the help which Canadian-born citizens are giving newly arrived Hungarians in settling on the land and generally establishing themselves in Canada.

"Canada is a place where anyone can make an honest living with hard work," His Excellency said. "All that has been said of Canada is true. It is a land of real opportunity and I shall certainly come back again where I find so many of my countrymen happy, contented and prosperous."

The photograph shows Baron Perenyi on the left and Albert Paizs, noted Budapest editor on the right. Mr Paizs visited Canada three years ago and published a book, "The Hungarians in Canada," which attracted many Hungarians to Canada.

Measuring the Rainfall

One Inch Means Over 113 tons Of Water To the Acre

You have often seen the statement that the rainfall during the past week has been so many inches. Do you have an adequate idea of what this means? Few people have. ...

How He Deciphered It

Chemist Made Up Prescription From Badly Written Testimonial

A young man was given a testimonial so shockingly written that he was unable to decipher it. A friend suggested that he should take it to a chemist, for chemists are skilled at these, having spent long lives deciphering what doctors call handwriting. So the testimonial was handed to a chemist.

"What do you make of that?" asked the young man. The chemist glanced over it for a moment and then disappeared behind a screen. There was a subdued tinkle of glasses for a couple of minutes and then he emerged. "I think you will find that all right," he said handing over a bottle. "Half-a-crown, please!"

Peggy: "Oh, mummy, may I go to the fancy-dress party as a milkmaid?"

"No, dear, you are too small."

Peggy: "Then why can't I go as a condensed milkmaid?"

Nervous Youth: "Darling you are the breath of my life."

Wise One: "Well, why don't you hold your breath?"

Rubber is now believed to be the equipment that enables whales to withstand the pressure of great depths.

German Settler Boosts Canada

During Trip To Homeland Induces Thirty Young Men To Migrate To Dominion

Carl Scholz, of Uckmark, Brandenburg, Germany, who came to Canada a year ago and purchased 1,000 acres of unbroken land on the Canadian National Railways near St. Walburg, Saskatchewan, proved to be a good colonization agent for Canada. ...

Johnny: "Is sister going to have all this?"

Mother: "No, my darling, this is for you."

Johnny: "Scrumptious!"

A Scotsman rang up a doctor in a state of great agitation. "Come at once," he said, "ma wee bairn has swallowed a saxpence." "How old is it?" asked the doctor. "1894."

"This is intolerable. I have found a button in the soup."

"Lucky man. The management gives a prize of a brandy to whoever discovers a button in the soup."—Buen Humor, Madrid

WORLD HAPPENINGS BRIEFLY TOLD

Henry James Cambie, pioneer railway builder and engineer, died at his home in Vancouver, at the age of ninety-one, after a brief illness with pneumonia.

Coal production in Canada during March was slightly less than in February. Alberta produced [illegible] tons, British Columbia's output [illegible] 261,637 tons.

[illegible]

The resignation of [illegible] Drayton as member for [illegible] was announced in the House of Commons. He has accepted the appointment of chairman of the [illegible] Liquor Board.

A notice of motion for the tabling of correspondence between Canada and Great Britain on the subject of titles for Canadians has been given by C. H. Cahan, Conservative, St. Lawrence-St. George. The motion also calls for a list of foreign honors and decorations conferred on Canadians since 1919.

Dr. Henry M. Tory, president of the University of Alberta since its organization 20 years ago, is tendering his resignation, to take effect at the end of the current college year next month, in order that he may accept the permanent chairmanship of the National Council of Scientific Research, with headquarters probably at Ottawa.

To Beautify Ottawa

Proposed Outlay Of Three Million Dollars To Furnish Up Federal Capital

Plans for the federal district commission for the beautification of the city of Ottawa were laid before the [illegible]

Small Town Papers

BY FRANK PARKER STOCKBRIDGE

(Continued.)

"The total circulation of these 11,300 country weeklies is about 9,[illegible],000, an average of a little under 1,000 copies each. That doesn't sound like much to a New Yorker accustomed to circulation figures in the hundreds of thousands. But there are only about 400 dailies in the United States which have as many as 10,000 circulation and the whole list of dailies circulates only about [illegible]

It doesn't take a large circulation to make a country weekly profitable. [illegible]

"Sounds all right to me," said an Iowa editor who had been doing nothing but listen. "I personally know at least fifteen country publishers in Iowa who make more than $5,000 a year from their papers. It's a poor paper, or rather a poor editor who can't earn 20 per cent a year on his investment in this business, and I guess our average plant investment runs nearer $20,000 than it does $15,000."

"That will come pretty close to it," said one of the others, who turned out to be the representative of a concern carrying a general line of printing-office machinery. "Take the main items and check me up. First is the typesetting machine, a line caster just like the big city papers use. Mighty few country papers but have got one machine, many have two; the average is about one and a quarter. Three thousand dollars is cheap for a typesetting machine, the $4,000 ones are more in demand. So put it at $4,000 per paper as the average of that item."

Then there's the press. There may be, somewhere in the United States, a newspaper still being printed on a hand press, but I don't know where [illegible]

WHERE WILD ANIMALS BECOME TAME

Jasper National Park, which will be visited by the members of the Canadian Weekly Newspapers Association at the completion of their annual convention at Edmonton this year, is Canada's largest and finest game sanctuary. Within its 4,400 square miles, guns and hunting dogs are forbidden, and he who would hunt bears, deer, mountain sheep, mountain goats or other animals must do so with the camera as his weapon. And there is as much thrill in bringing home a good snapshot of a bear or a deer, as there is in bringing home the skin or head of such a trophy.

There are 10,000 mountain sheep and an equal number of deer in Jasper National Park, according to an estimate made by J. B. Harkin, Commissioner of National Parks, in his annual report. Dealing with wild life in the park, Mr. Harkin states:

Wild life generally is increasing rapidly and all animals seen were in good condition. From the observations of the warden staff, it is estimated that there are between 800 and 1,000 elk in the park. Herds numbering as many as 70 and 100 have been seen in the vicinity of Cabin Creek.

A very gratifying increase is noted in Rocky Mountain sheep. They are spreading their range annually and previously deserted ranges are again being frequented. [illegible]

A Graceful Afternoon Or Evening Frock

Exceedingly graceful is the frock pictured here. The two-piece pointed skirt is gathered to a bodice having the lower edge slightly rounded, thereby giving a graceful line. The attractive arrangement of the surplice effect is effectively shown, and there are lace shields at the front and back. The long pointed sleeves may be omitted for evening wear, if desired, thereby making this frock suitable for many occasions. An added note of contrast is introduced in the flowers placed at the shoulder and hip closing. No. 1501 is for misses and small women, and is in sizes 16, 18 and 20 years. Size 16 (36 bust) requires $3\frac{1}{8}$ yards 39-inch material, or $2\frac{3}{4}$ yards 54-inch, and ¾ yard all-over lace for the shields. Price 20 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in [illegible]

SUNDAY SCHOOL LESSON

MAY 6

GREATNESS THROUGH SERVICE

Golden Text: "The Son of Man also came not to be ministered unto, but to minister, and to give His life a ransom for many." Mark 10.45.

Lesson: Mark 9.33-50; 10.35-45.

Devotional Reading: Isaiah 42.1-7.

Explanations and Comments

The Request For Preferment, verses 35-37.—James and John the sons of Zebedee, came to Jesus with a special request. Matthew says that their mother came with the request (Matthew 20.20). "The case is in accordance with the law maxim, He who does anything through another, does it himself" (John A. Broadus). An Australian writer suggests that Mark was more chivalrous than Matthew, or else that Matthew wished to save the face of James and John, and adds, "Anyhow, it was clearly a [illegible]ly affair, with almost a suggestion of an Eastern intrigue. Salome may have been put up to it by her sons."

"We would that Thou shouldest do for us whatsoever we shall ask of Thee," they began. They would have Him, as it were, give them a signed check leaving them to fill in the amount as they pleased.

How like many, shall I say most?—of our petitions! We come to God to get what we want, not to learn what He wants us to have or [illegible] from us. As Bishop Temple says, the form of all pagan prayer is, "Will you do for me what I want?" While the form of Christian prayer is, "Will You do with me and with all men what You want?"

To Jesus' question as to what they wished, they replied, "Grant unto us that we may sit, one on Thy [illegible] hand, and one on Thy left hand, in Thy glory." The two disciples were at least honest in their request; they wanted precedence and asked for it in plain words. They do not include Peter in their request for the chief places, were they jealous of him, and were they seeking to "get ahead" of him? The right and the left hand were the places of honor. Dummelow quotes a saying of Rabbi Acha to the effect that the Holy and Blessed God will cause King Messiah to sit at His right hand, and Abraham at His left.

"Rank in itself is one of the false [illegible] which it is the business of religion and philosophy to dethrone. Outward rank deserves outward respect, genuine respect is only accorded to real usefulness."—Donald Hankey.

An Interesting Edition

London Daily Mail Pictures Events In Year 2,000

A newspaper as newspaper men thought it would be on January 1, 2000, has been published in London by the Daily Mail. [illegible]

Will Soon Banish Weeds

A new law passed by the Quebec Government makes it compulsory for every person to destroy all noxious weeds on his property whether that property is cultivated or not. The weeds must be destroyed before they go to seed, and if the owner fails to carry out this work the authorities will step in and do the job, charging the farmer with the cost of removal.

Don't try to do the smallest amount of work possible for the pay you get.

[illegible] doctor; when you need the law, you see a lawyer. Financing is a specialty about as intricate as medicine or law. Therefore see your banker before you loosen your purse strings.

The cries of sea-birds, especially seagulls, are very valuable as fog signals. The birds cluster on the cliffs and their cries warn boatmen that they are near the land.

The man who always does as he pleases is often displeased with what he does.

Name ....

Old Lady: "And what should a polite little boy say to the lady who has given him a half-penny for carrying her parcels?"

Little Boy: "I'm too polite to tell you, ma'am."

The way to get rich is to lay up part of your income and as much as possible of other people's.

CANADIAN FOREST WEEK

We are the trustees, not the owners of our forest heritage; to keep faith with the future we must use it wisely and guard it from waste through preventable forest fires.—*Rt. Hon. W. L. Mackenzie King, Prime Minister.*

[illegible] forests provide employment, stimulate business, and yield rich dividends in health and pleasure. Fire is their enemy. Carelessness with fire is criminal and offenders are justly subject to the penalties provided by law.—*Hon. Cha's Stewart, Minister of the Interior.*

[illegible] loss by fire is total waste. Industrial depletion can be replaced by yearly growth and reforestation. Care in starting and extinguishing fire would almost entirely prevent this waste of a heritage of which we are but trustees for generations of Canadians yet unborn.—*Hon. R. B. Bennett, Leader of the Opposition.*

THE MERCURY, TOFIELD, ALBERTA

Cuticura Heals Annoying Rashes

Bathe the affected parts freely with Cuticura Soap and hot water, dry without rubbing, and anoint with Cuticura Ointment. This treatment not only soothes and heals rashes and irritations but tends to prevent such conditions.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XXIII.—Continued.

"Well, there's many a good girl has come to me before without references, Mrs. Angus. I'm no such a hand for references as I once was," said Miss Ritchie. "They are often written to get rid of a girl, you know."

"No, I do not know that," said Mrs. Angus; "I prefer references."

"Well, then, here you are," said Miss Ritchie, "here's an old country girl with letters from rectors and curates and local bodies and all. She'll do fine for you."

That morning Helmi was interviewed by four other women. She was viewed with favor by the first one, who enumerated her good points without ever thinking it might be embarrassing. "You look clean and smart," she said; "you know how to put your clothes on straight, and you look a person square in the eye. You are a foreigner, I see. From what country?"

"Finland," said Helmi.

"Goodnight!" cried the lady, with a harsh laugh; "then it's all off. My husband had one in his bridge gang and, a positive nuisance he was, a socialist and agitator. He would put me out if I brought home a Finn. I want a British subject, Miss Ritchie. We owe it to our own to give them the choice, though [illegible]

Helmi stared at her haughtily. "It is not your business," she said, "I can have a baby if I want it without asking you."

"You bet you can, and welcome. Well, who else have you, Miss Ritchie?"

The fourth woman who spoke to Helmi asked her many questions about her past. "Where is your husband?" she asked.

Helmi replied that she did not know.

"Are you sure you are married?"

Helmi produced the certificate.

"Do you ever think he may have deserted you?" the woman asked searchingly.

Helmi hesitated, and as the woman plied her questions she could only think of the brace and bit Jack used to bore holes in the boards. Helmi knew she had no right to question her, but she answered as bravely as she could, all the time praying, "Make her take me, God; Make her!"

"Well, my dear, I wouldn't be too sure. Men are fickle, I know. My first husband left me."

"My man is a good one," said Helmi, firmly.

"Any family?"

"One little girl, one month old."

"Well, of course, that would be the [illegible]

baby—it would be [illegible]" she hesitated.

"I can work by the day and leave the baby with friends," said Helmi. She was pale and tired now, and looked too ill to be an attractive venture for anyone looking for help.

"I am strong," said Helmi. "My baby is young so I am pale yet. Try me for a day even."

"Well, I must ask my husband—I always consult him of course"—(Mr. Brand would have been interested in this) "and I will let Miss Ritchie know. That will be the best. I couldn't very well let you bring the baby, and it's at night I need you most."

Helmi turned to Miss Ritchie. "I must go now," she said, "a little girl minds the baby—home from school, she stayed for me."

Miss Ritchie nodded. "Better luck next time," she said; "I shall keep you in mind."

In the afternoon Helmi came back. Mrs. Corbett was not going out, so she kept the baby. But no one wanted Helmi—she was a foreigner, and she had a baby.

Kind-hearted Miss Ritchie was distressed, and flared up in anger when one woman said to Helmi: "You should have thought of this about this time last year!"

"Having a baby is not a crime, Mrs. Coatsworth; the poor girl is honest and willing to work. She'd give service for every dollar. I'll go bail. She isn't asking charity or even sympathy."

All afternoon Helmi waited, while well-dressed women came and went. The seekers of employment sat together, and were easily distinguishable from the others. Their manner was humble and beseeching. The war with all its dislocations had thrown many women out of employment, and on the faces of many, gaunt fear was plainly written. This was particularly true of those who were the most refined and cultured.

Fragments of conversation fell around Helmi as she sat among the seekers.

Two women in seal coats were discussing the situation.

NEW GUIDE FOR AVIATORS

Roof Signs Would Aid Fliers To Identify Towns

The patriotic citizen of today is called upon to give a roof to his country. Roofs are to be the aerial guideposts for flyers, with signs identifying each community, pointing the direction to the nearest airport and telling the distance to it.

The family of a generation hence which goes out in its aerial flivver for a Sunday afternoon ride will be able to see beneath it the name of each town in large letters, and to learn at a glance where to land if the carburetor gets to balking or the gasoline runs out.

The aviation division of the department of commerce has initiated the plan of guiding aviators by roof signs, and it has been taken up vigorously. Particularly are such signs valuable to airmen, it is pointed out, on roofs of buildings in smaller towns and communities which have no landmarks which are easily distinguishable from the air.

Oil companies have been among the first to accede to the suggestion, and many of them are putting town names on the tops of their gasoline and oil tanks in each community. The American Legion has announced that 10,000 of its posts will undertake the marking of their communities for guidance of flyers.

Office buildings, shops and tanks are suitable for the signs, the aviation division says, but depots and warehouses near railroads are particularly good because railway lines are frequently followed by flyers.

Simple block letters in chrome yellow, on a dull black background, are best, pilots say, and the letters should be at least six feet high. [illegible]

Centennial Celebration

Henri Dunant, Founder Of Red Cross, Winner of Nobel Peace Prize

Born Geneva, May 8, 1828. Died Paris, October 31, 1910.

Franco-Swiss business man and philanthropist. Author of several books.

Casually travelling through Northern Italy in 1859, Dunant came upon the ghastly plain of Solferino where on June 24th, 300,000 men had been engaged in a battle which had lasted fifteen hours.

Shocked into action at the sight of 40,000 dead, wounded and dying soldiers, Dunant undertook to establish a volunteer ambulance and nursing service, recruited from the nearby town of Castiglione. With these workers, he obtained official permission to tend the wounded and dying on the field of battle, going out personally with wine, food, cigarettes, tobacco, for which he paid out of his own purse. So indefatigably did he work that, in gratitude, the invalids named him "The Good Samaritan of Castiglione."

The vision of the suffering witnessed at Solferino never left him. For three years he travelled about Europe, preaching, lecturing, writing, advocating the need of speedy reorganization of military and medical nursing service. Finally, in 1862, his little book "Un Souvenir de Solferino" appeared and startled a shocked world [illegible]

Treat Colds 2 Ways With One Treatment

RUBBED on throat and chest, Vicks does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

VICKS VAPORUB

Little Helps For This Week

"Let us do good unto all men." Galatians vi. 10.

The chief use, then in man of that he knows,
Is his painstaking for the good of all;
Not fleshly weeping for our own-made woes,
Nor laughing from a melancholy gall;
Not hating from a soul that overflows
With bitterness breathed out from inward thrall,
But sweetly, rather, to ease, to loose, or bind,
As need requires, this frail, fallen human kind. —Fulke Greville.

Power to do good is the true and lawful end of aspiring. For good thoughts, though God accept them, yet towards men they are little better than good dreams, except they be put in act, and that cannot be without power and place as the vantage ground.—Lord Bacon.

NO MEDICINE LIKE BABY'S OWN TABLETS

A holy war is reported to be raging in Arabia and parts adjacent. As we understand it, a holy war is about as holy as a civil war is civil.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

"Anything suitable for a man here?" asked the fellow who never glanced at store signs.

"Just me," smiled the cashier of the children's specialty shop.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

COMMUNICATION

Tofield, April 25th, 1928

The Editor, Tofield Mercury, Tofield.

Dear Sir:

I am enclosing a copy of "The Canadian Mining Gazette" on the cover of which appears a reproduction of a letter addressed to the Editor, by Mr. William Sulzer of New York who seems to speak on the importance of mining, with some authority. At any rate I was very much interested in his subject, and especially so in view of Canada's extensive mineral resources, and it occurred to me that no doubt many of your readers would appreciate an article of this nature if you found it convenient to use same in "The Mercury."

Yours truly,

J. W. McMullen.

The Editor
Canadian Mining Gazette, Ottawa.
Dear Sir:

As I have been interested in mining for the past 30 years, I want to congratulate you on getting out a most readable mining paper, and I indulge the hope that it will have a large circulation, not only in Canada but in the United States.

[illegible] economists tell us that mining, next to agriculture, is the greatest industry in our country.

This is true from the view point, that if our soil were untilled famine would stalk the land.

From a monetary standpoint, however, the mining industry is the greatest in the world. The truth of this assertion becomes apparent when it is visualized that mining gives us the standard of value by which the price of everything produced by the brain and brawn of man is measured.

Abandon mining and the value of every commodity would be insignificant, humanity would sink back to the barter and exchange age, and a general paralysis would hold in its vice-like grasp the industries of mankind. It would be the greatest calamity that ever befell the human race, and in less than a century civilization would revert to barbarism, when primitive man knew knothing about copper, gold, silver, iron, steel, lead, zinc, and the mineral resources of Mother Earth.

Those who decry mining are ignorant of history, or have ulterior purposes to serve. If they know anything about metal they must know that all business; that all industries; and that all human progress depends on the mines.

The wealth from the mines from the dawn of time is the epic of human advancement—of man's heroic march along the path of progress.

Show me a people without mines, and I will show you a people deep in the mire of poverty; and a thousand years behind the procession of civilization.

It was the mines that made the greatness of the past; that made the ancient civilizations; that made Egypt great; that made Greece great; that made Rome great; and in modern times the mines have made Spain, and England, and the United States rich beyond the dreams of avarice.

Mining is essential to the progress of civilization. Mining has done more for the human race than all other agencies combined. Mining has made more poor men millionaires than all other things put together.

The government's statistics show there has been less money lost in mining than in any other business in our country. These records prove that during the past fifty years the failures in mines have been less than 35 per cent against more than 67 per cent of failures in other industries. More real profit has been made by investors in mining securities during the past century than in any other industry.

Strike down the miner; shackle mining; throttle the mining industry; and civilization will sink back to poverty and stagnation.

The great benefactor of the human race has been the prospector. The most beneficent men of all times are the far seeing men whose brain and brawn developed the earth's natural resources—the men who poured the gold streams of mineral wealth into the lap of civilization; into the channels of trade into the avenues of commerce; and into the homes of happiness.

All honor to the miner!

All hail to the prospector! In every land a monument should be built to them for all that they have done to bless humanity.

(Sgd.) Wm. Sulzer.

MAIN STREET, TOFIELD

LOCAL and PERSONAL

Visitors to the city this week included Mr. and Mrs. Galloway, Mrs. John Lee, Sr., Mr. W. Swift, Mr. Lamont, Mr. A. B. Evenson, the Misses Thelma and Audrey Jobb, Minnie Wood and Clara Abbott.

Mrs. McCauley and the Misses Helen, Lela and Stella Clements, and Marion Argue visited Lamont on Sunday.

Mr. and Mrs. Abbott and Mr. and Mrs. McLean motored to Camrose on Sunday.

Mr R. McGuire spent the week-end in the city.

Mr. and Mrs. A. Young, Mrs. W. Bowick and Miss Mattie Bowick motored to the city on Friday.

Miss Jean Borard spent the week-end at home.

Mrs. W. King returned to her home in Calgary after spending two weeks with her sister, Mrs. George Bruce.

Mr. and Mrs. Spilsted are celebrating their Golden Wedding today (Wednesday.)

Mrs. Clutterham, Mrs. H. Rogers and Max, and Mrs. Gray spent Tuesday in the city.

Messrs. George and Jack Cookson returned from Rochester on Friday last. Mr. George Cookson underwent two serious operations there and we hope is now much improved in health. Mr. Jack Cookson was there keeping George company.

Born—To Mr. and Mrs. S. Gladwin, on May 10th, a son.

The W. M. S. of the United Church will meet with Mrs. Lehnkme on Thursday, May 17th, at 3 p.m.

TENNIS CLUB MEETING

An interesting Tennis Club meeting was held at the town hall on Wednesday evening, when the anual election of officers was held. The following were elected.

Hon. president, J. D. Hannan; president, R. W. Pascott; vice-president, H. J. Ward; sec-treasurer, A. E. [illegible]; [illegible] committee Dr. Law, Mr. [illegible] and Mr. Hetherington; Entertainment committee: Mrs. [illegible], [illegible] and Mrs Law. Tournament committee: Dr. Simpson and Dr. McAuley.

The meeting decided to become affiliated with the Alberta Tennis Association.

W. I. NOTES

A very interesting meeting was held in the W. I. rooms on Tuesday, May 8th. An interesting paper was read by Miss Argue and was much enjoyed by all. Mrs. J. Ferguson gave a very clever demonstration of [illegible] packets, which all present enjoyed. Our plant sale will be on Saturday May 26th and we will have a better sale than ever this year. We [illegible] of cabbage and cauliflower plants and all other lines. Afternoon tea will be served by some of the members.

We are pleased the way our returns for the school ground fund are coming in. We thank you all who have so kindly donated. We also thank the men who assembled at the school Monday night to dig the holes for the trees. We have found out [illegible] many willing workers in our town. There are still a few more holes to be dug and those who couldn't be present on Monday night go up at any time and do your share. Right now we want loads of good earth donated, and we ask this from our friends in the country or anyone who can haul it. Again the Institute takes this opportunity in thanking all who have helped this far with the ground fund. Right here the Institute wish to thank Mr Blake who so kindly donated his work in plowing the ground for the trees. It was very kind indeed of Mr. Blake and we thank him kindly.

Will those who desire to procure plants at our plant sale kindly telephone their orders early to Mrs. Abbott, President, or to Mrs. Betts, Secretary Treasurer.

$ WATCH FOR THIS SIGN NEXT WEEK $

KINGMAN

Mr and Mrs C. Lindberg and J. Sandlie were Edmonton visitors over the week-end.

Mrs T. Horte and children motored to Tofield on Saturday.

Mr and Mrs J Munson and family of Camrose, were the guests of Mr. and Mrs C. R. Blychert on Sunday

Mr. and Mrs. C. Tyrberg, and Mr and Mrs. L. Erickson were the guests of Mr and Mrs. J. Anderson on Sunday

Mr. and Mrs. H. Rieger visited with Mr. and Mrs. R. Melvin on Sunday.

Misses Irene and Gladys Horte and Eddie Lindberg of Camrose, visited with their parents over the week-end.

KETCHAMOOT

As a result of the storm a week ago some of the telephone lines are still out of order. Much field work is being done as the fields are in good condition. A few are making gardens and very busy with the poultry, etc

Mr. Tom Schultz put down a well for R. Lee last week.

Miss Mabel Jevning of Bardo is assisting Mrs. Sam Sterritt with her house work.

Mr. and Mrs. Haukedal and daughter spent the week-end visiting relatives at New Norway.

Mr. and Mrs. Leslie Coombes and little daughter, and Mrs. Coombes' father, Mr. Cottle motored up from Red Deer on Sunday and spent the day visiting Mr and Mrs. A. McMullen and Chester Coombes' family. This being the first trip to the Tofield district for Mr. Cottle he was very much impressed by the country and coal mines.

Mr and Mrs. C. A. Ingram were guests of Mr. and Mrs. McCowan for dinner on Sunday.

Mr. Dick Ross returned from B. C. last week and is now working with Mr. Schultz.

Mr. and Mrs. Archie Brown and son of Bawlf were guests of Mrs. Brown's mother, Mrs. A. McMullen on Sunday.

Word has been received here this week of the death of Mr John Mitchell (Uncle Jack Mitchell better known by many) at Gladbrook, Iowa, April 20. He had underwent an operation about a month before. Mr. Mitchell was one of our real founders of Ketchamoot School District, as the first meeting was called at his home some twenty years ago. He was the first secretary and treasurer and still owned the farm north of the school house. The deceased was a brother of Mr. Hugh Mitchell and father of Clarence Mitchell, besides other relatives he had a host of friends in our district who were very sorry to hear of his death.

Mr. and Mrs. Chas. Whillans visited at the Geo. Cookson home Sunday evening. Friends of Mr. Cookson were glad to hear he was able to return home last week after undergoing several operations and being a patient in a hospital at Rochester, Minn. several months.

Miss Mildred Ingram is staying with Mrs. A. McMullen as Mrs. McMullen has been having a siege of the grippe.

MAJOR MILLER INSPECTS THE TOFIELD CADET TROOPS

On Wednesday, Major Miller, of Calgary, visited Tofield for the purpose of inspecting the local troop of cadets. This troop which was formed under the leadership of Mr. A. B. Evenson, made a smart and military appearance and went through their drills with military precision and dispatch.

Major Miller was quite pleased with the troop showing and complimented them upon their inspection parade.

W. B. Worton has been appointed sole subscription representative for Tofield and district for the McLean Publishing Co. of Toronto. He will have charge of procuring subscriptions for McLean's Magazine, Power House, Canadian Automotive Trade, Bus and Truck Transport, Printer and Publisher, and other McLean publications. Magazines which are all Canadian will be sold solely upon their merits and not through any charity appeal.

BARDO

Everybody is busy getting in the crop. The hum of the tractor is heard on every side.

Maynard, the 9-year old son of J. B. Stauffer was badly hurt while driving a door. He was [illegible] for four or five days but is now on the road to recovery.

The Young People's Society of the Lutheran Church will have a Mother's Day Program at the church on Sunday. Mr. M. R. Gordon of [illegible] will speak.

The Milo Stutsman family left for Nebraska on Wednesday morning. They will drive through in their car and will visit Mr. Stutsman's father who is not well this spring.

Emil Rude and family and Mr. C. J. Rude were Edmonton visitors on Sunday. They expected to bring Miss Nora home, but thought best to leave her longer under the doctor's care.

Mr. and Mrs. Pete Eggen entertained the J. Jacobsen family and the Aasen family to dinner on Sunday. In the evening they were all the guests of Mrs. Eggen, Sr.

The Bennie Anderson's are riding in a new Chrysler car. They drove to Scandia on Sunday.

Mr. and Mrs. Geo. Hendrickson visited in the Anderson home Monday and drove to Edmonton. Mrs. P. B. Anderson accompanied them.

AMISK CREEK

The Ladies Aid meeting held at Mrs. P. O. Flaaten's home Wednesday of last week was very well attended. Most of the members and several visitors were present. Mr. [illegible] and Mrs. M. Berdahl and Mrs. N. Sand from Ryley also were present.

Everybody is busy in the field. Quite a lot of wheat has already been put in.

Carl Erickson motored to Camrose last Saturday.

Nearly every one in the neighborhood was over to the result of the [illegible] last week.

E. A. Moen shipped a carload of cattle from Ryley to the pool Tuesday of last week.

Mr. and Mrs. I. Annebo and R. O. Berg visited the Old People's Home in [illegible] not very long ago. Miss Clara Annebo is assisting there with the [illegible] for a couple of weeks.

[illegible] school was reorganized last [illegible] with Mrs. Andersen as superintendent, and Mrs. I. C. Olson and Mrs. [illegible] Flaaten as teachers.

Mrs. [illegible] Olson from Shorts left for a short trip to Saskatchewan last week. She intends to return on Monday [illegible] week.

We are glad to report that Alice Berg, who was sick with rheumatic fever is now able to be up and around a little.

Mr. A. Erickson's sore foot is improving very slowly.

I. C. Olson is now driving a new McLaughlin Buick car.

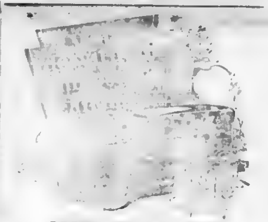
Mrs. T. Anderson and family from Ryley visited at the E. A. Moen home last Sunday.

The W. C. T. U. from Ryley meet at the home of Mrs. I. C. Olson on Tuesday.

The "flu" is still visiting this district. Mrs. R. O. Berg and little son Lloyd are the latest victims.

[illegible] from Shorts, Mr Joiness and Mr. and Mrs. E. Anderson and [illegible] from Ryley were visitors at the E. A. Moen's home last Sunday.

[illegible] In the news of this district of last week's issue a typographical error was made regarding Mrs. P. C. Moen's birthday. It should have read 76th instead of 71st.



Why do without ANY of these things when you can have them . . . in Chevrolet . . . at the lowest prices in all Chevrolet history?

Who Wants War?

The statement has been made so frequently and with such vigor that it is the capitalist class of the world which has been responsible for war between nations that [illegible] have become convinced of its truth, and it is probably true that [illegible] the wars of the past have been the result of [illegible] seeking to further their own selfish ends. To what extent [illegible] have been responsible for past wars it would be difficult to say. [illegible] the last Great War, and the disastrous effects on industry [illegible] which resulted both during the continuance of the conflict and in the years that have followed, it is safe to say that Capital [illegible] the whole influence of the financial and [illegible] the scale in favor of continuing the [illegible].

[illegible] presented by the [illegible] against the capitalist class are in full [illegible]. In no other country is Capital so strongly denounced [illegible]. The Soviet leaders regard Capital as the source of all the [illegible]. At its door they lay the major crimes of the world. The revolution under Lenine and Trotsky had for its object, not the [illegible] of the Czarist government, for it had already fallen, but the overthrow and complete destruction of Capital, and in their campaign against the capitalist system [illegible] to be responsible for war and the [illegible].

Today, however, under the leadership of the Soviet, Russia is the most militaristic country in the world, the one chief place of danger to the peace of the world. Recently a first-hand picture of the military spirit in Russia was given by one who is friendly to the present [illegible] Mr. [illegible] M.P. for the Stourbridge [illegible] of the British Parliament. [illegible] Soviet Russia of Today [illegible] in a recent issue of the Socialist Review. There he [illegible] boasts of a most efficient [illegible] and is responsible for [illegible] a military spirit that [illegible].

Moreover, [illegible] as well as boys are [illegible] are being formed in these other [illegible] made much claim. Indeed, except during the World War I have never seen such military enthusiasm as I witnessed [illegible] Mr. Wellock mentions a military demonstration [illegible] half a million young people of the International Youth Movement [illegible]. If after the enthusiasm and determination I then witnessed [illegible] the army that comes out against her, for every capitalist government in the whole world can put an army into the field with [illegible] of the enthusiasm [illegible].

Thus while professing [illegible] of Geneva, and submitting proposals that [illegible] the Soviet leaders are engaged in the task of exciting military enthusiasm throughout the length and breadth of Russia and training the youth of the land, girls as well as boys, for war.

In the face of such [illegible] and with full knowledge of what [illegible] in all countries where a feeling of [illegible] the nations of the world scrap all their arms [illegible] would like to do so? Russia is, in actual fact, the greatest [illegible] world disarmament, and, notwithstanding [illegible] the Soviet leaders, constitutes the outstanding threat [illegible] among the nations.

Delay In Delivery

After a trip [illegible] Frank Kerr [illegible] $1.50.

Payments For Beets

[illegible] 1927 [illegible] $7 per ton.

Magistrate: "Did you have an accomplice in this robbery?"

Prisoner: "No, I 'ad one once, but I 'ad to dismiss 'im—'e was dishonest."

World's Greatest Tea Drinkers

New Zealanders Serve It Seven Times Every Day

In New Zealand they drink tea seven times a day, according to one of the Canadian Exchange teachers, Miss Laura Dettweiler, of Kitchener, Ont. Miss Dettweiler stated that although there were no furnaces in the houses, the practice of tea-drinking [illegible] breakfast tea at breakfast, tea at half past ten, tea for lunch, afternoon tea, tea for dinner and tea for supper was the unvarying procedure. Even the schools, shops and offices served tea at 10:30 in the morning, she said.

A shark's egg is unprotected with shell but the contents are protected by a thick leathery covering almost as elastic as rubber.

Women are always included when speaking of mankind, for man embraces woman.

The city of Strasbourg is the capital of the province of Alsace.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Premier Baldwin Never Contributes To Press

Has Never Been Asked But Hopes He Will Be

That Premier Baldwin occupies a somewhat unique distinction among cabinet ministers in that he has never had a single offer of any kind to contribute to the press, was revealed by Mr. Baldwin in a speech at a luncheon given to Viscount Burnham.

"I might produce something," the Premier said, smilingly, "that if not worth a penny a line might at least be worth a penny a mile," he remarked. When he retired from public life, he added, he would like to feel that one kind hearted person had once made him an offer so that he could see his own stuff in print with his name under it.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use Of Dr. Williams' Pink Pills

The most a rheumatic sufferer can hope for in rubbing something on the swollen, aching joints is a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the trouble goes on the blood becomes still further thin and watery. To get rid of rheumatism, therefore, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They make new, rich blood which expels the poisonous acid and the rheumatism disappears.

There are thousands of former rheumatic sufferers in Canada, now well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these, Mrs. W. J. Tait, McKellar, Ont., who says:—"I am one of the willing ones to tell you of the great benefits I received from the use of Dr. Williams' Pink Pills. After lying in bed for seven weeks suffering untold agony with inflammatory rheumatism, relief finally came through the use of this medicine. I could not move in bed only as they lifted me, and I could only sleep when opiates were given me. The medical treatment I was taking seemed of no avail. Then I was advised to try Dr. Williams' Pink Pills, and soon I began to get relief. After taking six or eight boxes the rheumatism was banished and I had never felt better in my life. It is several years since this happened and I have had no return of the trouble since. I may add that I recommended the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Will Travel By Plane

Prince Of Wales Will Use Aeroplane In Trips About Country

The London Mail says that the Prince of Wales has decided to use an aeroplane for travel about the country in filling his numerous engagements. A special fast army two-seater 'plane has been allotted for his use at Northolt Aerodrome near Harrow.

The Prince holds the rank of group captain in the Royal Air Force and has had considerable experience in flying.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a qualm of the stomach and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

Germany Shows Thanks

Is Grateful To Canada For Assistance Given To Airmen

Germany has thanked Canada for the assistance rendered in behalf of the crew of the Bremen aeroplane, which blazed the east-to-west trans-Atlantic air trail. The following message from L. Kempff, German consul-general for the Dominion, has been received by Premier King.

"I am instructed by my government to express the sincerest thanks of the government of the German Reich for all the assistance rendered to the fliers of the Bremen. My government would be grateful if you would transmit its thanks to the various government departments and to the numerous organizations and individuals who have so generously and efficiently come to the aid of the Bremen crew."

Canada is the principal source of soft wood supplies in the British Empire.

Insist on Minard's Liniment—accept no other.

Claims Parachute Will Bring Airplanes Down

New Device If Successful Would Eliminate Risk Of Flying

All risk will be eliminated from air flying if a device now under construction proves the success its sponsor confidently believes it will be. At the All-American Aircraft Show, in Convention Hall, Detroit, Major Edward L. Hoffman, of Wright Field, Dayton, announced that parachutes which will bring a plane and its passengers safely by means of a chute, will be available soon.

Major Hoffman has spent much of his 16 years of army life at McCook Field, Dayton, where he conducted experiments in connection with the parachutes now used by the U.S. army.

"We have been experimenting along the lines of devising a parachute for an entire plane," he said. The pilot would pull a lever, releasing a chute that would bring the plane safely to earth. As a result of experiments, I have brought down a 1,000-pound weight at a reasonable rate of speed with a 60-foot diameter parachute. Since the plane to be used in actual tests weighs 1,400 pounds, I am quite certain the results will be successful. I expect we will make the first tests at Dayton within the next two months.

"The parachute to be used will take up four cubic feet of space and weigh not more than 120 pounds. In heavier planes more than one parachute would be used."

Low Grade Wheat Marketed In Japan

Profitable Outlet In Orient For Million Bushels Last Year

Speaking at Portage la Prairie, George McIvor, general sales manager of the Canadian Co-operative Wheat Growers, Ltd., the central selling agency for the Canadian pools, pointed out that out of a total world crop of about four billions of bushels, only 800,000,000 were usually exported to world markets, and Canada supplied over a third of that. The pool itself handled about a quarter of it, and therefore was able to have quite an influence on price levels, this being particularly true because Canada is the only country selling hard spring wheat, now that Russia is out of the picture for the time being.

Mr. McIvor also mentioned that the pool had established a market in Italy for Canadian durums instead of selling them, as formerly, to American exporters for mixing. Instead of raising the quality of American durum exports, Canadian durums now brought a premium straight back to the producer in Canada. Another example of the advantage of a strong central selling agency was shown in Alberta, where there was a lot of feed wheat last year that looked like being hard to get rid of. A trial shipment of 50 tons was sent to Japan. As a result over a million bushels of low-grade wheat has been sold on that market this year.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

World War Veteran (reminiscently): "Once we captured a big Bertha that had been throwing duds over our line."

His Wife: "Why didn't she hang them on her own line?"

According to a sports journal, chess-players seldom die young. They would never finish a tournament if they did.

Minard's Liniment for Toothache.

COOL AND FRAGRANT

France Paying War Debt

Britain Advised That Bill For 1928 Will Be Met

A brief announcement by the British Government that France intends to pay £4,000,000 on its war debt to Britain during the current year indicates that France is adhering to the debt agreement of 1926, notwithstanding the fact that it is as yet unratified by the French Senate.

By agreement, the total indebtedness was fixed at £647,106,000 and a scale of annual payments was arranged.

The 1928 payment will be made in two equal installments, one on August 15, and the second on March 15, 1929, which is reckoned in the fiscal year of 1928.

Under the agreement £10,000,000 would be due in 1929 and £12,500,000 the following year.

An Oil That Is Famous. Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Equals Sun's Surface Heat

Powerful Flame Radiates Light From World's Largest Electric Lamp

Paris. Voltaire's City of Light boasts today the most powerful flash-light lamp in the world. Its light, generated by electric current, is equal to 1,400 million candles. When we consider that 1,400 million ordinary candles, put end to end, would extend eight to ten times round the earth, and almost far enough to reach the moon, we realize how far man has traveled as light-maker since the days of the first tallow candle.

Even if mediaeval man had been able to manufacture 1,400 million candles and put them in 1,400 million candlesticks, the whole population of the world could not have set them alight; today a single man moves a switch, there is a maelstrom in the ether, and the light of 1,400 million candles bursts into flame.

So powerful is the lamp in Paris that from the top of Eiffel Tower it would be visible for hundreds of miles, and if the Eiffel Tower were twice as high a man with field glasses at Vienna would be able to see it quite clearly. The heat in the centre of the electric flame which radiates the light reaches 6,500 degrees Centigrade. That is to say, it equals the heat at the surface of the sun!

Keep Clear Of the Road

When making a roadway repair, pull your car over off the concrete and keep your body out of the right of way. If you must crawl under car, keep your legs off the road. If you must change a tire, be sure no passing car can touch you as you work beside your automobile. You may think you are a conspicuous object on the road, and maybe you are, but there are always some drivers who cannot see.

Minard's Liniment for falling hair.

High Prices For Livestock

At the Spring Stock Show held recently at Calgary, Alberta, 395 bulls were sold for a total of $116,730, an average of $297 each, which was $104.50 per head higher than was paid for 350 bulls at the 1927 show.

Requisite On the Farm. Every farmer and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Growth Of Alberta Phone System

In the first three months of this year 446 new telephone stations were opened in the Province of Alberta. The 'phone system in Alberta is operated by the Provincial Government.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Aluminum is more abundant throughout the world than any other metal. It forms over eight per cent. of the earth's crust.

The seedless tomato has been perfected in Kansas by a horticulturist.

Cute in a Baby—Awful at Three—and it's Dangerous

by Ruth Brittain

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids, and it always interferes with digestion. Pinning the sleeve over the hand, attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

C.N.R. ESTIMATES ARE APPROVED BY COMMITTEE

Ottawa.—In its final report tabled in the House, the special railway committee of the House approved the estimates of the Canadian National Railway and Canadian Government Marine. The report says that when reductions in freight rates, increase in wages, late crop conditions and bigger expenditure on maintenance of way and structures are taken into account, the result of the operations of the railway for the past year "are very satisfactory indeed."

The committee is satisfied from the evidence given that the accounts presented for the year are in accordance with the prescribed practice in railroad accounting and accurately reflect the revenues received and expenditure made during the period.

The committee is further of the opinion that the amounts of $30,000,000 asked for the Canadian National, and of $784,800 asked for the Canadian Government Merchant Marine are necessary and should be passed by the House.

The committee struck a snag in its deliberations, and sat well after the usual hour of adjournment.

Sir Henry Thornton, president of the Canadian National, and Hon. H. H. Stevens differed sharply over the manner in which Canadian National accounts are presented.

Since the passage of the Maritime Freight Rates Act, the result of operations on the Eastern Lines had been published separately from that of the Canadian National Lines. Mr. Stevens held that while under the Maritime Freight Rates act the accounts of Eastern lines had to be left separate, the result should be included in the main report. "The accounts as presented," Mr. Stevens declared, "do not give the whole situation fairly and accurately."

Sir Henry Thornton differed. He said that the board of directors of the Canadian National had followed what they believed to be the requirements of the Canadian National. He held that it would be unjust and unfair that the Canadian National should have to include in the operating results of the system the deficits on Western Lines brought about by freight reductions under the Maritime Freight Rates Act.

The report was not adopted till after two and a half hours' discussion.

Grants Will Be Discontinued

Federal Assistance For Vocational Training Ends With Fiscal Year

Ottawa.—The grants of the Dominion Government to technical education will be discontinued at the end of the present fiscal year, Premier Mackenzie King told a large delegation which waited on the Government to urge that the federal assistance be continued.

The grants were begun in 1919, and the act provided that they be continued for a period of ten years. The prime minister said that as education was a matter solely within the jurisdiction of the provincial governments and the obligations of the federal government were so heavy, his government had come to the conclusion that the assistance to the provinces for technical education would not be continued when the present act expires.

The government would consider the cases of provinces which had been late in starting vocational training and therefore had not received the full benefit of the grants the act provided, there being allowed further time.

Would Follow Canada's Example

London.—Sir Hugh R. Denison, former commissioner for Australia in the United States, strongly urges the Commonwealth government to follow the example of the Canadian government in having a legation at Washington, according to The Daily Telegraph's correspondent at Sydney, Australia.

Nurses Will Meet In Winnipeg

Montreal. Winnipeg will be the scene of the convention of the Canadian National Association of Trained Nurses during July, it was stated here by Miss Esther Beith, secretary-treasurer of the public health section of the association.

Calgary. Margaret Kinney, of Edmonton, won the Alberta oratorical championship over Arthur Cragg, of Calgary. The judges were: Chief Justice Harvey, Mr. Justice Tweedie and Bishop L. R. Sherman. Hon. Perren Baker, Minister of Education, presided.

Think British Envoy Should Be Canadian

British Labor M.P. Suggests Dominion Citizen For Post At Washington

London.—Appointment of a Canadian as principal representative of Great Britain at Washington is a suggestion made in a book, "The Freedom of the Seas," just published by Lt.-Commander J. M. Kenworthy, Labor M.P., and George Young, once attache to the late Lord Bryce, in the British embassy at Washington.

Referring to the naval differences between the two countries the authors state that in their belief the conflicting policies can be reconciled. They continue:

"There is now a non diplomatic channel and democratic contact in the Canadian diplomatic representative and his staff at Washington. Canada is a bond for peace between Great Britain and the United States and her mission in Washington might become a bridge for political confidence and co-operation.

"We might indeed do worse than persuade the Canadian Government to release an important citizen of the Dominion to represent England and the Empire at Washington when next there is a vacancy at the British embassy, and let the foreign office be represented by an official who would be a junior to the representative."

Gen Currie Receives Verdict

Jury Finds Article Criticizing Sir Arthur Was Libellous

Cobourg, Ont.—By a poll of eleven to one, a civilian jury rendered a verdict against W. T. R. Preston, writer of the article which appeared on June 13, 1927, in the Port Hope Guide, entitled "Mons," and against the publisher of the paper, F. W. Wilson. The jury, after four hours' deliberation, found that publication of this article was libellous and they awarded General Sir Arthur Currie, who was the aggrieved party in the suit, damages in the sum of $500. The former commander of the Canadian corps had claimed $50,000.

The trial opened on April 16, in the Ontario supreme court assizes at Cobourg before Mr. Justice Rose and a jury, the hearing of evidence and addresses to the jury lasting well into 14 days. During the course of the testimony the events of the stirring days which closed the campaign in Belgium and France, were gone over by [illegible] witnesses, including a number whose names have become famous for deeds of gallantry and heroic leadership.

Sir Arthur was represented by W. N. Tilley, K.C., Toronto, and F. W. Wilson by Frank Regan, of Toronto. W. T. R. Preston conducted his own case.

Commencing Work On Peace River Highways

Alberta Ministers Made Inspection Trip Over Proposed Route

Edmonton.—Hon. O. L. McPherson and J. D. Robertson, minister and deputy minister of public works, have returned from an inspection trip over the proposed route of the Peace River Highways. They went as far north as High Prairie, visiting a number of points where road construction details required decision before the season's work begins.

Work on the new highway into the North is to be commenced at once and will be pushed forward as rapidly as conditions will permit during the spring and summer. A working crew has already made camp in the Lesser Slave Lake region, where a considerable amount of clearing is to be done for the new road.

Mr. McPherson is hopeful of better conditions than last year, which in turn will make possible a better construction record for the season.

Starts On Long Trip

Chicago.—The job of putting the Rotary club on "main street" in Jerusalem, Constantinople, Cairo, and the cities of the Orient, has been given James Davidson, of Calgary, Alta., who has started a seven months trip. Mr. Davidson is a past vice-president of Rotary International. His itinerary includes Manchuria, Dutch East Indies, French Indo-China, Siam, India, Arabia, Egypt, Palestine, Turkey and Greece.

Summer Course For Teachers

Saskatoon.—The twelfth session of the summer school for teachers will open at the University of Saskatchewan on July 31. It is designed to afford teachers an opportunity to qualify for higher professional standing and also to receive special instruction in certain subjects on the public and high school courses of study.

Leaves Life Job In Canton

Former Edmonton Man Was Bodyguard For Late Dr. Sun Yat Sen

Canton.—Morris Cohen, famous two-gun man from Canada, who served the late Dr. Sun Yat Sen as bodyguard for the last three years of the revolutionary leader's life, has left Canton for an unnamed destination.

Of the polyglot coterie of foreigners who assembled about Dr. Sun's person in Canton Red Russians, Americans, Germans—this burly free-handed Jewish adventurer is believed to have been the last of any prominence remaining in China. He turned up here six years ago with a letter of recommendation from revolutionary Chinese in Edmonton, Alta., whence Cohen hailed.

When the Kuomintang leader died in 1925, his will stipulated that Cohen should have a life job in the Canton Government's Central bank. This he held, acting as messenger and purchasing agent for Canton officials, until he became involved in the Red uprising of last December. The upshot was his purchase of a one-way ticket from the scene of his six-year phase of his adventurous career.

Radium Specialist Martyr To Science

Has Lost Left Hand But Will Continue His Work

Paris.—For the tenth time in two years Henri Bourdon, radium specialist in St. Louis hospital, Paris, has submitted to the amputation of a finger joint. His right hand is still intact, but ten operations have cut the left away. The skin effect which develops cancer is responsible. His hip also is affected. Physicians have warned M. Bourdon that his martyrdom will be fatal, but the radiologist's answer is: "My Comrades in the war made greater sacrifices for humanity."

EGYPT MUST REMAIN UNDER BRITISH CONTROL

London.—"I think the interests of Great Britain in Egypt make it impossible to contemplate the occupation of Egypt by any other power than ourselves," Sir Austen Chamberlain, British foreign secretary, asserted in the House of Commons after making public Britain's reply to the Egyptian government's note announcing its intention not to proceed this session with the assemblies bill to which Britain had objected.

The Egyptian note dispelled for the time being at least the crisis brought about by the Egyptian government's intention to enact the measure and also resulted in the countermanding of instructions which it had previously been thought necessary to give to certain British warships.

"It will always be necessary," Sir Austen declared, "for this and other governments in the future to maintain the principles of the declaration of 1922 and as we forbid other powers to interfere we must also take measures to secure the safety of citizens of those powers as well as our own nationals."

The foreign secretary's statement came in answer to a question by Will Thorne, Labor, Plaistow, who enquired whether Sir Austen thought the declaration of 1922 would stand for ever.

SUCCESSFUL POLAR FLIGHT

Capt. George Wilkins, who flew over the north pole from Point Barrow to Spitzbergen, covering some 2,200 miles in 21 hours.

Washington Greets Fliers

Crew Of Bremen Presented With Distinguished Flying Crosses

Washington, D.C.—The crew of the Bremen was welcomed to Washington as pioneers whose feat symbolized the ever-narrowing distance between the nations of the world.

Coming by train in the early hours of the morning, the German-Irish trio which accompanied the first non-stop flight of an airplane over the North Atlantic from the east, received the Secretary of State Frank B. Kellogg's greetings of the nation to supplement the tumultuous welcome they were given in New York City.

The three fliers, Von Huenefeld, Fitzmaurice and Koehl, were greeted as men who had "marked another milestone in the path of man's conquest over the forces of nature."

After Secretary Kellogg had greeted them Ambassador Von Prittwitz, of Germany, and Hon. Timothy Smiddy, minister of the Irish Free State, stepped forward to offer welcome.

Prominent among those participating in the welcoming ceremonies was Col. C. A. Lindbergh and Eddie Rickenbacker, the U.S. war ace.

Later in the day the Bremen trio received from President Coolidge the distinguished flying crosses awarded them by Congress.

Prepare For Night Flying

Beacons Have Been Ordered For Canadian Air Route

Ottawa.—Night flying will soon be a factor in aviation in Canada, according to plans being formulated by the civil aviation branch, department of national defence, for the first lighted airway in the Dominion, says the [illegible].

Tenders it is understood are to be called for by the government for five giant beacon lights to be placed at intervals of 35 miles along the south shore of the St. Lawrence River on the air route from St. Hubert aerodrome, Montreal, to Levis, Que. This will form a great part of the air mail route from Rimouski to inland points, which opened for the season on May 5.

London-India Air Service

Croydon, Eng.—Speaking at the official opening of the enlarged Croydon Aerodrome, Sir Samuel Hoare, British air minister, said he had approved the outline of an agreement between the Government and the Imperial Airways for a regular weekly air service between London and India.

FAMOUS CANADIAN EXPLORER

Captain J. E. Bernier, the Arctic explorer and his wife. It was 20 years ago this last year that Captain Bernier took possession of the Arctic archipelago in the name of Canada. He has always been a champion of the Hudson Bay route and has been in and out of the straits a score of times without the least mishap. At 76, this iron man, who came over from the wooden ships to the iron ships, is a physical marvel and is far from having made the last entry in his log books.

Claim Explanation Does Not Satisfy British

Invasion Of West Indies Ports By U.S. Anti-Smuggling Ships Being Discussed

Washington, D.C.—The controversy between the British and United States governments over violations by the United States prohibition enforcement staff of the Bahamas agreement probably will be carried to President Coolidge.

It is rumored here that Secretary of State Kellogg has informed the treasury department which is in charge of coastguard ships that the British government is not satisfied with the explanation offered of recent invasion of British ports in the West Indies by anti-smuggling ships from the United States and that the whole question will have to be referred to the president and his cabinet.

Executive departments here will neither confirm nor deny the rumors concerning the controversy, nor will the British embassy comment.

Damage From Tidal Wave

Natives Killed and Crops Destroyed On Madagascar Coast

Paris.—Official advices just reaching Paris said that numbers of natives were killed and great damage done by a tidal wave which swept the East coast of Madagascar from Tamatave to Port Dauphin on April 20.

The European population escaped. Telegraph and telephone lines were cut. Buildings were swept away and many acres of crops destroyed.

Prompt measures were taken to avoid famine in the flooded districts.

WHEAT POOL CONFERENCE TO BE HELD IN JUNE

Winnipeg.—Co-operative marketing associations engaged in marketing livestock, dairy products, wool, fruit, poultry, etc., as well as representatives of consumers' co-operative organizations, will take part in the third international wheat pool conference, to be held at Regina, on June 5, 6 and 7, it was announced by C. H. Burnell, chairman of the Wheat Pool committee, after an all-day session in the Manitoba Wheat Pool offices.

Mr. Burnell received word that the Scottish Co-operative Wholesale Society will be represented by John Cairns and Peter Malcolm, directors, and William Smith, commercial manager and wheat buyer, as well as by John R. Fisher, of Winnipeg, Canadian manager, and the English Co-operative Wholesale Society by A. W. Golightly and J. Oliver, directors, and A. H. Hobley, central wheat buyer.

Sir Thomas Allen is expected to attend as a member of the British Empire Marketing Board; Henry J. May, secretary of the International Co-operative Alliance has cabled that he will be present.

The Australian Wheat Pool are sending two representatives, C. Judd, of the Victoria Wheat Pool and J. Hawkins of the South Australia Farmers' Co-operative Union.

It is expected that Russian Co-operative Marketing Societies will be represented by several delegates.

The Australian government and the International Institute of Agriculture will have special representatives at the conference. A number of prominent officials from the United States department of agriculture as well as representatives of a number of the large co-operative organizations in addition to delegates and officials of the United States wheat pools will be present.

Among those who have promised to attend are Judge John D. Miller, vice president and general counsel of the Dairymen's League and president of the National Co-operative Milk Products Federation, New York City, John Brandt, president of the Land O'Lakes Creameries, of Minneapolis, Ralph D. Merritt, managing director of the Sun-Maid Raisin Growers, Fresno, California, J. S. Montgomery, general manager of the Central Co-operative Association, St. Paul; F. M. Black, chairman of the Interior Tree Fruit and Vegetable committee of direction, Kelowna, B.C.

Hon. W. R. Motherwell, minister of agriculture for Canada; Hon. J. E. Brownlee, premier of Alberta; Hon. J. G. Gardiner, premier of Saskatchewan, and Hon. R. A. Hoey, who will represent the Manitoba Government, will be among the speakers.

CLAIM SETTLERS ARE BARRED BY NEW INSPECTION

Ottawa.—"Canada is receiving a decreased number of British immigrants owing to the new medical inspection system." This assertion was made at session of the House immigration enquiry by Col. J. S. Dennis, chief commissioner of colonization, Canadian Pacific Railway.

The records of his company showed a decrease of 40 per cent. in British newcomers for the four months of this year, as compared with a similar period in 1927, Col. Dennis stated.

A system of inspection of immigrants on the other side by Canadian doctors, under the supervision of a small body of Canadian doctors, would be very preferable to the new system of inspection by Canadian doctors only at British ports, he contended.

Col. J. Stibbard, British army reservist, explained a system of training soldiers in agriculture for a period of six months prior to their discharge from the British army. About 35,000 soldiers were discharged annually in England. A number of them were available afterwards for agricultural employment in Canada or Australia. These men, married and single, desired a guarantee of one year's employment on arrival.

Col. Dennis was here to examine Canadian conditions which he would place before these agricultural training camps in England.

London.—While the assisted passage rates for migration to Canada are low, the restrictions on migration are severe, the Overseas Settlement committee states in its annual report, published recently.

The rule that those persons who have settled down to any other occupation than that of agriculture are not allowed to nominate families for assisted passage to the Dominion is pointed out as one of the restrictions.

The committee expressed the opinion that the restrictions might be modified to mutual advantage and hope is voiced that the nomination system will be extended to enable persons to enter other occupations besides farm work.

Asks More Financial Help For Settlers

British Welfare Worker Advocates Family Re-Union Scheme

Ottawa.—"Canada must not become another melting pot, we must keep Canada British."

So stated Albert Chamberlain, president of the British Welcome and Welfare League, Toronto, in appearing before the agriculture committee of the House considering immigration problems.

"There ought to be some financial assistance available to help British women and children to join their husbands in Canada, provided they can be taken care of on arrival," continued Mr. Chamberlain.

"There are today thousands of British men living in Canada apart from their wives and children in the Old Country and this is an undesirable condition of affairs for Canada, for the husbands and wives and for the Old Country," he said.

The British government was prepared to financially assist the league in its family re-union scheme if the Ontario and Dominion governments or either one of them were prepared to share the costs, the British government is ready to pay 50 per cent of the cost of the scheme.

The league, Mr. Chamberlain said, could bring 50,000 British women and children to Canada annually if the proper financial system was in operation.

Would Amend Divorce Bill

Ottawa.—J. D. Woodsworth, Labor member of North Centre Winnipeg, again moved in the house to amend a divorce bill. Mr. Woodsworth moved that the bill be amended to give the wife the [illegible] the custody of the child while the father should pay $500 a year for the child's maintenance as long as the mother remained unmarried, or $250 a year if she remarried. The husband in this case should not have the right to remarry again and if he went through the process of marriage would be subject to seven years' imprisonment.

Transferred To Ottawa

Rome.—The Italian consul-general at Montreal has been transferred to Ottawa, it was announced by the Italian foreign office recently. The move is considered of diplomatic importance. The Montreal office becomes a consulate. A vice-consulate has been instituted at Vancouver, B.C., the announcement added.

AN ANNUAL PHYSICAL EXAMINATION

Spring is here, and with it Spring cleaning. Every corner of the house is turned out, examined, scrubbed and necessary repairs done. The garden is attacked, refuse gathered, burned or otherwise disposed, lawns brushed, trees and hedges pruned. The car is taken to pieces, thoroughly overhauled and put in complete running order, but, what about the complete physical examination of the human machine? The intricate and irreplacable mechanism that never gets a rest, the machine for which no spare parts can be bought? Alas! It is used and abused day in, day out, week in, week out, year in and year out until the mechanism shows signs of giving up and then it is taken to the repair shop, in other words to the physician who in many, many cases can do no more than patch. Why is the cheapest make of car given more consideration than the human body? A car can be replaced, a body never.

The value of a periodic physical examination cannot be over-estimated. Many diseases begin slowly or insidiously and may not produce any disabling symptoms until the condition is considerably advanced. T. B., cancer, Bright's Disease, Diabetes, hardening of the arteries, and certain forms of heart disease, are examples of diseases that may begin unnoticed. To the physician trained to note the slightest symptom of disorder, the beginning of these diseases is at once apparent. A careful physical examination made periodically would detect such diseases early and allow of the prompt institution of proper treatment.

Objection to periodic physical examination is sometimes made on the ground that such examinations cause much unnecessary worry, especially if some disease is detected, but if a diseased condition is present the person affected should know about it in order that corrective steps may be taken promptly. If a person is in excellent health, he has nothing to fear from an examination, but such an examination will add to his peace of mind and mental security. Physical examination should begin in early life, during the pre-school age, and be continued into old age. If this practice was begun then, there would be found many defects which could be corrected and thus the handicap of such children avoided.

"Prevention is better than cure" and the Red Cross with its Health Library will give much valuable assistance towards this end.

HOG PASTURES

(Experimental Farms Note)

Pastures are essential for economic pork production, especially for growing pigs and brood sows. Pastures provide an abundance of cheap feed, and considerably reduce the cost of pork production. The choice of pastures, however, largely depends on soil and climatic conditions.

At Indian Head, such pasture crops as rape, oats, barley, rye, millet, and various mixtures have been under test for a number of years.

Variety of pastures is essential in order to provide an abundance of succulent feed throughout the season. Rape has proved to be one of the best pastures under test from the standpoint of economical gains and the provision of succulent feed throughout the late summer and fall months. Rape sown in June will be ready in August or September and may be used to finish the early spring pigs or give the fall litters a fair start before the cold weather sets in. A good stand of rape is capable of carrying from fifteen to twenty pigs per acre.

The coarse grains, such as oats, barley, etc., when sown alone, or in combination, supply an abundance of green succulent pasture. To obtain the best results with these mixtures, the pigs should be turned on when the growth is from six to eight inches high.

Fall rye has also given good results as hog pasture. Fall rye when sown in combination with oats provides succulent pasture throughout the entire season. As the oat pasture becomes exhausted, the fall rye will gradually take its place and provide green succulent feed all fall. Fall rye sown late in August and early in September will supply green pasture for the early spring litters.

Suitable pastures should be available for the growing pigs, brood sows and stock boars.

A news item: "Mr. and Mrs. John Beverlin are rejoicing over an eight pound daughter, their sixth child, since last Saturday."—Newton, Ill., Mentor-Democrat.

—:o:—

"My dear young lady," said the clergyman in grieved tones, as he listened to the extremely modern young girl tear off some of the very latest jazz on the piano, "have you ever heard of the Ten Commandments?"

Modern young lady: "Whistle a few bars and I think I can follow you."

—:o:—

"Tell me truly, does the baby really take after his father?" asked Mrs. Jones.

"Yes, indeed! Why, when we took the darling's bottle away, he tried to creep down the cellar stairs.

—"The Groundhog."

—:o:—

He: I can answer any question.

She: Well, what's the broad band used to keep the saddle in place on a horse's back?

He: Aw that's a cinch.

A Triumph of Engineering Genius!

UNDERLYING the smart styling of Pontiac's Fisher-built bodies, you will find the master results of skilled engineers and designers . . . the unmistakable evidence of engineering excellence.

The big, husky Pontiac Six engine—with its GMR "Cross-flow" cylinder head, its crankcase ventilation system, its oil filter, air cleaner, etc. . . . is the result of the skill and experience of Pontiac engineers, plus General Motors' great engineering and research laboratories!

The fuel-pump system (replacing the vacuum-tank) . . . the Lovejoy Shock Absorbers . . . the new acting mechanical Four Wheel Brakes . . . these too are developments of Pontiac plus General Motors.

General Motors' resources make Pontiac Six a triumph of engineering genius. Just as they make it a revelation of six-cylinder value.

New Impetus Being Given To Cattle Raising Industry As a Result Of High Prices

The active demand for Canadian cattle in the United States, which has elevated prices to a height never before reached, together with the prospect of this situation continuing for some time to come, has given an entirely new impetus to the beef-raising industry of Western Canada, for which the outlook a few years ago appeared so gloomy, says a bulletin of the Canadian Pacific Railway. At the same time the realization is steadily taking more general hold among Canadian agriculturists that a great and prosperous future awaits the Dominion in the sheep industry, according to the railroad. There is every justification for an expansion of these two as well as other branches of the live-stock industry, the writer adds.

"Governments and live-stock organizations have been working to effect this," the bulletin continues, "and already the fruits of their efforts are apparent. During 1927 the number of beef cattle in Canada increased by some 20 per cent. over the previous year, and in Western Canada, essentially the home of the beef animal, numbers increased by over 75 per cent. In the same year the number of sheep in Canada increased by about 4 per cent. and in Western Canada by more than 9 per cent. There is every indication that despite heavy sales there will be further increases recorded in the present year, and thereafter steady expansion is to be expected.

"Looking no further than the occupied farms of Western Canada, great opportunity for the expansion of the live-stock industry is revealed. The average farm in this territory is of considerable extent. The average farm acreage in Manitoba is 274 acres, in Saskatchewan, 368 acres, in Alberta 353 acres, and in British Columbia 130 acres. Forty per cent. of the farms in Manitoba are over 200 acres in extent, 64 per cent. of those in Saskatchewan, 81 per cent. in Alberta and about 9 per cent in British Columbia. Yet on the average Manitoba farm there are less than 5 beef cattle, and but 3.8 sheep; in Saskatchewan, 1.1 beef cattle, and 1.4 sheep per farm; in Alberta, 3.2 cattle and 6.8 sheep; and in British Columbia, using the number of farms in 1921 which are the latest available, approximately 2 head of beef cattle and 6.3 sheep.

"Even considering the vast tracts given up to pure grain growing, it is very clear that Western Canada farms could be carrying substantially more stock. At the time of the last agricultural census it was disclosed that of all the occupied farms in Western Canada 44 per cent. of the land in Manitoba, 43.13 per cent. in Saskatchewan, 50.23 per cent. in Alberta and 30.07 per cent. in British Columbia was unimproved. A total of 12.93 per cent. in Manitoba, 5.10 per cent. in Saskatchewan, 7.42 per cent. in Alberta and 37.62 per cent in British Columbia was in woodlot and so unfit for most forms of agriculture until cleared. The remainder of the area of occupied farms, amounting to 37.28 per cent. of the total in Manitoba, 30.06 per cent. in Saskatchewan, 47.66 per cent in Alberta and 35.71 per cent. in British Columbia, was natural pasture and as such suited to the raising of cattle sheep or other live stock.

"In addition to the wide opportunity existing on the farms of Western Canada for greater engagement in these branches of the live-stock industry on an intensive scale, account must be taken of the larger operations of ranching, which is still an important factor and in several sections an increasing one in the raising of cattle and sheep. A distinct impetus to the ranching industry of Western Canada was given by the Department of the Interior in its amendment to allow of the granting of 21-year leases in Southern Alberta and Saskatchewan and in the railway belt of British Columbia. These Government grazing leases last year totalled 6,282,725 acres, an increase of 154,130 acres over the previous year and an increase in the number of leases of nearly 600.

"It is surprising to find that when Western Canada has so firmly established its reputation as a live stock producer a mere commencement has been made upon the industry, and the scope for development is immense. Circumstances have combined to make the present a propitious time for inaugurating a great program of expansion, and there would appear to be good times ahead for those who will engage in live stock production in the territory, either established farmers and ranchers or newcomers to the country."

W. N. U. 1732

Youth Wins Big Prize

Arthur Cleland Lloyd, nineteen-year-old Vancouver youth, who won the prize of $1,000 offered by E. W. Beatty, Chairman and President of the Canadian Pacific Railway, for orchestral suite open to all comers. This prize is given in connection with the Quebec Folk Song and Handicrafts Festival which is to be held in Quebec, May 24-28.

Mr. Lloyd has been under the tutorship of Percy Grainger, in Chicago, and is at the present time studying under Harold Bauer and Nicolai Medtkoff, in New York. He won the distinction of Associate of Toronto Conservatory of Music while at the age of thirteen.

Speeds Up Work

The horse continues to supply the power needed on most farms, but there are tasks and times, most seasons, when its ally, the tractor, can render valuable service in speeding up the work or getting a job done at the right time.—Farmer's Advocate.

CROSSING LONESOME TRAIL

Map shows the route of the polar flight recently completed by Captain George Wilkins.

Women On the Farm

About 124,000 Occupied In Industry in England and Wales

Of 794,000 agricultural workers in England and Wales, 104,336 are women and girls, 62,909 being classed as regular workers on the land, and 41,607 as casual workers. These figures do not comprise women occupiers or domestic servants, but they do include daughters working on holdings. The census for 1921 showed that there were 18,440 women farmers. Adding these to the above total of 104,336, it would seem that there are approximately 124,000 women (82,209 permanent and 41,607 casual) who might be described as "independently occupied" in the industry.

Canada's Trade With China

Canada's trade with China has grown more rapidly than with any other country, not even excepting Germany, in the post-war period. This is indicated in figures of Chinese maritime customs. The report for the calendar year 1926, issued by the Chinese Government, shows that importation of Canadian produce increased by more than 400 per cent. over the previous year, from $3,742,720 to $15,840,619.

Conscience makes cowards of us all or else cowardice makes us conscientious.

If they adopt that year of thirteen months, won't the installments come due quicker?

Fort a La Corne Memorial

Government Historic Sites Committee Will Share Work In Shrine

At a meeting of the Prince Albert Historic Society, the erection of a memorial at Fort a la Corne, about fifty miles east of the city, was discussed. The work will be undertaken by the government department of historic sites of Canada.

The following inscription is to be placed on the monument:

"Fort a la Corne. The most westerly and most northerly post founded by the French fur-traders. Built in 1753 near this spot by Legardeur de Saint Pierre, the successor of La Verendry. James Findlay, about 1771, erected in this vicinity a fort, later called Fort St. Louis, which was maintained by the Northwest Company until 1805.

"In 1846 the Hudson's Bay Company re-occupied this place. The site has been frequently changed and the fort has had many names."

Lest We Forget

It is startling to learn that there are still fifteen thousand wounded soldiers in our war homes and war hospitals. There is a danger that because they are out of our sight they may be out of our mind. It is said that in one of these hospitals there has been no entertainment for three years. Most of the broken men are young, but they are doomed to lifelong invalidism. They should not lack loving friendship and affection in their isolation and suffering.—London Sunday Express.

A Distinctive Canadian Spirit Is Developing Which Will Naturally Demand Expression

That there is a distinctive Canadian spirit demanding expression is the firm belief of Frederick Philip Grove, world traveller and author, who addressed the Canadian Club in Toronto recently on "Canada: the Spiritual Awakening of an Individual." Mr Grove drew upon his experiences for his subject, and he expressed confidence that there was a specific Canadian attitude to life, to the world, to the universe, to God, which demanded utterance. Only by giving this utterance, he said, could Canadians make the cultured, well-educated people of Europe, Asia or Africa realize what they were, and only by giving it utterance could the voice of the Dominion resound through the centuries.

Mr Grove's experiences in Western Canada include teaching a school on the prairie attended by foreign-born settlers. Later he received an appointment as principal of a high school in Winnipeg.

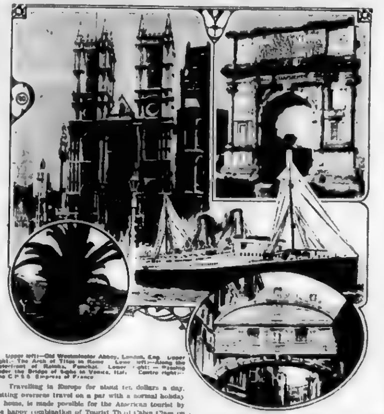
Mr Grove said: "In our Canadian West I have seen old men and women bending over frayed copies of the Bible and other cherished books, their lips moving, their fingers holding the line, spelling out sentences that seemed to express what they felt. And in their eyes I have seen something new, something I have never seen in the eyes of European peasants. I do not know what it is, a sort of hopefulness. I sometimes ask myself whether it was bred by our wider spaces among our countless, our higher [illegible] and sometimes I think it is bred by the fact that after all it is one of the fundamental desires of man to own the soil on which he stands, and land ownership was beyond their reach in Europe. That Canada has given to them and thereby freed their spirits."

THE BISHOP AND SHORT SKIRTS

In discussing the current vogue for short skirts, the Bishop of Ely declares that in so far as women's dress tends to approximate to man's attire it becomes a factor in the disintegration of the social order. He adds that there are many who cannot afford to be so casual about their ankles as are modern women. Some English women have been sufficiently bold as to suggest that the trimly-shod and silken-clad ankle of a flapper is just as much worthy of exposure to the public gaze as the gaitered leg of a bishop. The illustration above presents the contrast.

"Brown eyes," says one of our teachers of psychology, "indicate a strong character." Black eyes, of course are indications of a weak defence.

Dreams of Visiting Old World Countries Come True.



Upper left—Old Westminster Abbey, London, Eng. Upper right—The Arch of Titus in Rome. Lower left—Along the waterfront of Funchal, Madeira. Lower right—Passing under the Bridge of Sighs in Venice, Ital. Centre right—The C.P.R.S. Empress of France.

Travelling in Europe for about ten dollars a day, putting overseas travel on a par with a normal holiday at home, is made possible for the American tourist by the happy combination of Tourist Third Cabin Class on the magnificent Atlantic fleet of the Canadian Pacific Steamships and the tours arranged in the old world by the Arts Crafts Guild of Chicago. It is shown by the figures released by these companies.

The creation of this new class of ocean travel on Canadian Pacific vessels has made it possible for many thousands who have been unable to consider fulfilling their hopes, and during the past few years it has become fully established in popularity. The economy effected by this class of ocean passage makes a comprehensive European tour possible for every traveller who during the Atlantic voyage enjoys surroundings and comforts equal to those until recently associated only with first class accommodation. State rooms are above the water line, each with hot and cold running water and the public rooms, card rooms, drawing rooms, smoking rooms, dining saloons are commodious and tastefully furnished. Orchestras are carried for special entertainments and dancing. These take place on the broad promenade decks or within doors.

Itineraries ranging from thirty-two to seventy-three days in extent, including the ocean passage, are possible for the traveller under the Continental Collegiate Tours organized by the Arts Crafts Guild of Chicago. The charm of these tours is realized right from the start, for during the thousand mile journey down the mighty St. Lawrence and through the Gulf the boats pass scenery rivalling that of any river trip in the old world for beauty and picturesqueness.

Once overseas there is nothing of importance or interest missed by the tours of the Guild. In England they include the Shakespeare country and London; in the "Low Countries," the best of Belgium and Holland; in Germany, the Rhine and her great centres; in France, Paris of course and in the lovely Riviera with Monte Carlo in its midst, in Switzerland, the Alps; to the south the cities of sunny Italy [illegible] north, in the "Land of the Midnight Sun" [illegible] Sweden. Everything in [illegible] to see may be visited [illegible]

The Deadly Iceberg

No Effective Means Yet Found To Rid Seaways Of Menace

Despite all the advances that have been made in trans-Atlantic navigation, no effective means have yet been found of freeing the seaways of dangers from ice. The best that can be done is to warn ships of the presence of ice and the whereabouts of the various bergs.

Attempts are also made during the summer season to destroy some of the icebergs with shellfire. This work is done by a vessel specially commissioned for the purpose and supported jointly by Britain and the United States.

But these measures do not eliminate the danger. Eternal vigilance has to be practised by the captain of every vessel who would successfully avoid the deadly iceberg and bring his ship safely to port.

Outlawry Of War

British Government Warmly Welcomes Proposals From U. S.

The British government warmly welcomes the proposals of the U.S. for a further joint effort to safeguard the peace of the world, Sir Austen Chamberlain told the House, replying to a question as to when the Kellogg outlawry of war project would be discussed in Commons.

The British Foreign Secretary said the British Government is giving close and sympathetic attention to the text of the treaty proposed by the U.S. Secretary of State Kellogg on this subject, together with the observations and the suggestions of the French government.

WORLD HAPPENINGS BRIEFLY TOLD

John Bassett Moore, American judge on the permanent court of international justice since 1921, has announced his resignation.

The Prince Edward Island Government has purchased about 120,000 of seed oats and wheat in Manitoba for distribution among the farmers at cost.

Dr. William Marsden, secretary of the Department of Scientific and Industrial Research, New Zealand, will visit Canada to enlist co-operation of the Canadian Research Council in certain research matters.

A 600-mile air mail and passenger route from Omaha to Winnipeg is the goal of the Omaha-Winnipeg Airways Association, organized by representatives of commercial clubs from Grand Forks, Watertown, Sioux Falls and Sioux City.

The British House of Commons debated and gave second reading to a bill providing for the grading and marking of British agricultural produce with a view to combating foreign competition. A start will be made with eggs and fruit.

It is expected 1,000 men for Canadian farms will be sent out from the agricultural training centre established by the British war office at Claydon for the training of young men about to be demobilised from the army.

Lieut.-General Duidoni, director general of the aeronautical construction of the Italian air ministry, was killed when he fell 1,000 meters from an airplane. General Duidoni was testing a new parachute, which failed to open.

Since 1918 the Canadian parliament has voted $66,000 for Olympic games participation and the payments were made to the Canadian Olympic committee it was stated in the House of Commons. The total includes $26,000 contributed for the 1928 games at Amsterdam.

MISTAKES MOTHERS MAKE IN CARE OF LITTLE ONES

Many mothers give their children solid foods at too early an age and say proudly that their babies eat everything that grown up people do. Such a course is almost certain to bring on indigestion and lay the foundation of much ill health for the little one.

Other mothers administer harsh nauseating purgatives which in reality irritate and injure the delicate stomach and bowels and at the same time cause the children to dread all medicine.

Absolutely no meat should be given to a child until it reaches the age of 18 months and then only if approved by the doctor. For the child all strong, disagreeable oils and powders should be abandoned and Baby's Own Tablets given instead.

Baby's Own Tablets are especially made for little ones. They are pleasant to take and can be given with absolute safety to even the new born babe. They quickly banish constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Modern slang leads to many complications and we know of one young man who is looking for another sweetie because he told his last one that her shoes looked great.

Lake Michigan is separated from Lake Huron by the Strait of Mackinac.

Small Town Papers

BY

FRANK PARKER STOCKBRIDGE

(Continued.)

I wanted to know just how they did make money. Does the modern country newspaper publisher keep accounts like a business man, or does he just guess at his profits, as the old timers used to do and usually guessed wrong?

"That's one of the things we are doing in our state and regional press associations," said the Iowa man. "Teaching the country editor how to figure his costs and base his advertising and subscription rates upon them is one of the important things in the work of our organization. Too many of them are still going at costs. In fact the former president of the National Editorial Association, Herman Roe, recently said that accounting was the weakest spot in the whole rural newspaper field."

I was at the meeting when Roe said that ... Bert Mills. "He asked for estimates of the cost of producing a five column eight page paper 2,000 copies weekly. I believe that these estimates ran all the way from $75 to $800. The men who were publishing the papers didn't know, most of them, what it cost them. How are you going to sell advertising space at a fair price? And you can't prove that unless you know what it costs you."

"I think I've got the costs pretty well worked out in the Gazette plant but it took my older boy fresh from college to show me where I had omitted a lot of items in my old way of figuring. Now we charge up costs not only the wages paid and material used but a rental by the week for each machine high enough to cover depreciation and interest on the investment, a fair rent for the building and everything else we can think of in the way of expense, including my own salary and then we add a profit at an arbitrary figure on top of all that, to be safe.

"I run a sixteen-page, six-column paper and print a little more than 3,000 copies every week. I average about 1,000 inches of advertising each issue. Figured the way I've just described, it costs about $446 an issue to produce. I get 40 cents an inch for advertising space, or about $400 an issue. That may look as if the Gazette were headed for bankruptcy, but that apparent loss of $46 a week is offset first by the 25 per cent. profit, which has been figured into the costs all along the line, so that on advertising alone there is a profit in getting out the paper of $43.50 a week. I draw a salary of $60 a week, which is included in the costs. Those two items come to $6,500 a year, and the subscription revenue runs another $7,500. The interest on the investment, charged also into costs, brings my profits above $15,000 a year, without counting legal advertising, sale of extra copies and such items."

I was pretty well convinced by this time on every point but one.

"I'd hate to try to borrow money at the bank on the strength of that subscription revenue," I suggested.

There was a chorus of laughter from the entire group around the luncheon table.

"Try to subscribe to an up-to-date country weekly without paying cash in advance and see what you get," said one of them. "Cash-in-Advance Club is one of our strongest and most popular organizations. It has taken a good deal of educational effort both with subscribers and with publishers to establish the principle of paid-in-advance subscriptions, and there are a good many papers still which do not enforce it very strictly. But I should say that a clear majority of the country weeklies now get their money from subscribers promptly, both for original subscriptions and for renewals. The modern farmer has not the aversion to paying out cash that his granddad had. He has the cash to pay, for one thing, and he buys machinery and other things for cash, so that it seems natural to him to pay for his paper in cash. And while we think of the old-time editor as taking apples or cordwood for subscriptions we've found some papers, in the course of our association investigations, which have always enforced the cash-in-advance rule. There's the Southern Standard for example which has been published at [illegible]innville, Tennessee, since 1879 without a break, and which has never sent a copy to a subscriber who wasn't paid up for a [illegible]. They get somewhat less than the prevailing rate of $2.50 a year, or five cents a copy which is now almost the standard rate all over the country and which gives the publisher a run for his money."

"The whole trick is to make the paper so useful and interesting to the local readers that they can't get along without it," said Bert Mills.

... the Star Clipper agreed the man from Iowa. "That's the prize winning country weekly for 1927-28. One of the things which the National Editorial Association does every year is to award a prize to the best country weekly. Bert, here, got it one year. Until the 1928 convention next summer it's held by a paper out in ... in a town you probably never heard of named Traer, in Tama County, Iowa. And what makes it the best weekly paper in the United States, as it has a right to call itself, is the fact that it is so full of local news about local people and events that everybody in its territory just has to read it. Traer has a population of 1,532 but the Star Clipper has a circulation of 2,675 and all paid in advance at two dollars a year. When the N.E.A. committee checked up its circulation it was found that in thirteen townships in the county nine out of every ten farmers were subscribers. Three townships showed 100 per cent. subscriptions."

"That's a real record," said Bert Mills. "They give another award every year, too, for the paper with

The Best Laxative He Ever Tried
Mr. Wm. Towner, New York, writes: "Never have I felt better in my life. Your purely vegetable Laxative Pills keep my bowels active, headaches and indigestion never bother me now. I enjoy my sleep and get up refreshed, with a clear head ready for a day's work."
CARTER'S LITTLE LIVER PILLS
Sold all druggists 25c and 75c red pkgs.

the best editorial page. It is an upstate New York paper that holds that this year, Jacob Strong's Rhinebeck Gazette. Most of us don't go in very strongly for editorial comment, but the Gazette speaks right out in meeting about matters of local interest, and has a great influence in Dutchess County."

"I think there's a decided tendency toward stronger editorial expression, as well as toward constructive community service among country weeklies generally," added the editor from Oklahoma. "That last is another matter which the National Editorial Association is encouraging. At its last convention the association gave a prize to the Clinton County Republican-News, published at St. Johns, Michigan, for the greatest community service, in recognition of its campaigns to raise money for a county hospital, for fireproof vaults for the courthouse and for tuberculosis tests of cattle in the county."

Provincial Hay Pool

Hay Growers Of Manitoba To Organize Central Selling Agency

A provincial hay pool, providing for a central selling agency and a contract system of delivery, is the most recent development in co-operative marketing in Manitoba, it was announced at the office of the co-operative marketing board.

Hay growers in different parts of the province have decided to proceed at once with the organization of an association to be known as Manitoba Co-operative Hay Growers, Ltd. An application is being made to the provincial government for a charter under the co-operative association act.

George McKay, Marquette, Man., has been elected president of the pool.

It is sometimes better to forgive an enemy than to take a sound thrashing.

Madrid has the highest altitude of any city in Europe.

There is something wrong with the man who doesn't secretly love praise.

SUNDAY SCHOOL LESSON

MAY 13

JESUS ENTERS JERUSALEM

Golden Text: "Behold, thy King cometh unto thee. He is just, and having salvation." Zechariah 9.9.

Lesson: Mark 11.1-33.

Devotional Reading: Psalm 24.7-10.

Explanations and Comments

Christ's Kingship Openly Proclaimed, verses 1-10.—On the day which we now call Palm Sunday, the last Sunday of His life, Jesus made His triumphant entry of Jerusalem. On approaching Bethphage and Bethany, not far from the city, Jesus bade two of His disciples go into the village opposite, where on entering they would find a colt tied which no man had ever ridden; this animal they were to loose and bring to Him. If questioned as to their action they were to say, "The Lord hath need of him and will return him to you after he has been ridden." The disciples found the colt in a public street fastened to a door, and as they unloosed him were questioned, but upon answering as Jesus had directed they were permitted to take him away. The owner was evidently a friend of Jesus.

They brought the colt and put their loose, outer robes upon him for their Master to sit upon. Others spread their garments on the road, and yet others secured branches of palm trees (John 12.13), and cast them down for Him to ride over. And the crowd that went before as well as the crowd that followed cried, "Hosanna (Save now; compare the acclamation, God Save the King). Blessed is He that cometh in the name of the Lord; Blessed is the kingdom that cometh, the Kingdom of our father David. Hosanna in the highest." The words are from the one hundred and eighteenth Psalm, "The Messianic Psalm," the last one of the five "Hallel Psalms" which were sung by the people as they wended their way around the altar at the great festivals. Their use on this occasion indicated that the people recognized Jesus as the Messiah. "Shout, O daughter of Jerusalem," Zechariah had cried; "behold thy King cometh unto thee; he is just, and having salvation, lowly, and riding upon an ass, even upon a colt, the foal of an ass." This prophecy Jesus intentionally fulfilled. The words were prophetic of a peaceful King, not of a warrior. The ass was the animal for labor, the horse was for war. "In reality the ride over the Mount of Olives was Jesus' last attempt to convey to those about Him by symbolic act that which His words had failed to convey, that He had not come to be a conquering warrior or political King, but a lowly Servant and Prince of Peace."—George A. Barton.

Another artificial ice rink in Montreal for curling indicates that winters have become milder notwithstanding the statistics of weather men to the contrary.

Death Valley, California, the dryest and hottest place in the world, is 276 feet below sea level, 150 miles long and 15 to 20 miles wide.

LOOKS TO CANADA

Unable to support properly his wife and nine children on the wages of a blast furnaceman, and discouraged by conditions in the Old Country, Thomas Booth, of Scunthorpe, Lincs., England, looks to Canada to give him a return more commensurate with his labors. Having had considerable farm experience he decided to emigrate, and he arrived in Canada this week in the White Star liner "Calgaric." He will work a farm at Emo, Ont.

May Get Concession

Western Stockmen Hopeful That Application Will Be Reconsidered

The application of British Columbia and Prairie stockmen for variation of the accredited T.B. free area regulation to allow the movement of tested feeder cattle to approved feed lots within the restricted area was not granted. But there is reason to hope that it will be granted. If so it will round out the achievement of the concession under which untested cattle may be exported, recently announced and joyfully acclaimed by stockmen generally.

Millions For Branch Lines

Proposed To Spend Ten Millions On C.N.R. Branch Lines This Year

"We are not interested in whether two hotels in Halifax will pay," Sir Henry Thornton, president of the Canadian National Railways, told the house committee on railways and shipping. "We are interested in whether our own hotel will pay. We believe, having regard to all circumstances, that the hotel we propose to build will pay."

The committee had under consideration Canadian National estimates for the fiscal year ending March 31 next.

Sir Henry said that it was proposed to spend ten millions on branch lines this year under the three-year programme.

The committee passed the estimates and accounts of the Canadian National.

Choose English Language

Swedish Paper Finds Majority Favor It As World Tongue

The English language is better suited to become a world tongue than Esperanto, Ido or any of the artificial languages, maintains Professor R. E. [illegible], refuting the theory that these languages are easier to learn than the established tongues and stressing the fact that English is understood by 300,000,000 people in every corner of the globe, whereas Esperanto, for instance, is mastered by but some few hundred thousand, the professor finds reason to believe that English will be the future world language.

To ascertain to what extent the citizens of Stockholm understand and speak foreign tongues, a newspaper of the Swedish capital recently made an interesting investigation. A reporter capable of speaking many different languages was sent out to question at random a number of people, men and women, in various walks of life. German, French, Italian, Russian and the artificial languages of Esperanto and Ido were spoken and understood by only a few people, whereas the majority had a fair knowledge of English. The quest gave the result that a stranger in Stockholm may be reasonably assured of being understood if he or she knows English.

When asked by the interviewing reporter which language would be most suited as world tongue, 46 out of 100 were in favor of English, 10 advocated Esperanto, and 14 voted for Ido. Spanish received six votes, French 4, German and Latin two each, and Italian and Swedish one each.

Winnipeg Newspaper Union Fashions

Effective Sport Dress

This tremendously smart sports dress of silk crepe has a perfectly straight back, with slightly bloused bodice and skirt pressed in box plait effect at front. The plaits are stitched part way to assure a snug fit through the hipline. Jersey, georgette crepe, two surfaces of crepe satin, canton faille crepe and wool crepe are also adaptable for design No. 752. Pattern can be had in sizes 16, 18 and 20 years, 36, 38, 40 and 42 inches bust measure. The 36-inch size requires 3⅛ yards of 40-inch material with ⅓ yard of 40-inch contrasting. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Reject Undesirable Immigrants

Says Plan Adopted By U.S. Should Be Followed Here

"If Canada does not desire to be the dumping ground of those would-be immigrants to this continent which the United States medical inspection system is weeding out, we must lose no time in keeping close guard at our own ports of entry by adopting the method which is working so successfully with our neighbors to the south."

The warning was issued by Dr. J. D. Page, chief of the division of immigration, medical service, federal department of health, before members of the health division of the Canadian conference on social work now in session at Montreal. He was speaking on "the medical aspect of immigration."

Village Has Been Deserted

For more than 30 years a thriving village, Cutler, situated on the Canadian Pacific Railway line to Sault Ste. Marie, has been completely deserted. Of late the population has gradually been dwindling and with the announcement that the ferry to Manitoulin will no longer call, the last two residents of Cutler, the station agent and the customs officer, were forced to move. The ferry terminus has been moved to Spragge, leaving Cutler a deserted village.

It isn't necessary to erect a monument when you bury your animosity.

WAS SO NERVOUS and SHORT OF BREATH COULD HARDLY SLEEP
Mrs. Louise Baglin, Golden Lake, Ont., writes:—"For several years I was greatly troubled with my heart. I was so nervous and short of breath I could hardly sleep at night, and if I did sleep for a while I had bad dreams.
"I managed to keep at my work, somehow, until I began to have dizzy spells which got so bad I had to give up. I used many kinds of medicine, but found no help until I got a box of MILBURN'S ... After the first box I found a great change, and after two boxes I was as well as I could be.
"I told my mother, who had choking sensations, about them and they helped her greatly."
Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

THERE is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word genuine printed in red:

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture. ...

CHAPTER XXIII.—Continued.

"My dear," said one, "it is our patriotic duty to save every cent. I cut down my cook ten dollars at once, and changed my dressmaker." Her voice fell. "My dear, there's a wonderful German woman on the south side. I will give you her address and she made me a stunning little afternoon dress, with so much handwork on it, for ten dollars. Madam Frouchette would have charged thirty-five. She is a positive find. She's frightened to death that she will lose her trade, and so has cut her prices away down. We're keeping it among ourselves, my dear. You know some of the I.O.D.E.'s would be up in arms if they knew. They say we should patronize our own, but, my dear, the German woman has to live."

When Helmi walked wearily back to the "North Star" that night she was beginning to wonder if to bring a child into the world were not the great transgression for which there could be no pardon. Only the thought of the blessed shelter of her room, and the warm-hearted Irish family who had befriended her kept her heart from despair. Mrs. Corbett had not thought it was so terrible. She had praised little Lili, and Rose and Danny were getting marbles now from other children in the block for a look at the child.

The traffic was congested at the corner of First and Jasper. A Blue Line car waited for the rush of passengers homeward bound, and a coal wagon, lumbering past, narrowly escaped a closed motor which had dashed by disregarding the traffic law. A newsboy in an overcoat much too long for him shouted "Evening Journal, all about the suicide."

Two men, waiting to get across, were talking about it. "She took a room at the St. Petersburg ... left her baby there."

Helmi shuddered and hurried on. She wanted to feel the little warm cheek against her own, and to listen to the regular breathing, and get back the confidence she had lost. There must be someone in this city who would let her work.

The next day Miss Ritchie had an address for her. The lady there wanted someone to come by the day and go home at night. Helmi set out at once, taking a street car to save time. When she arrived she found that the lady had already secured a helper for the day.

After Helmi had gone the lady remarked to her friend that the girl whom Miss Ritchie had sent looked rather pale, and she wished she had given her a street car ticket. The friend advised her not to worry over it: "no doubt a brisk walk would do the girl good."

Helmi walked slowly over the long bridge, whose great iron pillars frowned coldly at her. On the river below men were drawing sleighloads of ice, glistening blue against the white snow. They looked so warm and happy in their fur coats. Helmi stopped for a moment to watch them, but soon hurried on, for it made her dizzy to look down, and yet it drew her back again in a horrible way that made her heart beat sickeningly. She compelled herself to think of little Lili's pink fingers, with their long, tapering nails, and the satiny feel of her little cheek.

Helmi knew there were kind women in the city; there were women like Miss Abbie and Miss Rodgers, and men like Mr. Terry and the Doctor. She would not give up—two days was not long to be looking.

When Helmi got back to the Bureau Miss Ritchie's assistant was there, a young lady with a metallic voice and stiff white collar which seemed to choke her. She motioned Helmi to sit down.

Helmi laid her purse on her knee and leaned back against the wall. Such a weariness came over her that even the hard seat could not prevent sleep. She was awakened by the metallic voice of the assistant and sprang up in confusion. It was near closing time and the seats were empty. Then she noticed that her purse was gone. The blood rushed to her head, and it seemed as if something snapped. She hunted wildly, talking in her own language excitedly.

The metallic voice was saying: "We cannot be responsible for property; you should have held on to your purse—was there much in it?"

"All that I have in the world," said Helmi brokenly.

"Too bad," came from the stiff collar, "but you can't blame us."

Helmi walked down the street empty handed and distraught. She had a desire to tear her hair, to scream, to break something—to kill someone. It couldn't, couldn't, couldn't be all that she had—her seventeen dollars, her marriage certificate—God could not be so cruel.

A man was speaking at the corner of the street, catching the six o'clock crowd. Helmi could not make her way through the mob, and so found these words beating in upon her through the confusion of street sounds: "Canada calls you, as it has called me. Canada is good enough to fight for—don't fail her now in her need. How would you like to be ruled by Germany? How would you like to bow the knee to Kaiser Wilhelm? Think of our lives here in Canada, where we are free as the air we breathe, with all our wealth of wheat fields, oil wells, mines and forests, enough for all, enough for ever—yours and mine. Canada the land of plenty, is our country. Let us fight for it—the land of the maple leaf, where there is room enough and work enough for everyone."

A shift in the crowd revealed the speaker's face. Helmi remembered him. It was Major Gowsett, the man [illegible] wood. Black rage filled Helmi's heart. Oh, the liar! how could he say there is work in Canada for everybody? There's nothing in Canada but heartbreak." Clenching her empty hands in an agony of hopeless rage: "He's a liar!" she cried aloud, "don't listen to him."

Someone tapped her arm. "None of that, my girl," said a deep voice.

Looking up, Helmi saw a big policeman shaking his head warningly at her. She turned and ran. Fear gave fleetness to her feet—she dared not look behind. It seemed as if the whole police force were in pursuit. Heavy steps pounded behind her. At the corner of Namao Street a sign in a window glared at her, a sign in black letters on a blue card. Helmi read it aloud in her eagerness, then darted in the door.

"GIRL WANTED"

said the sign. Pale and trembling, Helmi approached the desk.

"Do you want a girl? Will you take me?" she said, before she noticed the person who sat there.

A tall, old Chinaman rose from his high stool. "You washee dish, cookee, waitee table?" he asked.

"I will do anything," said Helmi; "give me a chance."

"Sure, you nice liddle girl; old Sam give you chance. Want girl for night—seven till twelve every night. Nice liddle parties—lots of nice fellows come out at old Sam's. Like nice liddle girl carry chop suey—makee nice in white apron, liddle cap."

"I'll work hard if you'll give me a chance," said Helmi.

And so it happened that when Major Gowsett, who was recruiting for the Canadian Army, came in after a late meeting the next night for a cup of coffee and a sandwich, he saw Helmi carrying the trays from the kitchen. She was dressed very smartly in her black dress, with white apron and cap, and carried the trays with the old air of aloofness.

Deeply concerned as Major Gowsett was over the dishonoring of the Belgium women—and he spoke of them with deep feeling every night in his recruiting speeches; indeed, with an almost fatherly solicitude—he did not hesitate to tell Helmi's story now to his young officer friend.

"Our haughty looking waitress is a lady with a past—a real purple past," he said, in a low voice. "I could swear to that head of hair any place, and that Boadicea manner, though she was not looking quite so haughty nor quite so svelte when I saw her last—she evidently has gotten over her trouble and is back to her old haunts. No decent girl works in a Chinese restaurant at night. Old Blackwood, at Bannerman, had the whole story in a newspaper and showed it in front of her."

The younger man looked after Helmi as she walked noiselessly past them with her tray of dishes. "She's a good-looking girl," he said, "and certainly has not the face of a crook."

"Look out Jim," laughed the Major; "Go slow on this girl, she's a wild cat."

"She would need to be," said the young officer, "if she wants to keep straight. The girl is earning an honest living here now, anyway. Why not let her past go?"

But in spite of this rebuke, which made Major Gowsett shrug his beefy shoulders, he took time the next day from his arduous task of recruiting for the 67th Battalion to write to his friend Col. Blackwood, at Bannerman: "I saw the Finn girl again. She is in a Chinese restaurant, working at night," and he underlined the last three words.

Firestone
Tread is Scientifically Designed
When Firestone engineers were developing the Balloon Tire they found it necessary to design a tread altogether different from that required by High Pressure Tires.
The Firestone tread was not designed with large, massive projections for appearance or to make plausible sales argument. On the contrary, the projections of the cross-and-square tread are small and the sides stripe narrow, permitting the tread to yield to irregularities and cling to the road, giving the greatest non-skid surface. This tough, pliable tread has the wear-resisting qualities that give thousands of extra miles of service and save you money.
Your nearest Firestone Dealer will gladly supply your needs and give you the better service that goes with these better tires.

ITCHY ECZEMA ON BABY'S FACE
Broke Out in Watery Pimples. Cuticura Healed.
"Eczema broke out in watery pimples on my baby's face. It itched and burned so badly that she scratched, and her face was covered with sore eruptions. When she scratched the eruptions they used to bleed something dreadful. She used to fret and stay awake nights. It caused disfigurement for a while.
"I sent for a free sample of Cuticura Soap and Ointment and after using it I purchased two cakes of Cuticura Soap and two boxes of Cuticura Ointment, and in five weeks she was completely healed." (Signed) Mrs. Clifford Fancy, West-field, N. S.
Give Cuticura Soap and Ointment the care of your skin.

Little Helps For This Week

"Many shall be purified, and made white, and tried." Daniel xii. 10.

A Water Lily

O Star on the breast of the river
O marvel of bloom and grace!
Did you fall straight down from heaven,
Out of the sweetest place?
You are white as the thoughts of an angel,
Your heart is steeped in the sun.
Did you grow in the golden city,
My pure and radiant one?

Nay, nay, I fell not out of heaven,
None gave me my saintly white,
It slowly grew from the blackness,
Far down in the dreary night;
From the ooze of the silent river
I won my glory and grace,
White souls fall not, O my poet,
They rise to the sweetest place.
—Mary Frances Butts.

If we could only think of the pain and the suffering, the unpleasant surroundings and all the things that make living so hard, as the bed out of which the lily hearts may come, and, with our hidden hearts golden and glowing, just climb up slowly through the deep waters, until the soul shall open out all white and lovely under the full sunlight of God, would it not pay for all we have to bear?—Mary Lowe Dickenson.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

WHAT LOOSENS THE BABY TEETH

You have watched in your small son these little teeth that were once so firmly rooted, gradually loosen and begin to wobble. For fear lest he might swallow one you tied a string round it and jerked it out; or else you just picked it off, and finding no root, you wondered what had been holding it in place, and you asked yourself was it always so.

Now as a matter of fact, the "baby teeth," upon eruption, did possess a normal root; then where has it gone?

Well you see, that as the incoming permanent tooth begins to develop and push up, it must find room. So nature removes these little temporary teeth through absorption of the root, allowing the crown to fall away—a process that is attended with no pain or outward disturbances whatsoever.

But occasionally it happens that this natural process of root absorption is retarded, or it may be, does not occur at all, with the result that the little tooth does not loosen by the time the shedding process should take place.

This is due probably, to the death of its pulp or nerve, preventing a quick natural absorption, or it may be, to the tardy development of the replacing permanent or to its eruption into an abnormal position, or possibly to the non-development of what should have been the succeeding tooth.

In any case, your dentist will be best able to advise you as to whether this unloosened "baby tooth" should come out now or at a later date.

The unit of currency in Greece is called the drachma.

Aerial Views Of Alberta

Photographs Of Northern Terrain To Be Taken From Aeroplanes

Aerial surveys of the north country, up at the top of Alberta, will be commenced this summer. It is expected that a programme covering three or four years will be undertaken, and a beginning will be made this season in the vicinity of Lake Athabaska, coming south along the waterways to McMurray.

Flying machines, fully manned and outfitted for the work, will be employed, and complete photographic and topographical surveys of the area will be made.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Wheat Map Of Canada

Preparation of a wheat map showing the varieties best suited in each locality of the Prairie Provinces is announced by L. H. Newman, Dominion Cerealist. New varieties of wheat, particularly suitable to Canadian conditions, are being produced by the Canadian Government, and the map will indicate to farmers at a glance the variety best suited to their locality.

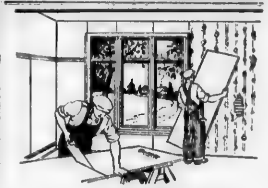
The pessimist is a man who set an optimist up in business.

More Timber Burned Than Used

Since exploitation of Canada's forest resources began from four to five times the amount of timber actually used has been burned through forest fires.

What puzzles us a little now and then is why people who do not want to take up any of our valuable time invariably do.

Success is frequently the result of your ability to persuade others to accept you at your own valuation.



Nail GYPROC right over Old Walls
GYPROC Advantages for Farm Buildings
Easy to cut.
Low cost.
Works like or lumber.
Cannot warp, bulge, crack, shrink or burn.
Takes any decoration.
Resists heat and cold.
Vermin proof.
Eliminates repairs.
Ideal for lining garages, poultry houses, barns, grain bins, and other farm buildings.
Especially suitable for converting attics and basements into extra rooms.
How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing Gyproc right over the old, unsightly wallpaper. When you've decorated with Alabastine your home will be as attractive and comfortable as any home can be.
Use Gyproc for partitioning off extra rooms, renovating attics and basements, and making grain bins, stables and other farm buildings fire-safe and vermin-proof. You can put it up yourself easily, quickly and at a substantial saving.
Gyproc Joint Filler applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.
